We have the largest stock in the world. Over 400 varieties, including not only all the good standard sorts but many new varieties never offered in quantity before. This is one of the most valuable plants for decoration of the florists' store window during the summer months and during recent years we have sold many thousands for this purpose. We especially recommend the choice rare and new varieties at \$15.00 per 100 for this purpose.

We offer special selections according to variety as follows:

Choice Standard Varieties. The finest collection ever offered at the price, \$1.75 per doz.; \$12.00 per 100; \$100.00 per 1000.
 Choice Rare and New Varieties. A splendid assortment, especially valuable for the retail florist, \$2.25 per doz.; \$15.00 per 100; \$140.00 per 1000.
 Rare New Varieties. The most recent introductions, \$3.50 per doz.; \$25.00 per 100.

Gladiolus, Tuberoses, Ismene, Montbretias, Tigridias and other Summer Flowering Bulbs are offered in our QUARTERLY WHOLESALE LIST, and also a full list of Seasonable Plants, Seeds, etc. Write for it if you have not already received a copy.

THE ABOVE PRICES FOR THE TRADE ONLY.

HENRY A. DREER, Inc., 714 Chestnut Street, Philadelphia, Pa.

IMPORTANT ROSES

We are offering to commercial rose growers, who are alive to the possibilities of increasing their profits, stock of the best there is in the new varieties. These roses represent the nearest to the ideal that exists in roses today and the quality of stock sent out by us is above question.

DARK PINK KILLARNEY. With a Killarney habit and a color that can be equalled only by the lobe of a Cattleya, it sells on sight.

DOUBLE PINK KILLARNEY. Stronger in growth than the parent and with a large, perfect flower, it stands alone in its class as the representative of the highest type of forcing roses.

PRINCE DE BULGARIE. As a twelve months rose this variety is good, while for a spring, summer and fall bloomer it has

no equal in its color. And in its color, there is the character that is called life. It is hard to describe the color. "Rosy flesh" is near, but it does not describe the impression the color makes. For a money-getter the rose has been a wonder.

LADY CROMWELL, MELODY, MRS. AARON WARD, RADIANCE and the older varieties are described in our catalogue.

If you are progressive, write us for your young stock and get the best that can be produced.

A. N. PIERSON, Inc., - Cromwell, Conn.

FINE FERNS

Ready For Immediate Retail Sale

We have an exceptionally fine and large stock of ferns in the following varieties,—first-class plants of exceedingly good value—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type—never showing a Boston frond; has not reverted in the last four years. Fine plants, 6-in., \$6.00 per dozen; 8-in., \$12.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima compacta that Scottii does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes. Fine plants, 6-in., \$6.00 per dozen.

NEPHROLEPIS SCHOLZELI. Fine plants, 3½-in. pots, \$2.50 per dozen; 6-in. pans, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS BOSTONIENSIS. Extra strong plants, 8-in. pans, \$12.00 per dozen.

NEPHROLEPIS SCOTTII. 8-in. pans, \$12.00 per dozen.

SMALL FERNS FOR FERN PANS. Best and hardest varieties assorted: *Pteris Mayii*, *Wimsettii*, *Adiantoides*, *Aspidium Tsussimense*, *Cryptomium falcatum*, etc. Strong plants, 2¼-in. pots, \$3.50 per 100.

CROTONS. Nice assortment, well colored, 5-inch, \$9.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CINERARIA HYBRIDA

Remember this is the
BEST PAYER FOR EASTER.

We offer our superior strain in 4 in. pots (medium height), latest improvement in size and color, \$10.00 per 100. Now is the proper time to plant them into 5½ and 6 in. pots for Easter blooming.

THE NEW ENGLAND NURSERIES, Inc.
BEDFORD, MASS.

Franklin, Mass.—The Slade Nursery on Central street has been purchased by Mathew J. Van Leeuwen, proprietor of the Continental Nurseries. Mr. Van Leeuwen expects to make extensive improvements and to use the place as an annex to the Continental Nurseries.

To make money you have to spend. To grow a crop of Easter lilies you have to plant bulbs. Here's where you plunge. It's a bet on the bulbs against the eternal cussedness of things. It's you against the chances of a crop.

AND YOU HAVE
NO CHANCE AT ALL
UNLESS YOU
HAVE
GOOD BULBS

Then you must treat them properly; and taboo the green-fly, or they will be a fizzle. So the positive requirements are, first good bulbs and then good treatment. Good bulbs you can get from us—the Horseshoe Brand. With them you will make more money per square foot of space than with any brand known, under the same conditions.

Seed Trade

Dodder in Chilean Red-Clover Seed.

We are apprised by the U. S. Dept. of Agriculture, Division of Publications that since July 1, 1910, twenty-three lots of clover seed of probable Chilean origin aggregating 370,000 pounds have been imported into the United States. In all of these shipments two kinds of dodder seed characteristic of Chilean red-clover seed are present. At a normal rate of seeding, these shipments are sufficient to seed approximately 46,000 acres, and at this rate of seeding an average of approximately 450 dodder seeds would be sown on each square rod. The sowing of this Chilean seed this spring means that the clover crop on a considerable proportion of the area on which it is seeded will be destroyed by dodder, and farmers should be on their guard against purchasing this seed. Unfortunately most of the importations have gone into the southern part of the clover-producing region where this dodder will undoubtedly prove disastrous. This Chilean clover seed is itself especially fine looking seed, being dark colored and approximately fifty per cent larger in size than ordinary red-clover seed produced in the United States. It will, therefore, doubtless receive a ready sale on account of its fine appearance.

A Peculiar Possibility.

A peculiar situation will exist with the passage of the proposed reciprocity treaty with Canada. The treaty permits the free passage of American seeds across the Canadian border, while the Canadian postal laws practically exclude American seed catalogues.

According to Charles N. Page of Des Moines, seed dealers in the United States will seek a revision of the Canadian postal laws in the event the proposed reciprocity treaty becomes a law.

In order to get their catalogues into Canada at the present time, American seedsmen are compelled to pay a duty of fifteen cents a pound.

HENRY F. MICHELL CO.

Seedsmen

518 Market St.,

PHILADELPHIA, PA.

"Every once in awhile I get a letter from the Canadian postal department," said Mr. Page, "in which I am informed that a quantity of my catalogues are being held there and that they will be destroyed unless I send the money to pay for their admission into the country.

"The duty amounts to about 8 cents on each catalogue, which is too much for us to pay. There are 1000 American farmers in Canada who want to use American seeds and these are denied them because of the stringent postal and revenue laws governing the admission of catalogues into Canada."

About Tulip Bulb Prices.

At the meeting of the Detroit Florist Club on the evening of March 6 Mr. A. Colyn, representing Colyn Sons, of Voorhout, Holland, made some interesting remarks about peculiarities of his home country, dwelling at length on the fact that most of his fatherland lies 30 feet below the sea-level. He gave an interesting explanation in regard to the low price of tulip bulbs. It appears that several years ago Germany put a duty on vegetables and many Holland farmers became afraid for their bread and butter. Tulips which can be grown most everywhere in Holland, were planted by these farmers in their heavily fertilized ground and they produced almost three times the yield per acre compared with other growers, and herewith the consequent over-supply and low prices.

Notes.

Council Bluffs, Iowa.—Fire caused an approximate loss of \$15,000 to the Perry Seed Co. on Feb. 25.

Harrisville, Mich.—The name of the Sheap-Johnson Seed Co. has been changed to F. C. Johnson & Co. Capitalized at \$15,000.

Baltimore, Md.—A seed business will be conducted by C. M. Robinson at 614 East Lombard street, where he has leased an entire floor.

Chicago, Ill.—John Prendergast and Miss Stella Corwin of Janesville, Wis., were married Feb. 25. Mr. Prendergast is with the Leonard Seed Co.

Port O'Connor, Texas.—A tract of land near here has been purchased by L. E. Higgins, bean grower of Lompoc, Cal., who will use it for seed growing.

provements and combining the two retail stores. C. T. Kipp, proprietor of the Spokane Florist Co., will have charge of the rearranging, decorating, etc.

ST. LOUIS NOTES.

F. H. Weber used 500 long Beauties March 15 for the big decoration at the Vandervorts department store. This is also one of the big jobs of the year.

Ostertag Bros made a fine decoration last week for the Busch golden jubilee wedding in the Coliseum. All yellow flowers were used, the big job took a large force to handle it.

W. C. Smith was married on Thursday, March 9th, to Miss Helen West at the home of the bride's parents in Edwardsville, Ill. The employees of Mr. Smith's firm made a handsome decoration of cut flowers in the section reserved by Mr. Smith on the Clover leaf R. R. for the honeymoon trip. Mrs. H. V. Hunkel of Milwaukee, Mr. Smith's sister, was present at the wedding.

estate at Southboro, Mass., on April 1.

William Edlelson, pioneer florist of Milwaukee, celebrated the fiftieth anniversary of his entering that business on Wednesday evening, March 8, in his home on Atkinson avenue.

William Mackay, lately gardener for E. T. Gerry at Newport, R. I., is now in charge of the Henry A. C. Taylor place which was made vacant by the sudden death, March 5th, of John J. Harrington, who filled that position faithfully for many years.

New York visitor: H. S. Dawson, Eastern Nurseries, Jamaica Plain, Mass.

Cincinnati visitors: E. J. Fancourt, representing Pennock-Meehan Co., Philadelphia; F. Farney, representing M. Rice & Co., Philadelphia; J. H. Broxey, Dayton, Ohio; C. L. Cramer, Oxford, Ohio.

Boston visitors—F. R. Pierson, Tarrytown, N. Y.; W. A. Manda, South Orange, N. J.; I. S. Hendrickson, Flowerfield, N. Y.; D. Cameron, representing Sander & Son's N. Y. office; Ed. Roehrs, Rutherford, N. J.

NEWS NOTES.

Fitchburg, Mass.—The business of C. E. Mansfield has been purchased by C. E. Lesure.

Schenectady, N. Y.—J. H. Fredericks has purchased the business of Howe, the florist, at Jay and Franklin streets.

Randolph, Ill.—The land and greenhouses recently bought by B. S. Green have been rented by Grant Torrey, who will run the business the same as usual.

Flower Market Reports

BOSTON This market has been in a very bad way for the past week, but at present writing a return of wintry weather gives some promise of an improved condition, due to decreased receipts. Prices, while not quoted much lower than of late, are greatly reduced in the aggregate and there has been quite a loss on unsold stock of various sorts, particularly violets, carnations and bulb flowers. Roses are plentiful, but Beauties are an exception, as they have been for several weeks. Buyers are few and reluctant in all lines. Among the things which have just begun to come in are English primroses.

BUFFALO Lenten dullness has fallen heavily on us and the past week convinces us that too much bright weather and sunshine is not always the best for at least the wholesalers. Stock of all kinds came in quantity especially carnations and bulbous material, and at the end of the week the market was well loaded with everything and the buyers having practically their own way. Roses came in more plentifully and more of the select stock was had than the shorter grades, the latter moving to better advantage. Beauties, violets, lily of the valley were in heavy supply and price within reach of everybody. Trade was not at a standstill but prices were low for the week. Bargain signs were much in evidence. The coolers are again filled and wholesalers uneasy.

CHICAGO The market has been very erratic the past week—some days well-cleaned up and on others an accumulation. Warm weather and sunshine have caused an oversupply along some lines especially bulbous stock and violets. The latter are moving very slowly and on some days not at all. Double violets have to give way to singles wherever there is a chance to move either. Sweet peas, if first class, sell well. There is an abundance of lilies. Carnations are plentiful enough to make the buyer discriminate and the poor stock has little chance of moving with profit to the grower. The only flowers really in short supply are the Beauties. Growers complain of the poor quality of the flowers as well as the scarcity and one of our largest growers expresses himself as of the opinion that too many experiments are tried on the plants by those in charge, particularly when the buds are forming. Other roses are in good supply and prices cover about the same range as before.

CINCINNATI Business for the second week in Lent is all that could be desired. White flowers are in exceptionally heavy demand. The supply of Beauties is very limited with not half enough to fill orders. Three or four days of cloudy weather in the forepart of the past week had a tendency to reduce the cut of other roses. The feature of the market the past week was the exceptionally heavy demand for white carnations. While the supply was liberal, the demand so far exceeded same as to cause quite a shortage. Enchantress also enjoyed a good call and cleaned up nicely while rose-pink, red and Lawson shades move

A RICH NEW RIBBON

All Silk Faille, Pattern 699, No. 150

A new ribbon which we are starting this season. It has the widest range of colors of any ribbon we have ever handled. Eighteen shades comprising some of the most beautiful and effective imaginable. Flower Market Reports

(Continued from page 373)

more slowly. Daffodils are slow sellers and accumulate, but Dutch hyacinths sell out clean every day as do Murrillo and La Reine tulips, also Paper Whites. Red tulips are in good supply and move less freely. Lily of the valley, as usual when the supply lets up, has increased demand. Double violets continue more than sufficient, but good singles clean up every day. The lily supply is bountiful. Callas meet with an excellent demand.

A week of general activity has brought contentment to retailers and wholesalers. There is nothing heard of any special doing and at the beginning of the week all kinds of stock did accumulate to a serious stage. Towards the end of the week, though, buying was much more liberal and everything was cleared off nicely. Prices ruled about the same as last week, with a trifle lower at some instances. This, however, is a much more satisfactory condition when compared with one year ago when large quantities of fine stock went to the dump pile. Lilies are very scarce at present with no immediate relief in sight. They will be plentiful at Easter, but the average rather short of stem.

This market has been undergoing a readjustment of values for the past ten days. Prices persist in getting down to a lower level. This is more apparent where roses and carnations are concerned as the supply is gradually increasing. The shortage in supply of Beauties is at an end. White and pink Killarneys, Bridesmaids, Brides and Marylands are in ample supply, Maryland being the poorest seller of all. Richmonds, too, are coming on. The cut of carnations is heavy and they are disposed of with difficulty, no fixed price being possible. Violets are a drug; even the street men find it unprofitable to handle them and the prices finally realized are hardly sufficient to pay the producer for picking and sending them to market. Bulbous stock of all kinds is very plentiful but holds its own better than roses or carnations—at least, daffodils, jonquils and tulips are seasonable. There are more lilies and callas than the demand requires—lily of the valley is also in excess of the demand.

The second week of Lent had a little better tone to it in this market than the first. People are gradually recovering from their first fierce fit of sanctimoniousness.

Mignonette.....	2.00 to 5.00	2.00 to 5.00
Lilac, per bunch.....	.50 to .75	.50 to .75
Tulips.....	1.00 to 3.00	1.00 to 3.00
Roman Hyacinths, Paper Whites.....	.50 to 2.00	1.00 to 1.50
Daffodils.....	1.10 to 2.00	1.00 to 2.00
Freesia.....	1.00 to 1.50	1.00 to 1.50
Daisies.....	.50 to 1.00	.50 to 1.00
Snapdragon.....	3.00 to 6.00	3.00 to 6.00
Sweet Peas (per 100 bunches).....	3.00 to 8.00	3.00 to 8.00
Gardenias.....	15.00 to 35.00	15.00 to 35.00
Adiantum.....	1.00 to 1.25	.75 to 1.25
Smilax.....	6.00 to 10.00	6.00 to 10.00
Asparagus Plumosus, strings..... to 50.00	20.00 to 30.00
" " & Sprea (100 bchs).....	15.00 to 25.00	15.00 to 25.00

But for all that, things were nothing to brag about and prices generally remained at the previous low level. The weather being good the Friday and Saturday finish was up to best expectations. The same old story is still the go on American Beauty—very scarce. Some growers say they see no chance of any improvement for several weeks yet. Richmond also is scarce in spots, and does not seem to be overplentiful anywhere. White roses are good stock and in excellent demand. Kaiserin—new crop—just commencing to arrive—very good for the season. Carnations are more plentiful and prices rule a shade lower. There will probably be a run on white carnations this week—these being largely used for St. Patrick's. Orchids are coming in more freely and prices have moderated. Violet figures are low and the influx of fine stock remains unabated. On the fashionable promenades the sweet pea seems to have the call over the violet this year for corsage bouquets. Sweet peas are of excellent quality just now and abundant. The whites are rather too abundant and do not go as readily as the colors. Lily of the valley is a little sluggish. White lilac is pretty good yet, but will probably not last much longer as there is a noticeable slackening up in supplies. Indoor daffodils are also in smaller volume but the southern stock is filling the gap and all demands can be satisfactorily filled.

During the past week the market here was all that could be expected.

It was well stocked and in some cases over-stocked. The trade were greatly interested in roses of the first grade. These have become scarce again, but there are quite a lot of second and third grade stocks to be had. American Beauties, long and fancy, are having some call, but are hard to get. Carnations are in plenty and almost a

glut; \$10 per 1000 buys good stock. Violets and sweet peas are a glut and are selling cheap, and a great many of these had to be dumped owing to quantity. Lilies and callas are also coming in heavy and are sold for \$10 per 100 flowers.

Elmer D. Smith & Co., Adrian, Mich.
For page see List of Advertisers.

James Vick's Sons, Rochester, N. Y.
High Grade Asters.

For page see List of Advertisers.

ASTER SEED, SEMPLES BRANCHING.
Mr. Phillips, Florist, Syracuse, N. Y., advises us that the aster seed purchased from us produced blooms that carried away the first prize at the last N. Y. State Fair. In the growing and the selection of this seed we exercised the most painstaking care, positively allowing only two or three ideal blooms per plant, to mature seeds. We have a small amount of this same seed in stock and will sell it only in mixture of about 1000 seeds, comprising pure white, lavender, pink and purple—about one third the mixture being pure white. Price, per packet of 1000 seeds, 35 cts.; 4 packets for \$1.00. Russell Bros., Syracuse, N. Y., Route 4.

NOVELTIES

"REAL NOVELTIES AND
NOVEL REALITIES."

In Hardy Plants.

The biggest collection offered anywhere,
is found in our NOVELTY CATALOGUE,
just out.

Of great interest to the amateur and
commercial grower alike.

It describes and illustrates uncommon
plants of singular beauty, desirability and
simplicity of growth; inexpensive to
acquire.

Besides; our low prices, plants are big,
making them valuable, in small or large
quantities.

Mailed along with our illustrated whole-
sale catalogue of Hardy Perennials, etc.,
on receipt of three 2c. stamps, which pays
postage only, and which amount is
credited on first order.

Short But Sweet.

I think the Kroeschell Boiler is the "boss" of all boilers. Very truly yours,
JEFF. DOREMUS, Green Village, N. J.

Get a Kroeschell and You Will Be Pleased Too.

I am very well pleased with the Kroeschell Boiler which I purchased five years ago. It has given perfect satisfaction to this date. Yours truly, A. W. BELCHER, Winthrop, Mass.

Get a Kroeschell and You Will Never Change.

The No. 6 and No. 8 Kroeschell Boiler cross-connected are heating 30,000 feet of glass—would take care of 5,000 feet more. I never will use any other for hot water heating. We are using a Generator on the heating system and could not do without it. Very truly yours, J. N. BOMMERSBACH, Decatur, Ill.

THE U-BAR CIRCULAR PALM HOUSE

Curves are the very key note of the U-Bar house. The circular palm house is, of course, but the natural development and the most fitting accompaniment of the U-Bar Curved Eave House.

To build a circular palm house with other constructions, although not exactly impossible, is decidedly undesirable, because of the numerous heavy framing members coming closely together at the dome, giving a very cumbersome unpleasing effect.

Not so with the U-Bar, as the strong light U-Bars entirely support the roof—there being no heavier roof members on the inside than you see on the outside. It is a house of beauty from start to finish. It is the U-Bars that make the U-Bar house—the house with the original curved eaves. Send for catalog.

trying to get heat quickly into the
greenhouse farthest from your boiler.*

The Castle Automatic Circulator

will force the hot water throughout
the system and do it without put-
ting on a pressure that is liable to

cause leakage. It does it by mechanically setting the water in motion and keeping it moving until the desired heat is just where you want it.

The Castle Circular has entirely cured the faults of hot-water systems which could not be satisfactorily operated before it was put in. We would like to show you the results of the tests.

Our new booklet tells how the circulator works. Write at once to the

Here's Nursery Stock That Every Florist Can Use NOW

Your customers are ready to buy a lot of things from you besides cut flowers, pot-plants and bulbs—for instance, you can sell a lot of Harrison's California Privet this Spring without going to much bother—and make money on every bit of it, too.

We have the soil and the facilities for growing California Privet right. We grow plants by the million—they are sturdy and stocky, branched close and thick right down to the ground, and with great heavy masses of roots that will take right hold and get down to business almost anywhere your customers plant them—making a beautiful, dense hedge from the first season.

Harrison's Strawberry Plants are another thing you can sell a lot of this Spring—we have over 100 varieties, and are ready to dig millions of healthy young plants that will bear heavily next year.

Then we have scores of other shrubs and vines, trees and plants, many of which you could handle to splendid advantage—make money and please your trade. We'd like to "talk it over with you by letter." Drop us a line and we'll send full particulars, with our brand-new eye catching 1911 Catalogue, by first mail.

 From 2¼-inch pots 4.00 per 100; 30.00 per 1000

General Collection of Standard Varieties:

WHITE.

Early—George S. Kalb, Polly Rose, Early Snow, Ivory,
 Clementine Touse.
 Mid-season—Mrs. Clay Frick, Mrs. H. Robinson, Alice
 Byron, Miss Minnie Wanamaker, Heston's White, White
 Cloud.
 Late—White Bonnaillon, Moneymaker.

PINK.

Early—Glory of the Pacific, Pacific Supremé.
 Mid-season—Pink Ivory, William H. Duckham.
 Late—Maud Dean, Mayor Weaver, Dr. Enguehard.

YELLOW.

Early—Monrovia, Golden Glow, Comoleta.
 Mid-season—Pitcher, Col. D. Appleton, Mrs. Wm. Duck-
 ham.
 Late—Major Bonnaillon.

RED.

J. H. Shrimpton, Merstham Red, Intensity, Culling-
 fordii.
 Rooted cuttings, 5c. each; 50c. per dozen; \$2.00 per 100;
 15.00 per 1000.
 From 2¼-inch pots, 5c. each; 50c. per dozen; \$3.00 per
 100; \$25.00 per 1000.

Pompons:

THE BEST OF THE COMMERCIAL VARIETIES.

We can safely recommend all the Pompons in the fol-
 lowing list.
 Customers in ordering will please note that these prices
 are for plants from pots; no orders for rooted cuttings
 of Pompons will be accepted.

WHITE—Baby Margaret, Lula, Queen of Whites, Nio,
 Jas. Boone.

PINK—Alma, Aleua, Acto, Eleganta.

YELLOW—Baby, Klondike, Quinola.

BRONZE YELLOW—Lodi, Miss Julia, Allentown.

RED—Rufus, Jlia, Lyndhurst.

POMPON ANEMONE. GARZA.

From 2-inch pots: 5 cents each, 50 cents per dozen,
 \$3.00 per 100, \$25.00 per 1000. Not more than five
 varieties at the 100 rate; 250 in assortment, our selec-
 tion at the 1000 rate.

BEDDING PLANTS

COLEUS.

Verschaffeltii. Standard Crimson.
 Firebrand. Bright Maroon.
 Golden Queen. Standard Yellow.
 Lord Palmerston. Dark Maroon.
 Queen Victoria. Cardinal Red, with distinct golden
 border.
 Beckwith's Gem. Center velvety maroon, bordered with
 red; the edge green, changing to creamy yellow at the
 point of leaf.

Rooted cuttings by express: 75 cents per 100; \$7.00
 per 1000. Out of 2¼-inch pots in May: \$2.50 per 100,
 \$20.00 per 1000. Less than 250 of a variety will be
 charged at the 100 rate.

Golden Bedder. Golden Yellow, the old original, true to
 name.

Hero. Very Dark Maroon.
 Messey. Dwarf, Pearl White and Silver Green.
 Brilliancy. A combination of Red and Gold.

Rooted cuttings by express: \$1.00 per 100, \$8.00 per
 1000. Out of 2¼-inch pots: \$2.50 per 100; \$20.00 per
 1000. Less than 250 of a variety will be charged at the
 100 rate.

FANCY VARIETIES.

Fancy Varieties. A very fine assortment of twelve kinds
 not listed above.

Rooted cuttings: \$1.00 per 100, \$8.00 per 1000. Out of
 2¼-inch pots: \$2.50 per 100; \$20.00 per 1000.

Fancy Varieties. Either rooted cuttings or plants from
 2¼-inch pots, our selection, 250 at the 1000 rate.

AGERATUM.

Stella Gurney. Dwarf Blue. 75 cents per 100; \$7.00
 per 1000.

Princess Pauline. A combination of Blue and White
 in same flower. 75 cents per 100; \$7.00 per 1000.

ALTERNANTHERA.

Red and Yellow. Rooted cuttings: 75 cents per 100;
 \$6.00 per 1000. From 2¼-inch pots: \$2.00 per 100.

Brilliantissima. A valuable new Alternanthera, red

and yellow in color, with broad leaf. Strong grower.
 Rooted cuttings: \$1.25 per 100; \$10.00 per 1000. From
 2¼-inch pots: \$2.50 per 100.

HELIOTROPE.

Dark Blue Variety. Rooted cuttings: \$1.00 per 100;
 \$9.00 per 1000. From 2¼-inch pots: \$2.50 per 100;
 \$20.00 per 1000. 250, either plants or cuttings, at the
 1000 rate.

SALVIA.

S. Splendens. Tall standard, one of the best. Rooted
 cuttings: 75 cents per 100; \$7.00 per 1000.
 S. Bonfire. Medium dwarf; very good. Rooted cuttings:
 75 cents per 100; \$7.00 per 1000.
 S. Zurich. Dwarf; an excellent variety. Rooted cuttings,
 75 cents per 100; \$7.00 per 1000.
 S. Schenley. Medium dwarf; very highly colored.. One
 of the best. Rooted cuttings: 75 cents per 100; \$7.00
 per 1000.

Salvia of these varieties from 2¼-inch pots, April and
 later delivery, \$2.50 per 100; \$20.00 per 1000. 250 of a
 variety, or in assortment as ordered, at the 1000 rate.

BEGONIAS.

Gloire de Lorraine.

Strong healthy plants, ready for April and later de-
 livery. 2¼-inch pots, \$15.00 per 100; \$135.00 per 1000.
 3-inch pots, \$25.00 per 100; \$200.00 per 1000. 4-inch pots,
 \$35.00 per 100; \$300.00 per 1000. Write for special price
 on large orders.

Glory of Cincinnati.

A new begonia with large, heavy foliage. Flowers in
 abundance. An excellent Christmas plant. Strong
 healthy plants for June and later delivery: 2¼-inch
 pots, \$20.00 per 100; \$150.00 per 1000.

ASPARAGUS HATCHERI.

Prices of plants from 2¼-inch pots, \$3.00 per dozen;
 \$15.00 per 100; \$100.00 per 1000. April delivery.

PALMS AND FERNS.

Our Palm and Fern department is up to its high
 standard of excellence. We call especial attention to

Aconitum

Among flowering perennials which, regardless of fads and fashions in garden planting, have permanently held their own we must count the aconitums. They are generally known to represent a genus rich on distinct species, still notwithstanding the many varied forms and colors, the old common monkshood, *Aconitum napellus*, seems to lead in public favor. Always occupying its space in some corner of our ancestors' gardens, it lays claim upon the same space today. Here in the north it does best in the open sunny exposure, while in the middle states a half-shady location is apt to prove of better advantage.

Aconitums thrive well in a rather light sandy loam, richly manured. To bring out their full beauty means to leave the plants undisturbed for a number of years. The result of transplanting is low growth; the stately height of 6 to 8 feet is only attained by old plantations with plenty of fibre roots. Once established their large terminal racemes of quaintly shaped flowers become a distinct feature of the mid-summer aspect of a garden. The dark glossy green of the foliage also adds to the good general effect of plants. The color of the blossoms of *Aconitum napellus* is a deep blue; var. *album* is nearly white, while *bicolor* and *versicolor* show a very attractive blue and white. All aconitums represent an excellent material for filling tall vases.

Botanists divide aconitums into two sections: tuberous and fibrous rooted. The species *napellus* belongs to the former. The roots of nearly all monkshoods are poisonous, consequently all plantings should be left out of kitchen gardens. A more thorough study of the different garden varieties cannot be too strongly advocated in all cases where herbaceous borders of liberal extent are planned. The acquaintance of a great majority of gardeners and garden owners with aconitums appears to be limited to the *napellus* forms. Still there is a

ACONITUM NAPELLUS VAR BICOLOR

number of less known species in cultivation which will prove very desirable acquisitions for the flower garden. *Aconitum autumnale*, of medium height, blue, broadly helmeted, flowers during September and October. *A. Cammarum*, rich deep purple, is a fine mid-summer species. The same may be said of *A. chinense*, bearing its intense bright blue blossoms in large compound racemes. *A. Fischeri* flowers pale blue; *A. lycoctonum* livid violet and *A. Wilsoni* light intense blue. Of the yellow shades I mention *A. barbatus* producing dense racemes of cream color, and *A. Anthora*, and *A. pyrenaicum*. Interesting and, when rightly employed, highly effective, is the climbing monkshood *A. Hemsleyanum*, a very pretty violet blue introduction from China. This small selection of meritorious garden forms may suffice to show how great an opportunity aconitums offer to enrich and brighten our floral outdoor displays.

Richard Roth

Northeast Harbor, Maine.

Gladiolus Notes

In trying out new varieties of gladioli, there are various things that have to be considered before passing final judgment. The change of climate and soil; the manner of fertilizing and cultivation—all have their influence in developing or retarding the blooming qualities. Then there are varieties that do not bloom at their best, only every other year. This is characteristic of many varieties after they have been grown from divisions for a few years. So it is much better, when possible, to get bulbs that are grown to blooming size from bulblets. These young bulbs are much stronger and nearly always produce good flowers under changed conditions of planting.

Two years ago I obtained in a collection from Vilmorin & Co., Paris, their variety *Parure*. It produced that year a rather weak plant with a short spike of insignificant pink flowers poorly set on the spike, but they

were a very pretty shade of pink and for that reason I saved the bulb and planted it last season, and when it came into bloom again I had the surprise of my life, for I can truly say that I beheld the most beautiful pink gladiolus I have ever seen. The flowers set perfectly on a splendid spike, very large, soft pink, daintily penciled on the edge with carmine, with a large pure white throat. *Le Triomphe*—a lilac pink variety, and *M. A. Brouginiart*, a large orange pink sort, are two other very fine Gandavensis varieties offered by this firm.

I received from Wilhelm Pfitzer, Stuttgart, Germany, about sixty varieties, a very excellent collection. Of these the following were particularly fine: *Jungfrau*—a very delicate pink with a most distinctive lavender tint. *Margot von Quaita*—a variety resembling *May*, but nearly double the size. *Helios*—a very large dark canary yellow, almost solid color, and *Frau Senger Bet-*

taque, a large pure white, with a slight stain in the throat. E. Y. Teas & Son, Centerville, Ind., sent me a splendid white variety—Alice Carey, that I would describe as very similar to Frau Senger Bettaque. Another variety from this firm that I like very much is Big Medicine; rose flaked yellow, very large and fine.

C. L. Goodrich, the Luther, Iowa, specialist, is producing some remarkable Childsi seedlings. The colors are clear and bright and the blendings exquisitely delicate. No. 183 is a large flower, measuring 5 to 6 inches across; a beautiful blending of lilac and lavender, with penciling on the edge of some of the petals. No. 1248 is a very large flower of a tint similar to America, with a larger flower, although not quite so well arranged spike. No. 1258—white ground penciled crimson; dark red blotch in throat; flower about 5 inches in diameter.

I tested all of the novelties of John Lewis Childs, Flowerfield, N. Y., and a fine quartette they were. Especially good were Pink Pearl, a very beautiful pearly pink, as the name suggests, and Rosy Spray, a large white sort beautifully stained with rose. From their general list were Melrose—a large white flower, flaked pink with a bright crimson center; L. S. Hendrickson—a beautiful mottling of white and bright pink, and Wild Rose—delicate pink, or rose shade; very fine.

P. O. Coblenz, New Madison, Ohio, is doing good work as a breeder and his seedlings show great vigor with petals of good substance. He is producing some fine stuff. His No. 400 is a splendid light creamy yellow with a bright red blotch and extra large flower. No. 53 is a beautiful ruffled pink; No. 42, a deep bright pink almost solid color. Nancy Ray is a fine white sort with a red throat marking.

In a collection from E. E. Stewart, Rives Junction, Mich., there was a most beautiful variety—No. 103. It was a delicate pink variety with ruffled petals. Golden Queen, the variety that won the prize at Rochester for the best yellow, did well with me. It is a clear light

yellow with a red blotch, good straight spikes that do not get soft or wilt in water and the flowers open out to the last bud.

Margaret, offered by Vaughan's Seed Store, is one of the best reds of recent introduction. It is bright carmine, with a large pure white throat. Mastodon—a novelty offered for the first time this year, is a seedling of Princeps and a very striking and valuable variety. Another seedling of Princeps is a variety named Princepene raised by the W. E. Korchoff Co., Pembroke, N. Y. This is one of the most brilliant scarlets I have seen. It is very vigorous, flowers well open and are large and of fine substance. The throat is glistening white and it is a very attractive variety. They tell me that they have shipped the cut spikes to Porto Rico, where they arrived in good condition, so it must be a good shipper.

Montague Chamberlain, who is soon to establish as a commercial grower, has recently bought out a large collection of Mr. Kunderd's hybrids. I am well acquainted with a large number of the varieties in this collection, and they are a splendid lot of gladioli. Improved 1900 one of the best is, as the name implies, a real advance on the old 1900 and is a robust and healthy variety—a quality that was lacking in the old sort. Mr. Chamberlain has purchased a farm in Groton, Mass., where he will grow his bulbs. The farm is nicely located and the soil well adapted for growing gladiolus bulbs. Mr. Chamberlain is a well-known ornithologist and is the author of several volumes on this subject; a man of strictest integrity and fine business ability.

Stewart Gay
Orange, Mass.

Grevillea robusta as a House Plant

I have always admired this plant as seen in a greenhouse and had heard it said that it was most suitable for house use, but until recently I did not realize its possibilities for this purpose. Last fall I took two plants into my house and gave them rather rough treatment but in spite of this they flourished and are still doing creditable duty in my windows. From this little experiment I have been wondering why it is not more generally grown for the retail trade. As specimen plants three feet high it would be irresistible to purchasers. There are many ways that it could be used. A few small plants in a large pot with a still larger plant for the centre; very small plants in shallow pans for the window, or table, combined with other plants, flowering or foliage; with every use it would surely show its worth. It certainly has not been pushed to the full limit. It can be propagated and grown without great trouble and at small cost.

Frank J. Doogue

Dorchester, Mass.

GREVILLEA ROBUSTA
After a Winter in the House

Japanese Yew (*Taxus cuspidata*)

While this desirable evergreen has been known in our American gardens in a limited way for many years, it has not been until quite recently that its many merits as an ornamental tree have been generally realized.

The splendid garden effects obtained by the use of the European Yew (*Taxus baccata*) in various favorable sections of Europe fill the American traveler with hopes that it will succeed equally well in Eastern United States, only to find that the locations favorable to its success are very few. This Japanese form to the contrary proves to be practically as hardy as the Eastern American Hemlock and under favorable conditions eventually grows to be a large and handsome tree. By its use no end of desirable results will be possible that have been out of the reach of the gardener heretofore where climatic conditions are too severe for the European Yew to thrive.

It grows well in the shade, submits kindly to severe pruning, making an ideal hedge, will thrive under the shade of large trees, is tolerant of city atmospheric conditions, long-lived and a rich deep evergreen the year round. Its propagation is, however, somewhat slow and success in transplanting depends upon the stock having an excellent system of roots; pot-grown or frequently transplanted stock giving best results.

The writer has recently had the privilege of visiting some of the parts of Japan where this beautiful Yew is native and finds it thriving under most severe climatic conditions. It is by natural preference a mountain tree and usually on the shady side. The Japanese Yew is very variable in habit in common with many alpine trees. In some places it attains a diameter of trunk of two to three feet and a height of fifty to seventy-five, and quite symmetrical, in other instances being of a spreading nature or even quite prostrate in the higher altitudes where a heavy burden of snow every winter has through succeeding generations kept the growth perpetually bowed down. This great variability in its native habitat suggests the desirability of its propagation for commercial purposes from forms of known habit which can easily be done by graftage or from cuttage.

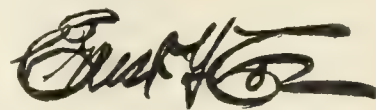

About the temple grounds of Japan, especially those situated in the mountains, this beautiful native Yew has been chosen to occupy places of honor, such as either

side of steps leading to important temples, etc. In such situations the trees have attained in many instances large size and are no doubt many of them several hundred years old. Again this same Yew, but often in its dwarfer garden forms, has seemingly been a favorite with the landscape gardener from the oldest temple garden examples down and even when continuously clipped and confined within very limited size has shown its willingness to remain vigorous, proving its great aptitude and range of usefulness.

There exists among the Japanese today a great variety of garden forms of this Yew showing many variations from upright tree-like types to dwarf prostrate types. No doubt a search throughout the middle and north Atlantic states will reveal many fine old specimens of these various types which have been imported from time to time or disseminated from some of the old nurseries. If perhaps five desirable forms could be selected, suitably named and eventually placed on the market, gardening opportunities will be greatly enriched over a large area of the states. The following forms suggest themselves:

- 1st. Upright tree-like, which would ultimately form a large spreading tree.
- 2nd. A less tree-like form of more compact habit and suitable for windbreaks and tall hedges.
- 3rd. A still dwarfer form of very dense habit for medium hedges and formal specimens.
- 4th. A dwarf form which could be kept to small size.
- 5th. A type with prostrate habit for use in rocky work, etc.

This may seem all very vague and impracticable and at least a long way off, but gardening is receiving increasing encouragement every year in America and the progressive nurseryman will be depended upon more and more to supply the necessary materials, once the landscape fraternity appreciates the value of this Japanese Yew and all available stock that can be possibly produced for a number of years at least, will be quickly taken up. Nurserymen will do well to stock up with it as its field of usefulness is so large that an overstock is hardly conceivable.

New Haven, Conn.

¶ The next two issues will contain full reports of the National Flower Show and the proceedings of the several societies holding meetings in connection therewith. They will be excellent advertising mediums for Easter and Spring Trade.

Seasonable Notes on Culture of Florists' Stock

ANTHURIUMS

Those who grow this genus of stove aroids should see that they have copious supplies of water now and during the summer, as this is their growing period. As the season advances give them more air, but when the temperature drops to 72 degrees see that the air is taken off, as they don't enjoy anything like a chill in the atmosphere. Atmospheric moisture in plenty is essential for this class of plants. They should now be given a temperature during the night of 65 to 70, and, as the season advances, raise it to 75 with a solar heat of from 85 to 90 degrees. Give them shade so to protect them from the powerful sun. Use care in syringing so as to keep the foliage beautiful with that gorgeous tropical appearance. During dark and muggy weather less water should be used. Plants that have not been potted should have a resurfacing of one part each of peat fiber and sphagnum moss. Cone this up 2 or 3 inches above the rim of the pot around the plant.

ASTERS

Early varieties that were started in February and transplanted into flats should be given a temperature of about 50 degrees at night. The flats should be placed as near the glass as possible. This stock when ready can be potted into 3-inch pots and plunged in a cold frame until May, when they can be planted out and these will be earlier than if planted directly from the flats. For the medium and late varieties a mild hotbed is the thing. From now on until the middle of May seed can be sown. A great deal depends on the weather during late Summer and early Fall as to what success you may expect from late sowings. Give the ground in which you propose to plant them a liberal dressing of cow manure, if possible, or thoroughly rotted stable manure. The ground should have a sprinkling of lime—say about 25 to 30 bushels to the acre. When buds show work in some good fertilizer at the rate of 150 to 200 lbs. to the acre. They should receive no check in their growing period.

CANDYTUFT AND STOCKS

These are always very useful for Memorial Day. A spare bench, which is generally found in the violet house or any other cool house, will do to bench both these plants. Soil that will produce good violets, carnations or roses will answer for them. Plants that were raised from seed sown in February should be just right to plant now. With the lengthening days and increased solar heat they will not need any forcing, but should be grown as cool as possible. They will not require a higher night temperature than 50 degrees. Plants that are intended for flowering in pots should be put into 4 or 5-inch pots as soon as possible. A good compost is one-third of decomposed mushroom manure or some spent hot-bed manure mixed through the soil. A 4-inch potful of bone meal to every barrow load will make a generous compost. Grow cool and airy so as to preserve a pure atmosphere. Fumigate at least once in two weeks, as they are very subject to green-fly.

NEPHROLEPIS

After Easter when there will be more bench room start to increase your stock of this fern and also to grow into salable size by next fall. Select a bench that is well drained and cover the bottom with lumpy sod and place on this about four inches of a tolerably rich

sandy loam. Young and thrifty stock can be planted out into this bench and by September or October will attain a fine desirable size to be potted up for winter sales. The fierce sun during midday should be intercepted by some device as a screen so as to afford a measure of shade, but at other times of the day, say from sunrise until 9 or 10 o'clock and after 3 o'clock in the afternoon they should have full and unrestricted light. For stock, plant out of 5 or 6-inch pots and these produce a fine lot of runners, which can be potted up into 2½-inch pots, and with a reasonable amount of atmospheric humidity they will soon establish themselves.

CARE OF ORCHIDS

The best time to repot or topdress *Cattleya Trianae* or *C. Schroederiae* is just before the new growth starts. This also applies to dendrobiums. After they have been potted water should be given with great care for several weeks until good root action is in evidence, when they should never be allowed to get dry at the roots. From now on during their growing season the atmosphere of the house should have a high degree of moisture, but the amount and frequency in watering and damping down will have to be regulated by the weather condition. Ventilate so as to avoid sudden changes and cold draughts. Attend to shading during the bright hours of the day, but let them have the sun during early morning and late afternoon hours. In nine out of ten cases shading is overdone.

PREPARATION FOR EASTER

Give all the stock which is near ready or promising to finish up for Easter good care. All flowering hard-wooded plants such as roses, hydrangeas, azaleas, spiraeas, deutzias, plums, ericas, rhododendrons, genistas, flowering almonds, cherries, peaches and wistarias, even if kept in ever so cool a place, must be watered regularly and faithfully for one drying out at the roots is sure to result in the loss of some bloom. If you are not supplied with a good lot of made-up pans, pots, baskets and dishes of plants that sell well, such as geraniums, begonias, marguerites, pansies, primroses, English daisies, forgetmenots, and such bulbous stock as hyacinths, tulips and daffodils—there is time yet to make up into tasteful arrangement. If taken from flats or frames they can be made up eight to ten days before Easter and will be in good condition if proper judgment and attention are given. Where your stock is backward you can employ severe forcing in lilies, pot grown roses, azaleas, hydrangeas, etc. It is more expedient to have them in bloom five or six days before Easter, as they can then have a cool treatment of about 48 to 50 degrees, which will harden them up so they will give more satisfaction to the buyer. There are still two good weeks in which to replenish any deficiencies in plants, baskets, boxes, pans, pot covers, ribbons, etc., by buying through the many growers and supply houses, that advertise in HORTICULTURE.

John J. M. Farrell

South Norwalk, Conn.

Mr. Farrell's next notes will be on the following: Amaryllis; Hardy Roses; Hardy Stock for late Spring Sales; Salvias; Shading; Verbenas.

Fruits and Vegetables Under Glass

MUSCAT VINES

As we have advocated before, Muscat vines require special treatment as compared with other vines, therefore a house should be devoted to them alone, if they are to attain perfection. Muscats enjoy a higher temperature while growing, especially so while in flower. A temperature of 65 to 70 by night is sufficient for most vines while in flower, but Muscats require 70 to 75 degrees, never below 70. Muscats, as a rule, being shy setters every care should be taken to assist them. Thus it is not advisable to include them in an early house. Mid-season and even late houses suit them much better. This enables a grower to get more assistance from nature in the form of sunshine and air, both great factors, for without either the chances of a good set on Muscats are slim. If possible the same brush should be used on Muscats as has been used on other free-setting varieties. This will carry grains of pollen from the latter on to the former and will answer the same purpose as their own pollen, which oftentimes is scarce and is the chief cause of a shy set. Some go so far as to plant a rod of Hamburgh or Gros Colman in the same house, from which to obtain pollen at time of setting. Muscat of Alexandria can be classed as a late grape and grown as such, its keeping properties being good. Do not over-crop at any time or shanking will result and eventually ruin the vine.

PACKING STRAWBERRIES

After spending so much time and trouble to obtain home-grown strawberries they cannot be packed by the quart and shipped off to chance the knocks and bruises which they will be sure to get before reaching their destination. Each berry being perfect when gathered special care is needed to place them on the table in the same condition. Wooden boxes made to fit packing trunks or other strong receptacles should be made deep enough to carry one layer of berries when packed. Each berry should first be wrapped in a piece of waxed paper and then in cotton wool, filling up any loose spaces that may be left with wool so as to pack the whole firm but not hard. Berries should then turn out little worse for their journey. For shipping the fruit should be gathered on the hard side—i. e., before they are quite ripe.

APPLES AND PEARS

Trees which have set their fruit will require a night temperature of 50. Any which have failed to set should be removed and more room given to those remaining. It is not advisable to be in a hurry to thin the fruit as sometimes a quantity will drop themselves, being imperfectly fertilized (this is especially so with pears), but where a cluster is on one spur they can be gradually reduced to three or four. When reaching the final thinning, later on, one fruit to a spur is sufficient.

Plums and cherries will usually thin themselves down to what they are able to carry. Should an over-abundance be left after stoning is completed some can be removed before the second swelling commences. Any superfluous growth bud can be gradually removed. Syringe thoroughly morning and again in afternoon. Keep a sharp lookout for fly, which is sure to make its appearance.

LATE PEACHES AND NECTARINES

Trees which are intended to be kept back as late as possible will now be coming into flower, despite all efforts to retard them any longer. A night temperature of 40 to 45 degrees by artificial means will suit them and houses can still be opened up through the day, keeping both flowers and growths hardy, but avoid cold draughts. It will not be necessary to go over each flower and fertilize it if the weather is good. Give the trellis a few sharp knocks which will jar the flower sufficiently to distribute the pollen.

KITCHEN GARDEN

Work in the kitchen garden will now be coming along at a brisk rate. Endless rubbish will need clearing off—prunings, mulchings, etc. Condition of the soil must determine the advisability of working it. Sandy and well-drained soil will be in a fit condition sooner than heavy land. It is a mistake to try to work land before it is dry enough. The mere fact of walking on it packs it down so hard that no air can possibly get to the roots of growing stock later. A sheltered position can be selected and made ready for a first sowing of peas and planting of potatoes. As asparagus shows signs of moving, a light dressing of salt will be beneficial. It will not be advisable to risk any greenhouse-raised stock for a few weeks yet, without making provision for protecting it from late frosts.

George H. Benson

Somerville, N. J.

Spring

'Tis like the birthday of the world
When Earth was born in bloom;
The light is made of many dyes,
The air is all perfume.

There's crimson hues, and white and blue,
The very rainbow showers;
Have turned to blossoms where they fell,
And sown the Earth with flowers.

—Hood.

A Memorable Occasion

The great event to which the horticultural world had been eagerly looking forward for months is at last a reality and Boston bound trains from north, south and west are bringing visitors by hundreds, all imbued with the same purpose to see and participate in the most ambitious project ever carried through in American horticulture. A hearty welcome awaits the visitors, in which HORTICULTURE fervently joins. With the liveliest interest we have watched the preparations for the big show from their beginnings as they took form and were gradually perfected from day to day; followed the sentiment and interest as it has developed at home and abroad; shared alike in the hopes and in the doubts as to the final outcome of a scheme so colos-

sal; exulted as we saw the whole-hearted way in which the right men stepped up in the right time and place for the right work—and now that the structure is practically completed and ready to be opened to the gaze of the world we can all look back with pardonable pride over the harmonious and resolute manner in which one difficulty after another has been surmounted and the many-sided enterprise brought to completion. The influx of floricultural visitors to Boston promises to be unprecedented in numbers. We feel confident that they have made no mistake in undertaking the pilgrimage but will find full compensating value for it all in the inspiring spectacle which this day opens its doors to the flower grower and the flower lover. And—the bigger the crowd the happier the Boston bunch.

BOSTON.

We are satisfied that the particular interest which the readers of these lines feel towards Boston just now is horticultural in sentiment rather than statistical. The guide books and other regular sources of local information will supply all that the average visitor may desire to know as to landmarks, antiquities, historical spots, public buildings, industries, etc., etc., and so we do not feel called upon to devote any space to these matters in introducing our floricultural friends to the New England metropolis, which, for the time being,

CHARLES W. PARKER,
President Massachusetts Horticultural Society.

occupies so prominent a place in American horticulture. Suffice it to say that the real Boston, or "Greater Boston," as generally understood, is an aggregation of some forty cities and towns with a population according to the last census of 1,423,429, and of which municipal Boston, with a population of 670,585, is the business centre. So it will be recognized from these figures that the

Metropolitan District, embracing an area geographically comparable to that occupied by New York, Chicago or Philadelphia, follows these three municipalities as the fourth in population among American cities. Boston's preeminence in literature, art, music and education generally, needs no argument here.

As regards the horticultural position of Boston, however, we should say a few words. Among the foremost institutions located here is the Massachusetts Horticultural Society, an organization which for over eighty

years has exercised a tremendous and far-reaching influence for the advancement of horticultural knowledge and the encouragement of rural life. Mt. Auburn, the first lawn cemetery, was instituted under the auspices of this society. Through its agency many zealous and liberal patrons of horticulture have worked and extended their benefactions.

The history of this organization is in a large degree the history of the progress of horticulture on the American Continent. Encouragement of the most substantial character has been

given the florist and gardener interests from the earliest days of the Society. For over seventy years it has been holding floral exhibitions—for a considerable portion of the time, weekly. At the dahlia show in 1840, 3000 blooms were displayed. Its first rose show was in 1849, but three years before it had awarded a gold medal to Samuel Feast, of Baltimore, Md., for meritorious

WILLIAM P. RICH,
Secretary Massachusetts Horticultural Society.

work in rose crossing. The first Horticultural Hall was erected in 1845. Since that time the Society has made several moves, each time making a substantial gain in property value, which together with its income from various donations and its interest in Mt. Auburn Cemetery, has made it the wealthiest horticultural society in America, if not in the world. Notwithstanding the fact that it has distributed many thousands of dollars yearly among exhibitors and has at all times been ready to extend the use of its halls and other

HORTICULTURAL HALL, BOSTON

courtesies in the most liberal manner to any and all allied organizations, local or visiting in Boston. Among the latter the Mass. Horticultural Society has entertained the Society of American Florists, American Carnation Society twice, American Rose Society twice, American Pomological Society several times and other minor organizations frequently.

Horticultural Hall is located at the corner of Huntington and Massachusetts avenues, a short distance from Mechanics' Building, where the National Flower Show is held, and visitors should call on the secretary, W. P. Rich, and inspect the magnificent library under his charge—reputed to be one of the finest in the world.

The Arnold Arboretum stands among the most notable and interesting of Boston's institutions. This reservation comprises 223 acres. W. J. Bean, of the Royal Gardens, Kew, England, has published a very interesting pamphlet of observations on a recent visit to the Arnold Arboretum in which he speaks in highest terms of Professor C. S. Sargent's qualities as Director of the institution, his scientific attainments, his perception of landscape beauty, his business faculty and his generous devotion to the upbuilding and development of this rich arboreal collection.

Of Jackson Dawson, superintendent of the Arnold Arboretum, Mr. Bean says:

Mr. Dawson has, like Professor Sargent, seen, and helped in, the development of the Arboretum since its inception, and in regard to the outdoor department he has in a great measure played the part of builder to that of the Professor's architect. Trees now 60 feet high, he himself raised from seed, or collected as seedlings in the forests. Gifted with that peculiar under-

PROFESSOR CHARLES SPRAGUE SARGENT.
Director of the Arnold Arboretum.

standing of plant life which enables its possessor to divine by intuition the treatment best suited to his charges and the happiest devices for increasing their number, Mr. Dawson has done much by his genius as a propagator towards making the collections so rich as they now are. He was about the first to recognize the value of *Rosa multiflora* and *R. Wichuraiana* for hybridising, and such fine roses as The Dawson, Lady Duncan, William C. Egan and Arnoldiana are the products of his skill.

As indicating briefly what the Arnold Arbore-

tum is doing in a practical way, we quote again from Mr. Bean:

The Arnold Arboretum is filling a very important part in the advancement of arboriculture in North America and Europe. Being in one respect part of the park system of Boston, it provides a very beautiful place of resort for the people of that city. It provides also many lessons in landscape art, for there is evidence that every aspect of the grounds has been the subject of careful study in that respect. While the scientific side of the establishment necessarily dominates all others, the natural beauties of the site have not only been preserved but greatly enhanced.

Considered from the practical side, as apart from pure botany, perhaps the most notable work it has done has been the popularisation and dissemination of American trees and shrubs. Before its foundation, American gardens appear to have mainly depended for their ornamentation on plants of European origin. As an instance, I was told that 30 to 40 years ago one could not have purchased one hundred American oaks in American nurseries. The flora of the east United States has given an extraordinary number of beautiful trees and shrubs to English gardens, and in the latter half of the 18th century and the beginning of the 19th their introduction and cultivation was the chief interest of the most ardent horticulturists of the period. Many of the shrubs then introduced disappeared in course of time, and the Arnold Arboretum has done much good work in re-introducing them. Such shrubs as *Laccinium hirsutum*, *Rhododendron arborescens*, *Gaylus-*

JACKSON DAWSON,
Superintendent Arnold Arboretum.

E. H. WILSON,
Noted Chinese Traveler and Collector.

sacia brachycera, *Kalmia cuneata* and *Fothergilla major* are a sample of the many delightful plants which have in this way been restored to us. Many quite new species have also been introduced to cultivation, whilst others, long known but rare, have been made more plentiful.

Among the portraits presented herewith is that of E. H. Wilson, the indefatigable Chinese explorer and collector, who has contributed so much to the wealth of new introductions at the Arnold Arboretum. As most of our readers are aware Mr. Wilson is now on his way home from China, slowly recovering from the sad accident which befell him in his mountain climbing, never again to return to the work to which he had dedicated his life. It is the hope of a host of friends in Boston that circumstances may permit of his making a perma-

taining to the welfare of the trade or the elevation of the craft requires attention. Its membership now numbers well up towards five hundred. The present officers are Peter M. Miller, president; Thos. Pegler, vice-president; Peter Fisher, treasurer; W. N. Craig, secretary; J. P. A. Guérineau, Robt. Cameron, William Downs, W. J. Kennedy, Executive Committee. The local committee representing the Club in connection with the National Flower Show are well selected and will be found at their respective posts of duty during the week of the show.

Boston's park system has few equals. Three distinct departments are recognized—the Common and Public

KALMIA LATIFOLIA IN THE ARNOLD ARBORETUM.

nent home among us, adding one more to the list of illustrious horticulturists who have brought distinction and renown to Boston far excelling anything which mere census figures can disclose.

Among the most efficient agencies for bringing together in social and business relations and for mutual advantage, the gardeners, florists, seedsmen and nurserymen of Boston, the Gardeners' and Florists' Club of Boston, has a proud record. It was organized in the wholesale flower store of Wm. J. Stewart, now editor of HORTICULTURE, on November 27, 1886, consequently is within a few months of its silver jubilee. The Club has always been well to the front when anything apper-

Squares, which are under the care of a superintendent appointed at City Hall; the Boston Park system, which comprises 1922 acres of park and playground within the city limits and in charge of that most efficient and successful of all park officials in this country, Mr. J. A. Pettigrew; and finally, the Metropolitan Park system with a total area of 10,053.70 acres of highland and lowland, forest, lake, river and seashore, which is under the control of a state commission. One-half of the cost of construction and maintenance of the latter is assessed by apportionment among the several cities and towns comprising the park district.

The flower industry of Boston is and always has been

in a flourishing condition. It supports three large wholesale houses, two prosperous flower markets and some very fine retail flower stores. The nursery and seed trade of Boston are also noted for the high quality of their products, which find in the hundreds of beautiful estates which fringe the seacoast from Greenwich, Conn., to Bar Harbor, Me., and all through the mountain and lake regions of this picturesque section of our country appreciative and discriminating buyers who insist upon quality first and price afterwards. Visitors to the National Flower Show will see in the exhibits of all these interests, which will fill every part of the vast Mechanics' Hall, an impressive display of what the florists, seedsmen and nurserymen of Boston and vicinity are capable of producing, as well as the choicest things from famous growers

JOHN A. PETTIGREW,
Superintendent Boston Park System.

in other and remote localities. It will be an object lesson of no small educational value and, in many of its features, will mark the beginning of a new epoch in American horticulture.

And, in conclusion, let us remind the visitors in attendance on the great exhibition that the entire section of Boston in which are located Mechanics' Building, Horticultural Hall, Art Museum, Opera House, Symphony Hall, Institute of Technology, Public Library, the splendid hotels in which most of the visitors will be housed and many other notable public and private buildings, is "made land," reclaimed from the bog and water of the "back bay" and filled in to become one of the most renowned and ex-

clusive residential section in America.

NATIONAL FLOWER SHOW

An Auspicious Opening — Program of the Society Meetings, etc.

As we go to press Mechanics' Building is being turned into a bower of beauty and on Saturday evening, March 25th, the great event will be in full swing. The meetings of the Society of American Florists and Ornamental Horticulturists, American Rose, American Carnation, American Gladiolus and Sweet Pea Societies will get under way early in the coming week, and all indications point to a record influx of trade visitors from far and near.

JAMES WHEELER
Superintendent of Exhibition.

and double the usual admission will be charged.

We repeat, for the benefit of those who receive this paper before starting for Boston, that there are excellent hotel accommodations in the immediate vicinity of the exhibition hall, and that those who desire to locate near the Show should leave trains at Back Bay Station, if on the N. Y., N. H. & H. R. R., or at Huntington Ave. Station if on the N. Y. Central, these being practically the same station but under different names. Do not get carried through to the Terminal Station which is nearly two miles distant from Mechanics' Building. Either of the hotels advertising in this paper will be found first-class and reasonable.

W. N. CRAIG
Chairman of Examining Committee.

The offices of the secretaries are in Mechanics' Building.

Office of the National Flower Show Committee is in Mechanics' Building. Chester I. Campbell, manager of the show, is in charge. All business connected with the Flower Show should be presented there.

New Members. Those desiring to become members of any of the societies should apply at the office of the respective secretaries.

Paying Dues. Dues may be paid and orders for members' tickets obtained at the office of the respective secretaries.

CHESTER I. CAMPBELL
General Manager National Flower Show.

We understand that the entire floor area at the disposal of the Trade Exhibit, which is to be an important adjunct of the main exhibition, has been taken, yielding a revenue towards the expense account far beyond the most sanguine hopes of its promoters.

Governor Foss, Mayor Fitzgerald and Hon. S. W. McCall have been especially invited to take part in the opening exercises on Saturday, at 8 o'clock in the evening. On Sunday the show will be open from 1 p. m. until 10 in the evening, but not for trading purposes, and between the hours of one and three on that day all children who are accompanied by their elders will be admitted free. Fifty members of the Gardeners' and Florists' Club of Boston, have volunteered to be present and act as escorts to the children. Friday, March 31, will be known as "Society Day,"

The following list of events in connection with the Show and Meetings was published last week, but is here repeated as a reminder. It is understood that the Ladies' S. A. F. will attend Boston Theatre on Wednesday afternoon, where several hundred seats have been reserved for them, and there are other interesting things on the program for the ladies, including an auto ride to historical spots, etc.

The office of HORTICULTURE, at 11 Hamilton Place, in the centre of the shopping district and directly opposite Park Street Church, will be at the disposal of visitors needing to use telephone or other conveniences, and we hope many will honor us with a social call. During the continuance of the Show, HORTICULTURE will have a space in the main exhibition hall with someone constantly in attendance to receive subscriptions or advertising and to supply information generally.

GIVE US A CALL.

Railway Certificates. Railway certificates should be deposited with the Secretary of the S. A. F. & O. H. immediately upon arrival at Mechanics Building. The fee of 25 cents must be paid when certificate is deposited. Certificates will be signed by the agent from 9 a. m. to 6 p. m. on March 27, 28 and 29. No certificate will be signed before or after these dates. Certificates must be called for before 11 a. m. on March 31st.

Members' Tickets. Orders for members' tickets must be presented to the committee in charge of admission and exchanged for regular tickets. All orders and tickets in hands other than the owners will be taken up and cancelled.

Register. All members of the S. A. F. & O. H. and affiliated societies should register with the secretary of the S. A. F. & O. H., so that a record may be kept of the attendance, and so that members may be located when asked for.

MONDAY, MARCH 27.**Opening Session.****S. A. F. & O. H.**

10:30 A. M. General meeting for the opening of the Convention. Welcome by President Asmus. Welcome by Boston florists.

Afternoon Session.**American Rose Society.**

but the Gardeners' and Florists' Club of Boston had already selected that evening for the entertainment of the visitors at an informal reception, lunch and dance, and the preparations have gone so far in the way of printing tickets, caterer, etc., that to change it is impossible at so late a date. Probably a way out of the awkward situation will be fixed as soon as the American Carnation Society meets.—Ed.

THURSDAY, MARCH 30.

Morning Session.

American Carnation Society.

9:30 A. M. Call to order. Final report of judges. Deferred business. Adjournment.

Notice—The secretary will leave for Boston on Sunday, March 26th. All mail which would not reach him by Saturday, March 25th, should be addressed to him at the Hotel Lenox,

ELMER D. SMITH
President Chrysanthemum Society of America.

Boston, which will be A. C. S. headquarters.

Afternoon Session.

American Gladiolus Society.

2:00 P. M. Reading of minutes of last meeting. Reports of officers, bulletin committee, exhibition committee, Boston show, Baltimore show, committee on nomenclature, exhibition committee on rules governing the awarding of "certificates of merit," and suggesting a "scale of points" to use in judging. New business. Discussion: "What action shall our Society take when the same name has been given to several different varieties of gladioli and when different names have been given to the same variety?" Opened by A. Cowee, Berlin, N. Y.

FRIDAY, MARCH 31.

Morning Session.

S. A. F. & O. H.

9:00 A. M. President's address. Report of the secretary. Report of the treasurer. Preliminary report of National Flower Show committee. Miscellaneous business.

Afternoon Session.

S. A. F. & O. H.

2:00 P. M. 10-minute talks by presidents of various societies: George Asmus, president, S. A. F. & O. H.; Fred Burki, president, A. C. S.; W. H. Elliott, president, A. R. S.; Elmer D. Smith, president, C. S. A.; W. Atlee Burpee, president, N. S. P. A.; I. S. Hendrickson, president, A. G. S.; J. A. Valentine, president, F. T. D.; William Kleinheinz, president, N. S. G.

Evening Session.

S. A. F. & O. H.

8:00 P. M. Illustrated lecture, "Trees, Shrubs and Flowering Plants," John Dunbar, Asst. Supt. of Parks, Rochester, N. Y.

SATURDAY, APRIL 1.

Morning Session.

S. A. F. & O. H.

9:00 A. M. Unfinished business. Adjournment.

A. FARENWALD
Vice-President American Rose Society.

EBER HOLMES
Superintendent of American Rose Society's Exhibits.

FRED BURKI
President American Carnation Society.

F. E. DORNER
Treasurer American Carnation Society.

A. F. J. BAUR
Secretary American Carnation Society.

W. ATLEE BURPEE
President National Sweet Pea Society.

H. A. BUNYARD
Secretary National Sweet Pea Society.

WILLIAM SIM
Vice-President National Sweet Pea Society.

ISAAC S. HENDRICKSON
President American Gladiolus Society.

A. T. BODDINGTON
Treasurer National Sweet Pea Society.

L. MERTON GAGE
Secretary American Gladiolus Society.

Officers of the Gardeners' and Florists' Club of Boston

PETER FISHER
Treasurer

PETER M. MILLER
President

THOMAS PEGLER
Vice-President

SOCIETY OF AMERICAN FLORISTS

By order of the President, notice is hereby given that the mid-lent meeting of the Executive Board of the Society of American Florists and Ornamental Horticulturists will be held at Boston, Mass., from March 25th until April 3rd with an adjourned meeting to be held at Baltimore on April 4th. Meetings are called at Boston for 9 A. M. each morning from March 25th to April 3rd inclusive. The meeting at Baltimore is called for 10 A. M. on April 4th and will remain in session until all business is disposed of.

H. B. DORNER,
Secretary S. A. F.

AMERICAN ROSE SOCIETY.

New Roses on Exhibition at Boston.

Brant-Hentz Flower Co. registers for exhibit a new rose, "Madison," and they say: "This new rose is a cross between Bride, Pearl and Meteor, has foliage resembling the holly, flowers white, resembling Bride, large buds; the plants will bloom five flowers to the Bride's three. There is very little blind wood and cuts continually throughout the whole year."

E. G. Hill Co. will show his new Rose, "Sunburst." Stockton & Howe bring out one called "Princeton." S. J. Reuter & Son bring out two new Roses, "Double Improved White Killarney," is pure white sport from the Waban strain of White Killarney. Bud double the size of the ordinary White Killarney, a larger plant with heavy deep-colored foliage. "Cerise Pink Killarney," is deep pink sport from Killarney, having a velvety sheen and beautiful shading and a heavier bud.

The foregoing new roses are entered for the American Rose Society's gold medal as are also the following: Melody and Double Killarney from Robert Scott & Son, Sport from Chatenay from Exeter Rose Conservatories, Sport from Killarney from F. R. Pierson Co.,

and three crackerjacks from A. N. Pierson.

Gude Bros. will show H. P. roses in pots and M. H. Walsh will make the most magnificent show of Ramblers ever put up, including several new introductions. In the cut flower classes there are as many as forty entries in some cases. Myer & Samtman will send 100 Hilda specials.

The Rose represents 60 per cent. of the value of commercial flowers raised in the United States, and there is nowhere in the world where flowers grow but what the rose stands out with unquestioned prominence. The development of outside roses is apparent to anyone who travels over this country today and the nurseryman and plant growers have a chance to show what they can do on the second division of

this exhibition, which is given up entirely to pot roses.

Meetings at Boston.

Provision has been made for three meetings. The first is to be a general report meeting and it is expected that two able papers of great interest to all growers of roses will be presented. The second meeting will be the general business meeting for election of officers and choice of location for next meeting, and the third meeting is devoted to the report of Dr. S. S. Suliger concerning the National Rose Show of England. Richard Vincent, Jr., of Whitmarsh, Md., who went to Brussels, will report on his trip, and W. G. MacKendrick of Toronto, Can., will prepare a paper. These three meetings are hoped to be of popular interest.

The State Florist's Association of Indiana a year ago made application to the Rose Society that it go there in 1912, and an official invitation to meet in the city of Indianapolis in 1912 has been received.

BENJAMIN HAMMOND.

LADIES' SOCIETY OF AMERICAN FLORISTS.

F. R. Pierson, chairman, National Flower Show, has requested the Secretary of the Ladies' Society to issue an order for members' season tickets to all who have paid their dues for 1911. Members will find the Secretary at Exhibition Hall ready to receive dues and issue orders. Be sure to bring your order, as no duplicate will be issued. Please wear your badge pin.

MRS. J. V. PHILLIPS, Pres.
MRS. CHAS. H. MAYNARD, Sec'y.

We are informed that the Association of Gardeners will have their meeting at Boston on Wednesday P. M., March 29, same to be followed by a dinner at which Chas H. Totty will be toastmaster.

ROBERT CAMERON
Member of Examining Committee, National Flower Show.

CLUBS AND SOCIETIES

HORTICULTURAL SOCIETY OF
NEW YORK.

The second monthly exhibition was held, in conjunction with the meeting, at the American Museum of Natural History on Wednesday, March 8. The initial monthly exhibition in February was very encouraging, but the present one was much more so, being large and better attended. Cyclamens and carnations held the center of the stage, but there were many other exhibits, among which were orchids, bulbous stuff, and cut flowers. The display of cyclamens was superb, and the competition in the carnations was very keen. Below will be found a list of the premiums awarded.

The next exhibition will take place at the same place on Wednesday, April 12, and will be devoted primarily to the plants and flowers which are associated with Easter. The schedules will soon be ready for distribution, and will be sent, upon application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City.

Premiums awarded March 8, 1911—

- Best vase of carnations, Winthrop Sargent, Frank E. Witney, gardener, silver medal.
3 vases of carnations, 3 kinds, 12 flowers of each, Mrs. Myron I. Borg, James Aitchison, gardener, first; J. J. Riker, Thos. W. Stobo, gardener, second.
12 scarlet carnations, Mrs. Myron I. Borg, first; Henry Goldman, Anton Bauer, gardener, second.
12 Winsor-shade carnations, Miss C. A. Bliss, J. T. Burns, gardener, first; J. J. Riker, second.
12 Enchantress-shade carnations, Mrs. Myron I. Borg, first; J. J. Riker, second.
12 crimson carnations, W. W. Heroy, A. Wynne, gardener, first; Miss C. A. Bliss, second.
12 Lawson-shade carnations, Henry Siegel, Thos. Aitchison, gardener, first; Henry Goldman, second.
12 white carnations, Adolph Lewisohn, John Canning, gardener, first; J. J. Riker, second.
50 blooms of carnations, arranged for effect, Henry Siegel, first.
10 plants of cyclamen, Mrs. F. A. Constable, James Stuart, gardener, first; Mrs. H. B. Gilbert, Robert Stobo, gardener, second.
5 plants of cyclamen, Henry Siegel, first.
1 plant of cyclamen, Henry Siegel, first; Mrs. F. A. Constable, second.
3 plants of cineraria, Chas. Mallory, Wm. J. Sealey, gardener, first; Adolph Lewisohn, second.
Group of orchids, F. V. Burton, Wm. Cordes, gardener, special prize, silver medal.
Sweet peas, stocks and daffodils, W. W. Heroy, special prize.
Plant of *Dendrobium thyrsiflorum*, Mrs. F. B. Van Vorst, A. Anderson, gardener, special prize.
Vase of *Antirrhinums*, R. Delafield, Wm. Brock, gardener, special prize.
Plant of *Cypripedium Iris*, J. A. Manda, special prize, silver medal.
Dish of mushrooms, Miss C. A. Bliss, special prize.
7 vases of sweet peas, A. C. Zvolanek, certificate of merit.
Fine variety of *Cattleya Schroederiae*, Lager & Hurrell, special prize, silver medal.
Vases of *hippeastrums*, *Primula Kewensis*, and carnation *May Day*, Mrs. F. A. Constable, special prize.
Seedling carnation, Wm. Eccles, Scott Bros., certificate of merit.

GEO. V. NASH, Sec'y.

NEWPORT HORTICULTURAL SO-
CIETY.

The meeting of this society, March 14, was well attended and full of interest, indicating success to the plan adopted at the beginning of the year to make meetings more attractive.

This plan provides handsome prizes at the end of the year to the three members having the highest number of points gained from helping the society in various ways, a specially prepared scale of points regulating the competition. The reading of a paper at each meeting is bringing out unexpected talent and doing much good. This evening the paper was on "Tuberous Begonias," by Paul Volquardsen, who had previously qualified for the task through the high-class exhibits he has from time to time placed before the society. In growing tuberous begonias outdoors, the speaker said, an ideal situation is where they will be shaded from the sun from about 10 A. M. to 2 P. M., but not under trees, as the drip from branches has a bad effect on them. They also succeed well in the full sun if watered thoroughly every day during dry weather. A rich soil is also necessary from the very start. A mulch of a suitable loose material is also good. Bulbs one year old are best for all round use, but seedlings make a fine display in late summer. Comparing them with geraniums they give a much more gorgeous effect and require shorter treatment under glass previous to planting out.

The exhibits at this meeting were extra good, including two orchid plants of the *Dendrobium Wardianum* types from Oscar Schultz, who was awarded a bronze medal for one and a first class certificate for the other. Fredrick Franco also exhibited a seedling *H. T. rose* plant of considerable promise, which was awarded honorable mention.

The paper at the next meeting will be on "Horticulture in the South," by Frank Jenkins.

GARDENERS' AND FLORISTS'
CLUB OF BOSTON.

The regular monthly meeting of this club on Tuesday evening, March 21, was a big one and much interest was manifested in the discussion of the preparations for club hospitalities to the National Flower Show visitors—matters which are hardly within the scope of a public report. Suffice it to say that the club will be on deck for anything concerning the comfort and pleasure of all strangers who show up. Fifty members volunteered to serve on Sunday afternoon as escorts to any children who may be present under the free admission privilege.

The question box, when opened, disclosed a query as to why so many forcing tulips had gone "blind" this season. Mr. Farquhar explained the phenomenon satisfactorily as being due to peaty soil as affected by a very wet growing season and the consequent harvesting of the bulbs in an immature condition. Bulbs from sandy districts, on the contrary, would under these conditions ripen normally and flower satisfactorily. Another question was in reference to the culture of gardenias, which, by the way was fully treated in last week's issue of HORTICULTURE. Mr. Finlayson replied briefly.

PITTSBURGH FLORISTS' AND
GARDENERS' CLUB.

"Rose night" brought out a good attendance on the evening of March 7th.

On Feb. 28th Mr. Vincent, of White Marsh, Md., had given a talk before the club on his trip through the Holland bulb fields, illustrated by lantern slides. The entertainment committee's report on this event, by Mr. Langhans was pleasantly received.

Mr. Cook, representing the Passenger Dept. of the New York Central lines was present, and presented the claims of his line for transportation to the Boston Flower Show. A transportation committee was named, composed of James Wiseman, T. P. Langhans and E. C. Reineman, and it was suggested they get in touch with the Penna. R. R., as many of the members desired to go to Boston via Philadelphia and New York.

A fine display of roses, carnations and flowering plants was staged. The judges—Wm. Falconer, Fred Burki, and H. L. Blind made awards as follows:

To E. G. Hill Co., certificate of merit for Carnation Bonfire, and a certificate of merit for Rose, Mrs. Aaron Ward. To E. W. Garland, Finleyville, Pa., a certificate of merit each for carnation seedling—one pink, one white. To Bertermann Bros. Co., cultural commendation for carnation, J. Whitcomb Riley. Geo. J. Learzaf, cultural commendation for vase of Carnations grown under the unfavorable conditions of the city. Randolph & McClements, first class certificate for *Jasminum primulinum*, and a certificate of merit for group of plants. W. A. Morten, certificate of merit for crimson-flowered *Primula obconica*. Walter James, cultural commendation for *Dendrobium nobile*. Frank Crook, *Primula obconica*, cultural commendation. Pittsburgh Cut Flower, for roses, certificate of merit. Phipps Conservatories, for Cinerarias, cultural certificate. Chas. H. Totty, Madison, N. J., for Carnation Wodenethe—an immense white,—a first class certificate, and for rose, Lady Hillingdon, a certificate of merit. Phipps Conservatories, for group of Hyacinths, Narcissus and Cinerarias, cultural commendation, and also for *Toxicophlaca spectabilis*, a South African evergreen shrub full of fragrant white blossoms.

In connection with roses Mr. Burki stated his belief that the use of blind wood for cuttings was responsible for the deterioration of Bride and Bridesmaid.

Mr. Neil McCallum showed colored plates of the newer daffodils, and Mr. Langhans spoke of a recent trip with Mr. Burki among the growers in the Chicago district, and of the vast differences observed, even in the large establishments, in the use of up-to-date and efficient methods.

The subject for the April meeting will be "Easter Flowers."

H. P. JOSLIN, Sec'y.

LENOX HORTICULTURAL
SOCIETY.

One of the most interesting and instructive meetings held by the society for some time was presided over by President Foulsham on Saturday, March 4th and was very largely attended, and the members were amply rewarded by hearing a practical paper on Mushroom Culture by W. Jack. The essayist dealt with the minutest detail from the preparing of the manure, making of beds, spawning,

temperatures, moisture, insects, and failures, attributing the latter in a degree to the dryness of the manure when the beds are made. A good discussion followed, most of the members taking part, and the essayist was accorded a hearty vote of thanks.

A. J. Loveless was awarded a certificate of merit for a fine vase of *Leptosyne maritima*. It is rather a pity that this beautiful annual is not more widely grown, as it somewhat resembles the marguerites having large lemon yellow flowers, borne on long stiff stems, fragrant, and very valuable as cut blooms, and can be successfully grown in a temperature of 50 degrees. George Breed was awarded a vote of thanks for a vase of roses—Gold of Ophir.

The schedules for the forthcoming shows were adopted as read. One new clause was voted,—namely: That none other than the Society's cards shall be used on exhibits. Exhibitions will be held as follows: Annual and Perennial, July 26th; Fall exhibitions Oct. 25th and 26th. The annual dinner of the society will be held at the Curtis Hotel, April 18th. The society is forging ahead, having elected thirteen active and three life members since the New Year. Quite a large delegation will attend the National Flower Show at Boston.

GEORGE H. INSTONE,
Secretary.

DAYTON FLORISTS' CLUB.

The third annual banquet and social session of the Dayton Florists' Club was held Wednesday night, March 1, in the Phillips House. The decorations were a combination of the wares and genius of the different florists and were said to be the best ever put up in the city. Horace M. Frank presided as toastmaster.

A business meeting was held on Monday evening, March 6, at Mrs. J. F. Young's store on East Fifth street, at which time the following officers for the ensuing year were elected:

President, F. R. Mittman; vice-president, A. E. Schmidt; secretary, Horace M. Frank; treasurer, George Bartholomew. A booster committee was appointed of which C. M. Schaefer is chairman, and a special entertainment committee was also appointed and arrangements made to hold a social meeting at the residence of Mr. and Mrs. J. F. Young, 105 Holt street, April 3.

An invitation from the Cleveland Florist Club was read, inviting the Dayton Florist Club to be their guests at the National Flower Show, which will be held in Boston, March 25.

NORTH SHORE HORTICULTURAL SOCIETY.

At the March 17 meeting of this society the members listened to a talk on "Bulb Growing in Holland," by P. J. Van Baarda. A description was given at length of the propagation, culture, digging, storing, drying, sorting and packing of Dutch bulbs. Bulb growing in other countries came up for discussion, and it being the 17th of March the fact was brought out that the "Emerald Isle" did something in narcissus, etc., as well as shamrocks. The speaker received a vote of thanks.

ROBERT A. MITCHELL.

NEW JERSEY FLORICULTURAL SOCIETY.

At the meeting on March 10 there was an unusually fine display. Joseph A. Manda had a fine display of rare orchids. Among his collection he had the new hybrid *Cypripedium Chamberlainianum*, first time exhibited, which captured a first-class certificate. Lager & Hurrell also had a nice display of orchids. Their *Renanthera Imshootiana* was awarded a first-class certificate. Thomas Jones also had a fine show of orchids.

A committee was appointed to draw up resolutions on the death of Louis Peiker of West Orange.

Peter Duff, gardener for Mrs. J. C. Brown, read a very instructive paper on "The Culture of Chrysanthemums." He said he keeps the stock plants in cold frames or pits during the winter, and commences propagating the early part of March and all through the month, and when rooted putting into 2½-inch or 3-inch pots, then into 4-inch. After the roots fill the latter they get their final shift to the benches, boxes and larger pots. The compost used for the first potting is lighter than for the final—four parts loam, one part well rotted horse manure and one part leaf mold and sand put through a sieve. For the final potting he makes up his compost in the fall with layers of sod and manure in proportions of four to one, with a sprinkling of lime, bone and soot. He uses the commercial fertilizers for feeding during the summer as the plants require it. He uses Nico-fume and Aphine to keep down aphids. In taking the bud, he says, with a few exceptions crowns must be taken to produce the large blooms seen at the exhibitions in the fall. For single-stem plants grown and flowered in 6-inch pots he propagates from May 1 to June 1, and in potting them he packs the soil good and hard in the pots to make the plants stocky. Standards and specimens are propagated much earlier in order to produce large plants, and should be pinched often to make them bushy, pinching to stop about the end of July. A few of the stronger shoots can be pinched a little later.

Awards were as follows:

Roses.—Thos. Edison, gard. Frank Drews, 90 points; S. M. and A. Colgate, gard. William Reid, 85 points; A. B. Jenkins, gard. Albert F. Larson, 80 points. American Beauties—Frank Drews, 70 points; Albert F. Larson, 65 points. Carnations—William Reid, 95 points; Albert F. Larson, 75 points; Frank Drews, 65 points. Orchids—William Reid, 90 points; Joseph A. Manda, 95 points; Lager & Hurrell, 93 points; Thomas Jones, 90 points. Carnations—Chas. Hathaway, gard. Max Schneider, 90 points. Stocks—Fritz Berglund, 85 points. Cultural certificates to Max Schneider, vase of narcissus and violets; Fritz Berglund, case of narcissus; Joseph A. Manda, orchids. Certificate of merit—Thos. Jones, *Dendrobium crassinode* and *Calanthe Regeneri*; Lager & Hurrell, orchids; Lager & Hurrell, *Lycastris crinita*; Frank Drews, vase of roses; Frank Drews, carnations.

WILLIAM REID, Sec'y.

PENNSYLVANIA HORTICULTURAL SOCIETY SPRING SHOW.

A very creditable display was opened on the 21st inst. and continued for three days at the annual Spring Exhibition of the Pennsylvania Horticultural Society. The quality and quantity of the exhibits were, we think, distinctly superior to the show of a year ago. The chief features were a

lavish showing of hyacinths, tulips, daffodils, and other bulbous stock, for the premiums so generously offered by the leading seedsmen of the city. These items showed, almost without exception, well-grown and well-developed plants from extra selected stock of the hundreds of varieties exhibited. Azaleas, lilies, callas, spireas, cinerarias, and other Easter subjects added largely to the interest of the show and were unusually well done. Around the front of the stage the Messrs. Dreer had a splendid group of foliage and flowering plants which were highly educational and much admired. The new holly fern (*Cyrtomium Rochfordi*) was the most noticeable gem of the collection. The new double white marguerite, Mrs. F. Sander, also came in for a good deal of favorable comment. It seems to us one of the best things we have seen in that line yet, and we have had several agreeable surprises in recent years. The lovely Dreer fancy caladiums were also well represented and the whole exhibit was given the finishing touch with a generous mingling of cocos and phoenix.

The principal prize winners were: William Kleinheinz, Joseph Hurley, William Robertson, Samuel Batchelor, John McCleary, John Gaynor, David Aiken, J. W. Geary, Thomas Long and John H. Dodds.

A feature of the show was a splendid vase of the new scarlet carnation Miss Dimple Widener, which was originated, grown, and exhibited by William Kleinheinz, and graced the middle stairway landing. This new-comer will be heard from yet.

Messrs. Michell, Waterer, Dreer, and others deserve great credit for the excellent showing made and their liberal donations to the prize list.

CONNECTICUT HORTICULTURAL SOCIETY.

Our first March meeting was held on the 10th instant, and brought out a splendid exhibition of cineraria plants by President Huss, mostly of the single hybrid kinds, but including a number of the stellata and cactus types. He also showed two blooming amaryllis plants. Certificates of merit were awarded for the single hybrids cactus and stellata and honorable mention for the amaryllis. An appropriate paper was presented by George B. Baker, of New Britain, who gave many useful facts concerning the history, propagation, and culture of the florists' cineraria, as well as the other and less common kinds. Considerable discussion ensued regarding seed germination of this plant. Some sow the seed on the surface, dampening the soil, and covering lightly with moss. Mr. Baker recommended sowing the seed about an eighth of an inch deep.

It was decided to hold the annual dahlia exhibition at Hartford on Sept. 19-20, and the chrysanthemum exhibition on Nov. 7-8.

Our next meeting on March 24th, will be Greenhouse Rose night; and we are hoping to be favored with an address by George A. Parker, superintendent of the city parks of Hartford, on the interesting topic of "The Improvement of Small Homes."

GEORGE W. SMITH,
Secretary.

ST. LOUIS FLORIST CLUB.

The meeting on last week Thursday afternoon was fairly well attended. Treasurer Smith could not be present owing to the fact that he was being married. He sent the members a fine box of cigars and in return they sent him a congratulatory telegram.

In front of the president's chair was a nice display of violets by H. Jeunemann, of Webster Park, who was exhibiting his new violets for inspection. The St. Clair Floral Co. also had a vase of well grown roses on exhibition.

A letter was read from Prof. Wm. Trelease, of Shaw's Garden, saying that young Fred W. Grossart, who was recommended by the club for a free scholarship, had been accepted. Mr. W. E. Ogle, of Belleville, Ill., was elected to membership. W. E. Guy, chairman of the trustees, made a report on how best to celebrate the club's 25th anniversary, June 28th. Chas. E. Schoenle and Geo. B. Windler were appointed to serve with the trustees and a full report will be heard at the next meeting.

Chas. E. Schoenle started a big discussion on his remarks that it was not right for any wholesaler to sell to department stores who have no regular floral departments. There was a long discussion between retailer, grower and wholesaler, and it was brought to a vote condemning the practice. This was all brought about by a certain wholesale house in Chicago quoting our department stores stock at wholesale prices. Mr. DeWever then started a discussion on regulating prices on plants which only interested the growers. More will be said about this at the next meeting.

NASSAU COUNTY HORTICULTURAL SOCIETY.

At the meeting of this Society at Glen Cove, N. Y., on March 8, Mr. Holloway, chairman of the Executive Committee, reported that the euchre and dance held in January was a great success financially and a very hearty vote of thanks was accorded Mr. Holloway and his colleagues. The judges of the exhibits—Messrs. Cliffe, James Elmslie and Geo. Gilder reported as follows:

First prize for cineraria stock and cyclamen to A. MacKenzie; mushrooms—certificate of culture to J. Everett; Bride roses—Hon. mention to J. Everett; cyclamen—Hon. mention to R. Marshall; violets—Hon. mention to Pierre Andevart; chickory—Hon. mention to Frank Petrocchia; sweet peas thanks to H. Gaut; gardenias—thanks to V. Cleres.

The silver cup presented by "Buds" of New York for the best collection of bulbs in flower was won by H. Matz. J. Everett gave a few interesting remarks on the growing of mushrooms. It was decided to accept the generous offer of 500 vases presented by Mrs. Bucknall. It was decided that the Society would hold no summer show this year. The Society's prize in April will be for calceolarias, 25 mixed carnations and sprays of outdoor flowering shrubs.

E. WESTLAKE,

Recording Secretary.

YONKERS HORTICULTURAL SOCIETY.

On Friday, March 17th, a regular meeting was held and largely attended. Various committees reported, notably the executive, in bringing forward a schedule of classes for the June show, which was adopted with a few amendments.

A prize given by W. Macdonald, brought out some fine exhibits, carnations of splendid quality from J. Canning, superintendent for A. Lewishon of Ardsley, receiving first prize R. Cochrane, superintendent of the Ewing estate was placed second, with blooms of very fine quality, and H. Scott, third, with My Maryland roses. E. Bennett, L. Milliot and G. Featherstone, acted as judges. The resignation of Lee Whitman, president, was read, and accepted with regret. The lure of the "Great Northwest" is responsible for Mr. Whitman's resignation, and he received a standing vote of thanks for his services, and innumerable good wishes for success.

After business, the evening was given over to sociability, songs, stories, and refreshments of high quality, all serving to make the evening a most pronounced success. H. M. B.

WALLACE R. PIERSON
Essayist at Meeting of American Rose Society.

A ZEALOUS OFFICIAL.

Wallace R. Pierson, vice-president of the S. A. F. for Connecticut, has mailed hundreds of copies of the following letter to all parts of his state and reports a number of responses already.

Office of the State Vice-President.

Dear Sir:—

The Society of American Florists are to have a convention in Boston March 25th to April 1st in connection with the National Flower Show. At the same time there will be meetings of the American Rose Society and The American Carnation Society, as well as meetings of other specialty societies. All these smaller societies owe in a large degree their existence to the inspiration of the Society of American Florists.

The coming National Flower Show is to be the greatest floral exhibition ever held in this country and perhaps in the world. We want all florists and gardeners to feel that a part of the show belongs to them.

Membership in the Society of American Florists is a most desirable qualification. Are you a member? If not, fill out the enclosed blank and enclose \$5.00 and become a member before the Boston Show. Don't wait until nearly time for the show, but do it now. The Society needs the members and as we realize the improved conditions in floriculture and horticulture today, for much of which the Society is responsible, should we not do our share by joining and carrying on the good work?

Send your application to

WALLACE R. PIERSON,
Cromwell, Conn.
Connecticut Vice-President

CHRYSANTHEMUM SOCIETY OF AMERICA.

The following special prizes have been offered for the annual exhibition of the Chrysanthemum Society of America in conjunction with the St. Louis Horticultural Society at St. Louis, Mo., November 7, 8, 9, 10, 11, 1911:

Chrysanthemum Society of America Prize—Best 10 blooms, any one variety, Silver Cup.

Jerome Jones Prizes 10 blooms Mrs. Jerome Jones, first \$15.00, second \$10.00 Prizes offered by Mr. Jerome Jones, Boston, Mass.

Elmer D. Smith Prizes—12 blooms in 12 varieties, introductions of 1910 and 1911, shown in separate vases, not less than 12-inch stems, first \$15.00, second \$10.00. Prizes offered by Elmer D. Smith & Co., Adrian, Mich.

William Wells Prizes—3 blooms Mrs. G. C. Kelley, first gold, second silver third bronze medals. Prizes offered by William Wells & Co., Merstham, Surrey, England.

William Wells Single Chrysanthemum Prizes—6 sprays of Miss Hilda Wells, first gold, second silver, third bronze medals. Prizes offered by William Wells & Co., Merstham, Surrey, England.

Charles H. Totty Prizes—6 blooms F. H. Nash, first \$15.00, second \$10.00 Prizes offered by Charles H. Totty, Madison, N. J.

Henry A. Dreer Prize—Best 6 blooms yellow seedling chrysanthemum of American origin, \$10.00. Prize offered by Henry A. Dreer, Inc., Philadelphia, Pa.

Philip J. Foley Prize 6 blooms white seedling of American origin, \$10.00. Prize offered by the Foley Manufacturing Co., Chicago, Ill.

J. C. Vaughan Prize—10 blooms pink seedling of American origin, silver cup. Prize offered by Vaughan's Seed Store, Chicago and New York.

Peter Henderson Prize—6 blooms crimson or bronze seedling of American origin, \$10.00. Prize offered by Peter Henderson & Co., New York.

Lord & Burnham Prize—10 blooms, any color chrysanthemum never before exhibited in this country; open to all. American or imported variety, gold medal or \$20.00 in cash. Prize offered by Lord & Burnham Co., Irvington-on-Hudson, N. Y.

Other firms have signified their intention of adding to this list. They will be published as soon as definitely arranged. In addition to these the regular premiums of the St. Louis Horticultural Society are offered for this show, the preliminary schedule of which will be ready in a short while and can be had upon application to the secretary, Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

The following additional special prizes are offered for the Chrysanthemum Society Show to be held in St. Louis next November: Offered by E. G. Hill Co., Richmond, Ind., for the best ten blooms chrysanthemum Emberta, \$10.00; for the best ten blooms chrysanthemum Wells' Late Pink, \$10.00; for the best ten blooms chrysanthemum Golden Gem, \$10.00.

C. W. JOHNSON, Sec.

BAR HARBOR HORTICULTURAL SOCIETY.

At the regular meeting of this society on March 16th Wm Miller, 2nd vice-president, occupied the chair. Rev. Samuel H. Jobe was the lecturer. Mr. Jobe gave a very interesting lecture on Florence, its Makers and Masters, illustrated with about 100 most beautiful lantern slides. At the close of the lecture a rising vote of thanks was extended.

March 2nd Chas. L. Shand gave a paper on "Gardening as a Profession, What it Offers of Pleasure and Profit to Young Men."

Wm. T. Burton, gardener for Mrs. John S. Kennedy, is to give a paper on some gardening subject at the meeting on April 6th.

DURING RECESS

New York Florists' Club.

The great social event of the season for the New York florists—the annual dinner of the club—took place last Saturday evening at Shanley's "Roman Banquet Room." There was a large gathering, numbering well up towards 300, ladies and gentlemen, and including many invited guests, among whom were the party of British horticulturalists who are now touring America, Mr. and Mrs. R. Vincent, Jr., of White-

so faithfully as chairman. He declared the Exhibition would do much to uplift horticulture in the United States and voiced a ringing tribute to Boston and her proud position in American horticulture.

J. S. Brunton, pilot of the British visitors, editor of the Horticultural Trade Journal of London, was next called upon and received a hearty ovation. Mr. Brunton expressed grateful appreciation of the attentions that had

ceptable songs by clever artists were interspersed between the speeches.

Adjourned about 2.30 A. M.

Chicago vs. Milwaukee.

The Chicago Florists' Bowling Club went to Milwaukee, Wis., Sunday, the 19th, and played the florists there. A royal welcome was given them and the Chicago boys are loud in their praises of their entertainers. They were dined at the Hotel Charlotte, lunched at the alleys and given an automobile ride round the city.

The game was a close one and the

BANQUET OF THE NEW YORK FLORISTS' CLUB.

marsh, Md., Chester I. Campbell, manager of the National Flower Show, W. P. Edgar, J. K. M. L. Farquhar and Mr. and Mrs. P. Welch, of Boston.

President John B. Nugent was in his happiest vein when, after the menu had been duly disposed of, he addressed the jovial assembly, extending a hearty welcome particularly to the guests from across the sea and introduced Patrick O'Mara to respond to the time-honored toast of "Our Night." Mr. O'Mara was witty and eloquent as ever—full of stories and most complimentary in his allusions to the distinguished horticulturists from abroad.

Ex-President F. R. Pierson spoke for the National Society and the Boston Show on which he has worked

been thrust upon his party from the moment of their arrival in America and of the cordial welcome extended on this occasion. He made a most favorable impression on his hearers by his apt and witty remarks and was vociferously declared to be "all right."

Chester I. Campbell, manager of the National Flower Show, was called upon next and he gave a terse account of the splendid progress being made and the inspiring outlook for this vast undertaking.

J. Austin Shaw then spoke in flowery language for "The Ladies." W. E. Wallace on behalf of the British visitors voiced in happy words their sincere appreciation of the hospitality enjoyed.

During the evening an orchestra rendered excellent music and some ac-

final count showed the Chicago teams winners by a small margin. A return game will be played in Chicago after Easter.

Cincinnati Bowlers.

The following were the scores bowled Monday, March 20:

Games		Games	
1st	2nd	1st	2nd
Critchell, 177	173	Witt'rst'tter, 125	161
A. S'nd'rbr'ch, 155	142	C. H'fm's't'r, 100	124
R. Murphy, 146	163	Westrich, 154	193
Heckman, 138	171	Horning, 152	160
O. H'fm's't'r, 107	146	Fritz, 143	148
E. Schuman, 193	169	W. Schuman, 134	114
C. Murphy, 144	170	W. S'nd'rbr'ch, 114	162

It is announced that the summer show usually held by the Royal Horticultural Society at Holland House Gardens, Kensington, London, will be transferred to Olympia. An unprecedented display, excelling any held at the Temple Gardens, where the space is limited, is anticipated.

CLUB AND SOCIETY NOTES.

The Bulletin of the American Association of Park Superintendents, just issued, contains a number of interesting and thoughtful communications from well-known park men on such topics as The Organization of a Park Commission; The Commission Plan of City Government as Applied to Parks; The Duties of a Park Superintendent; Park Music; Park Statistics, etc.

The regular monthly meeting of the Cincinnati Florists' Society was held in P. Olinger's salesroom, Monday, March 13th. Flower show matters were transacted. The preliminary schedule was mailed today. After the meeting lunch and refreshments were served by Mr. Olinger. A vote of thanks was tendered to Mr. Olinger for his kind hospitality.

At the Engelmann Botanical Club of St. Louis monthly meeting on March 13, H. W. Anderson read a paper on "Immunity from Disease in Plants. Secretary Pring announces that the check list of the local flora is ready for distribution and that the list comprises upwards of 3000 species of native plants together with their localities. Copies will be mailed to any address for 50 cents.

The following chairmen of special committees for the flower show which is to be given at Memorial Hall, Columbus, O., during the week of Nov. 13, were appointed Monday night, February 27, at a banquet of sixty members of the Columbus Florists' Association: G. C. Woodrow, finance; James Underwood, advertising; F. Bromwell, decorations. I. D. Seibert was appointed chairman of a committee to promote interest among florists outside of the city.

The preliminary list of the St. Louis Horticultural Society for their fall flower show has been mailed out and it is a very neat affair with good prizes. The Retail Florists' Association has offered \$50 in prizes to be competed for by their members; they will also have a large booth at the members' disposal to exhibit work not for competition. The St. Louis Florists' Club will also likely offer the same amount in prizes, the matter to come up at the April meeting of the club.

About seventy-five members of the Albany Florists' Club and their invited guests which included Prof. John A. Howe, James J. Karins of Philadelphia and Winfried Rolker of New York City, attended the annual banquet of the club which was held on February 25, in Donovan's hall on Western avenue. A short business meeting was held early in the evening and at 8.30 o'clock the large dining room was thrown open. President Fred A. Danker made a short speech in which he welcomed the guests and members and then turned the chair over to toastmaster John C. McAllister, who kept things moving every minute.

Grand Rapids, Mich.—The Grand Rapids Nursery Co., formerly located in the Ashton Bldg., has moved to Wenham Block, Monroe and Division streets.

WILLIAM ROBERTSON AND SOME OF HIS TROPHIES.

For twenty years this modest gardener has been showing us the difference between theory and practice. He is a born grower. Growers, like poets, are born—not made. No amount of education could have won all these first prizes, without the native gift. Like all geniuses, Mr. Robertson passes by the real things that count in life,

and prides himself only on things he can't do. The little square piece at base of picture represents the diamond medal, the championship bowling trophy at the Rochester convention, 1910. Mr. Robertson has been gardener for John W. Pepper at Jenkintown, Pa., from boyhood; has raised a family, owns property and, while the place is not the most elaborate in the vicinity, Mr. Pepper has the distinction of having a gardener who can make them all take his dust, however big their autos.

G. C. WATSON.

BAR HARBOR PERSONALS.

Wm. Miller of the Mt. Desert Nurseries is sending a large exhibit of his new fern, "Nephrolepis Milleri," to the National Flower Show. Mr. Miller has one large house devoted to the culture of this fern, which originated with him some years ago.

John H. Stafford of the Malvern greenhouses, who has been sick with the gripe, started on a visit to Philadelphia, returning to Boston on the 27th to attend the show.

Edward Kirk, gardener for Geo. W. Vanderbilt, has been confined to the house with a very severe attack of gripe. Also Mrs. Kirk has been very seriously ill for some time, but is now convalescent.

C. L. S.

NEWS NOTES.

Alton, Ill.—The greenhouses of the Joseph Krug Floral Co. will be thrown open to the public for the entire day on Thursday, April 6th.

Morrisville, Pa.—The Morrisville Nursery is having a closing-out sale of the ornamental nursery stock of the late Samuel C. Moon. Wm. H. McClosky, the former superintendent, is agent.

PERSONAL.

Julius Roehrs of Rutherford, N. J., sailed for a European visit on the Kaiserin Augusta, Thursday, March 16.

T. H. Shine, formerly decorator for the J. Van Lindley Nursery Co., Greensboro, N. C., has resigned his position.

C. J. Jones, manager of the Flower Store, Walnut Hills, Cincinnati, Ohio, and Miss Johnson, were married on March 15th.

H. Meyer, formerly at the Sheldon estate, Glen Cove, N. Y., has taken a position as superintendent for H. D. Davison, at Locust Valley, N. Y.

Frederick Moore, London (England), correspondent of HORTICULTURE, has moved to 23 A Kingwood Road, Munster Road, Fulham, London, S. W.

John White, a leading florist of Pittsfield, Mass., was married on March 20 to Miss Mary Grey, his bookkeeper. This is Mr. White's third marriage. He has been a widower for several years.

St. Louis visitors: E. J. Fancourt, representing S. S. Pennock-Meehan Co., Philadelphia; Charles S. Ford of A. Herrmann, New York.

Visitors in Boston:—Fred Lautenschlager, representing Kroeschell Co., Chicago; J. J. Karins, representing H. A. Dreer, Philadelphia, Pa.

New York visitors:—E. F. Coe, representing D. M. Ferry & Co., Detroit, Mich.; J. S. Brunton, Burnley, Eng.; J. Brown, Stamford, Eng.; E. Barker, Manchester, Eng.; W. A. Cull, London; C. Engelmann, Saffron Walden, Eng.; J. S. Gunn, Birmingham, Eng.; L. M. Graves, Harlington, Eng.; G. Brickett, London; C. Pratley, London; S. South, London; J. Simpson, Burnley, Eng.; W. E. Wallace, London; J. K. M. L. Farquhar, P. Welch, Chester I. Campbell, W. P. Edgar, Wm. J. Stewart, all of Boston.

CINCINNATI NOTES.

Wm. Murphy, who has been on the sick list the past week is again on duty.

Fire completely destroyed the residence of Louis Deunler, Baltimore Pike and McHenry Rd. A spark ignited the roof of the kitchen and fanned by a strong wind the two story building was in flames when the fire companies arrived. Loss, \$2000.

Charlie McCrea with Hardesty & Co. has been tendered the nomination as State legislator from Newport, Ky. Two years ago Charlie was the only democrat elected to the city council and no doubt the democratic organization is under the impression that he can again carry the city, but Charlie is modest and does not feel inclined to accept the nomination. However, he need have no anxiety about his election as few people have more friends than genial Charlie McCrea.

Washington, Ill.—Dr. R. E. Gordon has purchased the El Paso Carnation Co. from W. G. Plumb. Dr. Gordon, it is reported, will form a stock company and Mr. Snyder will be engaged as manager.

MUSHROOMS.

(A paper read before the Newport Horticultural Society, by William Grey.)

The cultivation of mushrooms has reached a higher state of development in France than in any other country, it being stated that more than 10,000,000 lbs. pass through the central market of Paris annually. It is only within the past few years that the growing of mushrooms has reached much importance in this country, the growing of them having been confined to gardeners of French and English training on a small scale. Of late years, however, quite an interest has been taken and the growing of them has been undertaken on a large scale in different parts of the country. Although they are considered by many to be a very uncertain crop to handle, with a suitable place to grow them in, properly prepared compost, and good spawn, success should be almost certain. The grower who is in the business on a large scale must be reasonably sure of success as a failure would be very costly.

Preparing the Bed.

Mushrooms can be grown in any place where an even temperature and a moist condition of the atmosphere can be maintained. The temperature may range between 50 degrees and 60 degrees but mushrooms grown in a temperature of 50 to 55 degrees will be of much better quality and the beds will produce over a longer period. The atmosphere should be kept in a moist condition but should not be stagnant. Some means of ventilation should be applied so that there may be a gradual change of air, and, if found necessary the moist condition can be kept up by spraying walls, etc.

In the preparation of the compost, fresh horse manure in sufficient quantity to make the size of bed desired is procured and placed in a pile to heat. When it shows signs of heating it should be turned daily until the heavy heat has subsided. Care should be taken that it does not become too dry in turning as it should be in a moist condition when ready to make up into beds. A light sprinkling when turning may be found necessary to keep it in the right state.

Spawning.

When the compost has been prepared as above it is ready to make into beds. The beds need not be more than 10 inches in depth, the compost being put in layer by layer and thoroughly firmed. After being made up the beds will heat to 110 degrees or over but spawning should not take place until the temperature drops to 90 degrees or less. Some authorities say that 90 degrees is too high a temperature to spawn and would prove fatal to the spawn. This would probably be the case if the spawn was planted as deep as the thermometer is placed as it is the general practice to thrust the thermometer into the heart of the bed or at least six inches deep. Although the temperature at this depth may be 90 degrees it will be found that it is considerable less nearer the surface or at a depth of three inches which is as deep as the spawn should be planted. It may therefore be considered safe to spawn when the temperature in the heart of

the bed has receded to 90 degrees. In spawning, the bricks are broken up into pieces about 2 inches square and planted about 3 inches deep and 9 inches apart each way. After spawning the bed should be thoroughly firmed and a week or so after a layer of loam an inch in depth placed over the bed. If the conditions have been favorable mushrooms will begin to appear in from four to six weeks and a bed should remain in bearing eight weeks or longer. When watering becomes necessary it should be done by frequent light sprayings of the beds, a heavy watering being injurious to mushrooms in the young stage.

Good spawn is essential to success and the grower should be able to know whether the spawn is good or not before planting. In good spawn the mycelium should be well run through the brick and of a cloudy or mouldy-like appearance. When it shows in a white-threaded state of development it is practically worthless. This condition may have been caused by having been left too long in the spawn bed or by being improperly stored in a place where the conditions caused the spawn to develop. Spawn can be kept for a long time if kept in a cool dry place.

Through the result of experiments made by Dr. B. M. Duggar, Prof. of Botany in the University of Missouri, there is now on the market what is called the American Pure Culture Spawn. This spawn is undoubtedly superior in vigor to the spawn usually imported, and it has also been found that the different types or varieties of *Agaricus campestris* can be separated by this method, the spawn being sold in three varieties under the names of Alaska or white, Bohemia or brown, and cream white or Columbia. In producing this spawn, cultures are taken from the tissues of the mushroom to inoculate the bricks instead of using spawn from other bricks or beds or spawn gathered in a wild state in the fields, so-called "virgin spawn."

AN AMERICAN NURSERYMAN IN JAPAN.

Our friend, Ernest F. Coe, of the Elm City Nursery Co., New Haven, Conn., is undoubtedly enjoying himself in the realm of the Mikado. Here is a Japanese gentleman's translation of a reading notice that has gone the rounds of the Japanese press:

AN AMERICAN HORTICULTURIST.

Mr. Earnest Francis Coe, president of a plant company in Elm City, Connecticut, N. A., is now staying in Kyoto Hotel with Mrs. Coe. His visit to Japan is to investigate our gardens and plants and finish some researches in Yokohama and Tokyo. His particular study is of marakan-pine (or Sekka-pine), agallochum and yew tree, as he has found these gingko biloba family very appropriate for ornamental aim in garden. Gardens in Kyoto and hills and mountains in the vicinity are now the objects of his strenuous researches, and his earnest study has given him the conclusion that podocarpus chinensis and yew tree are the fittest as garden trees, for these are, on account of their slow growth, by no means obstacles in garden view, and on the other hand serve as pretty good shades from strong sunshine in summer days. He bought several thousand sapling at plant companies in Yokohama and Kobe, and has got stone lanterns and ornament stones for tens of thousand yen in this city. Yesterday morning he expressly went to Mount Koyao with Mrs. Coe, as he happened in the course of his researches here that a rare kind of above-mentioned plant can be found in the sacred mount. — *The Kyoto Shimbun*.

Obituary.

George Lorenz.

George Lorenz of Astoria, Long Island City, N. Y., died on Saturday morning, March 18. He had a stroke of apoplexy about three years ago and a second one last September, which together with Bright's Disease caused his death after much suffering. His age was 71 years.

Mr. Lorenz came to this country from Bavaria when a youth of 17. He worked as gardener for Mr. Rogers at Poughkeepsie, N. Y., and then for the elder Bridgman as foreman of the greenhouses at Astoria. This place he, in company with Mr. Wiegand, bought out and for many years continued it as Wiegand & Lorenz. On the death of Wiegand, Mr. Lorenz bought his interest and conducted the business until five years ago when he retired. A widow, four sons and two daughters survive.

Mr. Lorenz was for many years a member of the New York Florists' Club and the S. A. F., attending the conventions of the latter regularly and was of a companionable, genial temperament, which made for him many friends.

Herman Lawrentz.

Herman Lawrentz, a well known and highly respected florist, who has conducted a greenhouse for many years on the Torrington road, Hartford, Conn., was found dead in his bed March 17. He was about 70 years of age and had not complained of feeling ill at any time. Mrs. Lawrentz is in a critical condition from the shock caused by the unexpected death of her husband and owing to her advanced age fears are entertained that she may not recover. Mr. Lawrentz's death was caused by heart disease.

Marcus C. Longfellow.

Marcus C. Longfellow, a former florist of Anderson, Ind., died on March 11th at his home on Yorktown Road, near Muncie, aged fifty-one years. He is survived by a widow, daughter and two sons. Burial was at Beach Grove Cemetery.

A NOBLE BEQUEST.

The old Nathaniel Ropes mansion in Salem, Mass., filled with costly antiques, and which, from Colonial days, has been one of the most picturesque structures in Salem, will ever be dedicated to the uses of the public, under the wills of Elizabeth O. and Mary P. Ropes, granddaughters of the original owner.

The Misses Ropes have provided that the house shall always remain as a memorial to the Ropes family and have incidentally provided for free instruction in the knowledge of botany. For that purpose the extensive grounds are to form a botanical garden and a portion of the same, together with other land, which the trustees are authorized to purchase, is to be set aside as a public park.

To maintain the house in its present condition and to carry out the purposes of the testators they bequeathed \$144,000.

British Horticulure

The Sweet Pea Boom in Britain.

A well directed effort is being made to have the sweet pea regarded as the Coronation flower in the festivities which will take place in the summer this year. Judging from the many firms who are now offering this flower to the gardening public there is no diminution in the popularity it has attained in the last few years. The National Sweet Pea Society is still going strong. Since the recent annual meeting 63 new members have joined, while several additional local societies have become affiliated. A further series of trials will be made in Surrey this season by the Society, a number of the leading home and foreign raisers having sent varieties. The Society's "Year Book" for 1911 has lately been brought out, and it is once more filled with good things for the sweet pea enthusiast. An important feature is the report of the subcommittee appointed to examine sweet pea diseases. Growers have particularly suffered from the ravages of a disease which has been popularly described as "streak." Affected plants have been subjected to a critical examination by experts. The results so far have not thrown much additional light on this somewhat strange ailment. In most cases, it appears, eel-worms were found to be injuring the roots, and the fungus *Thielavia basicola* was discovered. Mr. Chittenden, the Royal Horticultural Society's expert, strongly advises the eradication of the eel-worm from the soil with a view to checking the disastrous spread of the infection.

The Cult of the Chrysanthemum.

Another organization which looms prominently in the horticultural world is the National Chrysanthemum Society. At the annual meeting on February 6th, Sir Albert Rollit, who presided, was able to congratulate the members on the excellent progress which was being made. The November show, he stated, was considered the finest the Society had ever held. He alluded to a visit paid by representatives of the Society to France; these visits were very valuable in promoting a good feeling between France and Britain. In December the Society held a very successful conference in London. The Society were co-operating in the arrangements for the International Exhibition at Chelsea in 1912; several of the Society's officers are members of the exhibition's executive. As regards the financial position, the year had closed without any unpaid debts, whilst there was a balance in hand. Sir Albert Rollit was re-elected president; John Green, treasurer; Richard Witty, secretary; Thos. Bevan, chairman of committee, and C. Harman Payne, honorary foreign corresponding secretary. A pleasing feature was the appointment of M. Viger, president of the National Horticultural Society of France; M. A. Truffaut, premier vice-president of the same society; M. Maxime de la Rocheterie, president of the French Chrysanthemum Society; D. B. Crane, and J. H. Witty as fellows of the Society.

A Few Novelties.

This is the time when the study

CARNATION WASHINGTON
Dark Pink Sport of Enchantress.

table becomes laden with the printers' masterpieces issued by the nursery and seed firms. One cannot help noticing that in recent years there has been a decided advance in the high class character of the British catalogues. The best examples of letterpress work and illustrations are brought into force to enumerate the leading lines of the principal houses. There is once again a wide array of novelties to satisfy the demands of the most exacting enthusiast. Messrs. Wells & Co., of Merstham, are putting on the market nine meritorious chrysanthemum novelties. These include Lady Carmichael, white; Mrs. Gilbert Drabble, marble-white; E. M. Quitten-ton, deep crimson, with gold reverse; Marie Loomes, chestnut terra-cotta; H. E. Converse, reddish bronze, with gold reverse; Mrs. R. E. Witty, reddish terra-cotta, the florets being broad and drooping; William Turner, white; Mrs. G. C. Kelly, deep old rose, with silver reverse; Wells' White. The new singles embrace: Merstham Rose, rose, white border; Miss Hil-da Wells, crimson, with gold band circling disc; Crimson Jewel, crimson, tipped with gold; Sam Standen, rose, white disc; Yellow Fortescue, a spidery variety from Japan; Merstham Gem, crimson, with yellow circle round disc. Backmore and Langdon are sending out Begonia Rose Queen, an exhibition variety; Winsome Partner, reddish salmon; Kennerley Rumford, apricot; Madame Clara Butt, pale rose, lightly mottled with white; Duchess of Cornwall, dark crimson. Messrs. Sutton & Sons are offering a new single aster, Sutton's Southcote Beauty. Amongst the new dahlias, Messrs. Hobbies, Ltd., are distributing: H. L. Brousson, a pink; Mrs. Douglas Flemming, white with faint green markings at the base

of the florets; American, White, with crimson stripes and markings. Raynes Park Gem is the name of a dark crimson bedding cactus dahlia which Messrs. Carter & Co. are offering. The same firm have some new hybrid eschscholtzias. A late white aster has been added to the list by R. H. Bath, Ltd. This firm are handling the two new American sweet peas, Ethel Roosevelt and Florence Nightingale. A specialty in rock garden plants is made by Barr & Sons, who are offering *Onosma Helveticum*, a new species of the Golden Drop; this has long, dark green leaves, with citron-yellow flowers. Some new hybrids of aubrietias are likely to prove popular. Toogood & Sons are making a special feature of the following antirrhinums: Toogood's Lightning, vermillion; Buff Queen, rose, with cream lip; Prince Chamois, golden chamois; and Golden Fairy, shell pink, with pale yellow blotched lip.

Items of Interest.

Mr. T. W. Sanders, F. L. S., has been presented with an illuminated address in recognition of his services to the National Amateur Gardeners' Association, which has just celebrated its 21st birthday.—A well-known horticulturist has lately passed away in the person of Mr. George Daniels, one of the founders of the firm of Messrs. Daniels Brothers, seedsmen, of Norwich.—A National Daffodil Society is the latest project to receive consideration in gardening circles. The North of England Horticultural Society, formed a short time ago, has made an encouraging start. It is proposed to hold a big show in Leeds in August or September.

W. H. ADSETT.

Foreign Notes

Paris Chrysanthemum Committee.

This body which acts under the National Horticultural Society of France, has just drawn up and published its annual lists of the best chrysanthemums for various purposes. There are 14 sections in all giving name, raiser, date and color. The sections contain the best 50 large flowering earlies, the best 50 dwarf large flowering decoratives, the best 40 for standards, the 30 best late flowering, the best 30 incurves, the best 25 hairy, the 10 best anemones and others. This year a new section, the best 25 single flowering varieties, has been included, owing to the interest that is being aroused in them in France.

Mr. Geo. Schneider.

At the annual dinner of the French Horticultural Society held in London, Eng., a few weeks ago, under the presidency of M. Philippe de Vilmorin, some concern was created by the absence of Mr. Geo. Schneider, the Society's permanent chairman, through severe illness. He has many friends the wide world over, and those of them in America will rejoice to know that at the time of writing these lines, "Papa Schneider" is making good progress towards recovery and is allowed by his medical man to get up for a few hours every day. We all wish him a speedy and complete recovery.

National Chrysanthemum Society of England.

At the annual general meeting of this society the following officers were elected: President, Sir Albert K. Rolit; treasurer, John Green; chairman, Thomas Bevan; vice-chairman, E. F. Hawes; foreign secretary, C. Harman Payne; general secretary, R. A. Witty. Honorary fellowships were awarded to Messrs. Viger and Truffant of the National Horticultural Society of France, and to M. Maxime de la Rocheterie, president of the French Chrysanthemum Society. M. Louis Gentil, editor of *La Tribune Horticole*, Brussels, was nominated a corresponding member.

National Horticultural Society of France.

The annual report of this great French society has just been published. Its membership has during the past ten years very largely increased, there being at the present moment between four and five thousand names on the roll. Last year two grand International Horticultural Shows were held in Paris, one in May and the other in November, and in conjunction there were two congresses. The library—probably the best and most extensive horticultural library in Europe—received large additions and a supplement to the library catalogue was

ACACIA PUBESCENS.

ACACIA PUBESCENS

At Greenhouses of Joseph Fuller, Leominster, Mass.

This fine specimen of this popular decorative subject is growing in the greenhouse of Joseph Fuller, Leominster, Mass. It is nine years old, having been planted out where it now stands, from a six-inch pot. The soil is a sandy loam and it is easy to see that the acacia enjoys it.

Mr. Fuller says that he keeps it

well-watered at all times and during the growing season syringes once and twice a day in clear weather. From December 1 to February 1 he gives it liquid manure twice a week.

The tree has a spread of 24 feet from tip to tip across the head. Large quantities of richly flowered sprays three to five feet long are cut from it each season.

published. Everyone interested in garden bibliography will welcome this new effort on the part of M. Georges Gibault, the society's excellent librarian. The monthly journal appears with unfailing regularity, and contains reports of the society's meetings, various shows, papers of scientific or practical importance, etc.

International Horticultural Exhibition, London, 1912.

Considerable progress is being made by the executive committee of this great show. Queen Alexandra has recently signified her willingness to be one of its patrons. A preliminary schedule has been prepared and issued containing over 400 classes. Copies may be obtained of the secretary Ed. White, 7 Victoria street, London, S. W. The show has been fixed to be opened on the 22nd of May, 1912, and to remain open till the 30th of that month. The site will be the grounds of the Royal Hospital, Chelsea, a space of about 20 acres having been acquired for the purpose. Subscriptions and guarantees are being asked for and various advantages will be offered to those who enter their names in either of these lists.

Societe Royale de Flore.

This is reputedly the oldest floral society in Europe. It is known to have been in existence as far back as 1650, but records anterior to that date cannot be traced. It may possibly have

been an outcome of the tulipomania that raged in the low countries a little earlier in the 17th century. At first it was known as the Confraternity of St. Dorothy, but later the name was changed to that given above. It is under the patronage of H. M. the King of the Belgians. Quite recently Mr. R. Hooper Pearson, editor of the *Gardener's Chronicle*, and Mr. Harman Payne were elected members of honor of the society which includes among its members many well known horticulturists.

Royal Horticultural Society.

The growth and expansion of this great English Horticultural Society is practically without a parallel. From the annual report just issued and which contains much interesting matter relative to the past year's work we notice that the total members at the end of 1910 was 12,043, a number never reached by any other similar society. The financial condition appears to be equally satisfactory for on the year's working the excess of receipts over expenditures amounted to about \$41,850.

Monument to Ernest Calvat.

The subscription list opened for the purpose of raising a fund to place a monument over the grave of this illustrious French chrysanthemum grower has now reached the sum of over 1250 francs. Donations may still be sent to M. Ph. Rivoire, secretary of the French Chrysanthemum Society, 16 rue d'Algerie, Lyons, France.

WISCONSIN UNIVERSITY GIVES RECOGNITION OF ACHIEVE- MENT.

Special testimonials of recognition of their eminent services in the development of agricultural thought and practice were conferred upon Alexander Galbraith of Janesville, and William Toole of Baraboo, at the annual recognition exercises of the College of Agriculture of the University held in connection with the Farmers' Course. These men were selected for this particular recognition by the University because of their important work in the development of Wisconsin agriculture. Dean H. L. Russell reviewed the life work of each man in presenting them to President Charles R. Van Hise who conferred the testimonials.

Wm. Toole, of Baraboo, is well known throughout Wisconsin and many other states as one of the leading horticulturists of the country. While he has been particularly a specialist in the improvement of the pansy, he has also advocated better methods of farming in all lines and has also been instrumental in organizing a better type of social life in the community in which he resides.

Mr. Toole was born in Lancashire, England, in 1841, and came to Rhode Island a few years later. In 1859 his father moved to Sauk County, Wisconsin. In 1887 he moved to his present homestead known as Pansy Heights, two miles from Baraboo. He has built up an important business as a dealer and grower in flower seeds and plants with special attention to the development and cultivation of the pansy. He has been a leading prize winner at many shows with this flower, and has originated a number of varieties of high quality. His most valuable service to his community has been through his work for better educational facilities and as a prime mover in the Wisconsin State Horticultural Society. He was an early advocate of the strong College of Agriculture. He has held numerous offices of farmers' organizations, and for the past two years has been president of the State Horticultural Society, and for the past five years has been president of the Skillet Creek Farmers' Club, a social organization of farmers which has secured country-wide notice because of its work in aiding the improvement of rural social conditions. The influence of Mr. Toole has been state-wide in favor of permanent and substantial agriculture, and it was for this unselfish service that he was recognized by the university.

CATALOGUES RECEIVED.

Among recent publications which have come to our desk the illustrated catalogue entitled Palisades Popular Perennials, 1911 supplement of new, rare and meritorious hardy plants, is particularly pleasing and interesting. Among the desirable things of recent introduction therein listed we notice the following: *Helenium autumnale* superbum rubrum; *Aster Beauty of Col-*

wall; Hardy *Fuchsia Riccartoni* hybrids; *Lathyrus White Pearl*; *Siberian Edelweiss*; *Primula veris superba* fl. pl.; *Wallflower Cloth of Gold*; *Chrysanthemum Nipponicum*. These and many more are desirable additions to any garden and the Palisades Nurseries, which are located at Sparkill, N. Y., are entitled to much credit for what they are doing to disseminate the knowledge of these improved garden subjects.

Easter Plants

Send your orders direct to the Mill, the great Mill of Plant Production that never ceases, of Godfrey Aschmann, well known for Easter Plants from ocean to ocean.

LILIUM MULTIFLORUM green as grass, good foliage from bottom up, 6-in. pots from 12 to 30 inches high. Plants with 5 to 10 buds, 10c. per bud; plants with 2 to 4 buds, 12c. per bud.

HYDRANGEA OTAKSA every branch nicely staked up, 6, 7 and 8-inch pots, 35c., 50c., 75c., \$1.00 to \$1.50.

SPIREA GLADSTONE, 6 and 7-inch pots full of flowers, 35c., 50c., 75c., \$1.00.

CINERARIA HYBRIDA GRANDIFLORA, all colors, mixed, 5½ to 6-inch pots, 25c., 35c., 50c., 75c., \$1.00.

AZALEA INDICA, selected by myself on my trip to Belgium last year, 1910. Good best American varieties, Mme. Van der Cruyssen, double pink, 75c., \$1.00, \$1.25, \$1.50 to \$2.00. Simon Mardner, double pink, *Vervaeana*, *De Schreyeriana*, *Empress of India*, double variegated, 50c., 60c., 75c., \$1.00, \$1.25, \$1.50, \$1.75 to \$2.00. Apollo, red, 50c., 60c., 75c. *Deutsche Perle*, Niobe, white, 60c., 75c., \$1.00, \$1.25 to \$1.50. Bernard Andreas Alba, also white, and large Niobe, \$1.50 to \$2.00.

CRIMSON RAMBLER ROSES, large plants 30 by 36-40 inches high, 75c., \$1.00, \$1.25, \$1.50.

HYACINTHS, four best colors: Gertrude, pink, King of the Blues, dark blue, Grand Maitre, light blue, La Grandesse, white, 4-inch pots, \$12.00 per 100.

TOURNESOL, best double variegated and Marillo double rose Tulips, 3 bulbs in one pot, \$1.80 per doz., \$15.00 per 100 pots.

VON SION DAFFODILS, best double yellow narcissus, 3 bulbs, in 6-inch pots, \$2.50 per doz. pots.

ARAUCARIA EXCELSA, 6 and 7-inch pots, 4, 5, 6 and 7 tiers, 4 to 5 years old, 25, 30 and 35 inches high, 75c., \$1.00, \$1.25, \$1.50 to \$2.00.

ARAUCARIA GLAUCA, 6 to 7-inch pots. **ARAUCARIA ROBUSTA COMPACTA**, 6 to 7-inch pots, \$1.25, \$1.50, \$1.75 to \$2.00.

KENTIA FORSTERIANA, 6-inch pots, 30 to 40 inches high, \$1.00, \$1.50 to \$2.00.

KENTIA BELMOREANA, single plants, 6 to 7-inch pots, \$1.50 to \$2.00.

KENTIA BELMOREANA, combination plants, 3 plants in one pot, 30 to 40 inches high, \$1.25, \$1.50 to \$1.75.

FERNS

ASPARAGUS SPRENGERI, 4-inch, 10c.; 2½-inch, 4c.

NEPHROLEPIS BOSTONIENSIS, 5½ to 6-inch, 40 to 50c.

NEPHROLEPIS SCHOLZELI, 6-inch, 50c.; 7-inch, \$1.00.

WHITMANI, 7 to 8-inch, \$1.25 to \$1.50.

SCOTTII, 5, 5½ to 6-inches, 35c., 40c., 50c.; 7-inch, \$1.00; 8-inch, \$1.50.

NEPHROLEPIS GIATRASIL, a new fern very graceful, of weeping habit, 5, 5½-inch pots, 30c., 40c., 50c. Small 4-inch, 20c.

LATANIA BORBONICA (Chinese Fan Palm) 30-inches, 6 to 7-inch pots, 40c., 50c., 75c.

DRACAENA BRUANTI, 6-inch, 35c. to 40c.

BEGONIA REX, 5½ inches, 25c.

IPOMEA NOCTIFLORA or Aschmann's well-known, pure white, waxy Moon Vine, 2½ inch, \$5.00 per 100. Now is the time for you to plant them into 4-inch pots. will make plants for you by May 25th.

FERNS FOR DISHES, assorted, \$4.00 per 100.

Cash with order please, no references. All plants travel at purchaser's risk only. Mention if pots are wanted.

PHILADELPHIA, PA.

CHICAGO NOTES.

C. N. Dickinson of the E. H. Hunt Co. has returned from a trip to Denver and other western cities.

The J. C. Moninger Co. have their new catalogue ready for the press. They report an unusually busy time.

Strail & Hahn, who opened a store in the Wellington Hotel one year ago and who have established a nice business, have been obliged to leave that location on account of advanced rent. Another equally desirable place will doubtless be found.

It looks this year as if the ease with which white flowers have been colored green for St. Patrick's Day has lessened the demand for them. The novelty is wearing off and there were many left over to be thrown out last week, as they should.

The Misses Frances E. Stollery and Nettie C. Moore are opening a retail store at 627 Evanston avenue. Miss Stollery is a sister of the Stollery Bros., florists, and Miss Moore is the head of the firm known as the N. C. Moore Co. of Morton Grove, Ill.

Work is begun on the new range of houses for the Desplaines Violet Co., at Desplaines, Ill. Foley Mfg. Co. supplies the wood work and state that they are contracting more work than usual this spring, as the low price of glass and building material is enabling many to build who otherwise could not.

Poehlmann Bros. will cut about 100,000 *Formosum* lilies, which they find preferable to *gigantum* for cut flowers. The thinner foliage makes the blooms larger and more numerous because admitting more air while the *giganteum* being stockier and carrying heavier foliage makes the better pot plant.

A genuine black hand scare has visited one of the retail florists. Frank Williams, 35 Randolph street (whose Greek name he long since discarded) left for his native land a month ago, and now his wife, who has charge of the store, has been threatened with death if she does not deposit money where directed. An employee is suspected.

PHILADELPHIA NOTES.

Eugene Weiss has sold out his greenhouse establishment at Hatboro to his brother Harry Weiss and will go on an extended trip in the hope of recovering lost health.

B. Eschner of M. Rice & Co., reports Mr. and Mrs. Rice at Leipsic, Germany, attending the great international exhibition which is now going on in that historic city. Mr. Rice is on his annual European tour and will return with a full budget of novelties for the florists' trade.

Linnæus Cox, rose grower, Wissinoming, will build three houses, 30 x 70 ft. in the near future. The contract for the materials has been awarded to the Lord & Burnham Co. Dennis Connor, the local agent of the company, reports business very active at present and quite a wave of activity among the commercial flower growers in this vicinity. This follows naturally on the good season the cut flower men have experienced. According to

FIRE RECORD.

Plymouth, Mass.—A greenhouse on the country estate of Levy N. Mayer was destroyed by fire on March 16th. An overheated furnace is said to be the cause; loss about \$1,000.

Ansonia, Conn.—Peters & Palmer Greenhouses, 108 Holbrook street, were damaged by fire the evening of March 14th. About one-half of the building was destroyed and the remainder considerably damaged. Loss is estimated at \$400 or \$500 with no insurance.

AN ACCREDITED FUNGICIDE.

We have received from the B. G. Pratt Company of New York a pamphlet on Fungous Diseases of Fruits, Vegetables and Flowers, describing how these pests are controlled effectively, easily and cheaply with "Sulfocide," a compound made by the B. G. Pratt Company. The subject of which it treats is of intense interest to the farmer, fruit grower and florist and we do not hesitate to commend a perusal of its contents by our readers. It contains testimonials from such recognized authorities as Dr. J. B. Ewing, Booneford, N. C.; Mr. Horace Roberts, Moorestown, N. J., ex-President of the New Jersey Horticultural Society and one of the largest truck growers in the state; Hon. George T. Powell, Ghent, N. Y., President of the Agricultural Experts' Association, and Prof. John B. Smith of the New Jersey Experiment Station.

Morgantown, W. Va.—W. R. P. Stewart, florist, has gone out of business here and moved to Ohio.

AMOS H. WHIPPLE, Proprietor

WILLIAM KLEINHEINZ.

The chief editor asks for a few remarks on William Kleinheinz—as his picture is to adorn this issue. It gives me great pleasure to say a word or two on that subject. I have had it in mind for a long time, and—now that the opportunity has come—*Gemutlicht heit!* Here goes.

Please do not expect me to throw bouquets. If I am to paint a picture it must be a true one. The spirit of Oliver Cromwell—who told the artist to paint him “warts and all”—permeates me in this effort.

P. A. B. Widener is many times a millionaire and his tastes are of the cultivated kind. He built a splendid mansion in one of the loveliest rural districts around Philadelphia and the settings and surroundings are in keeping with the generous and palatial ideas of the founder. To get the right man as superintendent of an estate or

WILLIAM KLEINHEINZ

this character was not easy, and many were discarded before the keen and catholic shrewdness of Paul Huebner suggested William Kleinheinz.

William Kleinheinz rose to the opportunity and made good. Digging into the lad's history we find that, added to native ability, he had some good training. Born in Stuttgart, Germany, served apprenticeship in same city in a commercial place. One year as student at the Royal Gartenblau School in Hohenheim, Royal Garden, Stuttgart. Head gardener three years for Hungarian nobleman. Landed in America, 1889. Worked in several commercial places in United States and wound up as assistant to Paul Huebner, superintendent of the Reading R. R. landscape department, from which he went to take charge of the Widener place, June 15th, 1899.

Mr. Kleinheinz has been president of the Gardeners' Association for two terms, and has filled this exalted position with great ability. He donates a champion cup for competition at the National Show, and will be on hand on that great occasion to greet all his old friends and extend the glad hand to his fellow-craftsmen generally.

R. VINCENT, Jr. & SONS CO.

White Marsh, Md.

You can just as well buy your French bulbs from the most reliable source of supply as not because they don't cost any more money and they will average better returns than most bulbs of various brands on the market. The House of Bremond in Ollioules, France, is the home of the French bulb industry. The standard of quality maintained for so many years is marvelous considering the various seasons and conditions at times to be contended with.

If you knew what care is taken by Mr. Bremond to assure his clients of superior quality you would never buy other brands. The Horseshoe Brand in French bulbs are Bremond's goods and are from the choicest fields in France.

THE GLADIOLUS.

As We Knew and Grew It Fifty Years Ago—By H. Youell, Syracuse, N. Y.

Read before the American Gladiolus Society at Boston.

When asked to contribute a paper for the initial meeting of the Gladiolus Society, I gladly consented, as I feel greatly interested in the success of the Society. This arises from the fact that fifty years ago, my father was the largest grower of gladioli in England and I am proud of the fact that *Brenchleyensis* was disseminated by him.

It may be interesting to many if I recall, as they occurred, some of the facts relating to the early history of the *Gandavensis* varieties fifty years ago. It is generally known that the Gladiolus family is indigenous to Africa, and I know positively that *Gandavensis* originated there, being found by a French sailor and taken by him to Paris. It is to Frenchmen we are indebted for the great progress made fifty years ago, for they laid the foundation, so to speak, that we have built upon and made possible the grand flowers we have today.

It may not be generally known that Napoleon the III. was passionately fond of rare plants and flowers, and it is owing to his interest and enthusiasm that France today holds her position in the floral world. So eager was the Emperor to add to his collection of rare plants, that he offered large bounties to his soldiers, sailors and fishermen or to travelers who would bring him any good novelties from foreign countries. So it came about that *Gandavensis* was taken to Paris and placed in the hands of Mr. Souchet, the head gardener of the Emperor, and through his industry and ability came the beautiful varieties.

I take it there are not many who can recall the old *Gandavensis* with its broad yellow, poorly shaped flowers with a crimson edge, but what a beautiful and wonderful flower it was considered when first sent out, for the Colvilli varieties were the only ones grown and were called Jacob's Ladders in my childhood days.

Bowensis was the next one to make its appearance. This was a dirty brick red, but was a good shaped flower with large spikes. Fanny Rouget followed; this was a very pleasing pink, but only a medium sized flower. It was about 1855 or 1856 that these made their appearance and in 1857 the English people heard of the wonderful

flowers to be seen in the Royal French gardens. In August of that year Queen Victoria, with the Prince Consort and a very large retinue paid a visit to Napoleon. At that time the gardens were a blaze of glory with their many colored flowers and the Queen and all her court were completely carried away with the sight and returned to England with wonderful stories of what they had seen. The Queen was so delighted and enchanted that the Emperor ordered Mr. Souchet to send her a large supply of bulbs and so generously was the order obeyed, that the head gardener at Osborne could not find room for all and, rather than throw them away, he gave the surplus stock to my father, who was a personal friend. This was the nucleus of what eventually became the largest collection in England fifty years ago.

Soon after the Queen's visit to France came what was considered the wonder of the age in the floral world, for Mr. Souchet through Victor Verdier and Messrs. Vilmorin sent out quite a number of very beautiful varieties, some of which I believe are still grown in England. The names of a few I recall are John Bull, Victor Verdier, Napoleon Third, Queen Victoria, Calypso, Duc de Malakoff, Dr. Andry, Ceres, Endymion and LaReine.

I may be excused for feeling proud of the fact that my father disseminated the following year that grand old *Brenchleyensis*, still the acknowledged leader of its class. Its origin is a mystery. How it came into my father's possession is as follows: Some years previously he had in his employ Mr. W. Casey, foreman of the hard-wooded department, and traveling occasionally (he was later connected with Hugh Low & Co.) on one of his journeys through Kent, he visited a small place called Brenchley. In a cottager's garden he noticed several flowers of this variety and after a great deal of persuasion and what must have been a large sum to the owner (25 pounds), he secured the stock. All the information he could gather as to its origin was that a son who was a sailor had brought the bulbs home from some foreign country—Africa, it was believed at the time. How popular *Brenchleyensis* became is best attested by the fact that from 1860 to 1864 our sales averaged 300,000 yearly.

Our nurseries were situated at Great Yarmouth (made famous by Charles Dickens in David Copperfield), and less

than two thousand years ago the North Sea flowed where the town now stands, so of course the soil was very sandy and to that fact I attribute our success in cultivating the bulbs. The only thing used to enrich the soil was rotten brewers' hops, and disease was a thing unknown to us.

I have always been and am still a very strong advocate of printers' ink and flower shows, both for educational and commercial purposes, and believe my past experience justifies me, as I shall show. Prior to 1860 we had sent large quantities of gladiolus blooms to the Crystal Palace for decorative purposes free, and were assured that they were much finer than any exhibited for prizes. After much persuasion, my father consented to compete and had several large beds prepared and planted with the choicest kinds, to be raised for exhibition. The amount of the prizes was very small—for the best collection \$12, best twenty-four spikes \$5, best twelve spikes \$2.50; not much of an inducement for three men to travel one hundred and forty miles, pay excess luggage and hotel bills for three days, and compete against such men as Standish, Turner, Paul Cutbush and others. We went and conquered, not only the prizes but all the London papers from the Times down: they gave us columns of the best possible advertising, and that was not all, for the two foremen and myself booked orders the first day for more than three hundred pounds, besides distributing 5,000 catalogues in the two days. Did it pay?

The method in vogue at that time for staging the flowers was to have green painted boards, 3 ft. 6 in. long by 2 ft. 6 in. wide; each board had 24 holes fitted with tin tubes to hold the water. Our boards sloped on an angle of 45 degrees, which showed off the back row. We showed three spikes of each variety together with a little foliage mixed in. Some exhibitors used garden asparagus, others fern fronds, but I must say the effect of using the gladiolus foliage was by far the neatest and most appropriate. The London Times, speaking of our exhibit, said: "The flowers showed the highest cultivation and their staging was a finished and artistic piece of work and a revelation." Certain it is that our flowers were better colored and had far more substance than those grown around London or even in France, which I attribute to the salt air and our sandy soil.

BULBS FOR

Our Specialty is GLADIOLI

Our leading variety is "America" of which we sell 1,000,000 (one million) bulbs a year. It's the florists' variety of yesterday, today and will be tomorrow.

We are also headquarters for all other varieties of merit for Florists' use, such as Augusta, May, Brenchleyensis, Shakespeare, Superb white and light mixed, etc., etc.

A complete stock of fancy varieties. Noted the world over for Superior Merit.

SPRING PLANTING

We are strong not on Gladioli only, but we are in leading position to supply first class stock of Home Grown Lilioms, German and Japan Iris, Cannas, Hyacinthus Candicans, Lycoris Squamigera, Paeonies, Tritomas, etc., etc.

Inquiries and orders given prompt attention.

HIGH GRADE EASTER PLANTS

¶ *Visitors to the National Flower Show* are cordially invited to visit our greenhouses, also our exhibit at Mechanics Hall, Boston, and inspect our superb stock of *Lilies, Azaleas, Acacias and other Spring Plants and Easter Novelties.*

W. W. EDGAR CO., Waverly, Mass.

EASTER NOTES FROM CRAIG'S.

"Rhododendrons will be among the best Easter plants this year," says Robert Craig, "because Easter is late this year and as soon as the plant is out of bloom it can be transferred to the garden and form a permanent ornament. Besides, a shapely, well-furnished rhododendron shows up better than an azalea costing twice as much."

Hydrangeas should also be good Easter plants this year as they will come in nicely for porch use by the time Easter is over. They are finely finished, clean, shapely plants, well set with buds.

Nephrolepis Smithi is another of the many sports, having very finely-divided fronds and unique in some ways. Mr. Craig gave it as his opinion that it is the best of all for 4-inch pots and a perfect gem for transferring to jardinières, fern dishes or mixed baskets. It came from the Botanic Gardens at Washington, and is named after the superintendent, W. R. Smith. In his humorous way Mr. Craig began to expound on the wonderful way the old Boston fern has developed. "For a hundred years or more this staid, old Puritan," said he, "behaved itself according to the rules. Then all at once it went on a tear, and shot the town up. Had a regular orgy. Met all comers, and gave them surprise after surprise. No one could tell what it would do next, and timid housewives took

their babies indoors when they heard a noise. The stillness of the solemn midnight was filled with Bedlam. Golden dawn, brilliant noon and dewy eve alike beheld its capers. Mankind stood aside in little groups and looked with bated breath in awe and wonder. And no one can tell where this is going to stop. It may, like Tennyson's brook, go on forever. At all events it's the real and only original true blue Sport of the plant kingdom."

We all thought when that cyclamen expert of Craig's—"Old man" Winship—was gathered to his fathers some years ago, that his place could never be filled. But we are agreeably surprised to find that it has. Ernest Thomas is the man. He is a protege of Edwin Lonsdale and is said to be one of the best cyclamen growers in the country. The cyclamen is more of a Christmas than an Easter plant, of course, but there are still a few batches of well developed plants to be seen. One of the good new forms is a fringed variety called fimbriata carminea marginata, one of the butterfly section, but more symmetrical and when fully developed, has none of the objectionable raggedness of form. The color is white and blush, fringed with bright carmine.

We commented on the trained Rambler roses in a previous issue, so it is needless to say more now; but one interesting remark of Mr. Craig's may be noted. Pointing out a lot of American Pillar, he said, "That's the one that sent London crazy, and sent the Englishmen over here to clean up the country. That's the reason there has been no stock of it here to speak of

since." It is lovely as to color, bears a big truss like a bunch of grapes, and is a wonderful keeper—the flowers hanging on longer than on any other rose.

There is a new sport here of the Lorraine begonia—unnamed as yet. It came from the Lonsdale "dark pink" Lorraine, is much more brilliant than its parent and even more floriferous, and is a tremendous keeper—the flowers hanging on in attractive form for months. If Lorraine be the best Christmas plant, and it is, then this variety is the best of all the Lorraines, and in a class by itself.

We were also shown the great new summer bedder—*Begonia luminosa*—the most brilliant of its class. At auction last year in New York it was eagerly snapped up at 25 cents a plant.

G. C. WATSON.

THE BOSKOOP EXPOSITION.

The bulidings for the exhibition of forced shrubs and perennials, which will be held at Boskoop (Holland), in April of this year, are almost finished. They will be heated free of charge by the Dutch Central Heating Company of Amsterdam, and in the evening illuminated by electric light. In the exhibition grounds there will be a post and telegraph office, and every hour there will be a passenger boat between Boskoop and Gouda, the nearest railway station. The honorary committee consists of 40 members. The number of exhibits promised amounts to five hundred, the number of novelties to more than a hundred and that of little known plants sixty or more.

PRICE LIST—EASTER 1911

COME AND SEE OUR STOCK

Any Buyer seeking quality will be well repaid by inspecting our large stocks of Crimson and Pink Ramblers, Hydrangeas, Lilies, Azaleas, Rhododendrons, Spiraeas, etc.

The late Easter will make absolutely no difference to us. Our plants will not be too forward as they are grown very cool.

Stock timed just right for Easter. Send us your orders at once to insure satisfaction.

LILIES—Our stock is exceptionally good this year.
Plants from 4 to 8 blooms.....12 cents per bloom
Made-up pans from 12 to 20 blooms.....12 cents per bloom
Plants with less than 4 blooms.....15 cents per bloom

AZALEAS

We have the largest and finest stock of Azaleas we have ever had, including Van der Cruyssen, Vervaeana, Emp. of India, Emp. of Brazil, Niobe, Bernard Andre Alba, Prof. Wolters, etc., 75c., \$1.00, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00, \$3.50, \$4.00, \$5.00, \$6.00, \$7.50 and \$10.00 each.

CRIMSON RAMBLER ROSES

These plants are unusually fine and will be just right for Easter.
6-inch and 7-inch pots.....\$1.00, \$1.25 and \$1.50 each
8-inch pots.....\$2.00 and \$2.50 each
Plants trained in fan and globular shapes, extra fine,
\$2.00, \$2.50, \$3.00, \$3.50, \$4.00, \$5.00 and \$6.00 each

PINK RAMBLER ROSES

Lady Gay and Dorothy Perkins. In great condition, trained into fan, globular and pyramidal shapes, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00, \$3.50, \$4.00, \$5.00 and \$6.00 each.
Special Ball Shapes.....\$1.50, \$2.00, \$2.50, \$3.00 and \$3.50 each
Special Wire Fan Shapes.....\$3.00 and \$3.50 each
Standard Lady Gay, Umbrella Shape.....\$3.50 each

We want to call your attention to this Special Standard Lady Gay Umbrella, which we have in exceptionally fine condition. This, we believe, cannot be duplicated anywhere.

TAUSENDSCHON (New)—"Thousand Beauties."

This was our finest Climber last Easter and this year the plants are still better. We cannot recommend the Tausendschon Rambler too highly.

Strong plants in 6-in. and 7-in. pots...
\$1.00, \$1.25 and \$1.50 each
Trained Plants, Fan, Globular and Pyramidal shapes
\$2.00, \$2.50, \$3.00, \$3.50, \$4.00 and \$5.00 each

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12 in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties, assorted,—*Pteris Mayii*, *Wimsetti*, *Adiantoides*, *Aspidium tsusimense*, *Cyrtomium falcatum*, etc.

Nice plants, 2 ¼-in. pots, \$3.50 per 100.

CROTONS

Fine assortment, well-colored. 5-in. pots, \$9.00 per dozen.

THE "MARKET VALUE" OF ORCHIDS

A Duty for Revenue Only.

There is a duty on orchids, not for protection, but for revenue. It is well to start by affirming that commercial orchids do not grow in the United States. The tariff is dry and sweet. It says: "Par. 263—Orchids—25 per cent." This means 25 per cent. ad valorem, and here is the difficulty. "It is the duty of the appraiser by all reasonable ways and means in his power to ascertain, estimate and appraise the actual market value, and wholesale price of the merchandise at the time of exportation to the United States in the principal markets of the country whence the same has been imported."

It is natural that the market value assigned to the plants under no circumstances shall be less than the cost price. For many years a standard price has been charged for cattleyas, and a standard case is considered to contain forty plants. Cases of cattleyas are generally of 32x20x20 inches in size.

Varying Values.

Duty is paid on the accepted value. This appears simple enough, but frequently the appraiser finds that all plants are not invoiced at the same price; that two importations of labiatas, for instance, are valued differently, although they come from the same port and on the same ship, and that perhaps the plants valued at the least price are the best. How can this

be possible? Either one of the importers is a fool and puts a high value on his plants for the sake of paying duty, or the other is beating Uncle Sam. Apparently it seems just to raise the value of the plants invoiced at the lower figure—much more so if the plants are better.

This difficulty shows itself to a much more marked extent when the importations of orchids are made from England. The American firms have to buy in the market and pay the profit of the English merchant, which is generally large; then the duty has to be paid on this price, and in selling the plants in the United States, the dealer has to charge for the duty paid and for the risk he has had in handling such perishable goods. When he goes to sell his plants he finds that he is undersold by the representatives of the English firms, and his customers ask him why it is that he cannot sell as cheap as his foreign competitor.

Disadvantages of American Dealers.

Let us do some figuring. Suppose we buy a certain plant and pay four shillings for it. We have to pay twenty-five cents duty on every plant, dead or alive. The same firm has a representative in the United States and makes a shipment to him, of the same plants, invoicing them at what they claim is the cost price to them, say twenty cents. That firm pays a duty of five cents, and so has an advantage of twenty cents over the American

competitor. Twenty dollars in a hundred plants or two hundred in a thousand gives the foreign firm room to undersell and put out of business any American competitors. This also seems unfair, but when the Custom House officials are approached on the subject, they answer, "There is no remedy for it, that is the law." The only protection the American firms have is to put up the goods and make a very small profit.

About Collectors.

Let us go back to the imported cattleyas. The ways to get the plants are different, and from this, the difference in prices arises. Some firms have their own collectors. Some collectors are themselves dealers, and some firms buy from dealers or collectors. The collectors do not all deal in the same way. Some of them bring the plants to New York and sell them around, while others take orders and sell their plants F. O. B. at the port of shipment. This as far as the business in the United States is concerned.

The next difficulty comes from the way in which the collector collects. Some collectors collect all their plants, other collectors gather some themselves and buy the others from collectors that have gone broke, or from native dealers. In this way, it is rare that the same price is paid for the same plant by two of them.

But by far the greatest variation in the price of the plants comes from

ORCHIDS

Our Importations of *Cattleya Trianae*, *Labiata*, *Gigas Sanderiana* and *Schroederæ* are on the way.

Later on we will receive *Cattleyas Mossiae*, *Gaskelliana*, *Percivaliana*, *Warnerii*, *Dowiana*, etc., also *Dendrobium Formosum*, *Laelia Purpurata*, *Oncidium Varicosum*, and several others.

We collect and import nothing but the choicest of plants. No greater mistake can be made than to buy cheap Orchids. We specialize in supplying the Trade.

the quality of the goods and the ability of the collector. Two collectors may be working close by each other, and one of them is paying half the price the other is paying for the same plants, and the assertion that at times the fellow who pays the lower price gets the best plants, sounds like a yarn. In the first place, if two collectors work in the same district, and one of them gets the cheap plants, the man who pays more gets the pick. In the second place, a collector may be buying rubbish at a high price, while the other fellow discovers a new district and picks and chooses, for half or one-third of what the other is paying. So, in orchids, it is not the price paid at the markets what makes quality, but the ability of the collectors. How can it then be possible to fix a market price for orchids?

Collecting or Buying?

The firm that employs its own collectors risks its money, as there are many enemies of orchids. The firms that buy from dealers risk nothing. They pay if the plants reach them in good condition and therefore have to pay for them a much higher price. This explains why plants of the same variety, on the same steamer, are invoiced at different values. One firm collects them, the other buys them; naturally, they pay different prices.

Now there is another question. If the firms that buy their plants from dealers invoice them at the standard value, apparently they are beating Uncle Sam, but if they would invoice the plants at the price they pay F. O. B. at the port of shipment, they would be undersold by the firms that have

their own collectors, or by the collectors themselves.

Again, the collector sells his plants at a much higher price than the one they are invoiced at. If he sells F. O. B. Colombian, Brazilian, or Venezuelan ports, the invoice is made at the standard value and duty is paid on it. Should it be done otherwise, all the firms would be forced to have their own collectors, and all the collectors would have to establish a place of business in New York, a thing that would put some people out of the business at once. So, it is self-evident that the standard price is the only solution of the difficulty.

Of course, all the plants do not cost the same price; besides, some of them come from inaccessible districts, and it is necessary to transport them for long distances on the backs of men or mules; others grow near big navigable rivers, and transportation is far easier. But, again, the same trouble arises; some people pay less than others for transportation, and the very same plant is collected at different places, which makes this item vary in an appreciable way.

No doubt a man of great experience can give an approximate value of transportation, and price of every commercial orchid, but this is not an easy job and some injustice might be done. Very few experts are living who would distinguish the cattleyas when imported, and who could pick them out and give their proper name. Some of them resemble another as a drop of water resembles another drop of water, although they are of different varieties.

COLLECTOR.

Seed Trade

Mail Order Trade Light.

The mail order trade for March has fallen rather below expectations. January and February were said to be very good and it is quite possible the last half of this month may make up for the rather unsatisfactory first half. Counter trade has not assumed any very active proportions as yet, excepting in the Southern States. There is of course more or less business every day, but the height of the season has not yet been reached. March as a whole up to this time has not been as warm or spring-like as the same month last year, which probably accounts to some extent for the backwardness of counter trade.

Potatoes and Onion Sets.

Seed potatoes seems to be somewhat in the class with onion sets and both are on the decline, or rather they have been on the decline for some time, and the latter at least can hardly go much lower unless they are given away. Those dealers who are heavily interested in these two lines must have had a very unsatisfactory time of it for the past two seasons, as prices have had several bad sinking spells towards the close of the season.

Unsatisfactory Stock Situation.

As the time approaches for "fill-in orders" the trade begins to realize how badly broken stocks are this year, and how many crop failures are to be charged against 1910. We are informed that one of the leading jobbing houses is finding it difficult to supply a large percentage of the items, which are coming to them almost every day. Common standard varieties, which are supposed to be nearly always carried in surplus by the leading wholesalers are not procurable this year at any price, and of course the retail houses are disappointed and very much dissatisfied with the present situation. There is no help for it, however, and it is earnestly hoped that the general crop situation of 1911 will show a marked improvement over that of 1910.

Seed Houses, New and Old.

We are informed that one and possibly two new seed firms are to be launched in Baltimore. They have not as yet been formally incorporated. We have good reason to believe that at least one of them will be an accomplished fact within the next ten days. Regarding the other, we have not sufficient information to justify us in any comments. In this same connection we may add that we also have information that one of the old-established houses in Baltimore is about to be reorganized or liquidated; which it will be, will not be known for several months yet, but we believe it is safe to say that important changes are about to take place in the concern referred to.

The Holmes Seed Company of Harrisburg, Pa., seems to be experiencing considerable trouble with fires. This concern had most of its stock and fixtures destroyed in November last, principally by water, but about as effectively wiped out as though they had

been burned. In this instance the fire started in the adjoining store, while very recently fire started in a stable in the rear of their storage warehouse, causing them a loss of several hundred dollars by water. They seem to have had their full share of this sort of entertainment for one year, and it is hoped that neither they, nor any of our other friends will experience any further trouble from this cause.

Embarrassing the Late Ones.

We remarked in these columns some weeks ago that most of the pea and bean growers were contracted about to their capacity of the 1911 crop, and we have since been reliably informed that many of them have turned down thousands of dollars' worth of business because they could not consistently accept it without imperiling their deliveries in case of a crop shortage the coming year.

We are informed that one concern claims to have turned down business amounting to nearly \$100,000. It really looks as if the late comers this year will have to sit on the mourners' bench, and regret their tardiness in placing their orders. Those who get on to the job early rarely have occasion to regret it, while the tardy ones frequently do.

We are informed that Mr. and Mrs. Jerome B. Rice are still at Hot Springs, Ark., but are expected home about the middle of April. His many friends in the trade will hope that this veteran seedsman has been able to find the benefits to his general health as well as his rheumatic troubles, which he has been seeking the past winter.

STRAY LAMBS.

"And the sun came up like thunder
On the road to Mandalay."
—Kipling.

"Has a duck got eyebrows."
—Puddenhead Wilson.

Twelve Canterbury pilgrims arrived in Philadelphia on St. Patrick's and stayed over to Shela's day. Some had staff, some had scrip, but most of them depended on the Purse Bearer. Whatever their wives had allowed them for a red-hot time in this land of plain living and high thinking was blown in among the Quakers. They had stayed just two hours after they got off the steamer in New York—then ho for Philadelphia!

At 7.20 P. M. they were met at the Collonade by a committee consisting of George W. Kerr of Burpee's and regaled at Kugler's. By and by Howard M. Earl came around from the St. Patrick banquet at the Bellevue-Stratford and added much to the eclat of the occasion.

The next morning they were given an auto trip through the city and environs and at noon a reception took place at the Burpee seed warehouses. Mrs. Burpee graced the occasion with her presence and was ably seconded by Mrs. Vincent, wife of the vice-president of the Society of American Florists. Mr. and Mrs. Vincent had met the party at New York and took a fatherly and motherly interest in the pilgrims' progress from the start. Then came the Burpee dinner at the Harris Club. Congressman Irving P. Wanger represented the State of Pennsylvania; Samuel S. Pennock rep-

resented William Penn; H. Bayersdorfer had a keen eye on the business end and Howard M. Earl was watchful for the spoons. George W. Kerr—poor orphan—refused point blank to go back home on the Lusitania, April 5. Seems to be having a good time in America. Sad thing about old Coila!

"Of all the sons that ever leave her
De'il a one goes ever back!"

W. Atlee Burpee made the speech of his life. J. S. Brunton (Purse Bearer) returned thanks. His well turned phrases were polished and irreplicable and it makes me mad to think he isn't an American citizen. He is smart enough to be one. I think he is of the same breed as the Pilgrim Fathers, who landed at Plymouth Rock:

"First they fell upon their knees
And praised the Lord
And then got up with fire and sword
And fell upon the Aborigines."

If Mr. Brunton can moult the time tables long enough to give other matters his attention we would advise the unannexed to get down into the cyclone cellar.

J. Brown, Stamford, said some nice things about Alexander B. Scott, Howard M. Earl and George W. Kerr. Everybody seemed to like him. C. Engelmann, F. R. H. S., is a man after my own heart. He talks it right out—what he thinks of the country and its people and "who's who" and "what's what" 24 hours after he lands. I'm afraid I was just such another 27 years ago. So there's a job on for yours truly—all right. And won't I be de-lighted!

Score one more for Burpee. Whenever anything has to be done as a trade courtesy in Philadelphia Burpee is the man who never fails us. What he does is always just the right touch,—neither overdone nor underdone, and all with distinction and in the best of taste.

On Sunday morning—after a trip to New York to attend the Florists' Club dinner, the visitors were taken by J. Otto Thilow to the new Dreer establishment at Riverview and thence by auto to the main Dreer establishment at Riverton. Here the 13 acres of glass—the biggest general plant factory in the world—was an eye-opener for the strangers. Messrs. Eisele, Strohlein, Clark, Sim and various other officers of the company were indefatigable in the role of reception committee. A luncheon was served and the speeches that followed from both hosts and guests, although brief, were both hearty and witty.

Monday morning the visitors left Philadelphia for Baltimore, Washington and the West.

To Be Successful Sow In March

We are in the front rank for all the latest and most up-to-date Winter-Flowering and Spencer Sweet Peas, and made a specialty of this grand annual. Our collection has been thoroughly revised, synonyms and out-of-date varieties have been eliminated, wherever practical, and only those of real merit retained. When you stop to consider that there are nearly six hundred named varieties, you will doubtless miss some old favorite that you have known. No doubt we could procure you this variety; we could certainly send a variety equally as good.

The Spencer or Orchid-flowering types are exceedingly popular and all the varieties that we offer can be relied upon to come true to color and description. The "Unwins" are all good, and many grandiflora varieties are still holding their own.

If collections are wanted for exhibition purposes, we shall be glad to make suggestions.

NOVELTY SWEET PEAS

Maud Holmes

Sunproof Crimson Spencer (Holmes, 1910). This is undoubtedly one of the finest novelties of recent introduction; flowers are of the largest size, three and four to a spray, carried on long stems, of brilliant crimson, and blooms are of the true Spencer type, both standard and wings being well waved. This variety will not burn under the hottest sun, is of vigorous and strong growth. The stock is fixed as is shown by The National Sweet Pea Society's trials in England. Pkt. 15 cts., 4 for 50 cts. (See illustration.)

Doris Burt

(Unwin, 1909.) The color is a most brilliant light scarlet, slightly shaded cerise. For exhibition or table decoration it is excellent, and is quite the best of its class. Pkt. 15 cts., 4 for 50 cts.

Mrs. Hugh Dickson

(Dobbie, 1909.) A cream-pink Spencer on buff ground, very fine form; flowers well placed on long stems. Award of merit, N. S. P. S., 1910. Pkt. 15 cts., 4 for 50 cts.

Emily Eckford Spencer

The flowers are of good form, waved and of the true Spencer type. They are a rosy purple self color at opening, but turn bluish purple as they reach full expansion. It is similar to Tennant Spencer, but without any suggestion of magenta what variation there is in the flowers is toward blue. Pkt. 15 cts., oz. \$1.25, 1/4 lb. \$4.00.

Rose du Barri

This new grandiflora affords an entirely new shade in Sweet Peas. The name itself suggests the color, which is a lovely combination of deep rich, carnation-rose and orange. It is unique and distinct, a charming flower of deep rose color, overlaid with a lovely sheen of terra cotta. Foliage and haulm very dark green. One of the best decorative Peas ever introduced. For artificial light it is unsurpassed. Pkt. 15 cts., 4 for 50 cts.

Ethel Roosevelt

Is a true waved variety of the largest and most perfect Spencer type. The ground color is a soft pleasing primrose, or straw color, overlaid with dainty flakes and splashes of bluish-crimson. The crimson is not at all pronounced and simply gives some warmth and golden tinting to the yellowish ground work. Pkt. 15 cts., 4 for 50 cts.

Florence Nightingale

The flowers are truly magnificent and of immense size. The standard is unusually large and bold, pronouncedly waved, yet standing erect and broad, frequently measuring two inches across. The color is most charmingly soft and yet rich lavender, which is enlivened by a very faint sheen of rose-pink. It is practically a self color and bunches beautifully. Pkt. 15 cts., 4 for 50 cts.

Masterpiece

(Malcolm, 1908.) The color of the flower is a rich lavender, of true Spencer type, flowers very large, well waved, remarkably free-flowering. Award of merit, N. S. P. S., 1910. Pkt. 15 cts., 4 for 50 cts.

Tuckwood Favorites

A superb mixture of pedigree Spencer hybrids, being the results of hybridization and trials of Mr. Robert Holmes, the English Sweet Pea specialist, and containing a great assortment of colors. Varieties and colors will be found in this collection hitherto unknown, and many surprises will be in store for growers of this grand Tuckwood mixture. Pkt. 15 cts., oz. 60 cts., 1/4 lb. \$2.00, 1 lb. \$7.50.

Queen Victoria Spencer

The flowers are extremely large, of the true waved Spencer type, and have a most pleasing color effect.

The background is quite a deep primrose, flushed with rose. The flowers are all of good substance, borne three and four to the stem. The strong dark green stems carry well the gigantic flowers. Pkt. 15 cts., oz. 25 cts., 1/4 lb. 75 cts., 1 lb. \$2.50.

Collection, one packet each of the above 10 varieties, for \$1.25

Sweet Pea Maud Holmes (Spencer)

Collection, one packet each of the above 10 varieties, for \$1.25.

ARTHUR T. BODDINGTON,

Boddington's Quality Sweet Peas

INCLUDING ALL THE SUPERB SPENCER VARIETIES

If you are an up-to-date florist you should include these varieties in your order.

At the exhibition of the National Sweet Pea Society of America, held at the American Museum of Natural History, New York City, July 12 and 13, 1910, we were again awarded the C. C. Morse Co.'s **SILVER CUP** for the finest collection of Sweet Peas. Open to the trade only.

THE "SPENCER" TYPE OF SWEET PEAS

Burpee's Special Re-selected Stocks for 1911.

"SPENCER" SWEET PEAS are a great specialty with us! We were the first to grow the seed in America—the stock having been entrusted to us before introduction, even in England, of the original Countess Spencer. We have grown "the original Beauty" and its many "sportive" children with painstaking care each season since. There are but few other growers who can supply an equal assortment of True RE-SELECTED "SPENCERS" that are uniformly of such choice quality. Seedsmen and Florists can see how superior our stocks now are by the trials at FORDHOOK FARMS next June or July, while those who may be in California are invited also to inspect the growing crops at our FLORADALE FARM in the beautiful Lompoc Valley. Every planter's garden, however, is really a trial ground and we shall be quite content if any "Doubting Thomas" will send us only a portion of his order and note the difference in character of flowers produced!

 You can buy so-called "Spencer" Sweet Peas at half our prices—but the result will be only disappointment—and when in flower you will surely admit that you would gladly have paid even double our prices to have had the BURPEE-QUALITY of the TRUE SPENCER TYPE!

	Per pkt	Per oz	Per 1/4 lb	Per lb

W. ATLEE BURPEE CO., Philadelphia

A MODEL FLORAL ESTABLISHMENT

The Park Floral Company of Denver, Colo., have recently moved into new quarters at 1643 Broadway, about one half a square south of their old location. The building where they are now located was not yet erected when the lease was made, and their portion of the building was built in accordance with plans furnished by Mr. Valentine. The arrangement is therefore planned with especial reference to the florist business, and every possible convenience is provided.

The store has a frontage of forty feet on Broadway, and a depth of about ninety feet. The walls of the sales room are covered with gray friar's cloth divided into panels. All the wood work is Oregon fir finished to show the natural grain. A great many thousand feet of lumber were overhauled in order to secure pieces with beautiful grain. At one end of the room is a mantel of tile in dull finish, and at the opposite end is a large mirror running nearly to the ceiling.

The lighting fixtures for the walls and ceiling are copper lanterns made by the Craftwood Shops, and give a very artistic touch to the room. In the show windows are powerful tungsten lamps with holophane shades. A total of 1200 candle power is used in the windows.

The carpet is solid rubber, dark green with white border and harmonizes beautifully with the other furnishings. No counters are used, their place being supplied by hardwood tables finished to match the woodwork. A wide stairway leads from the center of the sales-room up to a spacious conservatory with cement floor.

The work room directly beneath the conservatory, has a ceiling height of ten ft. only, so as to reduce the length

of stair from the store to the conservatory. Under the stairway is a small glass enclosed room in which the cashier and the operator of the private telephone exchange are located.

Adjoining the sales room at the south end is the wrapping room, and

In the basement is an artificial ice plant with two large cooling rooms. Here also are located lockers for the store employees, the mossier table, etc. At the end of the basement and well lighted from the front, are the kitchen and dining room, and both are com-

NEW STORE OF THE PARK FLORAL CO., DENVER, COLO.
Exterior View.

directly in the rear of that is the stock room for ribbons, baskets and supplies. A wagon room with cement floor, still further back, connects with the alley, and also with the freight elevator which runs to the conservatory and the basement.

pletely equipped with modern conveniences. An electric exhaust fan carries away all odors and insures plenty of fresh air. The settees in the dining room are built somewhat on the plan of seats in a Pullman car, and are easily converted into couches with mattresses, where tired clerks can snatch a few hours' sleep after working most of the night before Christmas or Easter. On the office floor are similar arrangements. The dining room is not in service except during rush times; but at such times good meals, including one at midnight, are served to employees, without charge and a great saving of time is effected.

The offices are on the second floor above the flower store and the store adjacent. Ten windows on Broadway and four at the end, make the office wonderfully light and cheerful. The office equipment is modern and up-to-date and includes vertical files, desk telephones, billing and adding machines, rotary neostyle, dictaphone and addressograph.

The office and selling force have an organization called the Coterie. One year's service is necessary for admission, and initiation is the occasion for some gentle hazing. A kitchen and dining room have been part of the Park Floral equipment for years, and the Coterie has always had the use of them whenever they desired. Some fine banquets have been spread, and toasts have been responded to with an eloquence no less charming than we are accustomed to at larger gatherings. The company pays the freight and gets as good returns as on any other investment.

RETAIL STORE MANAGEMENT

A Paper Prepared for the Detroit Florist Club by Irwin Bertermann of Indianapolis.

The retail flower business may well be classified in two well defined parts—the commercial and the ideal. It is most essential that the sterner force which propels the larger industries be combined with that more subtle and delicate artistic loving nature. It is not enough to master the art of buying and selling—it is necessary to live the veritable life of the flower; to love and to be able to personally arrange them in beautiful combinations, or to constantly teach others to imbue them with a masterful individuality. The retail storeman, to gain prominence, must be a composite of the Italian with his love of art; the German with his perseverance and perfection of detail; the Persian with his knowledge of color; and, last but not least, the leader of the van with salesmanship and push—our Yankee.

Some of the flower dealers lean more toward one qualification than to another. One well-known retailer, who possesses a fine knowledge of figures and segregation, manages his business efficiently and in entirety from his office; another, with an innate taste for the beautiful, manages directly among the flowers and throws bookkeeping, figuratively speaking, to others. Suffice it to say that no matter which policy a retailer pursues personally he must be most careful that not one or the other be forgotten in rounding out a business.

Commercialism Indispensable.

There is more commercialism in the flower business than there was ten years ago and there will be more in the future, so it behooves all who would be in at the "survival of the fittest"—harsh though that may sound—to adopt the bulwark of the larger American industries and apply system throughout. Individuality has its merits and the storeman who arranges flowers with taste and skill is to be admired as a creator of the finer arts, but like all others must become a unit where the great volume of trade is subservient to the iron hand. It takes no more exertion for a man to do a large business under a system than it does to do a very small one without such advantage, and, if anything, the favor comes to the larger as it is certainly more of a pleasure and a credit to manage it.

Where the Foreigner Leads.

The foreign trade papers are, or should be, a source of much learning. Years of plodding has taught the older countries an insight into perfected detail which is hard to discover among ourselves. Our goal has rightfully and honorably been the dollar, but for the sake of finer beauty and success, also more dollars, it is well to take notice

of the beautiful wreaths, baskets, and easel arrangements of Russia, Germany, France and England.

Using the Window.

We are storemen in a wonderful country. The growers are producing elegant stock, so let the retailer show nature's productions in their most exquisite arrangement. The cost per hour of a well-decorated window is in direct proportion to the amount of store rent paid. A well-arranged window is one of the best advertisements a dealer may have and it should always be of utmost importance to keep the same trimmed in excellent taste. Unlike other lines of trade, the florist has the finest material at hand, and rarely is it necessary to introduce other materials to make it attractive. In fact goods other than those regularly supplied as accessories should be discouraged in featuring a window. There is nothing in better taste than flowers and as we derive our livelihood therefrom, why promote other attractions? Harmony in color, by allotting a whole or a distinct part to one shade of flower, adds much to the general appearance of the window.

Automobiles.

Many of the storemen are adding automobiles to their chattels and the consensus of opinion seems to have relegated the horse to the past. The urgent time calls; the long hours and the important events of life with which the retailers have to contend make automobile delivery of peculiar value to the retailer and it should be encouraged as a useful rather than an extravagant part of the equipment. Let it be omnipresent, though, that we are florists and are not endeavoring to degenerate into a greasy garage manager as he can do repairing much better and more economically while we are engaged with a fancy customer.

Value of Novelties.

Most important is it for the leading retailers to produce or to deal in novelties. It would be a grand thing were it possible to sell the same article each year, but destiny will not have it so. Catering to the public makes it imperative to have something new or novel at all times. The flowers need not be new from the trade standpoint, but it is requisite to have a refreshing change for the flower lovers. There are created styles in flowers and they keep changing. What was regarded as old and uninteresting a generation previous may be a good selling article at present. Antirrhinum, bouvardia and Bon Silene roses were favorites with our grandmothers, but are again in style right now, made up with paper holders as used during Napoleon's reign. Mignonette, pansies, forget-me-not, and carnations will never grow old, but the grower and retailer should conspire to present something different at all times. Novel arrangements are as essential as novel flowers and no opportunity should be overlooked in placing before the public a new and

meritorious combination of nature's wares. Corsage bouquets made of older varieties of flowers have grown wonderfully in demand and are a source of much revenue to the present day dealer.

Furthering the Counter Trade.

At least forty per cent. of the storemen's business might properly be classified as counter trade, so the importance of packing flowers carefully in a neat box of up-to-date pattern and adding a few finishing touches in the way of ribbons. Farleyne ferns and flowers must not be overlooked. Counter trade is a certain barometer of the state of trade, and, like that instrument, fluctuates quickly. The many details in connection with this important branch are often ably taken in hand by able retail correspondents of the florists' press. Their ideas may often be enlarged upon and the incentive given the fagged, but energetic, shopman is not to be underestimated. It is up to him to effect an opening for the great mass of flowers thrown upon the market by millions of feet of glass, and any suggestion in furthering their sale is of immense general value.

About Advertising.

"Take care of your business and your business will take care of you," as Poor Richard's Almanac had it, is certainly an axiom worthy of every retailer. The flower business is not so conducive of financial results such as are found in other commercial lines, but the instances are few in which the returns are not sufficient, provided the above axiom is closely adhered to. Opinions differ greatly as to the best method of advertising. There are many effective ways. Some use newspapers, others magazines, some programmes and others nothing at all in the way of printer's ink, but make up for it in actual energy in their display of flowers and in the class of goods furnished. All of those mentioned and others received the support of the public if done in an energetic manner and supported in actual facts.

Telegraph Delivery.

One of the most promising institutions—The Florists' Telegraph Delivery—is still in its infancy. The amount of business transacted mutually between cities is no small one, and with the plan outlined by the president of the association, J. A. Valentine, generally accepted this source of revenue should be greatly increased. No retail florist in the larger cities could afford to be without the protection and advantages thus offered at a minimum cost.

Standards Advancing.

Orchids and gardenias—articles De Luxe a few years ago—have become staple articles in cities with over 200,000 population. Custom may complain at times that prices are high for fancy flowers, but still it is seemingly the unusual and the higher-priced goods which satisfies. The flower standard grows higher each year so the retailer

BEAUTIFUL EASTER NOVELTIES NOW ARRIVING

THE Florist Supply House of America

Without A Competitor

H. BAYERSDORFER & CO., 1129 Arch Street, PHILADELPHIA, PA.

THE FLORISTS' RETAIL DELIVERY

Special Meeting at National Flower Show, Boston, Wednesday,
March 29th. Morning and Afternoon. All Retailers Invited.

J. A. VALENTINE, President

in a city of 500,000 sells more than twice as much as when the city was half that size, as the patrons have grown proportionately richer. When recognition is taken that New York City's millionaires are now to be counted in the thousands, whereas twenty years ago there were, perhaps, less than one hundred, we can see the direct reasons for changing our business methods, and look forward to standards which will place the retail florists in the front row of industrial pursuits and gain respect as a representative type of American business men.

A rough estimate of the exchange flower trade would put the total amount at \$300,000 in this country. So the importance of the undertaking is obvious.

A progressive flower store, tasteful

in appointment, absolutely clean, with efficient salesmen and flower workers attaining the reputation of handling meritorious goods must be ably managed. The ideal manager, a rare individual, must possess the executive qualities usually attributed to him. Further, he should have the fine artistic ability of a Thorley, Battles, Palmer or a score of others who have won distinction for their class and house work stand forth as a challenge to all who would do better.

New York City—A. H. Langjahr, wholesale florist, will remove from 55 W. 28 St. to 130 W. 28 street about May 1. The store which he vacates will be taken by James McManus, now located at 42 W. 28 street.

ABOUT FLORISTS' RIBBONS.

Mr. S. B. Wertheimer of Wertheimer Brothers, tells us that the growth of the floral ribbon industry in the past few years had been unparalleled. This field, hitherto catered to in a hit-or-miss manner, by millinery houses mainly, has now been developed so that the florist has his own distinctive fabrics created to fit the peculiar and particular requirements of his trade. The "Sprinkleproof" ribbons and chiffons, which unlike ordinary fabrics will not collapse when exposed to water are evidently appreciated by the florist trade for Mr. Wertheimer states that now the bulk of their sales to florists are for these textiles. This firm will be represented at the Boston Flower Show with a creditable exhibit.

NEWS NOTES.

Reading, Mass.—C. F. Trevor and F. E. Lind, conducting business as the Reading Floral Co., have dissolved partnership.

Greenwich, Conn.—James M. McArdle, formerly traveler for Vaughan's Seed Store, has started here in the florist business.

Fond du Lac, Wis.—Leon Sawicke, florist at the Fourth street greenhouses, caught a man on Sunday

rifing the office desk. The man managed to get away with three or four dollars. No accurate description of him could be secured.

South Manchester, Conn.—Peter Jengler, formerly head gardener at the Park Greenhouses, Elizabeth Park, Hartford, is now in business for himself here.

Anaconda, Mont.—Wilford Newell, formerly of New York, will have charge of the floral department at the R. M. Grieg Greenhouses.

Dennison Florist Tags

are distinctive, designed especially for the discriminating clientage every florist covets. Finest white stock, special writing surface (not stained by water) printed in colors, embossed if you wish, Dennison patch eyelet, perfect workmanship.

Let us design for you a Dennison Tag, incorporating your coat-of-arms, special flower or lettering. Many will receive your flowers who will like to remember your name. On a Dennison tag it will not be forgotten.

THE SQUARE DEAL

That is something every man is entitled to. The Grower, the Wholesaler and the Retailer owe it to one another and it is the best and only foundation for true business success.

"OLD AND RELIABLE"

is a term I have for many years delighted to have my growers and my buyers apply to my business transactions and methods. "He has always done the right thing by me" is something we should all be proud to have our business associates say of us. Now Easter is coming and I am ready to talk to you if you have a crop of good stock to dispose of or if you are going to need anything of the kind.

Lilies, Carnations, Roses, Violets, Stock, Callas, Lily of the Valley, Daffodils, Freesias and lesser specialties too numerous to mention are in full daily supply and my prices are always fair. Prompt payments to consignors.

Flower Market Reports

Business is rather sulky

BOSTON at present writing and sales that count for much

of anything are only made under high pressure and low figures. White carnations are scarce and with the exception of American Beauty roses they are about the only commodity that is scarce. Enchantress is very plentiful. Lily of the valley cheap and slow to move. There are lots of roses, plenty of lilies, too many violets and daffodils, and a sufficiency of orchids. Wholesalers' storage quarters are overflowing with stock awaiting a buyer.

There is plenty of stock

CHICAGO and it is good, bad and indifferent in quality,

and upon the quality depends the price. This does not include Beauties, which still are very scarce and even our largest growers would find it difficult to cut 25 first-class Beauties at this time. Richmond affords relief to the situation and so is selling better than is usual at this time of the year. Killarneys are giving way to the superior qualities of Brides and Bridesmaids, which stand shipment better this warm weather. Maryland, also, is taking preference over Killarney and Jardine is making extra heavy long stems and is much in demand in consequence, leading everything in pink except Bridesmaid. Carnations are of all kinds and conditions and inferior stuff is jobbed off at a low price, while much is a total loss. Really good carnations sell at a fair price. Lily of the valley is of good quality and moving well for the Lenten season. Violets are suffering from the warm weather this week and many are left unsold. Easter lilies and callas are seen everywhere but demand is light. Bulbous stock has no indication of coming to an end and quality keeps up exceptionally well. Green is in good demand, the call being for asparagus bunches and smilax mostly.

Business continues

CINCINNATI good. Flowers of all

kinds with the ex-

ception of long Beauties are plentiful and cleaning up, with prices at a lower level. Short Beauties are fairly plentiful but the quality is somewhat poor. The receipts of Richmond, Killarney, White Killarney and My Maryland are on the increase, some exceptionally fine stock being offered. Bride and Ivory are in heavy crop with the short and medium moving more freely than the fancy grades. Good Bridesmaids meet with a fair request. White continues to be the leading seller in line. The coming of southern daffodils in quantity has seriously affected the price of indoor stock. There being only a limited amount of white and lavender Dutch hyacinths, La Reine and Murrillo tulips coming in, they are good property. Pink and purple hyacinths move more slowly and lilies are plentiful and the demand could be improved upon. The call for single violets is very good while the supply of double is more than sufficient. Lily of the valley in fair supply and demand.

(Continued on page 457)

AT THE

NATIONAL FLOWER SHOW

at Boston, on the Second Floor, hardly more than a dozen feet from the meeting hall, will be our exhibit of

**Ribbons,
Supplies,
Cut Flowers
and various
other novelties**

OUR EASTER PLANT LIST

of splendid offerings and novelties has been mailed. If you have not received it, advise us, and we will gladly mail you one.

Some Splendid New Roses

"MELODY," the best yellow rose today.

"DOUBLE KILLARNEY," the Killarney that will supersede the one now grown.

"ROSE QUEEN," in a class by itself.

"PRINCE DE BULGARIE," entirely different from any rose grown.

Write for our Descriptive List and Prices of
these and other Introductions.

Flower Market Reports

(Continued from page 545)

Notwithstanding the NEW YORK very unfavorable weather of the past week crops of all kinds have been increasing in volume and, with the prevailing inactivity in the retail trade the effect has been disastrous as to market values, accumulations being the rule in the wholesale district. Roses are plentiful and of good average quality. Carnations vary from very good to very poor. The grades of lilies also show a wide variance as to quality, many lots being of the most miserable character. Callas are very abundant. There are heaps of violets, which find their best outlet through the street dealers, although the quality is superb as a rule. All bulbous material is overstocked. Daffodils seem to be more popular than in former years and the street men dispose of great quantities of them for corsage wear, etc. Wallflowers, corn flowers, pansies and similar lesser flowers are seen in most florists' offerings and sweet peas are in quantity on all sides.

More satisfactory PHILADELPHIA trading was the rule last week. Stocks cleaned up better, and while there was no decided advance in prices the tone of the market was distinctly firmer. The Friday and Saturday sales—although very low as to price—were extensive in quantity and brought the general average for the week up to respectable figures. There was no scarcity of anything—unless perhaps white carnations. There was some extra demand for these and, in addition, the crop seemed to be a little off. Of course, American Beauty roses are still scarce but the demand for them is kept within limits—as might be expected when specials are going at \$75 in March. The short Beauties at \$15 to \$25 are nothing extra, and there are no intermediate qualities. Carnations, outside of white, were more plentiful and in large lots shrewd buyers could get quite a discount from quoted schedules. We have now a number of wideawake retailers who are keen for a special drive when circumstances warrant in any item. The street men do not quite have it all their own way in the job-line as they used to. Southern daffodils came in more freely and may be looked for in larger quantities from now on. Sweet peas are still pretty good stock, although there are more shorts coming in than desirable. The

balance of the cut flower market, normal and featureless. Smilax and plumosus scarce. Plenty of good Sprengeri.

Reports from the different wholesale houses say that Lent so far has not interfered much with the local trade, as the retail florists are buying quite heavy and last week their business was good. Stock of all kind has been over-plentiful and from the looks of the market it will continue so right up to Easter. Prices are low on good quality of stock. Extra good quality in roses bring not over \$8 per 100; Beauties, long fancy, \$6 per dozen; Carnations, \$1 to \$3, and lilies from \$8 to \$10 per 100. Bulb stuff is not over-plentiful. Smilax, asparagus and all other green goods sell well.

NEWS NOTES.

Oakdale, Cal.—The Lagomarsino place has been purchased by Frank T. Swett, who intends to raise some of his nursery stock there.

Flasher, N. D.—The North Dakota Nursery Co., now being incorporated, intends to locate in Flasher. M. J. George is general manager.

New York—Mr. Beauplan, proprietor of the Forster-Mansfield Company, manufacturers of architectural woodwork, has had his bookkeeper arrested for forgery and grand larceny. The amount of the young man's alleged stealing amounted to several hundred dollars.

IN BANKRUPTCY.

Freeport, L. I., N. Y.—John Copp, florist, 46 Colonial avenue, has filed a petition in bankruptcy, liabilities \$9,306.25, assets \$3,350.

ASTER SEED, SEEDLING BRANCHING.
Mr. Phillips, Florist, Syracuse, N. Y., advises us that the aster seed purchased from us produced blooms that carried away the first prize at the last N. Y. State Fair. In the growing and the selection of this seed we exercised the most painstaking care, positively allowing only two or three ideal blooms per plant, to mature seeds. We have a small amount of this same seed in stock and will sell it only in mixture of about 1000 seeds comprising pure white, lavender pink and purple—about one-third the mixture being pure white. Price, per packet of 1000 seeds, 35 cts.; 4 packets for \$1.00. Russell Bros., Syracuse, N. Y., Route 4.

NOVELTIES

"REAL NOVELTIES AND
NOVEL REALITIES."

In Hardy Plants.

The biggest collection offered anywhere, is found in our NOVELTY CATALOGUE, just out.

Of great interest to the amateur and commercial grower alike.

It describes and illustrates uncommon plants of singular beauty, desirability and simplicity of growth; inexpensive to acquire.

Besides, our low prices, plants are big, making them valuable, in small or large quantities.

Mailed along with our illustrated wholesale catalogue of Hardy Perennials, etc., on receipt of three 2c. stamps, which pays postage only, and which amount is credited on first order.

PALISADES NURSERIES, INC.,

AN IRRIGATING FLOWER POT.

It is generally conceded that lack of adequate and regular watering is responsible for by far the larger number of failures of amateurs who attempt window gardens in dwelling houses. Watering may be neglected until roots of plants are dried out and killed, or so little water may be applied that it never penetrates to roots, or so much water may be supplied that combined with defective drainage the soil may be soured and roots may rot. It is claimed by the manufacturers of the Joy-O Jardiniere and Pots advertised in this paper that this recently devised pot banishes all the above troubles, if only water is supplied at least once in every eight days and the owner of the plants may be absent for a week or even ten days without detriment to the plants for lack of water, provided the reservoir is filled the day of departure, a feature which will at once appeal to most amateurs.

The pot is composed of two parts, the pot proper, and the reservoir into which the pot fits with sufficient space between the walls of the pot and reservoir. The pot holding the plant is made with imperforate bottom and

HILLFINGER BROS., Pottery, Fort Edward, N.Y.

August Roiker & Sons, Agts. 31 Barclay St., N. Y. City.

its side walls are glazed externally so as to restrict to the porous base the flow of water which percolates slowly through the pores of the clay, reaches the inside of the pot, rises through the soil to roots of plant and finally the surplus evaporates from the surface—practically a scheme of sub-irrigation.

The pots are of pleasing shape and do not show disfigurements due to salts or vegetation, and need no covering to make them presentable. They should make a good selling article for the florist.

Syracuse Red Pots

"A little pot is soon hot," likewise a thin pot. This will save you fuel. Our pots are the thinnest and toughest owing to the superior quality of the clay. New price list on application.

GOVERNMENT POSITIONS OPEN.

An examination will be held by the Civil Service Commission to secure eligibles to fill a vacancy in the position of statistician in forest products at a salary of \$1,500 per annum, in the Forest Service, Department of Agriculture, and also to fill other vacancies requiring similar qualifications as they may occur at different places in the same service. Men only will be admitted to this examination, which will be held on April 19, 1911.

The subjects are as follows: statistical methods; manufacture and use of forest products; markets and distribution of forest products; training and experience.

Applicants must be twenty-two and under forty-two years of age. They should communicate at once with the Civil Service Commission, Washington, D. C., or with the secretary of the local board of examiners, for application and examination Form 1312. No application will be accepted unless properly executed and filed with the Commission at Washington prior to April 8, 1911.

An examination will be held by the Civil Service Commission on April 19 to secure eligibles for the position of laboratory aid in the Bureau of Plant Industry, Department of Agriculture. The usual entrance salary for this position is \$600 per year. Applicants must be over seventeen and under twenty-five years of age.

The subjects in which the applicant is examined are: spelling, arithmetic penmanship, report writing, copying and correcting manuscript, outline drawing, and physics. The latter subject will only cover such ground as a high school student would cover.

The duties of a laboratory aid include aid in securing and reporting scientific data in connection with various projects, such as cotton standardization, fibre investigations, examination of paper and pulp, the technology of wheat and other grains, and also general laboratory work.

BEAUTIFYING WASHINGTON.

The campaign for the beautification of Washington is in full swing. The Peoples' Garden Association is determined to make this capital one of the most beautiful in the world, and the Association numbers among its members some of the wealthiest, brainiest, and most enterprising of Washington's citizens. One of the most enthusiastic advocates is President Fairchild, whose connection with the Department of Agriculture makes him eminently fitted for the task he has imposed upon himself. In the opinion of Mr. Fairchild, Washington is peculiarly well situated and possesses a combination of circumstances absolutely unique to aid in the beautification of the city. Washington's street and avenue trees are already famous and the city owes a great debt of gratitude and appreciation to William R. Smith, superintendent of the U. S. Botanical Garden, as the leading spirit in the planting of these trees which have done more than any other feature to make Washington attractive and healthful.

The Toledo Jardinere and Stand

is a work of art. They are made from quartered white oak, golden finish and polished. Hoops, handles, etc., are made of polished brass. They stand 31½ inches high, 9½ inches in diameter.

Toledo Tree Tubs

are made of the everlasting red cedar. They have the extension stave foot, that holds the tub up from floor or carpet, this feature permits air circulation between the tub and the floor,

also prevents rot and decaying. They have electric welded galvanized basic steel wire hoops that will not rust or break. They are made in all sizes from two quarts to two barrels.

PUBLICATIONS RECEIVED.

Under the Roof of the Jungle—A book of animal life in the Guiana wilds. By Charles Livingston Bull. 60 full page plates from drawings from life by the author. L. C. Page & Co., Boston, publishers. Charles Livingston Bull is primarily an artist, well-known as the illustrator of many magazine articles, and books such as Watchers of the Trails, by C. B. G. Roberts; Call of the Wild, by Jack London, etc. The books before us is a series of vivid word pictures of tropical nights, tragedies of the forest wilds and weird tales of reprisal and calamity to the denizens of the woods, amongst the lavish beauty and grace of orchids, anthuriums and other floral spendors of the tropics. The author frankly acknowledges that his book was inspired by the recorded adventures of Charles Waterton in British Guiana one hundred years ago, and we can see the evidence throughout that the pages are more in the way of the impressions of the artist than the experiences of the explorer. The book may not appeal so much to the naturalist as to the impressionable student, but here it will fill a place of no small usefulness in developing a keen interest in the great natural resources of these tropical countries and the life history of the animals, reptiles, birds and insects that make their home in the jungle.

"Adorning the Beulah Land of the Hither Shore and How to Become an Extinguished Minister." By C. S. Harrison, York, Neb.—This 60-page book is in Mr. Harrison's best vein. It is largely a series of incidents in the busy eventful life of the author, interwoven with inspiring suggestion and a sunshiny humor fully up to the best efforts of that other genial writer, the late Rev Dean Hole. We have always enjoyed reading anything written by this "79-year-young" apostle of Christianity and horticulture. We hope the grand old pioneer will yet stay many years to adorn Beulah Land.

Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

FUNGINE

The Newly Discovered Fungicide

An Invaluable Remedy for Mildew, Rust and other Fungus Diseases

IT ERADICATES RUST.

"BLANTYRE" GARDENS.

Thomas Proctor, Supt.

Lenox, Mass., Feb. 24, 1911.

Aphine Manufacturing Company, Madison, N. J.

Dear Sirs:—Replying to your letter of the 21st, in which you request me to advise you as to the results of my trials with your Fungine, I have not had an opportunity of testing its merits on mildew, but, I can, however, unqualifiedly recommend it as being a very effective remedy for Carnation Rust. I bought in some new carnations sometime ago—that were in a bad state with Rust on their arrival—their leaves were completely covered, and after two applications, at proportions of one part Fungine to forty parts water, I found it had the desired effect. For this reason I gladly endorse it.

Yours very truly,

THOMAS PROCTOR.

IT DESTROYS MILDEW.

Farmington, Conn., Feb. 23, 1911.

Aphine Manufacturing Company, Madison, N. J.

Dear Sirs:—In reply to yours of the 21st inst., I would say that my experience with Fungine for mildew has been very satisfactory. I think it is much better and easier than the old way of dusting the plants and painting steam pipes.

The first time I used it I was rather disappointed as it turned the wood-work in the houses, wherever the spray hit it, a dirty yellow, but this all disappeared in a few days.

I have not tried it for rust, but cannot see why Fungine is not going to be to the florists and gardeners what the lime and sulphur wash is to the pomologists.

For black, green and white fly, mealy bug and thrip I have not used anything this season but Aphine. The greenhouses have not been fumigated and plants are in a fine healthy condition.

Yours respectfully,

WARRAN S. MASON, Grd. to A. A. Pope.

IT CURES ROOT ROT.

ZIEGER & SONS

Growers of Decorative Greens and Flowers

Palms Ferns Novelties

Germantown, Philadelphia, Pa., February 23d, 1911.

Aphine Manufacturing Company, Madison, N. J.

Gentlemen:—Concerning the Fungine: we may say that we have not had much occasion to use it, however, we had one delightful experience with it. We had quite a few thousand chrysanthemum cuttings inserted in old sand which had been left in one of our cold houses. As our propagator is accustomed to do, he saturated the sand and kept the cuttings very wet, which caused rot and fungus. The writer noticing this apparent loss went to the Fungine purchased from you. We used it one part to twenty-five parts water and sprayed the entire lot of dampened and partly rotted cuttings, thinking that these cuttings (of which there were several thousand) might as well die one way as another, but to our great surprise, these cuttings after the single application, a thorough one at that, turned to a light green color and seemed to extract the fungus which sort of foamed up and separated from the decay (similar to peroxide on a healing wound).

Now these cuttings at this writing have nearly all made good healthy roots, although a few cuttings rotted in the sand but made roots above the decayed part, which seems remarkable to us. It is not necessary to say that for this experience alone we are highly pleased with the results obtained with Fungine used as above, which is far more than we had ever expected.

We beg to take the liberty to state that Aphine does all it is recommended to do in a very satisfactory manner.

Yours very truly,

ZIEGER & SONS.

Ernest J. F. Zieger, Sec'y.

FUNGINE, \$2.00 per gal., 75 cents per qt.

For

House

And

Garden

KNOWN AND USED THE WORLD OVER.

Entebbe, UGANDA (Central Africa), Jan. 16, 1911.

Sirs:—Kindly supply me with sufficient Aphine to ensure a fair trial. I should be glad to experiment with this insecticide.

W. GOWDEY, Government Entomologist.

Fritz Bahr says in his article on Lilies in the Florists Exchange of February 18th, 1911:

"We have given our lilies a weak dose of Aphine once a week since they have occupied space on top of the bench, and thus far we haven't noticed even a trace of the pests; that ought to prove that greenflies are not very fond of the stuff, for if there's anything they do like, it is to get into tops of the lilies and it takes an awful lot of coaxing to get them out."

APHINE, \$2.50 per gal., \$1.00 per qt.

For Sale by Seedsmen. If you cannot obtain them from your dealer write us for name of nearest selling agent.

Ground Limestone vs. Burned Lime

FOR SOIL IMPROVEMENT

CONSIDER THE FACTS. Send for our circulars showing actual results in comparative tests, at the Pennsylvania, Maryland and Virginia Experiment Stations. Positive proof is shown that the former will not injure the seed or the soil, as many times happens with the latter. No need to worry about getting on too much. It is the cleanest, neatest and pleasantest form of lime to handle. Does not burst the bags. Do not consider **PRICE** alone. Think of your **OWN COMFORT** also. After one trial you will be satisfied to have paid our price. It will yield a better proportionate return for the money invested than any one fertilizer you have ever bought.

We have a limestone high in **LIME** and **LOW** in magnesia, an ideal type for most soils. We grind it to pass (80%) through an 80 mesh screen (6400 holes per square inch). It is put up in 100 pound paper or burlap bags. We ship it in a car (if 5 tons or more) direct to your nearest siding. **DON'T FORGET** that we **BURN** lime also. We will be glad to sell you that **TOO**, but we want you to give ground limestone a thorough trial. Send for circulars, samples and prices. Get your order in early.

IN USE SINCE 1886

HAMMOND'S Grape Dust

Registered in U. S. Patent Office

KILLS MILDEW INDOORS AND OUT

Contains Sulphur 64 per cent., Copper Sulphate 3 per cent. U. S. P.

Now, in regards to your "Grape Dust," I must say that when I first heard of it I had but little faith in it, because I had tried all the remedies for Mildew I had ever heard of, but they were of little value. It seems that my location favors Mildew especially. When other Florists are but little troubled, my houses are generally well covered with the Mildew, so when I sent for the first keg of "Grape Dust" my Roses were almost worthless, but since using the "Grape Dust" my Roses are the "Picture of Health." There is not a vestige of Mildew to be seen on my place, and my Roses fetch double the price; besides, I have saved a month of firing, which I used to be compelled to do to kill Mildew.

Yours respectfully,
To Hammond's Slug Shot Works.

One Florist saved \$257.50

(19 tons of coal and the wages of a night fireman for four months) by installing a

CASTLE AUTOMATIC CIRCULATOR

which used only \$26 worth of power.

It is positive in action—the flow does not depend upon temperature.

It is insurance— it maintains just the right temperature day and night.

It saves coal—more water goes through the piping—more heat units are used for heating the houses. Ask us for results obtained in greenhouses which could not be satisfactorily heated before our circulator was put in.

AMERICAN AUXILIARY HEATING COMPANY

6 BEACON STREET, BOSTON, MASS.

We Are Going to Exhibit at the Boston Show

THAT is how important the show looks to us. It is going to be the greatest flower show this country has ever known.

The way the exhibitors have rallied around the flag has been a revelation. The enthusiasm of it all got into our system and we wired for double space, and have prepared an exhibit that is right in keeping with the U-Bar greenhouse. We just had to make it top notch — and better. There will be a U-Bar house there showing construction strong points that will set you thinking. It will be an exhibit of serious interest, not alone to superintendents and gardeners, but florists as well—both florists who need show houses, and growers who are so frequently asked by their private customers about the best house to build. Come and see the new fashioned greenhouse, inside an old fashioned garden.

POMPON ANEMONE. GARZA.

From 2-inch pots; 5 cents each, 50 cents per dozen.
\$3.00 per 100, \$25.00 per 1000. Not more than five
varieties at the 100 rate; 250 in assortment, our selec-
tion at the 1000 rate.

BEDDING PLANTS

COLEUS.

Verschaffeltii. Standard Crimson.
Firebrand. Bright Maroon.
Golden Queen. Standard Yellow.
Lord Palmerston. Dark Maroon.
Queen Victoria. Cardinal Red, with distinct golden
border.
Beckwith's Gem. Center velvety maroon, bordered with
red; the edge green, changing to creamy yellow at the
point of leaf.
Rooted cuttings by express: 75 cents per 100; \$7.00
per 1000. Out of 2¼-inch pots in May: \$2.50 per 100,
\$20.00 per 1000. Less than 250 of a variety will be
charged at the 100 rate.
Golden Bedder. Golden Yellow, the old original, true to
name.
Hero. Very Dark Maroon.
Messey. Dwarf, Pearl White and Silver Green.
Brilliant. A combination of Red and Gold.
Rooted cuttings by express: \$1.00 per 100, \$8.00 per
1000. Out of 2¼-inch pots; \$2.50 per 100; \$20.00 per
1000. Less than 250 of a variety will be charged at the
100 rate.

FANCY VARIETIES.

Fancy Varieties. A very fine assortment of twelve kinds
not listed above.
Rooted cuttings: \$1.00 per 100; \$8.00 per 1000. Out of
2¼-inch pots: \$2.50 per 100; \$20.00 per 1000.
Fancy Varieties. Either rooted cuttings or plants from
2¼-inch pots, our selection, 250 at the 1000 rate.

AGERATUM.

Stella Gurney. Dwarf Blue. 75 cents per 100; \$7.00
per 1000.
Princess Pauline. A combination of Blue and White
in same flower. 75 cents per 100; \$7.00 per 1000.

ALTERNANTHERA.

Red and Yellow. Rooted cuttings: 75 cents per 100;
\$6.00 per 1000. From 2¼-inch pots: \$2.00 per 100.
Brilliantissima. A valuable new Alternanthera, red
and yellow in color, with broad leaf. Strong grower

Rooted cuttings: \$1.25 per 100; \$10.00 per 1000. From
2¼-inch pots; \$2.50 per 100.

HELIOTROPE.

Dark Blue Variety. Rooted cuttings: \$1.00 per 100;
\$9.00 per 1000. From 2¼-inch pots: \$2.50 per 100;
\$20.00 per 1000. 250, either plants or cuttings, at the
1000 rate.

SALVIA.

S. Splendens. Tall standard, one of the best. Rooted
cuttings: 75 cents per 100; \$7.00 per 1000.
S. Bonfire. Medium dwarf; very good. Rooted cuttings:
75 cents per 100; \$7.00 per 1000.
S. Zurich. Dwarf; an excellent variety. Rooted cut-
tings: 75 cents per 100; \$7.00 per 1000.
S. Schenley. Medium dwarf; very highly colored. One
of the best. Rooted cuttings: 75 cents per 100; \$7.00
per 1000.
Salvia of these varieties from 2¼-inch pots, April and
later delivery, \$2.50 per 100; \$20.00 per 1000. 250 of a
variety, or in assortment as ordered, at the 1000 rate.

BEGONIAS.

Gloire de Lorraine.

Strong healthy plants, ready for April and later de-
livery. 2¼-inch pots, \$15.00 per 100; \$135.00 per 1000.
3-inch pots, \$25.00 per 100; \$200.00 per 1000. 4-inch pots,
\$35.00 per 100; \$300.00 per 1000. Write for special price
on large orders.

Glory of Cincinnati.

A new begonia with large, heavy foliage. Flowers in
abundance. An excellent Christmas plant. Strong
healthy plants for June and later delivery: 2¼-inch
pots, \$20.00 per 100; \$150.00 per 1000.

ASPARAGUS HATCHERI.

Prices of plants from 2¼-inch pots, \$3.00 per dozen;
\$15.00 per 100; \$100.00 per 1000. April delivery.

HENRY S. DAWSON, Manager

Fruits and Vegetables Under Glass

FIG HOUSE

Figs started in February will now be making good growth and the first crop of fruit swelling. With three or four fully-developed leaves maintain a night temperature of 55 to 60 degrees. Admit a little air as soon as 70 degrees has been reached in a morning, applying a crack at first and advancing as sun increases. From now on what is known as stopping or pinching will have to be continually resorted to. This is pinching out the point of the growth as every four or five leaves develop, which checks it for a time at the apex and concentrates more sap and energy on to the small fruit (the second crop) which will be found in the axils of the leaves. This can be done at intervals as the growth of the tree progresses and the shoots tied in their places on the trellis. This is applicable also to trees being grown in pots or tubs in bush form. Stopping must be done and later on a stake to support the heavy growth will be beneficial. Figs throughout the growing season like a very humid atmosphere as well as a plentiful supply of water to the roots.

CROPPING VINES

This is a vital question when one considers that the life of the vines depends on the crops they are asked to carry. Young vines especially are easily ruined by over-cropping. Aerial roots become numerous—a sure sign that they are seeking more support; shanking will probably show before the crop is finished and berries will never color and finish as they should do. These evils may take a few years to show themselves and at times we wonder why they are so. Probably the canes were run up in a year or two and never cut back as they should have been. Each year a heavy crop was carried, perhaps finishing up well, but it is time that tells. Youth always was served but as soon as youth is gone "look out." If vines are to be built up to last they must be done so gradually each succeeding year seeing another length of young cane added, which in turn means more fruiting spurs and more bunches. For the first year of planting (from a pot) no fruit should be carried. Prune back to two eyes and grow for another season. The next year if canes are strong leave about four feet of rod and carry two bunches, building on a little each year. If weak at all, prune back harder and do not crop. All depends on the strength of the vine itself. In this way a rod is built up with a constitution which will stand the test of time. On the other hand a house can be filled in a couple of years and heavy crops carried for a time, then you want new vines and borders. Well-established and full-grown vines will carry approximately one bunch to each two feet of rod, but much depends on the variety and treatment given them. Never allow two bunches on the same lateral.

PEACH TREES STONING

This is the most critical time during the whole growth of the fruit. An imperfect stone means an N. G. peach. Numerous fruits will also refuse to stone and drop off if not assisted. This is one of nature's ways of thinning a crop, but if they have been already thinned and evenly distributed over the whole tree none should drop now. Relieving it of part of the crop early insures an even crop to finish, no two fruits spoiling each other here and none at all elsewhere. Early started trees in pots will

now be stoning and should have the temperature dropped a few degrees. Do not try to rush at all at this stage. Give as much air as possible. Frequent dilutions of lime in the water (enough to nicely color it) is a great help to stone formation. Do not give any feeding in any form until the second swelling commences, when a final thinning can be made and food in the form of suitable manure given.

MELON BEDS AND CROPS

A diversity of opinion exists as to whether a heavy or sandy soil is preferable for melons. Soil does not appear to be such a great factor with melons as it is with some crops. Both soils will produce a good crop when properly handled. Of the two a heavy fibrous loam is to be preferred as this will allow of lime rubble and charcoal being added—even sand if very close and heavy. Using a small bed, this heavier loam is preferable through the summer as it will keep moist longer. Bed need not be more than eighteen inches wide and four inches deep and made quite firm. This makes a sturdy growth, being less liable to canker and other diseases. The addition of lime rubble and charcoal must be governed by the texture of the loam. We find good results are obtained by cutting the sod up into good-sized lumps and mixing the other ingredients into it. If whole turfs are used a little can be laid between them and included in the mounds. From now on plants are best planted twenty-one inches apart, but in early houses and again towards fall one foot will be far enough. This may seem close but it has proved to be satisfactory and has advantages over the longer distance, in that more fruits can be produced with a greater degree of certainty. It is an easy matter to get a set of two fruits to the plant, but not always so to get three or four, and these plants which are planted closer will make better-sized fruit than one plant at the longer distance carrying four. Through the summer time when melons grow so luxuriantly the latter method is preferable.

VEGETABLE HOUSES

Vegetable houses which have been doing service along through the winter will now be easing up as the crops are able to be transferred to the open grounds. Late tomatoes, beans, peas, spinach, etc., will still command attention, but will not need replenishing. The houses can be profitably used for a time by growing melons which can be planted on a slightly raised mound of sandy loam on the bench and allowed to grow without any restrictions. A few seeds can be sown at once in a pan and potted on into threes. Should room still be scarce, pot on again into sixes and transfer to the bench from the latter. This will give you melons several weeks ahead of those sown in the open and these are especially appreciated if no greenhouse varieties are grown. Such varieties as Seth Low, Rocky Ford, and Emerald Gem will answer the purpose well. The treatment of these will be quite different from greenhouse varieties.

George H. Benson

In Mr. Benson's notes a few errors escaped the proof reader's scrutiny in the issue of March 18. Referring to the scion, read "can take the form of a vine in a pot, easily placed in position OR a lateral." Regarding thinning of grapes for "the grafting of bunches can be reduced," read "the QUANTITY of bunches," etc.

"Getting there"

For the present week Boston is in the grasp of the gardener and florist and his product, as no city in the country has ever before been. They came and they have conquered and the proverbial austerity of the New England character has simply melted in the warmth and geniality of the flowers' inspiring presence. "The most beautiful spectacle ever seen in Boston or elsewhere" is what one of the daily newspapers says of this supreme effort of the allied floral organizations. A magnificent success in every other respect, it now only remains for the financial results to be computed and should this, too, be a success in the same degree, then, indeed, we have surely entered upon a new and glorious era for the horticulturists of America.

Cheap glass and its effect

We listened with interest to the discussion in the American Rose Society meeting on the question of glass tariff and glass prices. The unprecedentedly low price at which glass may be bought is not regarded by well-intrenched growers as an unmixed blessing, however favorably the new operator may regard it. The inducement to large greenhouse building enterprises during the coming season carries with it the thought of overproduction and falling market values on the product and naturally the men who are in don't take kindly to such a possibility. Yet, after all, as one speaker said at the discussion in question, it is largely a waste of time for even the rose growing interests to talk about influencing tariff legislation to any appreciable extent on such a commodity as glass, in which their strength as consumers is infinitesimal as compared with the total consumption. After all, is it not more in line with good business policy to devote time and thought to the question of how to enlarge the demand for our goods rather than to the futile task of trying to curtail expansion and limit production?

A choice of routes

The old problem of how to unite in one society the active support of trade and amateur interests is again brought to the surface by the American Rose Society. It is offered in evidence of the possibility of such an alliance that it has been done in England, hence is not impossible here. Perhaps it is not an impossibility and we grant that it would give a great strength to the organization if a favorable solution may be found. But the Rose Society is not yet in a position financially or otherwise to take any risks of cooling the ardor of such trade support as it has succeeded in rallying to its cause, and that is just what is liable to be the outcome of a change of base under present conditions. Across the water social and other relationships are quite different from what they are here, as everybody knows, and it is obvious that there is a limit to the distance we can successfully follow their lead in such matters, even though the object sought be a laudable one. In this instance there are still some wide gaps to be bridged between the two extremes and it will be well to "go slow." Eloquent pleading and practical doing don't always travel the same road.

Seasonable Notes on Culture of Florists' Stock

AMARYLLIS

The display of bloom on these plants depends in a great measure on the care and preparation of the bulbs the year previous to flowering. As they go out of flower they should be placed on an airy, sunny bench. See that they are carefully watered as they should be kept growing all summer; don't dry them off until the fall. They can be placed in an open frame when danger of frost is past. Plunge in some light material and give frequent waterings during the hot weather and with slight cleaning now and then they will need no more attention. These bulbs can be increased by offsets and by seed.

HARDY ROSES

It is great advantage for dormant hybrid perpetuals to be planted early in order to allow them to make some new roots before the growth of foliage starts. Trench the ground thoroughly, working in a liberal application of barnyard manure. I think it is wise to give them plenty of room between the rows—say three feet or more and from 15 to 18 inches in the rows. This enables you to work through them during the summer, and gives room for winter protection. Hybrid Perpetuals should be replanted or replaced with young two-year-old stock every eight or ten years. It is better to plant a new bed every five or six years, as hybrids give very poor results the first season after being planted, then you can have the old beds to cut from. On old beds give additional stimulant such as fertilizer, pure bone meal, or liquid manure. This should be applied about the 20th of May. Now is the best time to prune roses. Frequent hoeing among the plants to keep the surface loose is especially beneficial in and during dry spells.

HARDY STOCK FOR LATE SPRING SALES

Florists who carry a line of hardy stock generally have calls late in the season when it is too late to dig the plants because of their being in leaf. Prepare now for this demand by having an assortment of hardy roses, climbers, perennials, shrubs, trees and other nursery stock potted up. Landscape work being done late in the season always calls for these pot plants. There is no better time to sow hardy perennials than now. Seed can be sown in a cold frame or in the open ground on a well prepared and mellow surface. Make rows three or four inches apart and cover the seed about three times their size with soil. The surface should be pressed firmly and kept moderately moist. After they come up thin out to 3 or 4 inches apart. The plants that you thin out can be transplanted into other quarters, and if shaded and watered for a few days will become well established. When large enough for final planting out, plant in rows far enough apart to run a hand cultivator between them, as they should have constant cultivation.

SALVIA

For summer bedding to form the rear rows of borders, for covering the rough foundation of brick or stone, and also as screens for unsightly corners or isolated groups there is nothing better than the old *Salvia splendens*. Seed that were sown early will now be covering the seed pans or flats with nice thrifty plantlets. They should be pricked out as soon as they can be handled. Those that are of good size can be potted up into 2 or 3-inch pots. When yet soft and growing rapidly be careful of any sudden changes in temperature, or cold drafts. It is not too late yet for the striking of another batch of cuttings from last year's plants.

SHADING

We are now coming into the warm and sunny days when certain classes of plants will have to be shaded. We are always tempted to use a too heavy shade at the start, which is often highly injurious. It is better to use just enough shade to break the direct sun's rays. In houses where palms, ferns and other foliage plants are kept, where there is no alternative but to shade with naphtha and white lead or some other mixture, be careful to put it on as thinly as possible and as the season advances it can be given another coat. Give the violets a light shade as it helps to keep the temperature down and the flowers will come with deeper color. Where you have only a bench to shade it is better to use cheesecloth than to darken the whole house up. As Easter comes quite late this year it may become necessary to shade the plants in order to retard part of your Easter stock.

VERBENAS

The early-sown verbenas should be ready to go into 2½ or 3-inch pots. They like a fairly rich loam. To be first-class plants they should have sufficient room for their development with ample moisture at the roots. Grow them in a light, airy house at a temperature of about 50 degrees. After April 20th they can be plunged in a mild hot-bed, on which about four inches of soil has been placed. About once in two weeks turn the pots around so they will not root through. Give ventilation when the weather will permit, and during rainy weather be very careful how you use water. It is not too late yet to sow seed of verbenas. They will come in well for delayed planting or for the tail end of the regular bedding season. Greenfly is sometimes very troublesome, so before removing your stock into frames they should be made perfectly clean by repeated fumigation.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Carnations; Orchids; Cyclamen; Gladiolus; Peonies; Tuberous Rooted Begonias.

GET IN LINE

With your Easter Advertising; one week left yet to tell them what you have to offer. Spring trade, bedding plant trade, nursery stock, hardy perennials and all sorts of seasonable topics can be profitably exploited in next week's issue of HORTICULTURE.

NATIONAL FLOWER SHOW

AN UNPARALLELED SUCCESS

List of Exhibits in Competitive and Trade Departments in the Great Show — List of Awards — Meetings of Many Societies — Notes of Entertainments etc.

The "Great National Flower Show" now at its height in Boston has unqualifiedly fulfilled all that has been predicted for it during the many months of preparation. In grandeur and extent it so far excels all records that its most enthusiastic supporters are simply amazed and the visitors from far and near have been privileged to gaze upon one of the most beautiful spectacles ever presented. It is bewildering and, practically impossible, to adequately describe the scene.

Among the features which, in the estimation of every visitor, stand out in especial prominence are the rose garden of Thomas Roland, the group of magnificent acacias, ericas, etc., by the same exhibitor, the trained Rambler roses of M. H. Walsh and the Dutch Garden by R. & J. Farquhar & Co. The illustrations presented herewith convey but feebly any conception of the vastness and elegance of these displays, the gorgeous color effect and the artistic taste displayed in these and other displays, individual or collective. Sensational in the extreme was also the beautiful display of sweet peas staged on Tuesday by Wm. Sim.

The main floor of Mechanics Building has two great divisions, Grand Hall and Mechanics Hall. The great central area of Grand Hall is devoted to plant groupings of mammoth proportions, the Dutch garden occupying the stage and a large section of the contiguous floor space; the immense group of decorative plants from W. A. Manda filling the entire opposite end, the acacia, orchid and erica groups occupying the centre and the whole flanked by extensive massings of flowering and foliage plants, while the space underneath the galleries on either side is given up to the trade plant displays and decorations no less beautiful than the competitive groups.

In Mechanics Hall the scene is a riot of gorgeous color. Here are the rose gardens, the Italian garden and endless massings of spring-flowering bulbs, and Easter blooming plants, forming vistas of unprecedented loveliness. Large sections are given over to the cut flower displays, the roses and violets having had especial prominence on the first three days, the sweet peas and carnations following on Tuesday and Wednesday and the roses coming on for a repetition on the final days of the week. The gal-

leries and the lower floor are given over to the trade display section—the florists' supplies in the former and the mechanical appliances in the latter—in both of which the public have displayed great interest. The famed Philharmonic orchestra on the stage in Grand Hall, a fine ladies' orchestra in Mechanics Hall and a smaller one in the Machinery Hall give concerts day and evening.

THE OPENING EXERCISES

These were simple in character. Paul Revere Hall, which with a number of smaller halls occupies a portion of the upper floor of the vast Mechanics Building was well filled with a brilliant audience when at 8 o'clock on Saturday evening J. K. M. L. Farquhar called the meeting to order and in a brief address, closing with the verses which appear elsewhere in this paper, extended a cordial greeting and told of the work which led to this brilliant outcome. He then introduced F. R. Pierson, chairman of the Flower Show Committee who made a most graceful speech, paying a high compliment to Boston's horticultural preeminence.

Mayor Fitzgerald was the next speaker. Eloquent and pleasing as always he expressed the enthusiastic and hospitable welcome of the city to its visitors. Governor Foss, on behalf of the State of Massachusetts, voiced his appreciation of the elevating influence of horticulture and the splendor of the floral scene in the halls below. Then came Hon. S. W. McCall, who in his address took occasion to pay an appreciative tribute to the character and attainments of Wm. R. Smith, the venerable superintendent of the National Botanic Garden and "Father of the Charter" and was followed by Chas. W. Parker, president of the Massachusetts Horticultural Society who briefly extended the best wishes of that influential body. President George Asmus of the S. A. F. was next introduced and gave a short account of the scope and aim of that organization. Wm. R. Smith was the last speaker and, on being introduced, was accorded an ovation. He took occasion to compliment Boston on its esthetic culture, referred to Prof. C. S. Sargent as a man with no equal on earth in his chosen sphere and did not forget to add a few words regarding his beloved Robert Burns.

EXHIBITION DETAILS

Proceeding down the main aisle of Mechanics Hall the visitor would note the following: The rose exhibits above mentioned, from Thos. Roland and M. H. Walsh. In the latter Mrs. M. H. Walsh, white, and Lucile, soft pink, were sparkling novelties. Extensive orchid exhibit from W. A. Manda with a long line of first prize cards. In Mrs. H. F. Durant's collection, a plant of *Veltheimia vividifolium*, very rarely seen. C. B. Newbold's *Obconica* primroses. E. B. Dane's collection of cypripediums, remarkable for variety and rarity. New "moss fern," *Nephrolepis muscosa*. William Sim, display of violets. Norris F. Comley's and W. C. Ward's pansies, particularly extensive selections of fine varieties. Small-flowered Japan

bloom. Rose Melody, Robert Scott & Son (silver medal). Improved Double White Killarney, S. J. Reuter (silver medal). Pink sport of White Killarney, F. R. Pierson Co. Killarney sport, Robert Scott & Son. Dark Pink Killarney, A. N. Pierson (certificate). There were more American Beauties than we had any reason to expect, considering the scarcity of the market. The enclosure by Thomas F. Galvin, a bower of elegant palms, and the furnishings were very rich. O. Cusumano, dealers in pottery, a very fine exhibit. An enormous specimen of *Azalea Indica alba* from C. B. Newbold, Samuel Batchelor, gardener. Anthuriums and gigantic ferns and other stove plants from Lester Leland estate, E. H. Wetterlow, gardener. Group of *Imantophyllums* backed by

sive collection of bulbs. Display of yellow callas in pots.

Pennock-Meehan Co., ribbon specialties.

Henry F. Michell Co., a big general bulb and supply booth.

H. M. Robinson & Co. had not only supplies, but galax leaves and greens. Booth festooned with Southern smilax.

B. Hammond Tracy, gladiolus bulbs. Mrs. E. M. Gill, collection of plants and flowers.

Climax Mfg. Co., folding boxes.

Schloss Bros., ribbons, chiffons and novelties.

Wertheimer Bros., sprinkleproof ribbons and chiffons in new weaves, and chiffon with gold and silver borders, chiffon with wire edges, spun-glass corsage pins, etc.

J. Jarndahl, birch-bark plant recep-

NATIONAL FLOWER SHOW.

Roland Rose Garden and Walsh Ramblers in Mechanics Hall

azaleas from Prof. Charles Sargent's. Among Leuthy's novelties, *Dracaena Bruante Panache*, *Souvenir de Francois Buysse*, and *Dracaena Prince Albert*. *Cyrtostachis Renda*, var. *Duveviana*, a red-stemmed palm from Julius Roehrs Co. Robert Craig's exhibit of seedling crotons, one of which has been named Governor Foss. General collection of greenhouse plants and ferns, full of perfect specimens. New golden *Pandanus Lindenhurst*, raised by John Dodds, purchased by Robert Craig, and will be disseminated in the fall. *Schizanthus*, by several growers, all splendidly flowered plants. The cyclamens and *obconica* primroses fully up to the high standard of previous Boston exhibits, from many growers. New rose Mrs. Wardell, shown by W. H. Elliott. Raimbault & Bruzeaud, J. W. McIntire, salesman, 45 varieties of lilacs in

a group of ericas 8 to 10 feet high, from Prof. Sargent's estate. All the *nephrolepis* family was represented, among them one that was never shown before, a dwarf form of the Boston type, from Robert Craig Co., as yet unnamed. Closely resembles Scotti, but more perfect in frond. *Chorizemas ilicifolium*. Group of magnificent specimen plants, with their brilliant orange crimson flowers. Carbone's Italian garden, fitted up with pergola and a tasteful arrangement of palms and flowering plants and cut blooms in art vases. Bobbink & Atkins, display of confers; also extensive display of clipped box trees, formal yews and other garden specialties.

Gallery Trade Exhibits.

Welch Bros., magnificent display of florists' supplies.

John Lewis Childs, very comprehen-

sive collection of bulbs. Display of yellow callas in pots.

Boas & Co., flower boxes.

Fottler, Fiske, Rawson Co., forced bulb flowers and seedsmen's sundries.

Gt. Van Waveren & Kruijff, French and Dutch bulbs.

Jos. G. Neidinger, chiffons and artificial flowers and florists' supplies.

Grand Hall Trade Exhibits.

C. Keur & Sons, display of bulbs.

Henry A. Dreer Co., cocos, variegated pineapple and several other novelties.

Penn, the Florist, models of bridal party.

Hoffman, Florist, formal garden retreat, evergreens, flowering shrubs, stone seats.

F. R. Pierson Co., very complete collection of all the forms of *Nephrolepis*.

New England Nurseries, group of conifers and box trees.

Julius Roehrs Co., collection of novelties and standard greenhouse decorative plants.

Kessler Bros., new *Nephrolepis Dreyeri*.

Mt. Desert Nurseries, *Nephrolepis Milleri*.

R. & J. Farquhar Co., new shrubs and vines from northern China introduced by the Arnold Arboretum.

E. MacMulkin, display group of palms, flowering and foliage plants, flanking Thomas Roland's sensational group.

Farquhar's cyclamens, fringing the front of the Dutch garden.

Mrs. Frederick Ayer, exhibit of acacias, heaths, crotons, etc., flanking Thomas Roland's exhibit on the south side.

Julius Roehrs Co., immense circular stand of orchids, including very many new and rare plants.

W. A. Manda, orchids and choice stove plants.

A. Leuthy & Co., decorative and foliage plants.

Paul De Nave, choice orchids in flower.

Crowl Fern Co., florists' decorative greens.

Ellwanger & Barry, collection of conifers.

A. N. Pierson, extensive collection of Easter flowering plants and young stock of roses, chrysanthemums, geranias, etc. Also fine specimens of his new roses, Dark Pink Killarney and Prince de Bulgarie.

Yokohama Nursery Co., interesting display of dwarf Japanese trees and shrubs.

Knight & Struck, stove and greenhouse plants.

Lager & Hurrell, a nice display of orchids.

Eastern Nurseries, comprehensive collection of medium-sized conifers, including a very wide variety of the

NATIONAL FLOWER SHOW.

A corner of the Walsh rose exhibit.

choicest things in this line, arranged with much skill.

W. W. Edgar Co., Easter plants, palms and bay trees. Large and brilliant display.

R. C. Bridgham, Newton Rose Conservatories, display of bedding plants, etc.

Trade Displays in Lower Hall.

Boston Belting Co., rubber hose.
American Agricultural Chemical Co., fertilizers.

King Construction Co., model iron frame greenhouse.

Wilson Plant Oil & Fertilizer Co., horticultural sundries.

Patrick Grace, artstone lawn vases.

Archibald Mfg. Co., model greenhouse ventilating system.

E. A. Ormsby, ventilating apparatus.

Weathered Company, section of greenhouse.

Waits Interlocking Steel Co., greenhouse benches.

American Auxiliary Heating Co., Castle Automatic Circulator, busily working.

N. E. Mineral Fertilizer & Chemical Co., plant food.

Pierson-U-Bar Co., section of U-Bar greenhouse in a garden with a railing and floral adornment.

Lunt Moss Co., water supply machinery, spraying machines, etc.

International Harvester Co., automobiles and engines.

Daniel Iliffe, boiler and greenhouse section. The new Iliffe patent sash-lifter.

C. W. Brownell Co., orchid potting material, peat, etc.

Advance Company, ventilating apparatus and greenhouse fittings.

Means & Thacher, greenhouse paint.

A. H. Hews & Co., flower pots, and garden vases.

Joseph Traudt, variegated dwarf sweet alyssum.

Lord & Burnham Co., Burnham greenhouse boilers and section of greenhouse; greenhouse benches and fittings.

Kroeschell Co., mammoth Kroeschell boiler, the largest ever exhibited at any florists' convention. Messrs. Kroeschell provided a cozy corner, in which to sit and rest.

Hammond's Paint & Slug Shot Works, very complete display of the

NATIONAL FLOWER SHOW.

Italian Garden by Carbone

many specialties of this well-known company, including paint, putty, in secticides, etc.

Hitchings & Co., Hitchings' sectional boiler, section of greenhouse, hot-bed sashes, ventilation, angle-eave construction, etc.

Thomas J. Grey Co., seeds, bulbs, tools, etc. Display of Easter flowering plants. An interesting feature of this exhibit was an old-fashioned plow said to be 150 years old, alongside the latest improved model Syracuse plow, gold plated.

Bowker Fertilizer Co., fertilizers, lawn dressings, etc.

Electrical Hose & Rubber Co., rubber hose.

American Blower Co., Detroit return trap.

William Moll, ideal steam specialties.

Cleveland Cut Flower Co., Bate evaporator.

S. B. Church, high pressure spraying machines, water systems, etc.

Johnston Heating Co., greenhouse boilers.

Boston Plate & Window Glass Co., greenhouse glass, mirrors, etc.

Revere Rubber Co., Revere hose.

A. T. Stearns Lumber Co., sash bars and greenhouse lumber, etc.

W. A. Bruce, greenhouse glazing, paint, etc.

J. G. Harrison & Sons, box trees and nursery roses.

U. S. Radiator Corporation, Furman steam and hot water boilers.

North Shore Ferneries Co., rustic garden and lawn furniture, formal arbors, etc.

THE AWARDS

PLANT SECTION.

Flowering Plants.—Miscellaneous.

Aecias, 18 plants, not less than 4 vars., Thos. Roland, Nahant, Mass., 1st.; Mrs. Frederick Ayer, 2nd.
Aecias, 6 plants, not less than 3 vars., Thos. Roland, 1st.; Mrs. F. Ayer, 2nd.
Aecias, 3 plants, one or more vars., Thos. Roland, 1st.; Mrs. F. Ayer, 2nd.
Acacia pubescens, specimen plants, Thos. Roland, 1st.
Acacia paradoxa, specimen plants, Thos. Roland, 1st.; W. A. Manda, 2nd.
Acacia, any other species or var., specimen, T. Roland, 1st.; T. Roland, 2nd.
Amaryllis, 36 plants, not less than 18 vars., T. Roland, 1st.
Amaryllis, 12 plants, not less than 9 vars., T. Roland, 1st.
Anthurium, 6 plants, not less than 3 vars., one first; W. A. Manda, 2nd.
Anthurium, specimen plant, Lester Leland, 1st.; W. A. Manda, 2nd.
Azalea indica, 24 plants, not less than 6 vars., Julius Roehrs Co., Rutherford, N. J., 1st.
Azalea indica, 12 plants, not less than 6 vars., Peirce Bros., 1st.; W. W. Edgar Co., 2nd.
Azalea indica, 6 plants, not less than 3 vars., A. M. Davenport, Watertown, Mass., 1st.
Azalea indica, specimen plant, pink or rose, Peirce Bros., 1st.
Azalea indica, specimen plant, white, C. B. Newbold, 1st.
Azalea indica, specimen plant, any other color, Peirce Bros., 1st.
Azalea mollis, 12 plants, not less than 4 colors, Sidney Hoffman, 1st.
Begonia Gloire de Lorraine, 6 plants, A. M. Davenport, 1st.; A. M. Davenport, 2nd.
Boronia, 6 plants, not less than 2 vars., T. Roland, 1st.
Bougainvillea, 6 plants, T. Roland, 1st.
Calceolaria hybrida, 6 plants, T. Roland, 1st.; T. Roland, 2nd.
Camellias, specimen plant, W. A. Manda, 1st.
Cineraria hybrida, 6 plants, Mrs. John L. Gardner, Brookline, 1st.
Cineraria stellata, 6 plants, Mrs. John L. Gardner, 1st.
Cyclamens, 36 plants, R. & J. Farquhar & Co., 1st.
Cyclamens, 12 plants, W. C. Rust, 1st.; Robt. Craig Co., Phila., 2nd.
Chorizema, 4 plants, Mrs. John L. Gardner, 1st.
Chorizema, specimen plant, Mrs. John L. Gardner, 1st.
Ericas, 24 plants, not less than 6 vars., T. Roland, 1st.
Ericas, 6 plants, not less than 3 vars., T. Roland, 1st.; Mrs. F. Ayer, 2nd.
Erica melanthera, 6 plants, Thos. Roland, 1st.; Mrs. F. Ayer, 2nd.
Ericas, any species, specimen plant, Mrs. F. Ayer, 1st.; T. Roland, 2nd.
 Flowering shrubs, 12 plants, standard or tree form, not less than 6 vars., W. A. Manda, 1st.; Peirce Bros., 2nd.
 (Prize No. 45 offered by the Massachusetts State Board of Agriculture.)
Gardenias, 6 plants, John McFarland, 1st.
Gardenias, specimen plant, (No first); John McFarland, 2nd.
Genistas, 12 plants, T. Roland, 1st.
Genistas, specimen plant, (No first); Mrs. E. M. Gill, Medford, Mass., 2nd.
 Flowering Plants, group arranged for effect, with palms and other foliage plants, to cover not less than 200 square feet, Edward MacMulin, Boston, 1st.
 Forced Shrubs, group forced shrubs and herbaceous plants (hardy trees and vines admissible), arranged for effect, to cover not less than 200 square feet, Peirce Bros., 1st.
Hydrangeas, 12 plants, not less than 3 vars., Thos. Roland, 1st.; T. Roland, 2nd.
Hydrangeas, 6 plants, not less than 2 vars., T. Roland, 1st.
Hydrangeas, specimen plant, (No first), J. W. Dudley & Sons, Parkersburg, W. Va., 2nd.
Lilacs, 12 plants, not less than 3 vars., Julius Roehrs, 1st.; Peirce Bros., 2nd.
Lilacs, 3 plants, one or more vars., (No first); Peirce Bros., 2nd.
Marguerites, 3 plants, James Marlborough, 1st.
Marguerites, specimen plant, James Marlborough, 1st.
Rhododendrons, 24 plants, not less than 6 vars., Julius Roehrs, 1st.
Rhododendrons, 12 plants, not less than 3 vars., W. A. Manda, 1st.
Rhododendrons, specimen plant, pink or lavender, (no first); W. A. Manda, 2nd.
Rhododendrons, plant, white or nearly white, (no first); (no second); W. A. Manda, 3rd.
Spiraea, or *Astilbe*, 12 plants, not less than 3 vars., (no first); Peirce Bros., 2nd.
Wistaria, specimen plant, Peirce Bros., 1st.
Geraniums, 12 plants, not less than 12 vars., Winthrop Ames, 1st.
Primula obconica, 12 plants, W. C. Rust, 1st.
Schizanthus, 6 plants, Mrs. E. S. Grew, Manchester, Mass., 1st.; John L. Smith, 2nd.

One Specimen Flowering Plant, other than above, W. A. Manda, 1st.

Flowering Plants.—Bulbs.

Hyacinths, 8 10-inch pans, distinct vars., John L. Smith, Swampscott, Mass., 1st.; Geo. Barker, Swampscott, 2nd.; Wm. Patterson, Wollaston, Mass., 3rd.
Hyacinths, 3 10-inch pans, white, Wm. C. Rust, Brookline, 1st.; Wm. Patterson, 2nd.
Hyacinths, 3 10-inch pans, pink or red, W. C. Rust, 1st.; Wm. Patterson, 2nd.
Hyacinths, 3 10-inch pans, light blue, W. C. Rust, 1st.; Wm. Patterson, 2nd.
Hyacinths, 3 10-inch pans, dark blue, W. C. Rust, 1st.; Wm. Patterson, 2nd.
Hyacinths, 50 single pots, not less than 12 vars., John L. Smith, 1st.; Wm. Patterson, 2nd.
 Lilies, display to cover not less than 100 square feet. Foliage plants may be used for effective arrangement, John McFarland, North Easton, Mass., 1st.; Peirce Bros., Waltham, 2nd.
Narcissus, Large Trumpet, 12 10-in. pans in 12 vars., John L. Smith, 1st.; Wm. Patterson, 2nd.
Narcissus, Short or Medium Trumpet, 12 10-in. pans, 12 vars., John L. Smith, 1st.; Wm. Patterson, 2nd.
Narcissus, 3 10-inch pans, Glory of Leiden, Wm. Patterson, 1st.
Narcissus, 3 10-inch pans, Bicolor or Victoria, Wm. Patterson, 1st.
Narcissus, 3 10-inch pans, Empress, Wm. Patterson, 1st.
Narcissus, 3 10-inch pans, Emperor, Wm. Patterson, 1st.
Narcissus, 3 10-inch pans, Golden Spur, Wm. Patterson, 1st.
Narcissus, 3 10-inch pans, double Von Slon, John L. Smith, 1st.; Wm. Patterson, 2nd.
Narcissus, 3 10-inch pans, any other double, Wm. Patterson, 1st.
Tulips, Early Single, 15 10-inch pans, distinct vars., John L. Smith, 1st.; Wm. Patterson, 2nd.
Tulips, Early Single, 8 10-inch pans, distinct vars., John L. Smith, 1st.; Wm. Patterson, 2nd.
Tulips, Early Single, 3 10-inch pans, white, Wm. Patterson, 1st.
Tulips, Early Single, 3 10-inch pans, pink, Wm. Patterson, 1st.
Tulips, Early Single, 3 10-inch pans, scarlet or crimson, John L. Smith, 1st.
Tulips, Early Single, 3 10-inch pans, yellow, Wm. Patterson, 1st.
Tulips, Early Double, 6 10-inch pans, not less than 3 vars., Wm. Patterson, 2nd.
 Miscellaneous Bulbs, collection, arranged for effect, other foliage plants admissible, to cover not less than 150 square feet, R. & J. Farquhar & Co., 1st.; Sidney Hoffman, 2nd.
 The judges were so deeply impressed with the beauty and artistic arrangement of the first prize exhibit that they earnestly recommended the additional award of a gold medal.
 One specimen Bulbous Plant in flower other than above, T. T. Watt, 1st.
 The judges were specially attracted by the entry in this class of *Narcissus* King Alfred and would recommend a reward of a certificate of merit.

Flowering Plants.—Orchids.

Orchids, collection, arranged with foliage plants for effect, to cover not less than 100 square feet. For commercial growers only, Julius Roehrs, Rutherford, N. J., 1st.
 Orchids, collection, 12 plants, 12 distinct vars., E. B. Dane, Chestnut Hill, Brookline, Mass., 1st.; W. A. Manda, South Orange, N. J., 2nd.
Cattleya Trianae, specimen plant, J. T. Butterworth, South Framingham, Mass., 1st.; W. A. Manda, 2nd.
Cattleya Schroederiae, specimen plant, W. A. Manda, 1st.
Cattleya, any other variety, specimen plant, J. T. Butterworth, 1st.; W. A. Manda, 2nd.; W. A. Manda, 3rd.
Cypripedium, collection, not less than 25 vars., E. B. Dane, 1st.; W. A. Manda, 2nd.
Cypripedium, 6 plants, 6 vars., E. B. Dane, 1st.; W. A. Manda, 2nd.
Cypripedium, specimen, any var., W. A. Manda, 1st.; J. T. Butterworth, 2nd.
Coeloglyne, specimen plant, E. J. Mitton, Brookline, Mass., 1st.
Dendrobium, 12 plants, 12 vars., W. A. Manda, 1st.
Dendrobium nobile, specimen plant, Henry Stewart, Waltham, Mass., 1st.; W. A. Manda, 2nd.
Dendrobium Wardianum, best specimen plant, W. A. Manda, 1st.; J. T. Butterworth, 2nd.
Dendrobium, specimen plant, any other var., W. A. Manda, 1st.
Laelia anceps, specimen plant, T. T. Watt, Wellesley Mass., 1st.; T. T. Watt, 2nd.
Odontoglossum, specimen plant, any var., W. A. Manda, 1st.
Oncidium, specimen plant, any var., W. A. Manda, 1st.
Phalaenopsis, specimen plant, any var., W. A. Manda, 1st.; J. T. Butterworth, 2nd.
Vanda, specimen plant, any var., Lager & Hurrell, Summit, N. J., 1st.
 One Specimen Orchid in flower other than above, W. A. Manda, 1st.

Flowering Plants.—Roses.

Division A.—American Rose Society Prizes.

Display in pots or tubs, any or all classes, to occupy not less than 300 square feet, arranged for effect, Thos. Roland, 1st.; M. H. Walsh, Woods Hole, Mass., 2nd.

12 Climbing or rambling, 6 or more vars., M. H. Walsh, 1st.

Lady Gay, specimen plant, M. H. Walsh, 1st.

Hawatha, specimen plant, M. H. Walsh, 1st.

Climbing, any other var., specimen, M. H. Walsh, 1st.

Baby Rambler, crimson, 6 plants, Thos. Roland, 1st.

Baby Rambler, pink, 6 plants, T. Roland, 1st.

Baby Rambler, white, 6 plants, T. Roland, 1st.

Collection of standard or tree roses, 12 or more plants, 6 or more vars., T. Roland, 1st.

Ferns.

Adiantum Farleyense, specimen, James Marlborough, 1st.; W. A. Manda, 2nd.; James Marlborough, Topsfield, Mass., 3rd.

Adiantum cuneatum or its var., specimen, E. B. Dane, 1st.; Geo. Barker, 2nd.

Aspidium, specimen, W. A. Manda, 1st.

Cibotium Schiedel, specimen, C. B. Newbold, 1st.; Mrs. Frederick Ayer, 2nd.; W. A. Manda, 3rd.

Davallia, specimen, any var., W. A. Manda, 1st.; Wm. Thatcher, Brookline, Mass., 2nd.

Nephrolepis exaltata and its vars., display, one of each, pots not to exceed 8 inches in diam., F. R. Pierson Co., Tarrytown, N. Y., 1st.; W. A. Manda, 2nd.

Nephrolepis Bostoniensis, specimen, F. R. Pierson Co., 1st.

Nephrolepis Scottii, specimen, (no first); F. R. Pierson Co., 2nd.

Nephrolepis Piersoni, specimen, F. R. Pierson Co., 1st.

Nephrolepis Piersoni elegantissima, specimen, F. R. Pierson Co., 1st.

Nephrolepis Whitmani, specimen, F. R. Pierson Co., 1st.

Nephrolepis, specimen any other var., F. R. Pierson Co., 1st.; F. R. Pierson Co., 2nd.; Kessler Bros., New York, 3rd.

Polypodium, or Goniophlebium, specimen, W. A. Manda, 1st.; W. Edgar Co., 2nd.

Stag Horn Fern, 6 plants, in var., W. A. Manda, 1st.

Stag Horn Fern, specimen, any var., W. A. Manda, 1st.; Mrs. Frederick Ayer, 2nd.

Tree Fern, specimen, W. A. Manda, 1st.

Fern, specimen, any other var., W. A. Manda, 1st.

Fern, specimen, new var., not in commerce, Silver and Bronze medals, W. A. Manda, 1st.; F. R. Pierson Co., 2nd.

Palms and Foliage Plants.

Arecas, pair, Geo. Barker, Swampscott, Mass., 1st.; W. A. Manda, So. Orange, N. J., 2nd.

Arecas, specimen, W. A. Manda, 1st.

Cocos Australis or its vars., specimen, W. A. Manda, 1st.

Cocos plumosus, specimen, W. A. Manda, 1st.

Kentia Belmoreana, pair, W. A. Manda, 1st.; E. MacMulkin, Boston, 2nd.

Kentia Belmoreana, specimen, W. A. Manda, 1st.

Kentia Forsteriana, pair, W. A. Manda, 1st.

Kentia Forsteriana, specimen, W. A. Manda, 1st.

Phoenix Roebelenii, pair, Bobbink & Atkins, Rutherford, N. J., 1st.; A. Bieschke, Norton, Conn., 2nd.; James MacKan, Tuxedo Park, N. Y., 3rd.

Phoenix rupicola, specimen, W. A. Manda, 1st.

Palms, other than above, 12 plants, 12 vars., W. A. Manda, 1st.

One specimen Palm, any other than above, W. A. Manda, 1st.

Bay Trees, display, Bobbink & Atkins, 1st.; R. & J. Farquhar, 2nd.

Bay Trees, pair, pyramidal, Geo. Barker, 1st.; S. Hoffman, 2nd.

Bay Trees, pair, standard, Geo. Barker, 1st.; S. Hoffman, 2nd.

Box Trees, display, W. A. Manda, 1st.; Bobbink & Atkins, 2nd.

Box Trees, pair, pyramidal, W. A. Manda, 1st.; S. Hoffman, 2nd.

Box Trees, pair, standard, W. A. Manda, 1st.; S. Hoffman, 2nd.

Box Trees, pair, bush, W. A. Manda, 1st.; W. A. Manda, 2nd.

Araucarias, 6 plants, 3 or more vars., W. A. Manda, 1st.

Crotons, display, Robt. Craig Co., Phila., Pa., 1st.

Crotons, 25 plants, 25 vars., in not over 6-inch pot, Robt. Craig Co., 1st.

Crotons, 6 plants, 6 vars., Mrs. Frederick Ayer, Newton Centre, Mass., 1st.; Robt. Craig Co., 2nd.

Cycad, specimen, any variety, W. A. Manda, 1st.; W. A. Manda, 2nd.

Dracaenas, 12 plants, 6 or more vars., W. A. Manda, 1st.; Thos. Roland, Nahant, Mass., 2nd.

Dracaenas, specimen, green, W. A. Manda, 1st.; E. MacMulkin, 2nd.; W. A. Manda, 3rd.

Dracaenas, specimen, red, Robt. Craig Co., 1st.; W. A. Manda, 2nd.

Dracaenas, specimen, any other color, E. B. Dane, Brookline, Mass., 1st.; Robt. Craig, 2nd.; W. A. Manda, 3rd.

Ficus elastica or elastica variegata, specimen, W. A. Manda, 1st.

Ficus pandurata, specimen, W. A. Manda, 1st.; Robt. Craig, 2nd.

Pandanus Veitchii, specimen, W. A. Manda, 1st.

Pandanus, specimen, any other var., J. Dodds, Phila., Pa., 1st.; W. Thatcher, Brookline, Mass., 2nd.; W. A. Manda, 3rd.

One specimen greenhouse or stove foliage plant, other than above, W. Thatcher, 1st.

Greenhouse or Stove Foliage Plants, 6 plants, 6 var., W. A. Manda, 1st.

Cacti and other Succulent Plants, collection, not less than 50 vars., W. A. Manda, 1st.

One Specimen Succulent Plant, W. A. Manda, 1st.

Banana Tree, specimen in fruit, James Marlborough, Topsfield, Mass., 1st.

Conifers, collection in pots or tubs, not less than 25 vars., W. A. Manda, 1st.; R. & J. Farquhar, 2nd.; Bobbink & Atkins, 3rd.

Conifers, 6 specimens, W. A. Manda, 1st.; W. A. Manda, 2nd.

Conifers, 3 specimens, W. A. Manda, 1st.; W. A. Manda, 2nd.

Conifers, 2 specimens, W. A. Manda, 1st.; W. A. Manda, 2nd.

Conifers, single specimen, W. A. Manda, 1st.; W. A. Manda, 2nd.

CUT FLOWER SECTION.

Roses.

DIVISION D.

American Beauty, Myers & Samtman, 1st.; Bassett & Washburn, 2nd.

Killarney, A. Farenwald, 1st.; Waban Rose Conservatories, 2nd.

White Killarney, Waban Rose Cons., 1st.; Poehlmann Bros. Co., 2nd.

Richmond, Edward Towill, 1st.; A. Farenwald, 2nd.

My Maryland, A. N. Pierson, 1st.; Myers & Samtman, 2nd.

Mrs. Jardine, Robt. Scott & Son, 1st.; John Stevenson & Son, 2nd.

Kaiserin Augusta Victoria, (no first); Robt. Scott & Son, 2nd.

Mrs. Aaron Ward, Waban Rose Cons., 1st.; W. H. Elliott, 2nd.

Cardinal or Rhea Reid, W. H. Elliott, 1st.; Bassett & Washburn, 2nd.

Any other disseminated variety, A. N. Pierson, 1st.; A. N. Pierson, 2nd.

DIVISION E.

American Beauty, L. A. Noe, 1st.; Myers & Samtman, 2nd.

Killarney, John R. Andre, 1st.; A. Farenwald, 2nd.

White Killarney, John Andre, 1st.; Poehlmann Bros. Co., 2nd.

Richmond, Edward Towill, 1st.; John Welsh Young, 2nd.

My Maryland, John Welsh Young, 1st.; Wm. Geiger, 2nd.

Bride, L. A. Noe, 1st.; Pittsburg Cut Flower Co., 2nd.

Bridesmaid, Waban Rose Cons., 1st.; L. A. Noe, 2nd.

Golden Gate or Uncle John, (no first); Gude Bros. Co., 2nd.

Bon Silene, W. H. Elliott, 1st.

Any other disseminated variety, Wm. Geiger, 1st.; Exeter Rose Conservatories, 2nd.

Special Report on Roses: The judges wish to call attention to the special excellence of the total exhibits. The competition was so keen that there was little difference in quality and size between the first and second prize winners, and the exhibits of the roses at large were of a quality exceedingly even and close seconds to the best.

DIVISION H.

Special Prizes.—American Rose Society's Medals and Certificates for Novelties.

Gold Medal for the best new Rose not yet disseminated, whether of domestic or foreign origin. Exhibits to be judged by the official scale of the American Rose Society, and no gold medal to be awarded to any Rose scoring less than 95 points.

Silver Medal is offered at the same time and under the same conditions for a novelty scoring not less than 85 points.

A Certificate of Merit is awarded to all Novelties scoring 80 points, but neither Medal nor Certificate will be issued until the variety is named and 12 blooms shown.

F. R. Pierson Co., certificate on Killarney Sport, 84 points.

S. J. Reuter & Son, silver medal on Killarney Sport, 86 points.

A. N. Pierson Co., certificate on Lady Cromwell, 82 points.

Robert Scott & Son, silver medal on Melody, 85 points.

A. N. Pierson, certificate on Red Killarney, 81 points.

Robert Scott & Son, certificate on Double Pink Killarney, 84 points.

A. N. Pierson, certificate on Dark Pink Killarney, 83 points.

"Growers' " prizes, Waban Rose Conservatories 1st.; Edw. Towill, 2nd.; A. Farenwald, 3rd.

S. A. F. medals were awarded to M. H. Walsh for seedling Rambler roses and Rambler rose Lucile (Silver) and Lady Gay (Bronze). A certificate of merit was given to Myers & Samtman for new rose Hilda (81 points).

CARNATIONS.

SECTION A.

Open to all varieties.

Vase 100 blooms, white, Cottage Gardens Co., Queens, N. Y., 1st.; Patten & Co., Tewksbury, Mass., (with Shasta), 2nd.; Littlefield & Wyman North Hinton, Mass., (with Perfection), 3rd.

Vase 100 blooms, flesh pink, etc., John Barr, Natick, Mass., 1st.; Peter Fisher, Ellis, Mass., (with May Day), 2nd.; S. J. Goddard Framingham, Mass., (with Pink Delight), 3rd.

Vase 100 blooms, light pink, etc., John Barr, 1st.; Joseph Heacock Co., Wyncote, Pa., 2nd.; Peter Fisher, 3rd.

Vase 100 blooms, dark pink, etc., Cottage Gardens Co., 1st.; Chas. Webber, Lynbrook, N. Y., 2nd.

Vase 100 blooms, red or scarlet, etc., Patten & Co., (with Beacon), 1st.; S. J. Goddard, 2nd.; Peter Fisher, 3rd.

Vase 100 blooms, crimson, etc., W. D. Howard, Milford, Mass., (with Fenn), 1st.; Wanoka Greenhouses, Barnveld, N. Y., 2nd.; James Wheeler, Natick, Mass., 3rd.

Vase 100 blooms, yellow or yellow variegated, Patten & Co., (with Hattie Starret), 1st.

Vase 100 blooms, white, variegated, Patten & Co., (with Mrs. C. W. Barrow), 1st.; Wanoka Greenhouses, 2nd.; John Barr, 3rd.

See Section H. Class 343, for Sweepstakes prize in Section A.

SECTION B.

Open to all varieties disseminated prior to July, 1910. 50 blooms to each vase.

White Perfection, S. J. Goddard, 1st.; Peter Fisher, 2nd.

White Enchantress, Peter Fisher, 1st.; Pierce Bros., 2nd.

Any other white, Patten & Co., 1st.

Enchantress, Peter Fisher, 1st.; Wm. Nicholson, Framingham, Mass., 2nd.

Pink Delight, Patten & Co., 1st.; Peter Fisher, 2nd.

Any other flesh pink, Peter Fisher, 1st.; Chas. S. Strout, Biddeford, Maine, 2nd.

Rose pink Enchantress, (no first); Pierce Bros., 2nd.

Winsor, A. A. Pembroke, Beverly, Mass., 1st.; Patten & Co., 2nd.

Winona, Patten & Co., 1st.; Pierce Bros., 2nd.

Any other light pink, (no first); N. F. Comley, Lexington, Mass., 2nd.

Afterglow, William Nicholson, 1st.

Any other dark pink, S. J. Goddard, 1st.

Victory, F. R. Pierson Co., 1st.; C. S. Strout, 2nd.

Beacon, John Barr, 1st.; S. J. Goddard, 2nd.

Any other scarlet, L. E. Small, 1st.

Harry Fenn, W. D. Howard, 1st.

Any other crimson, Littlefield & Waymon, 1st.; M. A. Patten, 2nd.

Mrs. M. A. Patten, Wm. Nicholson, 1st.

Any yellow, variegated, M. A. Patten, 1st.; H. Schrade, 2nd.

Any other color, M. A. Patten, 1st.

SECTION C.

For Seedlings and Sports not disseminated prior to July, 1910. 25 blooms to each vase.

Sweepstake prizes for Classes 328 to 333 inclusive. 1st, \$25.00 and S. A. F. Silver Medal; 2nd, \$15.00 and S. A. F. Bronze

Medal; 3rd, \$10.00, M. A. Patten, 1st.; M. A. Patten, 2nd.; E. G. Hill Co., Richmond, Ind., 3rd.
 White, M. A. Patten, 1st.; Robt. Main, 2nd.
 Pink, Cottage Gardens Co., 1st.; Henry Eicholz, Waynesboro, Penna., 2nd.; W. D. Howard, 3rd.
 Red or Scarlet, E. G. Hill Co., 1st.; Wm. Kleinheinz, Ogontz, Pa., 2nd.
 Crimson or Maroon, Samuel Kinder, Bristol, R. I., 1st.
 Any other color, M. A. Patten, 1st.

SECTION E.

American Carnation Society Certificate of Merit. To be identical with our regular certificate class, Scott Bros., Elmsford, N. Y., 1st.

SECTION F.

Preliminary Certificate. To be identical with our regular certificate class, Wm. Kleinheinz, 1st. (Preliminary certificate, 85 points.)

SECTION H.

Special Premiums.

Silver Cup, valued at \$30.00, is offered by Hitchings & Co. as a sweepstake prize in Section A, Cottage Gardens Co., 1st.
 \$25.00 in gold is offered by F. Dorner & Sons Co. for the best vase of 100 blooms Pink Delight, S. J. Goddard, 1st.
 A Gold Medal, or \$25.00 in gold is offered by Kroeschell Bros. for the largest 12 blooms of Carnations, one or more varieties. Each bloom must measure not less than 5 inches, C. S. Strout, 1st.
 A \$25.00 silver cup, or \$25.00 in gold, is offered by Jos. Heacock Co. for the best vase of 100 blooms Dorothy Gordon, S. J. Goddard, 1st.

SECTION I.

For varieties disseminated season 1909-1910. 50 blooms to each vase.

Conquest, N. F. Comley, 2nd.
 Shasta, (no first); M. A. Patten 2nd.
 Scarlet Glow, L. E. Small, 1st.
 D. Gordon, (no first); W. Nicholson, 2nd.
 Bon Ami, M. A. Patten, 1st.

SWEET PEAS.

White, 100 Blooms, William Sim, Cliftondale, Mass., 1st.; Wm. Sim, 2nd.
 Pink, 100 Blooms, Wm. Sim, 1st.; Halifax Gardens Co., Halifax, Mass., 2nd.
 Pink and White, 100 Blooms, Wm. Sim, 1st.; Halifax Gardens Co., 2nd.
 Light Pink or Salmon, 100 Blooms, Wm. Sim, 1st.; Halifax Gardens Co., 2nd.
 Lavender, 100 Blooms, Wm. Sim, 1st.; Wm. Sim, 2nd.
 Red or Crimson, 100 Blooms, Wm. Sim, 1st.
 Waved or Variegated, 100 Blooms, Wm. Sim, 1st.; Wm. Sim, 2nd.
 Any other color, 100 Blooms, Wm. Sim, 1st.; Wm. Sim, 2nd.
 White, 50 Blooms, Wm. Sim, 1st.; Wm. Sim, 2nd.
 Pink, 50 Blooms, Wm. Sim, 1st.
 Pink and White, 50 Blooms, Wm. Sim, 1st.
 Light Pink or Salmon, 50 Blooms, Wm. Sim, 1st.; Anton C. Zvolanek, Bound Brook, N. J., 2nd.
 Lavender, 50 Blooms, Wm. Sim, 1st.; Wm. Sim, 2nd.
 Red or Crimson, 50 Blooms, Wm. Sim, 1st.
 Any waved variety, 50 Blooms, Wm. Sim, 1st.; Wm. Sim, 2nd.
 Variegated, 50 Blooms, Wm. Sim, 1st.
 Yellow or Primrose, 50 Blooms, Wm. Sim, 1st.
 Blue or Purple, 50 Blooms, Anton C. Zvolanek, 1st.; Wm. Sim, 2nd.
 Any other color, 50 Blooms, Wm. Sim, 1st.
 New Variety, 50 Blooms, Anton C. Zvolanek, 1st.
 New Variety, 25 Blooms, Anton C. Zvolanek, 1st.

Retailer's Section.

Table Decoration, Penn the Florist, Boston, Mass., 1st.; Edward MacMulklin, Boston, Mass., 2nd.
 Basket, Hoffman the Florist, Boston, Mass., 1st.; Boston Cut Flower Co., Bromfield St., Boston, Mass., 2nd.
 Bride's Bouquet, Boston Cut Flower Co., 1st.; Penn the Florist, 2nd.

Zvolanek Prize.

Eight or more distinct varieties, 100 in each vase, Wm. Sim, 1st.; Halifax Gardens Co., 2nd.

Zvolanek Prize.

Ten or more distinct varieties, 25 in each vase, Wm. Sim, 1st.; Halifax Gardens Co., 2nd. These varieties must be named; renamed varieties excluded.

Arthur T. Boddington Prize.

Display of not less than ten varieties, 50 in each vase, Wm. Sim, 1st.; Halifax Gardens Co., 2nd.

Lord & Burnham Prize.

Display of not less than 1000 Blooms, Gold Medal, Wm. Sim, 1st.

R. & J. Farquhar & Co. Prize.

Bouquet of Sweet Peas with any green foliage—private gardeners or amateurs only, Wm. Sim, 1st.; Halifax Gardens Co., 2nd.
 Certificates of Merit will be awarded to Exhibits of Sweet Peas, apart from the above classes, also for novelties, superior to existing varieties, Wm. Sim, 1st.

ORCHIDS.

Best display and collection of Cut Orchids, each species or variety filling one vase, arranged for effect. Cut greens of any variety admissible in arranging of same, John T. Butterworth, 1st.

Flowering stem of Cattleya, any species, W. A. Manda, 1st.; W. A. Manda, 2nd.
 Flowering stem of Laelia, any species, W. A. Manda, 1st.
 Flowering stem of Laelio-Cattleya or Hybrid Cattleya, W. C. Rust, 1st.
 Flower Cypripedium, any variety, W. A. Manda, 1st.; J. T. Butterworth, 2nd.
 Flowering stem Dendrobium, W. C. Rust, 1st.; W. A. Manda, 2nd.
 Flowering spray Odontoglossum, any variety, John T. Butterworth, 1st.
 Flowering spray Oncidium, any variety, (no first); W. A. Manda, 2nd.
 Flowering spray Phalaenopsis, any variety, W. A. Manda, 1st.; J. T. Butterworth, 2nd.
 Flowering spray Vanda, any variety, (no first); W. A. Manda, 2nd.
 Flowering spray of any Orchid other than above, W. H. Manda, 1st.

OTHER CUT FLOWERS.

Antirrhinum, 12 White Spikes, T. E. Proctor, gardener for James Marlborough, Topsfield, Mass., 1st.; N. F. Comley, Lexington, Mass., 2nd.
 Antirrhinum, 12 Yellow Spikes, Thos. Proctor 1st.; N. F. Comley, 2nd.
 Antirrhinum, 12 Red Spikes, T. E. Proctor, 1st.; N. F. Comley, 2nd.
 Antirrhinum, 12 Pink Spikes, W. T. Walke, Salem, Mass., 1st.; S. J. Goddard, Framingham, Mass., 2nd.
 Antirrhinum, largest display, N. F. Comley, 1st.; W. T. Walke, 2nd.
 Display of Pansies, N. F. Comley, 1st.; W. C. Ward, East Milton, Mass., 2nd.
 Pansies, 100, W. E. Turner, Woburn, Mass., 1st.; W. C. Ward, 2nd.
 Violets, bunch (100 double), P. S. Smiley, W. Roxbury, Mass., 1st.
 Violets, bunch 100 single, Wm. Sim, Cliftondale, Mass., 1st.; E. E. Cummings, Woburn, Mass., 2nd.; Sidney Hoffman, Boston, 3rd.
 Display of Violets, Wm. Sim, 1st.; Henry Penn, Boston, 2nd.
 Mignonette, 25 spikes, Wm. Nicholson, 1st.
 Stocks, display of cut blooms, not less than 6 vases, F. E. Palmer, 1st.; N. F. Comley 2nd.
 Display of cut Lilac blooms, J. W. McIntyre, Phila., Pa., 1st.
 Display of cut blooms of Lily of the Valley, John McFarland, 1st.
 Display of blooms of Marguerites, Peirce Bros., 1st.; S. J. Goddard, 2nd.; J. W. Simpson, Woburn, Mass., 3rd.

Prizes Offered by the S. A. F. & O. H. and the National Association of Gardeners.

Carnations, 6 varieties, 10 blooms each, F. B. Pierson Cup, Wm. Kleinheinz, 1st.; John H. Dodds, 2nd.
 Carnations, 3 varieties, 10 blooms each, limited to growers of only 800 plants or less, Aphine Manufacturing Co., Abraham Wynne, gardener W. W. Heroy, 1st.; Thos. Altchison, 2nd.
 Carnations, best seedling, Robert Craig Cup, Wm. Kleinheinz, 1st.; Abraham Wynne, 2nd.
 Gardenias, best 12 blooms, any variety, Gould Chemical Co., silver cup, C. B. Newbold, 1st.; Henry Seigel, Mamaroneck, N. Y., 2nd.
 Roses, American Beauty, best 12 blooms, stems to be 3 ft. or over, Hitchings & Co.'s Cup, Wm. Kleinheinz, 1st.
 Roses, 4 varieties, 12 blooms each, American Beauty excluded, Aphine Manufacturing Co., Wm. Kleinheinz, 1st.
 Roses, best 12 blooms, any pink variety, Bobbink & Atkins' Cup, (no first); James Stuart, 2nd.
 Roses, best white, 12 blooms, C. H. Totty Cup, James Stuart, gardener for F. A. Constable, 1st.
 Best 6 foliage plants in pots or pans, suitable for table decoration, Wilson Plant Oil & Fert. Co. Cup, Wm. Kleinheinz, 1st.
 Orchids, best specimen in bloom of any variety except Cattleyas, Lager & Hurrell Cup, John H. Dodds, 1st.
 Orchids, best specimen in bloom of any Cattleya, Julius Roehrs Cup, Donald McKenzie, 1st.
 Sweet Peas, best mixed vase of winter flowering varieties, Old Farm Hotel Cup, Wm. Kleinheinz, 1st.; Abraham Wynne, 2nd.
 Cineraria stellata, best 3 plants in bloom, Pierson U-Bar Cup, Clement Newbold, 1st.; John H. Dodds, 2nd.
 Cineraria hybrida, best 3 plants in bloom, Ellwanger & Barry Cup, Wm. Robertson, 1st.
 Primula obconica, best 6 plants in bloom of any type, H. F. Michell Co. Cup, C. B. Newbold, 1st.; W. C. Rust, 2nd.; John H. Dodds, 3rd.
 Cyclamen, best 6 plants, W. & T. Smith Co. Cup, John H. Dodds, 1st.
 Violets, best 100 flowers of any single variety, Association Cup, Henry Darling, 1st.
 Stocks, best vase of one or more varieties, Association Cup, Abraham Wynne, 1st.
 Best display of cut flowers from bulbous or tuberous plants, any variety, Peter Henderson Cup, Wm. Kleinheinz, 1st.
 Best flowering plant in bloom, any species, Aphine Manufacturing Co. Cup, C. B. Newbold, 1st.
 Best new or rare plant, Scott Bros.' Cup, John H. Dodds, 1st.

HORTICULTURAL SOCIETY MEDALS.

Massachusetts Horticultural Society medals were awarded as follows:

Gold medal to Thomas Roland for group of acacias and ericas; to W. A. Manda for collection and display of tropical plants.

Silver medal to R. & J. Farquhar & Co., for Dutch garden; to M. H. Walsh for Rambler roses; to Thomas Roland for rose garden; to Prof. C. S. Sargent for Imantophyllums; to C. R. Newbold for specimen Azaleas; to Mrs. Frederick Ayer for group of tropical plants. A first class certificate was awarded to C. S. Sargent for hybrid Imantophyllums.

THE LIST OF NEW EXHIBITS AND PRIZE AWARDS OF THE CONCLUDING THREE DAYS, AND ACCOUNTS OF THE MEETINGS OF THE S. A. F., AMERICAN GLADIOLUS SOCIETY AND SWEET PEA SOCIETY, SCHEDULED FOR THOSE DATES WILL APPEAR IN NEXT WEEK'S ISSUE.

J.A. BUDLONG

82-84-86 E. Randolph St., Chicago

Here we will have greatly increased facilities
for handling our large stock of cut flowers

**OUR STOCK IS A-1 AND IT IS QUALITY NOT PRICES
THAT TALKS**

We have a heavy supply of **Roses—Brides, 'Maids, Richmonds, White Killarney, Pink Killarney, Maryland, Jardine, American Beauties, Marshall Field, etc. Easter Lilies, Callas, Valley, Carnations, Sweet Peas, Mignonette, Tulips, Daffodils, Jonquils**—in fact all kinds of cut flowers - and in green we have **Smilax, Asparagus in strings and bunches, Sprenger, Adiantum Ferns, etc.**

BIG SUPPLY FOR EASTER

MEETINGS OF THE SOCIETIES

SOCIETY OF AMERICAN FLORISTS.

The meeting of the National Society called for Monday, March 27, was simply formal and very brief, and Friday, March 31st, was reserved for the detailed proceedings, addresses, reports, etc. This date being subsequent to the time of our going to press, we hold over until next week's issue the advance copies of papers, etc., which we have received and in our next a complete account of the proceedings will appear in these columns.

AMERICAN ROSE SOCIETY.

The meetings of the American Rose Society, which was the first of the affiliated societies to convene on this occasion, on Monday, were well attended. President W. H. Elliott was in the chair and the program was carried out in good shape. His opening address was attentively listened to and its recommendations well discussed and finally adopted.

The reading of Secretary Hammond's report followed.

Secretary's Report.

This exhibition makes the 12th annual rose show for the American Rose Society, and when a society has lived and prospered twelve years in succession, there are certainly elements of interests in its make-up of general service, or it would not thrive. The society has gradually accumulated an invested fund of over \$3,000; it owes no man anything which it cannot pay. Its annual report is looked for and sought for far and wide. Its repre-

sentatives, accredited to the general horticultural or floral assemblies of other nations are received with favor. It counts among its members men with national reputations, as growers of the finest and most cherished of the flower kingdom, the Rose, the flower which has the highest place in poetry and sentiment among all the blossoms of the earth. This is no mean force, this appreciation by all civilized mankind of this flower, second to none. The Rose, in variety is uncounted for multitude, yet always known as the one great flower of universal admiration, and this society aims to increase its popularity.

The medals of the society are comparatively inexpensive, but sought for and highly prized. The secretary would like to make a suggestion or two, one of which is, that hereafter our medals be provided with a suitable case. Hitherto this has not been done. Another matter is this, the increasing need of some way to get into touch with an amateur membership. Here we are lacking. The subject has been touched upon, and its importance recognized, that is a quarterly issue of a journal to go into the hand, especially of amateur or home gardeners—something that is exclusively devoted to the society and its membership. Until this is done, one aim of the society, I fear, will not be reached. We ought to count our membership by thousands, but we do not.

The past year we have not had as many meetings as usual in committee or otherwise. It seems to me as though the Rose Society should be more in

evidence than we are. The trade papers certainly do everything they can to boom the society, but somehow our membership does not enlarge as it should. Our annual meetings, hitherto, have been held in choice places—Boston the center of culture, always gives us a fine welcome, and the show which is here today is one that all the people may enjoy. But, for one, I would like to see the American Rose Society extend its popularity, so that it may become a living reality. "A Rose for every Home, and a Bush for Every Garden."

This spring meeting is a combination effort which it will remain to be seen whether it be not better to hold, and to have a combination exhibition rather than one solely of a class. We want to have all the support possible as an organization. Our program, which you all have makes plain the scope of our work.

The Rev. Dr. S. S. Sulliger, of Vancouver, Washington, who presents in a paper of much interest, his account of a visit to the National Rose Society of England, is not able to be present, owing to family affliction.

We ask a large general attendance to all our meetings.

The report was accepted.

The report of Treasurer Harry O. May followed, as below:

Treasurer's Report.

Receipts	\$7,765.00
Disbursements	7,277.01

Balance	\$487.99
---------------	----------

There are 61 life memberships, \$3000 is invested in three mortgage securities. Treasurer's report was accepted.

IN BOSTON

You will find the Largest and Best Equipped Flower Mart on the Continent. A visit from Florists attending the National Flower Show will be appreciated.

Motion was carried that a committee be appointed by the president to use their influence for a reduction of the glass tariff, and the following committee was appointed: Robert Simpson, Fred Burki, Benj. Hammond.

Besides the tariff, the promotion of amateur interest in the society, the grading of cut flowers and other important topics were discussed. Officers were elected as follows:

President, Adolph Farenwald; vice-president, Philip Breitmeyer; secretary, Benj. Hammond; treasurer, Harry O. May; executive committee Eber Holmes and Wallace R. Pierson.

Invitations were extended by Detroit and New York for the next convention. After discussion the selection was referred to a committee to confer with the Carnation Society with a view to arranging for a joint meeting.

August Poehlmann read the following paper:

Developing a Rose Growing Establishment.

The development of any business depends not only on one or two things, but upon a happy combination of conditions properly applied, classified, I would say, under the following factors: Ability, integrity, demand and locality and environments.

Classed separately I would say, ability means able to accomplish, to build, to grow good stock, to manage well, to anticipate and have power to do. As a rule most large up-to-date rose-growing establishments of the present day began business in a very small way. Spurred on by initial success, the earnings were reinvested from time to time to provide for the increasing demand of its product. It becomes second nature then to plan extensions and im-

provements, which in regular course create new heads. Responsibility is shifted. The work becomes more specific, each head a specialist. This system is general throughout, therefore, on ability to do depends much the ability to supply demand. Ability to discern the value of new varieties by previous knowledge of parents or otherwise and anticipate demand for same can properly be included under this head. Good stock creates demand, necessitating increase in output, demanding more labor, skilled and unskilled, labor saving machinery, new materials, etc. Thus one may say that the development depends principally upon the demand, which in turn is fostered by necessity. The demands of a growing or rapidly developing business can only be temporarily satisfied. Likewise, so do the personal demands increase.

Under integrity would come, maintained credit, good will, honest administration, efficient labor, confidence, and credit of customers, integrity of purpose.

Locality and environment cover transportation facilities, nearness of markets for certain commodities used extensively, prompt and efficient service to customers, labor requirements, homes, water, soil, manure and coal supplies. Natural advantages must be taken into serious account when building is contemplated. An unfailling water supply is absolutely necessary, suitable soil, plenty of it for years to come, must be provided for. Coal must be easy to obtain at fair prices. The markets for the sale of goods close at hand. Rapid transportation is desirable at all times, not only for the distributing of stock and to facilitate

purchasing, but it is a material aid in providing necessary help. All these various matters require careful working out, and each is an essential cog in the wheel which makes for the successful development of the business.

An up-to-date rose-growing establishment includes in its makeup, rose growers, steam fitters, painters, teamsters, blacksmiths, firemen, bookkeepers, stenographers, temperature men, engineers, carpenters, glaziers, packers, salesmen, laborers, and what not,—and the money to pay for their combined efforts must come from the product, the rose.

Wallace R. Pierson read his paper on "The Science of Rose Growing."

AMERICAN CARNATION SOCIETY.

The first session of this society was held on Tuesday evening in Paul Revere Hall. M. A. Patten welcomed the members in a short speech.

President Burki, on assuming the chair, was given a most hearty reception. He responded with a few welcoming words and extended a graceful compliment to the energetic and faithful work of his fellow officers and members during the year. He expressed great pleasure over the opportunities presented by the great flower show and congratulated the society on being once more the guest of Boston, "the recognized centre of horticulture." In the way of recommendations, he spoke as follows:

President's Address.

The most important matter that I wish you to consider is "the society's scale of point for judging exhibits." I especially refer to the seedlings or

Azaleas

\$1.00, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00, \$4.00, \$5.00, \$7.50 and \$12.50. A special lot, 22 to 26 inch heads, \$12.50 per pair; 26 to 28 inch heads, \$20.00 per pair.

Azaleas (hardy)

the yellow hardy Azalea (mollis) is exceedingly popular as it can be planted out in the garden after having done duty for Easter. \$1.50 and \$2.00 each.

Araucarias

We offer a nice lot of the excelsa; shapely, well done stock. 75c., \$1.00 and \$1.50

Begonias

We can supply Lorraines but they do not ship well, and we recommend the Rex in preference. 5½ in. 40c. each; 5½ in. 30c. each.

Bougainvillea

\$4.00, \$6.00 and \$10.00 each.

Deutzia

Shapely plants of the ever popular Gracilis (white), good for the garden when done flowering. \$1.00, \$1.50, \$2.00 and \$2.50 each.

Gardenias

Well flowered plants—good sellers as specimens; also profitable to cut from. \$1.50, \$2.00, \$3.50, \$5.00 and \$10.00 each.

Genista'Fragrans

\$6.00, \$9.00 and \$12.00 per doz.

Hydrangeas

Otaksa, Thomas Hogg and Sieur de Coeur. 75c., \$1.00, \$1.25, \$1.50, \$2.00, \$2.50 and \$3.00. Standards, \$3.00, \$4.00 and \$5.00 each.

Lilac

\$1.50, \$2.00 and \$2.50 each.

ROSES

Crimson Rambler; \$1.00, \$1.50, \$2.00, \$2.50; fan. and glob. \$2.50, \$3.00 and \$3.50.
Tausendschon; \$1.00, \$1.50, \$2.00, \$2.50; fan. and glob. and pyr., \$2.50, \$3.50 and \$5.00.
Lady Gay; fan., glob. and pyr., \$1.50, \$3.00 and \$5.00; ball and umbrella, \$3.00, \$4.00 and \$5.00.
Hiawatha; fan. and glob., \$1.50, \$3.00 and \$5.00.
Baby Ramblers; \$1.00, \$1.50, \$2.00; standards, \$1.00, \$1.50 and \$2.00.
Pink Baby Ramblers; 75c., \$1.00 and \$1.50.
Baby Dorothy Ramblers; 50c., 75c. and \$1.00.
Phyllis Baby Ramblers; 75c. and \$1.00.
American Pillar Ramblers; \$1.50, \$2.00 and \$3.00.
Hybrid Roses; Richmond, Maryland, Killarneys, Frau Karl Dr., etc., 75c., \$1.00 and \$1.50. Magna Charta, \$1.00, \$1.50 and \$2.00 each.

Easter Plants 1911

We have this year as fine an assortment of Easter Plants as we have ever handled, and our customers know what the P. M. standard of quality means. Orders should be booked as long in advance of Easter as possible so that the very best care and attention as to packing, etc., may be given.

**EASTER LILIES**

We will have a splendid lot of lilies for Easter. A canvas of the market reveals the fact that choice lilies are scarce, plenty of medium and poor stock, in fact too much of the latter, making it more evident than ever that our stock at 15c. is the cheapest to buy; a very few extra long at 17½c. Where customers specify plants with three flowers or less, 17½c.

CUT LILIES

Magnificent long stemmed stock, \$15.00 per 100. In original cases of 200 if desired.

In other plants we offer herewith the product of Philadelphia's best plantmen.

BLOOMINGDALE'S

ADDRESS

C. C. TREPEL, Mgr., Plant Department, 59th St., New York

coming new varieties. It appears that we must rely on getting new varieties to take the place of those which we term "standards" now grown. These seem to lose vigor in a few years under our present day treatment. If we are going to keep up the popularity of the carnation we must give more consideration to the keeping qualities, which to my understanding, means substance. For fragrance we only allow five points. Should we not require fifteen points for each of these—color, size, substance and fragrance, ten points each for calyx and form, and twenty points for stem, making a total of 100 points? This scale, to my judgment, would be more uniform than the present percentage on which our judging has heretofore been made. I recommend the appointment of a committee to take up this matter.

Is it not true that the carnation was made by the people the popular flower on account of its fragrance, keeping quality, and comparatively reasonable

price as compared with the Rose? I may add that some of our most prominent retailers care to handle but very few carnations. In fact, they say that they would rather not handle them at all on account of the many complaints they receive, that the carnation blooms which they sold to their customers had gone to sleep on the day they were purchased. We should give this matter our serious consideration, for the buyer of carnation blooms has a right to expect both fragrance and keeping qualities in them. It is too bad that we have been getting away from this in most of our present day varieties.

Now that we have a Carnation Society button we want to carry out the recommendation of our former president, Albert Herr, and that each member greet and welcome anyone wearing the button, and also constitute himself a committee of one, to secure new members to this society.

Secretary's Report.

The year 1910 may well be consid-

ered a very successful one, for the American Carnation Society. After a very successful convention at Pittsburgh, Pa., in January, preparations for this present convention were almost immediately taken up, and have kept the secretary's office busy during the entire year. The mails coming and going out have perhaps never been so large as during the past year.

The membership made its usual slight gain. During the year 1910 we added 57 new names, and against these we have 28 on the delinquent list. Sixteen new names have been added since the first of this year. We now have 344 members in good standing.

We have collected the dues as diligently as possible and turned them over to the treasurer, taking his receipt therefor. There is, however, a good deal standing out.

Five deaths were reported during the year, namely, Lyman B. Craw, of New York; Mrs. M. S. Vesey, of Ft. Wayne, Ind., who died on April 8th; W. E. Hall, of Clyde, O., who died on

H. FRANK DARROW

26 Barclay St., New York

P. O. B. 1250

May 3rd; Anthony Wiegand, of Indianapolis, Ind., who died Dec. 19th; Fred Dorner, of LaFayette, Ind., who died Dec. 29th.

To the funeral of Mr. Dorner who was one of our early presidents, we ordered a wreath of carnations costing \$15.00, after having first secured the sanction of the president. Nine members of the A. C. S. attended the funeral services, which were held on Jan. 3rd.

Complying with instructions given by the last convention, we have had designed a permanent button. The design having been approved by the board of directors, we had 150 of them made, and we are pleased to state that most of these have been sold among our members. They were sold at a slight profit to the society. A wide distribution being more desired than a profit.

The annual report was mailed to all the members, as is customary.

The premium schedule for this exhibition was also out in due time. We were able to secure slightly more advertising matter than was carried by last years list. The amount being exactly 30 pages, amounting to \$300.

The cost of printing the schedule ran slightly over \$100 and we have deferred payment until this meeting approves the account. This transaction is a violation of Section 6 of Article 2 of the Constitution, and inasmuch as the printing of this schedule will vary in proportion to the amount of revenue it produces for the treasury, and as we expect and hope to see a recurrence of the same thing each year, we would recommend that the printing of the premium schedule be inserted in that

clause which gives permission to spend over \$100.00 for printing the annual report.

We would also recommend a change in section 8 of the by-laws. We recommend that instead of compelling delinquent member to pay up all arrearages, that he be compelled to pay only one year's back dues. This would cover the time we carried him on the books after the last payment of his dues. Or, that after a certain lapse of time, he be allowed to join as a new member.

The merging of our exhibition with the National Flower Show, was perhaps responsible for most of the activity in the secretary's office. Just how much the society will be benefited, or otherwise, remains to be seen. The liberal premiums, coupled with the rule compelling membership in the A. C. S. of all competing exhibitors, has brought in several members. More than usually come in before the convention takes place.

The large increase in the total amount available for carnation premiums, made it necessary to completely rearrange the schedule. The schedule as it is this year, seems much nearer perfect than any we have ever had, in that it provides for a more complete exhibition of the carnation and its possibilities. If this list can be reduced without eliminating too many of the decorative features, it would be a step in the right direction.

To the National Flower Show Committee is due our thanks, for placing at our disposal the generous sum of \$750.00 to be used for premiums at this exhibition. This added to our usual amount of cash, medals and special

premiums, made the largest amount of premiums ever offered for carnations, totalling nearly \$1400.00. The large number of entries shows that the money was wisely distributed.

To our friends is due our thanks for the liberal special premiums placed at our disposal.

In conclusion, I wish to add that the society owes its thanks to our vice-president, Mr. E. A. Peirce, for the able manner in which he has handled the local end of the preparations.

F. E. DORNER, Treas.

Treasurer Dorner's report showed the financial standing to be all that was desired. The report of the Nomenclature committee was presented and accepted. A letter from W. N. Rudd was read by the secretary in which he resigned his position as judge. J. S. Brunton, organizer of the party of British tourists and chairman of the British Perpetual Flowering Carnation Society, made a short address in which he explained that the perpetual carnation was the British description of the American carnation. He spoke of the introduction of the American car-

nation in England and the popularity of the type of flower. C. Engelmann, of Saffron Walden, another of the party, well known as a carnation grower, also spoke. On being asked what varieties were favorites there, he mentioned Enchantress, White Perfection, Mrs. C. W. Ward, Beacon, Scarlet Glow and Mrs. M. A. Patten. W. B. Wallace, another visitor from abroad, spoke gracefully of the great hospitality he had experienced since his arrival in America. A vote of thanks to the visitors for their attendance was passed.

The question of the next place of meeting coming up, Philip Breitmeyer of Detroit, made an eloquent speech in which he set forth the claims of Detroit. He explained that the American Rose society had voted to hold its annual meeting next year in Detroit, and that if the Carnation Society could select a mutually acceptable date it would be a good plan. The Board of Directors was empowered to represent the society in a conference with the representatives of the Rose Society. J. A. Valentine was nominated for president, Philip Breitmeyer for vice-president, A. F. J. Baur for secretary, Fred E. Dorner of Lafayette, Ind., for treasurer. J. F. Ammann of Edwardsville, Ill., James T. Scott of Elmsford, N. Y., and C. W. Johnson of Morgan Park, Ill., were nominated for judges. The report of the judges was then presented. The meeting then adjourned until Thursday morning.

Thursday Morning's Session.

At the meeting on Thursday A. M. the society confirmed the nomination of officers previously made and each was elected.

Resolutions were passed on the death of Fred Dorner. It is earnestly desired to have some form of a memorial or tablet to the memory of Mr. Dorner, each member to subscribe \$2.00, notification of same to be made to each member by the secretary. Committee on president's message reported as not in favor of changing the scale of points, and the committee on the secretary's suggestion in regard to delinquents reported that such delinquents may come in upon payment of one year's dues, \$5.00. Both of these motions were adopted by the society. New judges were elected by ballot; Wm. Nicholson, E. S. Stroud and C. W. Johnson were elected to fill the unexpired term of W. N. Rudd. Detroit was decided on as the meeting place for 1912, the date being set for January 24th. It was also decided that the board of directors be empowered to accept the final report which will obviate the calling of a general meeting for Friday night, that is, the final report of judges. The board of directors were also empowered to pay over the money due the National Flower Show Association.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

The opening meeting of this society was held on Wednesday afternoon. President Burpee, in a very felicitous speech introduced George Asmus, president of the S. A. F. Mr. Asmus said in part: You are one of the auxiliary societies connected with one of the greatest flower shows we have ever

CROTONS

Fine assortment, well-colored. 5-in. pots, \$9.00 per dozen.

F. R. Pierson Company
TARRYTOWN-ON-HUDSON, NEW YORK

To Be Successful Sow In March

We are in the front rank for all the latest and most up-to-date Winter-Flowering and Spencer Sweet Peas, and made a specialty of this grand annual. Our collection has been thoroughly revised, synonyms and out-of-date varieties have been eliminated, wherever practical, and only those of real merit retained. When you stop to consider that there are nearly six hundred named varieties, you will doubtless miss some old favorite that you have known. No doubt we could procure you this variety; we could certainly send a variety equally as good.

The Spencer or Orchid-flowering types are exceedingly popular and all the varieties that we offer can be relied upon to come true to color and description. The "Unwins" are all good, and many grandiflora varieties are still holding their own.

If collections are wanted for exhibition purposes, we shall be glad to make suggestions.

NOVELTY SWEET PEAS

Maud Holmes

Sunproof Crimson Spencer (Holmes, 1910). This is undoubtedly one of the finest novelties of recent introduction; flowers are of the largest size, three and four to a spray, carried on long stems, of brilliant crimson, and blooms are of the true Spencer type, both standard and wings being well waved. This variety will not burn under the hottest sun, is of vigorous and strong growth. The stock is fixed as is shown by The National Sweet Pea Society's trials in England. Pkt. 15 cts., 4 for 50 cts. (See illustration.)

Doris Burt

(Unwin, 1909.) The color is a most brilliant light scarlet, slightly shaded cerise. For exhibition or table decoration it is excellent, and is quite the best of its class. Pkt. 15 cts., 4 for 50 cts.

Mrs. Hugh Dickson

(Dobbie, 1909.) A cream-pink Spencer on buff ground, very fine form; flowers well placed on long stems. Award of merit, N. S. P. S., 1910. Pkt. 15 cts., 4 for 50 cts.

Emily Eckford Spencer

The flowers are of good form, waved and of the true Spencer type. They are a rosy purple self color at opening, but turn bluish purple as they reach full expansion. It is similar to Tennant Spencer, but without any suggestion of magenta—what variation there is in the flowers is toward blue. Pkt. 15 cts., oz., \$1.25, ¼ lb. \$4.00.

Rose du Barri

This new grandiflora affords an entirely new shade in Sweet Peas. The name itself suggests the color, which is a lovely combination of deep rich, carmine-rose and orange. It is unique and distinct, a charming flower of deep rose color, overlaid with a lovely sheen of terra cotta. Foliage and haulm very dark green. One of the best decorative Peas ever introduced. For artificial light it is unsurpassed. Pkt. 15 cts., 4 for 50 cts.

Ethel Roosevelt

Is a true waved variety of the largest and most perfect Spencer type. The ground color is a soft pleasing primrose, or straw color, overlaid with dainty flakes and splashes of bluish-crimson. The crimson is not at all pronounced and simply gives some warmth and golden tinting to the yellowish ground work. Pkt. 15 cts., 4 for 50 cts.

Florence Nightingale

The flowers are truly magnificent and of immense size. The standard is unusually large and bold, pronouncedly waved, yet standing erect and broad, frequently measuring two inches across. The color is most charmingly soft and yet rich lavender, which is enlivened by a very faint sheen of rose-pink. It is practically a self color and bunches beautifully. Pkt. 15 cts., 4 for 50 cts.

Masterpiece

(Malcolm, 1908.) The color of the flower is a rich lavender, of true Spencer type, flowers very large, well waved, remarkably free-flowering. Award of merit, N. S. P. S., 1910. Pkt. 15 cts., 4 for 50 cts.

Tuckswold Favorites

A superb mixture of pedigree Spencer hybrids, being the results of hybridization and trials of Mr. Robert Holmes, the English Sweet Pea specialist, and containing a great assortment of colors. Varieties and colors will be found in this collection hitherto unknown, and many surprises will be in store for growers of this grand Tuckswold mixture. Pkt. 15 cts., oz. 60 cts., ¼ lb. \$2.00, lb. \$7.50.

Queen Victoria Spencer

The flowers are extremely large, of the true waved Spencer type, and have a most pleasing color effect.

The background is quite a deep primrose, flushed with rose. The flowers are all of good substance, borne three and four to the stem. The strong dark green stems carry well the gigantic flowers. Pkt. 15 cts., oz. 25 cts., ¼ lb. 75 cts., lb. \$2.50.

Collection, one packet each of the above 10 varieties, for \$1.25.

Sweet Pea Maud Holmes (Spencer)

Collection, one packet each of the above 10 varieties, for \$1.25.

ARTHUR T. BODDINGTON,

Boddington's Quality Sweet Peas

INCLUDING ALL THE SUPERB SPENCER VARIETIES

If you are an up-to-date florist you should include these varieties in your order.

At the exhibition of the National Sweet Pea Society of America, held at the American Museum of Natural History, New York City, July 12 and 13, 1910, we were again awarded the C. C. Morse Co.'s **SILVER CUP** for the finest collection of Sweet Peas. Open to the trade only.

DELPHINIUM BELLADONNA.

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$1.50 per dozen, \$12.00 per 100, \$100.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety. 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinense Blue and White. 75 cents per dozen; \$5.00 per 100.

Choice and Rare Named Hybrid Varieties

Amos Perry. Symmetrically formed, semi-double flowers of a rich rosy-mauve, flushed sky-blue, conspicuous black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Amyas Leigh. Large spikes of rich sky-blue flowers, the inner petals rich rosy-plum with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Belladonna. The freest of all, never out of bloom. Beautiful turquoise-blue flowers. 15 cents each; \$1.50 per dozen; \$12.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye. \$2.50 per dozen; \$20.00 per 100.

Julia. Gigantic flowers of a pretty "Cornflower" blue, beautifully veined with rose and large pure white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$18.00 per 100.

Mme. Emma Zaiser. Flowers nearly 2 inches in diameter, rich cambridge-blue, flushed rose, jet-black-centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mme. Violet Geslin. One of the finest, flowers perfectly round, clear blue, centre lavender, with bold white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Musea. Large circular flowers of a curious shade of rosy-mauve, edged cambridge-blue, with dark eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Portia. Lovely "Cornflower" blue, with faint flush of rose and black centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Queen Wilhelmina. Massive spikes of sky-blue flowers flushed with rose, with very large pure white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Rembrandt. Large loose spikes of bright sky-blue flowers, inner petals rosy-lavender, the whole suffused with a silvery sheen. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

NEW WHITE DELPHINIUM.

Hybridum Meerheimi. The first really pure white Delphinium introduced and a sterling novelty; a strong vigorous grower and a remarkably free bloomer. Stock limited. \$2.00 each.

Dreer's Superb Double Hollyhocks

We have this season a fine lot of strong, clean, healthy, vigorous one-year-old flowering plants of the finest strain, as under:

Double White,	Double Yellow,	Double Rose,
Double Pink,	Double Red,	Double Maroon.

MICHELL'S SEED HOUSE, 518 Market St., PHILADELPHIA

NATIONAL SWEET PEA SOCIETY.

(Continued from page 494.)

had. On behalf of the S. A. F., and also of the committee of control, I most cordially welcome you at this time at this gathering. The show that the sweet pea society has made here is the finest I have ever been able to see, and I think it has caused more talk for the space and amount of flowers displayed than any flower in the whole show. I sincerely wish you all the success that you so much merit. The hospitality of the society is open to you. The rose society and we expect the carnation society are probably going to Detroit next year. We want the next spring meeting of the Sweet Pea Society to go with us also.

Prof. Beal of Cornell University, read a thoughtful paper on "Trials of Sweet Peas Under glass as Tested in the Experiment Station."

William Sim of Cliftondale, Mass., next read a paper on his experiences in growing sweet peas under glass. He deplored the fact that competition was so limited in the various classes at this show. There is a continual demand for new colors, and there is a great field in store for the flower. Sweet peas are like human beings; they can stand a certain amount of high living only and keep healthy. Mr. Sim answered many questions concerning the growing of sweet peas.

Prof. John Craig gave a history of the work of the experiment station. Nothing was left undone in securing comparative data on the different varieties. Among the firms who had contributed seeds for the experiment station were: A. T. Boddington, W. W. Rawson, R. H. Bath, W. G. Unwin, W. A. Burpee, Watkins & Simpson, Vaughan's Seed Store, James Vick's Sons, Peter Henderson & Co., A. C. Zvolanek, Henry A. Dreer, Bobbink & Atkins.

Recommendations: That a digest of the conclusions of field studies in the forcing of winter varieties should be made. That a list of the newer varieties of special promise and those of special merit in the advance trials should be made; that the society should publish immediately the above information as an initial step in the

progress of National Sweet Pea Society work.

NATIONAL ASSOCIATION OF GARDENERS.

This association organized by W. E. Maynard held its fourth annual dinner and meeting in Talbot Hall, Mechanics Building, on Wednesday evening. Among the speakers were Robert Craig of Philadelphia, William Kleinhertz and George Asmus of Chicago.

Stamford, Conn., was chosen as the next meeting place. The following officers were elected: President, Thomas Logan of Jenkintown, Pa.; first vice-president, Thomas J. Kempton, Baychester, New York; second vice-president, Roy H. Caverly of Lowell, Mass.; secretary, B. S. Noyes of Brookline, Mass.; and treasurer, Robert Bottomly of New Canaan, Conn.

A new set of by-laws was adopted and it was voted to incorporate under New Jersey laws.

THE RECEPTION AND DANCE.

Wednesday evening was the Gardeners' and Florists' Club's night. They wanted to entertain their friends from far and near and they certainly did it in glorious manner. Paul Revere Hall was a scene of rare gaiety and the merry dancers kept it up until midnight. In an adjoining hall a substantial buffet lunch, splendidly served, was in operation during the entire evening. Among the guests who joined the throng were the visitors from England and members of the craft from almost every part of the American continent and they all agreed that the Boston ladies certainly did look good to them.

Previous to the dancing a reception was held, the officers and working members and their ladies being in the receiving line with President Peter Miller. Thomas Pegler, chairman of the arrangements committee and his associates had worked hard for the success of this affair and sincere congratulations are in order for the perfection of details which characterized every feature. Between the dances there were songs, fancy dances and recitations on the stage by first-class

entertainers. The orchestra and caterer did their part splendidly.

An especially pleasing feature of the evening was the arrival of Mayor Fitzgerald while the festivities were in full swing and the young ladies were given an opportunity to shake the hand of the man who has had the courage to undertake to insure cleanly words and acts on the stage, so far as Boston is concerned.

LADIES' S. A. F.

The Ladies' S. A. F. and guests had a good time throughout. On Monday afternoon, a business meeting in the hall; Tuesday morning, auto rides through the park system; Wednesday, lunch on invitation of Mrs. B. F. Tracy, and theatre party; Thursday trolley ride through Concord and Lexington; Friday, a tea party by Mrs. W. H. Elliott.

NOTES.

C. H. Totty's carnation Wodenethe arrived in bad condition and was not staged.

W. A. Manda's shipment of plants to the National Flower Show filled five cars.

A comment heard on all sides: "How clean and orderly these halls are kept."

A. H. Hews & Co. furnished to all exhibitors free of charge all pots and saucers required for their exhibit.

A 60-foot box car was required to transport M. H. Walsh's trained Rambler roses from Woods Hole to Boston.

F. Dorner & Son's Company's carnation exhibit did not arrive until Wednesday morning, too late for competition for prizes.

A sweet pea novelty which attracted much attention was Mrs. James Wheeler, a cross of Zvolanek Orange with Gladys Unwin, exhibited by A. Zvolanek.

The American Carnation Society silver medal was won by Peter Fisher, with Benora, variegated white and pink. The gold medal was not awarded.

Landscape Architect and Forester

1 Montgomery St., JERSEY CITY, N. J.

Tree Renovation by Expert Operators.
Stereopticon lectures on Horticulture and
Arboriculture.

"When I took the train at Rochester to come here for but a few hours, that tells you how much I think of this show." "The true way is to enjoy life as you go along, and not have so many irons in the fire that you can't do it."—W. C. Barry.

W. W. Edgar exhibited quite a few novelties in azaleas, amongst them being Souvenir Wm. Edgar, Mme. August Haerens, Winfried Haerens, Haerens Loraine, Easter Greetings and Lady Roosevelt. These are all ready for the trade with the exception of Lady Roosevelt, which will be in the market in about two years.

The sweet pea exhibits staged on Tuesday were the finest ever made in this country or probably any other at this season of the year. William Sim displayed great breadth and taste in the arrangement of his flowers. A. C. Zvolanek's improved varieties were endless in number and attracted much attention from the sweet pea votaries.

In the exhibit of A. Leuthy & Co. were the following azalea novelties from Haerens & Co.: A B C, deep pink, midwinter variety; President Taft, pink, similar in color to Vander Cruysen; A. Leuthy, magenta, double; unnamed seedling, white double, late-forcing, free bloomer; Azalea Indica Vuylsteckiana, crimson single, effective by electric light, midwinter variety.

HERBERT, ATCO, N. J.

DAHLIAS Every Day in the Year

A wave of cheapness is now sweeping over the lily bulb business. A multitude of firms are soliciting orders who, in their misconception of the first principles of a successful lily bulb business, are fighting one another to see who can get to the bottom of the pricelist. You will not find us traveling that way—we are fighting for a better quality continually, and the cost is a secondary consideration. The main thing is that the quality shall be worthy of the cost and its the everlasting driving for better bulbs that keeps us busy. A grower can well afford to pay a fair price for lily bulbs of sure good quality and he can be more sure of Horseshoe Brand Giganteum than any other brand produced.

Write for Prices.

Ralph M. Ward & Co.

12 West Broadway
NEW YORK CITY

Seed Trade

Balfour, N. D.—Orlo Nichols has opened a seed store here.

Denver, Colo.—Barteldes Seed Co., capital stock \$300,000. Incorporators, F. W. Barteldes, Max Wilhelmi and Janet Urhlaub.

Brattleboro, Vt.—C. S. Hopkins has added a cut flower department to his seed business at his greenhouses on Western avenue.

Paw Paw, Mich.—The Wolverine Co-operative Nursery Co., G. E. Prater, Jr., proprietor, has opened a seed department which will be in charge of W. A. Prater.

PHILADELPHIA NOTES.

This letter is mis-headed, to some extent, because your scribe has been at the great show in Boston, along with the leading lights of this city helping to bring up the tail end of the procession; therefore, he has been unable to keep track of the births, deaths, marriages and other important happenings of the week in our great city. For which lack sincere apologies—and trusts no worthy lady has had the bad luck to drop her egg basket on the way to market—while he was not there to chronicle the important event.

There were some doubts in spots as to whether the Boston brethren could handle this great national event—but the consensus of opinion now on every hand is, that they have not only done so but have set the pace for the world in this direction up-to-date—and that the great Temple shows, the magnificent Manchester exhibitions, and other events of which the horticultural trade everywhere is fond of bragging as red-letter events in history—that to these there is another red-letter epoch-making event added. One could walk through the show in a day, of course, but not to see all. Next day things overlooked the first day would appeal; and the same the third and fourth and succeeding days.

The Walsh rose exhibit in itself was worth going a thousand miles to see. Beautifully arranged with walks between so that every specimen could be examined. Roland's English Rose Garden was also a center of attraction and we all stood in amaze at the blaze of gold in the center of the big hall where the great Roland acacia exhibit was placed and where the genius of John and James Farquhar had planned and carried out their great Dutch Garden. But, of course, we are not reporting the show—this has been fully covered by others—we are only returning thanks to Boston and admiring the new jewel in her brilliant diadem.

Visitors: F. G. Berger and Mrs. Berger, Baltimore, Md.; Mr. Forbes, Portland, Ore.; S. McClements, of Randolph & McClements, Pittsburgh, Pa.; D. G. Grillebortzer, Alexandria, Va.

NEWS NOTES.

Sheridan, Wyo.—H. A. Loucks has been appointed park superintendent here to succeed the late Fred Friebe.

New London, Iowa.—C. E. Bailey has rented the place recently occupied by John Fye and will continue to operate the greenhouses.

read 2½ instead of 2-in. pot plants. Their new number after April 1st will be 131 N. Wabash avenue.

J. A. Budlong is rapidly getting the new quarters in shape. A light office and a private office and a large new refrigerator are completed and every foot of the extensive floor space will be arranged to the best advantage to handle the trade when the move is made April 1st.

Mr. and Mrs. E. E. Pieser have returned from a two weeks' stay at West Baden, Ind., where they had hoped the baths would benefit them both. Mrs. Pieser not improving they returned earlier than expected. G. H. Pieser is also again ill and unable to continue his position as bookkeeper at Kennicott's.

Participants in the British Horticultural Trades American trip were given a cordial welcome when they reached Chicago, March 24th. They were met at the Polk street depot by representatives of the Horticultural Society of Chicago and the Chicago Florists' Club, who took them to the Sherman Hotel for breakfast and rest. The party consisted of J. S. Brunton of the Horticultural Trade Journal, J. Brown, E. Barker, W. A. Cull, C. Engelmann, J. S. Gunn, L. M. Graves, G. Prickett, C. Pratley, S. South and J. Simpson. An auto trip gave the visitors a glimpse of the parks and their conservatories, the one at Garfield Park especially calling forth their praise for its size and beauty. The Chicago Florists' Club tendered the visitors a dinner at the Union Restaurant, the club's regular meeting place, and in interesting speeches followed. On Saturday the party went to Morton Grove where the extensive plant of the Poehlmann Bros. Co. was inspected.

Flower Market Reports

BOSTON The situation remains unchanged in commercial lines, although the big flower show has consumed a goodly share of the best product of the local growers. All sorts of stock can be had in any quantity and there are many cases of loss of stock from lack of any market. Yet we hear no complaining and Easter will soon be here.

Trade has been quite satisfactory the past two weeks, though high prices have been out of the question, a mixture of all kinds of weather having been had and with the abundance of stock received daily by the wholesalers, especially in the carnation line. There was a good supply of sweet peas, violets, lily of the valley, lilies and everything along the line and no orders go short of anything except long Beauties. The demand has been light on the Beauty, Richmond having taken its place in many instances. Carnot, Kaiserin and Ideal have been added to the rose line and some choice stock is had. Bon Silene and Perle have sold well throughout the season and at times not enough could be had. Callas have moved well also magnificum and gigantum lilies. Bulbous material in good supply.

CHICAGO The inevitable has arrived in the Chicago market. For weeks stock has been off crop for various reasons and now with the coming of spring weather, everything with the exception of Beauties comes on at once. Roses are again plentiful to an extent undesirable and carnations have made a long start downward when the sales are footed up. Only the fanciest reds are sold for three cents and on Saturday prices were so low for good medium carnations as to be unquotable. There does not seem to be so much an abnormal supply of flowers as that the demand has suddenly fallen off and stock allowed to accumulate because of a lack of buyers. Asparagus strings are in short supply and common ferns are bringing from three to three fifty per thousand.

Business is satisfactory as far as volume is concerned but prices are exceedingly low. Long-stemmed Beauties are the only flowers that are on the short side of the market. Short stemmed ones are fairly plentiful and of poor quality. There

is an over abundant supply of other roses and the quality is equal to anything the market has seen this season. Indications are that the rose crop will be on the wane right before Easter unless weather conditions change so as to retard crops. Carnations are in heavy supply. Saturday was general cleaning up day as far as carnations were concerned and several spring openings helped to relieve the market of its surplus bulbous stock. Single violets are on the down grade and double violets are more than sufficient for requirements. Good smilax is on the short side. Other greens are in good supply.

NEW YORK The situation in the flower market this week is precisely the same as indicated in report of last week. All varieties and grades of flowers are in heavier supply than is required to satisfy legitimate demand and the "bargain counter man" has things his own way, mostly.

PHILADELPHIA Fairly active trading ruled in this market the past week. Some stocks were in over-supply and very low prices were realized; but the general average kept up to normal. Bulbous stock such as paper whites and daffodils were the

most affected in the tumble—southern daffodils especially. It is too early for the good varieties of these, and the poor ones will not sell; the greenhouse stock of such choice sorts as Emperor, etc., have the call every time. Tulips are about over and Roman hyacinths are also on the wane. Good roses and carnations were the most active stocks on the list, and the clean-up at the end of the week was of a most satisfactory character—better if anything than the week before. The market ought to be crazy for American Beauty roses when it is considered how few are coming in, but it isn't. Prices have eased up while the meagre receipts continue. Killarney is the best among the pink roses at present. There are some exceptionally nice lots of new crop Kaiserin coming in and finding excellent demand. Lots of cattleyas, and demand for same fair. Lily of the valley, violets, lilac, Easter lilies, sweet peas, daisies—all fine and beautiful. The smilax scarcity is not so pronounced. Good plumosus still on the short list, and in active demand.

Detroit.—A rather depressed tone prevails in both the wholesale and retail circles. Wholesale prices, which had been steady for several weeks past, took a decided drop.

NOVELTIES**"REAL NOVELTIES AND
NOVEL REALITIES."
In Hardy Plants.**

The biggest collection offered anywhere is found in our NOVELTY CATALOGUE just out.

Of great interest to the amateur and commercial grower alike.

It describes and illustrates uncommon plants of singular beauty, desirability and simplicity of growth; inexpensive to acquire.

Resides; our low prices, plants are big, making them valuable, in small or large quantities.

Mailed along with our illustrated whole-sale catalogue of Hardy Perennials, etc., on receipt of three 2c. stamps, which pays postage only, and which amount is credited on first order.

OUR VISITORS.

(Lines by J. K. M. L. Farquhar, Boston.)

They come from the South, the West, the North,

They come from across the sea;
Our gardens are famed, and the marvelous worth
Of our flowers they come to see.

They come to the Hub, the Garden Hub,
The rarest of flowers have we;
New treasures from China, in herb, and shrub,
In creeper, and vine, and tree.

The Lawson Pink and Enchantress fair
Brought to Peter Fisher fame;
Montgomery, Dawson and Walsh all wear
The Rose's rich diadem.

They are Boston men—we laud them well—
And others have gone before,
Like Wilder, Hovey and Hinnewell,
And at least a dozen more.

Our Garden Saints! Do I speak too strong?
For I worship at their shrine.
They have done the work that brings this throng,
And, like them, may I do mine.

SOME OF W. R. SMITH'S SAYINGS AT THE NATIONAL FLOWER SHOW.

"When the Chorizema was first discovered some travelers in Australia had not tasted water for a week. Famished, they came across this plant and water at the same time and place, and they called the plant Chorizema, which signifies 'to dance with joy.'"

"I am fond of 'people's plants'; whatever is for the people is my delight; things not exclusively for the rich!"

"Ficus pandurata. I had the President of the United States, Mrs. Taft, Mr. and Mrs. Carnegie all shovel in a little dirt around one of these plants, and it is growing grandly in the new Pan-American Building in Washington. I had an idea it might be the original of the Scotch costume. Four of these leaves would make a Scotch costume, but unfortunately, it only grows in the tropics."

"This exhibition is the most extraordinary that ever occurred in this country, and it is the grandest Peace Convention ever held. How superior it is to the drum and life bringing crowds around! This means peace, sets people to thinking in peaceful thought, and much of the credit is due to the rose. You have done more for the rose than any other State."

"One of the things I want to see is azaleas grown in America, instead of being imported, but skilled labor is too high here."

"It isn't one thing, but everything that is here, and everything is grand. I am astonished. You had a grand one here 20 years ago, and I said then as I say now, the Bostonians are the most wonderful people on the face of the earth. New York may get ahead on something to eat, and so might Pittsburgh on iron statues, but the aesthetic soul of Boston is wonderful."

"I am great for reciprocity. I have sympathy and love for everyone who loves the beautiful. The only part of mankind that will be and ought to be preserved, is the aesthetic."

"The severest scolding I ever received was administered by Mrs. Jeff Davis, who told me she never measured beauty by the square yard, when I showed her a stem of hollyhocks."

"This show is being handled with an amount of brain power that is unique, that is calculated to lift up the whole human family into a higher condition."

"This is my religion. I believe that the soul of man is lifted up by the beautiful. Mr. Hoar said in a speech he made here, that the individual who didn't believe in God and the providence of God, and the nation who didn't believe in it, was a failure. France is a failure today, because of the infidelity of her people. There is no man or woman who should not be sunk to the lowest Hell if they do not appreciate and love the beautiful."

"Boston is a most wonderful, soul-elevating agency. Its environments,

guided as they are by such men as Sargent and Pettigrew, leave an impression on every visitor that ever comes here. I said in a speech 15 years ago in St. Louis, that the progressive improvement of the aesthetic culture of the Society of American Florists' members was due to the peculiar people living in Boston. Everything must be elegant and excellent; nothing but the best for Bostonians."

"Any person that doesn't appreciate this display is not fit to go to Heaven. There will be no place there for such."

"The acacia waves her yellow hair,
Lonely and sweet,
Nor loved the less
For flowering in a wilderness."

"I was in the middle of the house devoted to acacias when Robert Buist came to visit Kew Gardens. I washed my hands, and went in to have an interview with him. I said: 'I understand you are an American, and I have had an idea of going to America.' He answered me: 'We want no kid-glove gardeners in America.' I never forgot that rebuke. The next time I saw him was 15 years later in his own store in Philadelphia. He again said: 'I told you we wanted no kid-glove gardeners in America.' I told him he had no right to assume that I was such a gardener, and the meeting ended with Mr. Buist's securing for me the privilege of going to Washington."

HAIL STORM IN PENNSYLVANIA.

Old Boreas took advantage of your correspondent's being in Boston last week, and started in to cut up and blow our old town off the map. He struck the statue of William Penn with lightning; sent a hailstorm around one section of the city; and a "churn" cyclone in another. Holmesburg, Frankford, Germantown, Manayunk were in the special sweep of the latter, but while the blow was fierce enough to unroof houses; blow trolley cars off the track and cripple the great Pennsylvania Railroad by blowing down its block signal system and holding up Commodore Westcott six hours between Cornwalls and Holmesburg—the greenhous men (so far as heard from) seem to have escaped much damage. R. Jamison of Germantown had a slight loss—probably five or six boxes of glass broken—but up to this writing (March 29th), no others are reported. All this occurred on the evening of March 27th, while your scribe was busy picking up shaken down crockery in his state room—during the gale, Fall River to New York.

In the Chester Co. "carnation belt," tributary to Philadelphia, the following sufferers are reported: Walter McCoy, 300 panes, and hundreds of plants; Isaac Passmore, damage to glass, \$300; Howard Pyle, badly damaged; Chas. Sheller, badly damaged; Joseph Kift, 3,000 panes, and much damage to Easter stock; Percy Barnard, 600 panes; Geo. Love, 300 panes. All this was from hail, of course, and not from the cyclone. We expect the glass market will have a little revival. It needs it. Ed. Flood says they are giving glass away just now.

Greenhouse property near Boston; 12,000 feet of glass, dwelling house, barn and 8 acres land. G. B., care of HORTICULTURE

OBITUARY.

Amasa T. Hoyt.

Amasa T. Hoyt, for fifty years a florist in Warren, Ohio, died March 19th. He was born in Painesville, May 12, 1841; he is survived by a widow.

Thomas T. Connors.

Thomas T. Connors of Pittsfield, Mass., died on March 28th and was buried on Thursday, March 30th. He had been gardener and superintendent for some forty years on the estate of Mrs. W. Pollock in Pittsfield, and was universally loved and respected.

Charles Barnard.

Charles Barnard died at his residence in Earl Marlborough township, Pa., March 17th of pneumonia. He was in his 82nd year. He became prominent in this section during the past score of years for raising white onions. He leaves a widow and several children.

David Mundell.

David Mundell, for many years employed as florist at the Hospital for the Insane, Indianapolis, Ind., passed away at his home in Glenwood recently. He was about fifty years of age. He was an expert in the line of gardening and was well known among florists all over the state.

The annual banquet of the New Bedford (Mass.) Horticultural Society took place the evening of March 22nd in the dining room of the Parker House, New Bedford. Sixty or seventy members of the society attended and at the conclusion of the dinner, speeches were made by Gideon H. Allen, W. H. B. Remington, secretary of the Board of Trade; Senator Ross and others. During the dinner selections were rendered by Wade & Tablas' orchestra. The entertainment committee included James Garthley, James McVickar and George H. Reynolds.

Morrison, Ill.—R. R. Davis Co., house 18 x 150 feet for potted plants; another house contemplated in the summer.

FIRE RECORD.

Mason City, Iowa—The Gilbertson Nursery Co. was damaged by fire on March 15th to the extent of \$10,000. It is thought the fire originated from an Iowa Central engine.

West Hartford, Conn.—Fire in Coombs Bros.' Greenhouses on March 25th entirely destroyed the boiler house and parts of four greenhouses, causing a loss estimated at \$1,000; no insurance.

Trenton, N. J.—Four greenhouses of Goeller Bros. with their stock of Easter plants were destroyed by fire on March 17th. Loss about \$3,000, building partially covered by insurance. The fire was caused by the blowing down of the boiler house stack which crashed through one of the buildings, sparks igniting the wood work.

NEWS NOTES.

Mansfield, Ohio—M. Schulte will engage here in the greenhouse business with his son-in-law, Charles A. Dow.

Wooster, Ohio.—Prof. Charles E. Thorne is now sole owner of the Thorne Greenhouses. Lee Drabenstott will remain in charge.

Kenosha, Wis.—The greenhouse and dwelling of Lewis Turner were badly damaged by the powder mill explosion at Pleasant Prairie on March 9th.

Great Barrington, Mass.—The Green River Nursery Co. is a new business about to start here on a farm of 130 acres. Wm. Barth is the proprietor.

Mt. Vernon, Ill.—The Reinlein Greenhouse was wrecked by the wind storm of March 7th, which wrecked a number of other buildings in this locality.

Roswell, N. Mex.—The Roswell Nursery Co. is planting several acres on East 2nd street. This addition was necessary as the limit of the old nursery had been reached.

The "LOU DILLON" Tandem Garden Cultivator

It can be set to stir the soil any depth desired and to cultivate astride the row or between the rows.

One-third quicker and easier than any other garden cultivator, easier to push than a lawn mower. No gardener can afford to be without one.

If your local dealer does not handle them, write to us for descriptive catalog and special introductory price.

The Schaible Mfg. Co.
Dept. 4, Elyria, Ohio.

What the Users say

No. 6 Kroeschell Boiler—11000 G x 3000 C—60 degrees at zero

"Your No. 6 Boiler is taking care of 11,000 square feet of glass.

"Used 3,000 bushels of soft coal (slack).

"Had no trouble keeping temperature at 60 degrees in zero weather.

"Fired ordinarily from six to eight hours.

"Boiler has given entire satisfaction.

"We are at 10 o'clock P. M., and do not go to fire again until 6 A. M. even in the coldest weather (10 degrees below zero). One very windy, cold Saturday night, through a misunderstanding, the fire was not looked after from 10 o'clock P. M. until 8 o'clock A. M. Sunday morning (ten hours) and the houses registered 12 degrees.

"Very well pleased with the boiler.

"WARRICK BROS., Washington, Penn.

Philadelphia, Pa.

Manufacturers—Importers—Originators

NEPHROLEPIS ROOSEVELT

show stiff upright growth in a 6-inch, the wide wavy fronds of **Roosevelt** droop gracefully over the pot, hiding it completely from view. Finished 3-inch plants of **Roosevelt** are equally as large and more attractive than the average well grown 4-inch Boston and growers of **Harrisii** and the **Harrisii** type admit they cannot produce attractive plants of these varieties in pots smaller than 10-inch. Without an exception **Nephrolepis Roosevelt** is the most valuable fern ever offered for florists' use. It has the vitality to withstand more rough treatment than other varieties and does not revert to the parent type. In our long experience we have never offered the trade any plant with greater assurance of entire satisfaction and predict **Nephrolepis Roosevelt** will very soon lead in popular demand, sweeping from the list, Boston, **Harrisii** and **Harrisii** type.

We are booking orders for delivery, June 1, 1911, and will fill them in strict rotation as to the date received. Get yours in early, you will not be disappointed in this fern. 2 1/4-inch pots, 40c. each; \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000; 25 plants at 100 rate; 250 plants at 1000 rate.

GOOD & REESE CO.
SPRINGFIELD, OHIO

**LARGEST ROSE
GROWERS IN
THE WORLD**

The Grandest Fern of the Age **Nephrolepis Roosevelt**

is a sport from **Nephrolepis Bostoniensis**, but a wonderful improvement over the parent variety and others of stiff upright growing habit known as **Harrisii** or the **Harrisii** type. It is a stronger maker of fronds and young plants than any other variety and will produce a larger finished plant in a 6-inch pot than Boston or **Harrisii** will produce in a larger size.

The finished fronds of **Nephrolepis Roosevelt** are at least a third wider than Boston and have more graceful drooping habit. The pinnae are distinctly undulated giving them a beautiful wavy effect which attracts the eye instantly. Cut flower dealers will find fronds of **Roosevelt** invaluable for design work. A single plant of **Roosevelt** grown in a 6-inch pot will when finished almost double the number of fronds produced by Boston or **Harrisii** type varieties and while Boston and **Harrisii**

BOBBINK & ATKINS

....World's Choicest Florist and Nursery Products....

We are growing in our greenhouses and in our 250 acre nursery, a large variety of material constantly in demand by florists. Our New Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

B. & A. SPECIALTIES

PALMS, BAY TREES, FERNS
EVERGREENS, CONIFERS AND PINES
ROSES, RHODODENDRONS AND TREES
BOXWOOD AND HARDY HERBACEOUS PLANTS
FLOWERING SHRUBS AND FRUIT TREES
VINES AND CLIMBERS. BULBS AND ROOTS.

We manufacture Tubs in every shape and size for Florists. Ask for special list.

Florists are always welcome visitors to our Nurseries.

We are only a few minutes from New York City; Carlton Hill Station is the second stop on Main Line of Erie Railroad.

HARDY RHODODENDRONS

When we say **Hardy** we mean **Hardy** in American Gardens where climatic conditions are no more severe than in Massachusetts. **We have them, the finest stock in the world of brilliant hybrid varieties which have stood the test of years in American Gardens for hardiness and vigor.**

Write for Prices on what you wish to import for the coming season.

JOHN WATERER & SON, Ltd. American Nursery
Bagshot, England.

Instantaneous Hedge

We have a surplus of fine, big, bushy plants of California Privet, twenty to twenty-five branches—suitable for giving immediate effect in planting, and offer same to trade away below regular value, as we are crowded for room. For prompt order and unsold, 4½ ft., \$40 per 1000, balance 4½ to 6 ft. at \$60 per 1000. Both sizes in carload lots at \$35 per 1000.

Seasonable Notes on Culture of Florists' Stock

CARNATIONS

Now that spring is with us carnations will need uninterrupted attention in all details, such as disbudding, frequent mulching, soil, having the ventilators wide open during warm days, and if possible, a bit of air during the night even if you have to keep your fires up during some belated cold spell. Give regular and copious waterings at the roots and a good syringing every bright morning after the flowers are cut, so as to hold red spider in check, and also attend to regular fumigation. Where you have the frame room it is a good practice to give the young stock a week or so in the frame before they go outside, for it often happens that we get a cold and wet period after they are planted out in the field. When stock is hardened off in frames they will stand without injury any such visitation. See that your ground is given a dressing of stable manure and plowed in, before planting, also a good application of wood ash and bone.

CARE OF ORCHIDS

Give *Cypripedium insigne* a place where they can be kept cool. A house with a northern aspect is the best place—one that can be well ventilated according to the condition of the weather outside. Water should be applied to the roots whenever the compost appears dry, and the plants syringed overhead at least once a day in bright weather. Where you have not a north house a cold frame, after May 20, will make an excellent place. They make a stockier and better growth than when kept in a house where they are always a considerable distance from the glass. The many forms of *dendrobiums* will soon finish flowering, at which time any rebasketing or repotting should be done. Some plants probably will not require to be disturbed, but will be benefited by a surface dressing of equal parts of sphagnum moss and fern. Give them a place in some warm house where a little shade can be given, and keep up an abundance of moisture from now on. Attend carefully to ventilation so as to admit a gentle circulation of fresh air. *Dendrobiums* that are just starting into growth will need very careful watering, but as the growing season advances they will take frequent applications.

CYCLAMEN

Seedlings of this plant that are still in flats should have attention in the way of potting. Use either 2½ or 3-inch pots, give them a compost of two parts fibrous loam, leaf mould two parts, with rotted cow manure one part, and add some sand to make it porous. Pass the whole through a screen. After they have been potted give them an average night temperature of from 52 to 56 degrees and from 65 to 70 degrees in the daytime. Never keep the plants in a close air, or they will become drawn and weak. Give all the air possible, avoiding cold drafts. *Cyclamen* succeeds best where extremes of temperature are avoided. Shift whenever the pots are fairly well filled with roots as they are liable to suffer from getting potbound. Let the plants dry out fairly well before watering; this will keep the soil sweet. The sun is now getting strong so a light shade is necessary, but don't make it too dense. Space the plants about every two weeks, always giving them plenty of room. Give them

a spray every day once or twice and fumigate once a week faithfully.

GLADIOLUS

Now is the time to plant out a batch of gladioli. This can be repeated until the end of June for a succession. By planting the bulbs at an interval of about two weeks you can secure a long season of these fine flowers. Any ground that was well-manured last fall will do as they are not exacting in their demands as to soil. Plant where they will be exposed to full sun in rows sufficiently wide to make cultivation easy. For large corms plant 2 or 3 inches apart in the rows and about 4 or 5 inches deep. During limited rainfall they should be watered at intervals quite profusely. Give them a mulch in very hot weather so as to keep the soil cool.

PEONIES

Herbaceous peonies have so greatly improved of late years that now they are indispensable for spring and summer flowering. Now is a good time to make beds or borders. In order to have peonies that will produce flowers of good size and color the soil should be trenched to the depth of 18 to 24 inches and plenty of cow manure incorporated through it. When planting in the field with the intention of digging up the clumps and dividing for sale they should be planted 2½ or 3 feet apart both ways, but when planting for cut flowers leave them at least four feet apart each way, covering the crowns with 3 or 4 inches of soil. If you are dividing old clumps for new plantations leave 4 or 5 good eyes, and they will soon regain a firm hold in their new quarters and by fall will be nice clumps. Old plantations yielding good crops of flowers annually should have a good top-dressing of manure and this forked into the soil. If the weather becomes dry while the buds are forming and the flowers coloring they should have a liberal supply of water. By the end of this month give them an application of some quick working fertilizer; it will materially improve both stem and bloom. I think for this purpose dried blood or nitrate of soda are good.

TUBEROUS-ROOTED BEGONIAS

Tubers that are not already started for bedding purposes had better be as soon as possible. They do well in partial shade. To start them place about an inch of sand and leaf mold in equal parts on the bottom of a flat and on this place the tubers about half an inch apart and then cover them over with about an inch of the compost. Give them a place in a house where they can have some bottom heat and atmospheric temperature of from 65 to 70 degrees. In two or three weeks when the young leaves show they will have made a fine lot of roots and will then be ready for 4 or 5-inch pots. A good compost is three parts good loam, one part well-rotted cow manure, and enough of sand to make the whole porous. When the roots have taken a fresh hold in their pots they will want a cooler temperature, say about 60 degrees. They will now grow fast and will have to be shaded slightly from the sun in the middle of the day. If you have a mild hot bed you can plunge the pots in it and by the middle of May the glass can be removed which will harden them to weather and sun. Seedlings that are just touching one another should be potted into 2-inch pots and grown on.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Amorals*; *Bougainvilleas*; *Primulas*; *Ramblers* for Next Easter; *Staphyleas*; *Swainsona*.

A late
season

The lateness of the present season will greatly curtail spring planting operations. Both seedsmen and nurserymen have lost already, through inclemency of the weather, at least two weeks of the usual time available to them for Spring business. It is safe to say that the volume of business in both lines will be greatly diminished; in fact, some dealers estimate the loss already sustained at something like one-fifth of the season's output. The trade generally is resigned to the conviction that there will not be time now in which to make up the loss already sustained.

With flying
colors

The National Flower Show of 1911 has now passed into history. In all probability years will elapse before the distinction of being "the greatest horticultural exhibition ever undertaken in the western hemisphere, if not in the world," is wrested from it,—to quote from our editorial columns of March 11. In that foreword we made bold to state that the success of the great show was already assured—a three-fold success

with a prospective attendance far surpassing that of any previous Flower Show. Events have shown that our estimate was well founded. While figures are not yet available, it is generally understood that financially, as otherwise, success has crowned the efforts of the earnest workers for this great enterprise. It has done an incalculable amount of good for Boston and the horticultural region of which Boston is the centre of activity, and not only Boston but the entire country has experienced a great uplift in the example and the lessons of this epoch-marking event in American horticulture.

The showman's
place

More than once during show week we heard the remark, "What would we have done here without Campbell?" It was certainly a master-stroke when the Board of Control decided to put this quiet, shrewd man at the helm. Repeatedly since HORTICULTURE came into existence these editorial columns have urged upon those interested in flower exhibitions to call to their aid men naturally adapted and trained in dealing with the public, experienced in the art of exciting public interest and inducing the people to loosen their purse strings. In the present instance Mr. Campbell was unquestionably the ideal man for the great responsibility. Every community wherever a flower show may be contemplated has its Campbell, and had he been put to work when needed many a show would have been saved from disaster and its promoters from discouragement and humiliation. We have always maintained that one of the most potent causes for the financial failure which is proverbially attendant upon flower shows is the unfitness of the average florist and gardener for box office management. His business it is to produce the goods and display them properly. Here he is supreme. But his qualifications there reach their limit and for the rest of the work he will do well to call in the showman everytime.

A prime
attraction

Another point conclusively demonstrated at the National Flower Show was the eager interest taken by the public in the displays of floral arrangements staged on Tuesday and Friday, and here again we are tempted to say, "We told you so." True, there was nothing extraordinary in evidence, and, with perhaps one exception, nothing showing any departure from the floral work seen daily in any good flower shop, but, nevertheless, this feature was a most potent drawing card, and, if we were disposed to criticise, we should say that much more room might have been advantageously given here for the sight-seers to pass and repass about these exhibits. The interest manifested in this section proves beyond a doubt that the minor position given to these exemplifications of the uses of flowers in our public show schedules is a great mistake. Four years ago we expressed our views on this subject thus:

"Almost without exception our exhibitions are conducted from the standpoint of the culturist. To the expert they are profoundly interesting and instructive, but if the public purse is to be allured to the ticket office, something must be done to whet the interest and curiosity of the great majority to whom scales of points offer no inducements."

We most emphatically reassert the foregoing. It is further in evidence that those plant groupings into which had been injected some expression, such as Farquhar's Dutch garden and Roland's rose garden, and some others, were among the features coming in for the largest amount of public interest. Mark it down as proven that no flower show can reach its full possibilities unless this feature of the application and use of flowers and plants is given prominence.

Fruits and Vegetables Under Glass

POT VINES

Pot vines will now be swelling fast and will require plenty of feeding. A change of manure is better than using one continually. If surface roots are showing, add another rim of loam around the top of the pot and lightly cover the roots in the center with finely disintegrated loam, adding some approved manure. See the plants do not suffer at any time for water. Keep the leaves in which pots are plunged properly watered as roots are sure to be running through them. Dampen the floors, etc., continually or red spider and thrips will make their presence known. Give all air possible in bright weather and keep a temperature of 80 degrees to 85 degrees while sun is shining. Close down to one inch as sun declines and endeavor to keep as much sun heat as possible. Pinch at one leaf any sub laterals which may appear beyond the bunch.

WATERING POT FRUIT TREES

Fruit trees growing in pots require special attention as any dryness at the roots may prove fatal, the other extreme being also very detrimental. Later on when the hot weather commences a whole lot of trees can be watered at one time but, up to then, each pot is better examined individually two or three times daily by using a watering can. Other stimulants, etc., are better applied in the water, for if they are left on the surface of the pot for any length of time before watering in they are sure to deteriorate. Drop a little into the can each time and allow the water to run on to it, which will help it to dissolve. See that enough water is given each time to thoroughly saturate the whole ball.

CUCUMBERS

Cucumbers can be grown successfully in cold frames through the summer months. These are usually left vacant after the bedding stock has been removed. If not in stock already, seed should be secured in readiness. Improved Telegraph, Everyday, and Rochford's Market fruit well in cold frames and are to be preferred to field-grown varieties. The mounds of soil will necessarily have to be larger than when planted on a bench as you cannot top-dress them so easily. Continue to top-dress any fruiting plants as soon as the roots show through the surface. This keeps the roots continually moving as they are ever ready to come to any fresh food. Cut away any old and overcrowded foliage and fill in with young growths. Keep down fly by periodical fumigations and syringe briskly to prevent red spider.

TOMATOES

Tomatoes which were planted out at the beginning of the year to furnish a supply through the spring, will now be in full crop. If grown to limit of stake or trellis it will be necessary to stop them and get the last trusses set. Plants showing any signs of weakness must be fed but it is not advisable to get tomato plants too strong until a good crop is set. A feeding once a week will be beneficial to plants which have several trusses partly developed. Dampen the floors three or four times daily in bright weather, but omit it should the weather be wet or dull as this would only encourage black spot. White fly is the most troublesome pest to rid tomatoes of. Cyanide of potassium has proved to be the most sure death to this winged enemy and has been used regularly without injury to the plants. See that the house is not above normal temperature; it is safer to drop it three or four degrees for the occasion.

EARLY VEGETABLES

Early vegetables should now be hardened off ready to

be transferred to the open ground as soon as the weather is considered safe. Many plants receive a severe check when planted out through not being hardened off beforehand, which may ruin them or put them back several weeks. Provision should be made to protect them for a while after planting should the night turn cold. Branches of evergreen if kept handy are easily laid on them and will often break a cold wind or keep off a light frost. Do not let stock become pot-bound. This is especially applicable to cauliflowers, as they usually "button" in after it, that is just turn in a very small head instead of growing to their proper size.

Cabbage, cauliflowers, artichokes, onions, peppers, tomatoes, etc., should all be kept growing and if necessary given another shift so as to keep the roots in good action. Celery will be valuable for flavoring purposes in the kitchen during the early summer, and will be better transferred from flats to a frame and given more room. Peas and beans should be grown with the lights off them during the day. This will keep them hardy and give plenty of root action. Lettuce growing on hot beds should have surface soil continually cultivated. Younger stock in flats are better kept close to the glass. Make a sowing of Brussels sprouts to come on in advance of the main crop.

George H. Benson

A Word of Thanks from British Visitors

New York, April 4, 1911.

Editor HORTICULTURE:

Sir:—Permit us to express through your columns a word of thanks to the florists of the United States. We arrived on the Lusitania March 17th—we depart tomorrow on the Mauretania. Our tour of the United States, embracing New York, Philadelphia, Baltimore, Washington, Richmond (Ind.), Chicago, Niagara and Boston has been one grand triumphal procession. All along the line, florists and florists' clubs have entertained us with genial and generous hospitality, affording us the maximum of pleasure and instruction, with the minimum of trouble and expense.

We came to the United States with the desire to obtain "amusement and instruction hand in hand." American florists have provided both on a scale of magnitude impossible to describe. We recognize that horticulture in America is a great commercial proposition, run by men of grand brain power, and big hearts, full to the brim with the milk of human kindness. Before we leave we wish to say, "Thank you, thank you, thank you," to one and all. This is only a feebly worded expression, but it comes from the depths of our hearts, and within each recollections of American florists and their hospitality will always find a place.

Come over and see us at our International Horticultural Exhibition in London in May, 1912.

Yours sincerely,

J. S. BRUNTON,	J. BROWN,
E. BARKER,	W. A. CULL,
C. ENGELMANN,	L. M. GRAVES,
J. S. GUNN,	C. PRATLEY,
J. PRICKETT,	S. SOUTH,
J. SIMPSON.	

NATIONAL FLOWER SHOW

Concluding Days of the Exhibition at Boston — Additional Awards — Meetings of S. A. F., American Gladiolus Society and Florists' Telegraph Delivery

In our notes of last week we left the National Flower Show Thursday noon, with three more days to run, and several important meetings scheduled to fill in the time. But it was demonstrated again, as often before, that it is much easier to schedule meetings than it is to make them materialize, especially considering the business and social attractions of the many noted specialty establishments in and around the Hub, and their proprietors, whose latch-string was hanging out full length, not to mention the ceaseless fascination of the vast flower show itself, with its new exhibits continually coming in, its throngs of visitors and the inspiring music. So it was that, despite the efforts of president and secretary and volunteer whippers-in, no regular session of the S. A. F. materialized until Saturday forenoon. The Gladiolus Society fared rather better, for it managed to gather itself together on Thursday afternoon, as announced, and did some practical business, of which a synopsis appears further on.

THE SMOKER

It is perhaps hardly in good taste for us to say much about the "Smoker" on Thursday evening, for it was not a public affair in the sense that a society or club function would be, but just a little conspiracy of

a few of the Boston boys to give their visiting friends a good time—a free-and-easy jollification that they should in time to come recall as one of the bright memories of their Boston visit. It took place in the magnificent ball room of the Hotel Somerset, all the visiting florists were welcome and at the height of the fun fully five hundred were seated about round tables adorned with flowers and where refreshments were served all through the evening—a pot of Boston baked beans on each table being a special feature. There was vaudeville and lots of music and stentorian choruses and just a few brief congratulatory speeches by Manager Campbell, Messrs. F. R. Pierson, Robert Craig, J. K. M. L. Farquhar, Col. W. W. Castle, President Asmus and, as a climax, Mayor Fitzgerald, who in addition to a ringing speech aroused wild enthusiasm by singing his famous song, "Sweet Adeline." It was certainly a happy time, all work and worry forgotten in mirthful companionship—just such an occasion as we can imagine Longfellow might have had in mind when he wrote:

"And the night shall be filled with music,
And the cares that infest the day
Shall fold their tents like the Arabs,
And as silently steal away."

THE EXHIBITION

FRIDAY'S AWARDS.

Friday's schedule provided for a display of roses to cover 200 square feet of space, with prizes of \$250 or \$150 and \$100; a Retailers' arrangement of 100 roses with prizes of \$100 and \$50; an exhibit of carnations, \$100, \$75, \$50 and \$25; also table decoration, mantel decoration, hamper, basket and bride's or bridesmaid's bouquet all to be composed of carnations wholly or principally, and for all of which liberal prizes were provided. Following is a list of the awards as made on Friday:

Display of cut roses covering 200 square feet of space, and not to contain less than 200 blooms, quality of blooms and effect to be considered and decorative green of any kind, including plants, permitted. A. N. Pierson, first, with the finest group ever staged, his new introductions showing up splendidly in the collection, which contained over 2000 blooms; A. Farenwald, 2d; W. H. Elliott, 3rd.

Best and most artistic arrangement of 100 cut roses; any variety or varieties may be used, and with such accessories as the exhibitor may desire. Sidney Hoffman, 1st, with high-handled gold basket of Dark Pink Killarney; Ed. MacMulkin, 2nd, with handle basket of Killarney.

Exhibit of carnation blooms, covering 100 square feet of space. Carnation or other foliage may be used if so desired. Peirce Bros., 1st. The centerpiece was composed of a large basket of White Enchantress, and on either side were pink and deep rose carnations in baskets, depending from a tall framework, covered with Asparagus plumosus.

Table decoration, in which carnations are the principal flower used. Penn Bros., 1st,

with pink blooms; MacMulkin, 2nd, also with pink.

Mantel decoration, in which carnations are the principal flower used. Boston Cut Flower Co., 1st, with cerise carnations, ferns and palms; MacMulkin, 2nd, with pink and white, and 3rd with all scarlet carnations.

Hamper of carnations; other foliage permissible. MacMulkin, 1st, with pink blooms; Penn, 2nd, with crimson, and Hoffman, 3rd, with white.

Basket of carnations; other foliage permissible. Julius Zinn, 1st, with variegated carnations and own foliage, very fine; J. J. Casey, 2nd, with Beacon.

Bride's or Bridesmaid's Bouquet. Hoffman, 1st, with May Day carnations and Farleyense ferns; Zinn, 2nd, with white carnations and cuneatum; Penn, 3rd, with white carnations.

Silver cup, valued at \$30.00, offered by Hitchings & Co. as a Sweepstake Prize in Section A. Awarded to Cottage Gardens Co.

\$25.00 in gold offered by F. Dorner & Sons Co. for the best vase of 100 blooms Pink Delight. Won by S. J. Goddard.

A Gold Medal, value \$25.00, offered by Kroeschell Bros. for the largest 12 blooms of carnations, one or more varieties. Each bloom must measure not less than five inches. Won by Chas. S. Strout.

\$25.00 in gold offered by Jos. Heacock Co. for the best vase of 100 blooms Dorothy Gordon. Won by S. J. Goddard.

50 blooms Conquest (Chicago Carnation Co. prize), N. F. Comley, 2nd.

50 blooms Shasta (Baur & Smith prize), Patten & Co., 2nd.

50 blooms Scarlet Glow (Dorner prize), L. E. Small, 2nd.

50 blooms Dorothy Gordon (Heacock prize), Wm. Nicholson, 2nd.

50 blooms Alma Ward (Cottage Gardens prize), Patten & Co., 1st.

The silver cup offered by the Ladies' S. A. F. for table decoration was won by Sidney Hoffman with a table decoration which was one of the gems of the show. The centre was com-

posed of blooms of Azalea Mollis and the favors of the new Mrs. Wardell rose and Farleyense ferns. The blending of orange and yellow tints was exquisite.

Mr. Hoffman also won the first prize offered by the Gardeners' and Florists' Club of Boston for floral design, Penn being 2d and J. T. Butterworth 3rd.

John McFarland arranged a beautiful table decoration of gardenias, not for competition.

A large shower wreath of lily of the valley and orchids by J. T. Butterworth attracted much notice.

The judges for Friday's entries were W. J. Palmer, Joe Hill, J. Forbes, J. R. Frothingham and Emil Buettner.

According to vote of the Board of Control no Boston man served on any of the judging committees, throughout the show. The innovation appeared to be received with appreciative favor by the visitors.

TRADE EXHIBITION AWARDS.

The trade display, as has been previously reported, was the most extensive ever made, far exceeding the largest in the history of S. A. F. conventions. Best of all is the acknowledgment by the trade exhibitors generally that the volume of business captured was unexpectedly large and, so far as we have heard, not a single protest or complaint has been voiced by any exhibitor. The list of awards, in the trade section, outside of those

made to the exhibitors of plants is as follows:

Certificates of Merit.

Coldwell Lawn Mower Co., Newburgh, N. Y., lawn mower operated by gasoline engine; C. Keur & Sons, Hillegom, Holland, bulbs; Lord's Frost proof Plant Box Company, plant box; S. R. Church, J. Comer Jones, Mgr., Boston, Mass., and Seymour, Conn., gasoline engines and spraying machines; Revere Rubber Company (G. P. Whitmarsh), Chelsea, Mass., nozzles and couplings; Hitchings & Company, Elizabeth, N. J., ventilating machines; Wertheimer Brothers, New York, gold and silver edged chiffon, sprinkle-proof ribbon.

Honorable Mention.

Lord & Burnham Company, Irvington, N. Y., pipe hangers; Hitchings & Company, Elizabeth, N. J., water boiler; Revere Rubber Company, Chelsea, Mass., garden hose and spraying hose; Mrs. S. S. Sanborn, patent forms for table decorations; J. Jarn-dahl, rustic work; Eastern Nurseries, Jamaica Plain, Mass., collection of evergreens; O. Cusumano, Boston, Florentine terra cotta; Wilson Plant Oil & Fertilizer Co., New York, sprayers and tub carrier; Eastern Library & Supply Co. (MacMillan Co.), New York, works of Prof. L. H. Bailey; Pierson U-Bar Co., 1 Madison Ave., New York, greenhouse exhibit; Wertheimer Bros., New York, sprinkle-proof radium glass, grenadine and wire-edged sprinkle-proof ribbons, spun glass pins.

Highly Commended.

Schloss Bros., New York, woven Easter Greeting ribbon; Lord & Burnham Co., Irvington, N. Y., ventilating apparatus; Johnstone Heating Co., New York, tubular fire-box boiler; T. J. Grey Co., 32 South Market St., Boston, Mass., Detroit pruner; Weathered Company, Jersey City, N. J., greenhouse exhibit; Wait's Interlocking Steel Co., Newburgh, N. Y., steel exhibit.

The judges were J. F. Ammann, H. E. Philpott and Irwin C. Bertermann.

AMERICAN GLADIOLUS SOCIETY.

A special meeting of this young society was opened at 2 P. M. on Thursday, March 30, at Boston. President Hendrickson made a few preliminary remarks stating that the outlook for the success and usefulness of the organization seemed assured. He mentioned that a committee on diseases of the gladiolus had been appointed to work in conjunction with the respective State Experiment Stations. The minutes of the last meeting were read by Secretary Merton L. Gage and the report of Financial Secretary Youell followed. He stated that the membership had now reached 172. Membership and Bulletin-committees also reported. Treasurer Fuld's report followed, showing a balance of \$85.42. Various other committees were heard from and their reports variously discussed and accepted. On the report of the Exhibition Committee regarding the awarding of certificates and suggesting a scale of points to be used in awarding, a very interesting discussion ensued as to the comparative importance of size of bloom, form of flower, form of spike, stem length and stiffness, number of flowers on a stalk, vigor, etc., but the report was finally adopted.

A. Cowee, in speaking for the committee on diseases, expressed the hope that he would be able to get a State appropriation in New York of \$2000 for that committee's use. The president was instructed to appoint a nominating committee to choose candidates to be balloted for at the annual meeting next August.

Prof. Beal of Cornell gave some advice on the methods of conducting trial grounds and making records.

A letter was read from Prof. Craig, Cornell University, on food and soil and best methods of fertilizing.

A letter from a European grower was read by Mr. Cowee regarding the

grading of sizes of bulbs in quoting prices to European trade. After discussion it was voted that a committee be appointed to further consider and report on this question at the next meeting. It was voted to accept the recommendations of Mr. Cowee concerning the renaming of varieties and the disposition of synonyms; that the Bulletin Committee publish another Bulletin to be ready before the Baltimore meeting and that the society pay the expenses of Mr. Youell for his attendance at this meeting. A vote of thanks was tendered to Messrs. Youell and Gage for their work in preparing Bulletins No's 1 and 2.

Mr. J. Keur of C. Keur & Sons, Hillegom, Holland, addressed the meeting calling attention to the practice of culling the flowers of gladioli by growers who sell the bulbs, claiming that it resulted in injury to the bulbs. He also said that inasmuch as some varieties never produced large bulbs, a graded mixture of gladiolus bulbs in sizes was not desirable, as this would throw out many fine sorts, when a large range of varieties was required. There was much enthusiasm expressed over the coming meeting and exhibition at Baltimore in August.

SOCIETY OF AMERICAN FLORISTS

The illustrated lecture by John Dunbar, assistant superintendent of parks of Rochester, N. Y., on "Trees, Shrubs and Flowering Plants," was given as per program, in Paul Revere Hall, Mechanics' Building, Friday, p. m. The lecture, which was enjoyed by a good audience, was illustrated by an extensive series of lantern slides of trees, shrubs and landscape and garden scenery, many of them beautifully colored.

The formal session of the society took place on Saturday forenoon. A bare quorum was present, many of the members having already started for their homes. President Asmus delivered his address, covering the immediate business of the society and congratulating it on the success of the National Flower Show and allied enterprises. A telegram was received from Edwin Lonsdale, Lompoc, Cal., as follows:

"Greetings and congratulations on successful National Flower Show, hoping the innovation in holding a spring meeting has proven its wisdom by increasing membership materially and broadening influence. 1915 would be a good year to hold convention in San Francisco. This is worthy of the best endeavors of all good friends of the Society."

The committee on final resolutions, Messrs. A. T. De la Mare, A. Farenwald, James Forbes, J. H. Pepper and J. R. Fotheringham, presented their report as follows:

Whereas, The S. A. F. and O. H., in the holding of its second National Flower Show in the city of Boston, is deeply indebted to the Massachusetts Horticultural Society, the Gardeners' and Florists' Club of Boston and their ladies, Mayor Fitzgerald, the press, and the public of Boston, for courtesies extended and assistance rendered during the period of the show; and

Whereas, The National Flower Show Committee, through its Board of Control and its efficient managers, have all performed their duties in a manner entirely satisfactory to the Society; and

Whereas, Frank R. Pierson, the Chairman of the National Flower

Show Committee, has given unlimited time and services to make the Show a success; be it

Resolved, That the Society extends its most heartfelt thanks for such courtesies and assistance rendered, and the entertainment so liberally furnished. Furthermore,

Resolved, That the Society feels that the Show has been an unqualified success, due greatly to the efforts of those mentioned. And be it further

Resolved, That these resolutions be inscribed upon the records of the Society, and copies sent to the organization's members.

President Asmus then took the floor and, referring to the ardent and unselfish work done by Thomas Roland towards the success of the show, mentioned the fact that during its progress a daughter had been added to Mr. Roland's home circle, and on behalf of a few appreciative friends presented Mr. Roland with a silver porridge set for the use of the young lady. Mr. Roland in reply said that it had been all very easy work up to the present moment for him, but he found words to modestly express his pleasure over the little token and his delight that the great exhibition had been so great a success.

The president announced that the Executive Committee would meet in Baltimore on Monday, April 3, and then adjournment until next August was duly declared.

FLORISTS' TELEGRAPH DELIVERY ASSOCIATION.

A number of retail florists held a meeting on Wednesday, March 29. J. A. Valentine, president of the Association, explained its objects and the work done thus far. It was thought that the time was now right for strong action. On motion, Irwin Bertemann, of Indianapolis, was appointed secretary in place of H. B. Dornier, whose resignation was accepted with regret. The president appointed Messrs. Palmer, Smythe and Rock a committee to act with the president and secretary, to consider and present a schedule of dues and guarantee ratios at a meeting to be held later in the day. In the afternoon another session was held at which the committee presented the schedule and after some little discussion, the same was adopted.

George Asmus, president of the S. A. F., read a paper on "How We Handle Rush Work at Easter and Christmas." The paper was quite interesting. He thought that Saint Valentine's Day business was not reached out for as much as it might be by florists, and he predicted that this could be made one of the great days of the year from a business standpoint. Speaking of the taking care of sales charges, he suggested that florists use the registering machines, now popular in the country, for every charge made. In the matter of Christmas greens, he found that nowadays it was best to handle only stock of grades superior to those handled by the hucksters and other transient traders. He pointed out the importance of keeping a diary showing quantities of stock and kinds handled every day in the year. Henry Penn told how he had been successful in getting St. Valentine's Day business through liberal advertising in the local papers.

Clubs and Societies

FLORISTS' CLUB OF PHILADELPHIA.

The meeting of this club, held on the 4th inst., was rather slimly attended on account of the bad weather. A. E. Wohlert of Narberth, Pa., gave an excellent and interesting address on tree and shrub planting—which we hope to publish in the near future. He laid special stress on the importance of careful packing of stock at the nurseries, and attributed one-half of the failures to this and to exposure of the roots to cold or hot winds before planting or heeling in. He recommended broken stone for three feet around the base of a tree on the lawn instead of grass. The writer would like to have Mr. Wohlert explain more fully what the reasons for that might be. Grass is a friend of the human race and while not blazoned with bloom it is at least more cheerful and restful to the vision than broken rock.

A lively discussion of the recent National Flower Show took place. Commodore Westcott, Charles E. Meehan, Adolph Farenwald and others made interesting reports of what they had seen and made recommendations for our local guidance from deductions gathered at the show. J. Otto Thilow paid an eloquent tribute to the prize winners from our city and vicinity. Well-grown *Lilium longiflorum* and American Pillar roses were exhibited at the meeting of H. I. Faust, Merion.

DETROIT FLORIST CLUB.

The meeting on April 3 was devoted to an exhibition of cut flowers and plants suitable for Easter trade. The growers responded very liberally and it is only to be regretted that these many choice things could not be displayed in a more fitting way in a large hall and the public be made a witness of the great ability of local growers. There is no doubt that such exhibits as Thomas Brown's carnations, comprising 100 each, White Enchantress, Beacon, Dark Pink Enchantress, Pink Delight and new seedlings, most all with flowers $3\frac{1}{4}$ inches diameter on strong stems not less than 32 inches long, would capture first prizes amongst a much larger competition. Just as strong was Fred Breitmeyer's exhibit of Pink and White Killarney, La Detroit, American Beauty, Canadian Queen and a large assortment of snapdragon. The plant collections shown by Messrs. Plumb, Miesel, Beard Bros., M. Bloy and Fred Rush, covered everything the retailer needs for Easter and were of high quality. Ferd. Kolbe was very good with assorted carnations as well as vases of one variety.

The Bomb Floral Co. exhibited three very interesting baskets, one with Double Killarney, one with Melody and another with Aaron Ward, all tastily arranged with pussy willows and palms and ribbons.

Jerry Stock exhibited a fine collection of schizanthus. The Club awarded certificates of merit to Fred Breitmeyer, Charles Plumb, Thomas Brown and Fred Miesel.

FRANK DANZER.

A NEW PENNSYLVANIA SOCIETY.

The Bucks County Horticulture Society was organized on March 22nd, at

THE DUTCH GARDEN.
National Flower Show.

Doylestown, Pa. Officers: Dr. John H. Washburn, president; S. B. Denlinger, vice-president; J. J. Arney, secretary; S. Paul Woodman, treasurer. Nearly one hundred representative fruit growers and truckers of the locality signed the roll of membership, among them being our old friend Walter F. Fancourt, professor of horticulture at the National Farm School. Dr. Washburn, the president elect, is dean of the latter institution. The society will meet every three months and the National Farm School will probably be headquarters. Prof. Surface, state zoologist, has taken an active part.

LADIES' SOCIETY OF AMERICAN FLORISTS.

The Ladies' Society of American Florists were entertained right royally and thanks are returnable to the Ladies of the Boston Committee and Gardeners and Florists' Club for the good times. Especially did all enjoy the hearty welcome extended by Mrs. W. H. Elliott at her new home in Brighton, Mass., on Friday. And last, but not least, do we mention that the silver vase given for best table decorations by the Ladies' S. A. F. was awarded to Hoffman the Florist, of Boston.

MRS. CHAS. H. MAYNARD,
Secretary.

CLUB AND SOCIETY NOTES.

The St. Louis Ladies' Home Circle spent a pleasant afternoon in the Langan building on Monday, April 3d, and after an hour's session they adjourned to the bowling alleys, where the rest of the afternoon was passed.

The St. Louis Florists' Club will meet Thursday afternoon, April 13th, for their regular monthly session. President Cannon and Secretary Bencke are making efforts for a large attendance as there is a great deal of business to transact.

The Retail Florists' Association of St. Louis held a good meeting at its

monthly session on Monday night, April 3d, and discussed a number of important questions which were reported by the different committees. President Sanders presided and all the other officers were present.

The Engelmann Botanical Club will hold its regular monthly meeting at the Missouri Botanical Garden, St. Louis, on next Monday night, April 10. Secretary Pring says the meetings of the club have been largely attended by the members and a good sprinkling of visitors. They will make arrangements for the club's annual field meet at this meeting.

The fall exhibitions of the American Institute of the City of New York, will be held in the rooms of the Institute as follows: Dahlia, Fruit and Vegetable Exhibition, September 19th, 20th and 21st, 1911; Chrysanthemum Exhibition, November 1st, 2nd and 3rd, 1911.

WM. A. EAGLESON, Sec.,
Board of Managers.

The report made at Boston by C. B. Meehan, chairman of the committee of the American Rose Society having in hand the establishment of a standardization of the grading of roses, favoring a grading applying to stems as follows: 9-in., 12-in., 15-in., 18-in. and 24-in., and higher as necessary was, on motion accepted by the Society. It will be interesting to note how the growers and dealers in the different rose markets will treat this innovation. President Elliott announced that the Stearns Lumber Co., of Neponset, Mass., was desirous of furnishing a convenient scale for gradings as described, and if florists would apply to them same would be gladly furnished.

Danville, Pa.—The Castle Grove Greenhouses whose new greenhouse was reported in our last issue, inform us that the building of this house has not yet been finally decided upon.

Extra Choice Grafted Rose Plants

Pink and White Killarney, Richmond and Maryland

In 2½-in. pots read for delivery April 15th

\$12.00 Per 100

These young plants are taken only from selected wood of our strongest stock.

Kaiserin, own root, 2 1-2 in. \$4.00 per 100; \$35.00 per 1000.

During Recess

Florists' Club of Washington.

The weeping skies of April are making good the proverb anent April showers, and it was in the face of an inclement greeting that the florists of this capital city ventured forth last Tuesday night to attend the annual banquet of the Florists' Club of Washington. As many of the gentlemen were accompanied by their wives and daughters, and a number of invited guests were also among "those present," it seemed all the more improbable that there would be a record breaking attendance around the festal banquet board. However, it proved to be one of the most successful and enjoyable of the usually successful annual gatherings. The installation of officers was one of the principal features of interest, and as a close second in interest came the presentation of a silver service to the retiring president of the club, whose regime was marked by success and enthusiasm.

The officers of the club held a reception in the parlors of the Fredonia Hotel before the dinner, which was served in the main dining room. In the receiving line were President Elmer C. Mayberry, Vice-President David Grillbortzer, Treasurer William F. Gude, Secretary O. A. C. Oehmler, and Directors W. W. Kimmell, George Cooke, W. A. Ballinger and G. Edward Shultz. W. R. Smith, superintendent of the Botanical Garden, made an informal address in which he was, as always, most interesting. Granville Hunt, as a committee from the Chamber of Commerce, made a talk on the movement to erect in Washington a building to be known as the George Washington Memorial Hall, at a cost of \$2,500,000. The Chamber of Commerce is raising the sum considered to be this city's proportion of the entire amount needed, and the Florists' Club has a committee engaged in adding subscriptions. It reported that it was meeting with satisfactory success.

Much interest was shown in an address by Peter Bisset of the Department of Agriculture, who told of the work in plant and seed introduction. He said that new things are constantly being brought here from all over the world to be tried out. In particular he referred to a new rambler rose from China which only arrived on the day of the banquet. It was new to the profession, he said, and very beautiful. It would be tested on the grounds of the Department, he said, and it was expected that it would prove a real acquisition. Mr. Bisset formerly had charge of Mrs. Gardiner

NEPHROLEPIS ROOSEVELT.

This fern was produced at the American Rose & Plant Co.'s establishment, Springfield, Ohio, and is a sport from *Nephrolepis exaltata Bostoniensis*. The first two plants were found in November, 1908, and up to October, 1910, over seventy thousand young plants had been taken from planted stock.

The fronds are from one third to a half wider than "Boston" and beautifully tapered from base to tip. The pinnae are distinctly undulated, giving the plant a decided wavy appearance. It is claimed that it will produce nearly double the number of fronds as the parent variety and have more graceful drooping habit, the rib of fronds being strong but not stiff and the texture of pinnae heavy but without giving the fronds a coarse appearance.

The Roosevelt is a strong maker of young plants and a most vigorous grower in every respect. The producers are showing single plants grown in six-inch, measuring over three feet across, symmetrical, and with wide wavy fronds, hiding the pots completely. Finished plants in three-inch pots are larger and more attractive than well grown four-inch Bostons and single plants of Roosevelt grown in six-inch are unexcelled in size and beauty. We learn that one firm has contracted for over thirty thousand plants of *Nephrolepis Roosevelt* in various sizes.

Hubbard's place. He has been engaged by the Department of Agriculture, and has been devoting his time to searching out new plants in all parts of the world for American farms and gardens.

F. J. DYER.

Chicago Bowlers.

Totals in score made March 29th by the Chicago Club are as follows:

	1st	2nd	3rd
Violets	797	784	858
Carnations	763	746	782
Orchids	849	746	772
Roses	698	787	823

INCORPORATED.

Philadelphia, Pa.—The Leon Nurseries, capital stock \$25,000.

S. S. Pennock-Meehan Co. are distributing a celuloid card made up for use in scoring points on roses, carnations, chrysanthemums and sweet peas for all of which the official scoring figures are given. This little vest pocket reminder will often prove of service to exhibitors and show visitors.

J.A. BUDLONG

82-84-86 E. Randolph St., Chicago

Here we have greatly increased facilities
for handling our large stock of cut flowers

OUR STOCK IS A-1 AND IT IS QUALITY NOT PRICES THAT TALKS

We have a heavy supply of **Roses**—**Brides**, **'Maids**, **Richmonds**, **White Killarney**, **Pin Killarney**, **Maryland**, **Jardine**, **American Beauties**, **Marshall Field**, etc. **Easter Lilies**, **Callas**, **Valley**, **Carnations**, **Sweet Peas**, **Mignonette**, **Tulips**, **Daffodils**, **Jonquils**—in fact all kinds of cut flowers—and in green we have **Smilax**, **Asparagus** in strings and bunches, **Sprengeri**, **Adiantum Ferns**, etc.

BIG SUPPLY FOR EASTER

CHICAGO NOTES.

Trade Notes.

Chas. McKellar is receiving large quantities of bulbous stock from the south and it is arriving in fine condition.

The annual flower sale given for the benefit of the Home for Crippled Children will take place this year just after Easter, instead of before, as has been the custom.

Our Chicago visitors to the second National Flower Show came back filled with enthusiasm and have only praises for everything they saw and the welcome given them by the eastern florists.

The approach of Easter is bringing in the florists from surrounding towns, who have learned the advantage of being on the spot early and placing their orders well in advance for the big day just ahead.

A large quantity of callas were ordered from California by a local firm, but the flowers which arrived apparently in good condition quickly faded. They were also smaller than the home-grown ones and it was hard to cover express charges.

The usual display of flowering plants in the park conservatories is now on and thousands are taking advantage of it. Great credit is due those in charge. Quite possibly florists scarcely realize the value they receive commercially by this education of the people to love and desire plants and flowers.

Several large openings in the downtown business district April 3rd, was made the occasion for using a large quantity of flowers. The moving of the Fort Dearborn Bank to its new

home was accompanied by a shower of floral tributes from other banks and individuals, making the building more like a bower than a place of business. The opening of the new shoe store of De Muth & Co. called for cut flowers and palms and several large floral horseshoes were used at the opening of the Wiggery, and American Beauties were given to customers.

Outlook for Easter.

On account of Easter coming late this year bulb stock will be comparatively scarce except a few varieties of tulips and hyacinths. These will be in fair supply with very little prospect of a surplus. Of the main standby, Easter lilies, there is every indication that a sufficient number have been grown to meet all demands and the quality is good. There are the usual number, at least, of shorts and seconds and quite possibly the average length will run shorter this year. Spiraeas and Baby Ramblers are plentiful and some splendid trained specimens of the latter are seen. Azaleas promise now to be a little scarce while hydrangeas and rhododendrons are in much heavier supply and of excellent quality.

The cold rain which came with the opening of the last week in March was the forerunner of a cloudy week and settled down into a snow storm on Sunday, April 2nd, with continued cold and rain following. As much of the Easter stock depends upon the weather conditions of the three preceding weeks there are plenty of conjectures as to the result. Those whose crop of beauties is dependent upon sunshine for setting the buds are not very optimistic, but the growers whose roses

and carnations were coming in too fast are pleased with the cooler weather.

Personal.

Geo. Hoff who was operated on for appendicitis at the Lakeview Hospital ten days ago is gaining nicely.

John Starrett, florist at the La Salle Hotel, will spend two weeks at Mud-lava, Ind., and hopes to come back minus his rheumatism.

E. Wienhoeber and Wm. J. Smythe, who represented the retailers at Boston, are back and express themselves as delighted with the flower show.

A card from J. McHutchison of New York mailed from Santiago says his health is greatly improved by his trip. The party expected the next day to start across the Andes.

Visitors: Vincent J. Gorly of Grimm & Gorly, St. Louis, Mo.; Mrs. Ellison of the Ellison Floral Co., St. Louis, Mo.; A. Martini, gardener for J. H. Moore, Lake Geneva, Wis.; Geo. F. Crabb, Grand Rapids, Mich.; Mr. and Mrs. J. F. Wilcox and two sons of Council Bluffs, Mo.; E. Amerpohl, Janesville, Wis.; Mr. Kent of Kent Bros., Newark, O.

Mt. Vernon, Ill.—Fred Reinlein, proprietor of the Reinlein Greenhouse, whose greenhouse was wrecked by a wind storm, writes us that he intends to allow the place to lay idle for a time as business is slack and his entire stock was frozen. He has been working on solving the boll-weevil problem for years and claims to control the correct principle for its destruction. After this matter has been satisfactorily demonstrated he will rebuild his greenhouses.

BRITISH HORTICULTURE.

The Cult of the Carnation.

The Perpetual Flowering Carnation Society has given another proof of its usefulness in issuing an excellent "Year Book," which will be found exceedingly helpful to the professional and amateur alike. Mr. P. Smith, an experienced grower, has much to say that is appropriate and instructive in an article on "Novelties vs. Progress." C. Harman Payne entertainingly describes "Some Old Carnation Books." According to the existing judging scale ten points in a hundred are given for fragrance, whilst color, size and habit of plant receive twenty points each. The Rev. Joseph Jacob, in an article entitled, "What do we exist for?" advocates the raising of the points awarded for scent, and this view of the judging will be endorsed by most carnation lovers. Various phases of carnation culture are capably handled by Messrs. M. C. Allwood, A. Grubb, F. Fitch, and J. Gardner.

Activity in the North.

Good progress has been made in organizing the North of England Horticultural Society, the Secretary of which is the Rev. J. Bernard Hall. As regards the Society's certificates of horticultural proficiency, negotiations are taking place between the Secretary and the Northern Universities. It is hoped to arrange with the Universities to prepare candidates for written examinations. But to make sure of cultural proficiency as well as theoretical knowledge candidates will have to exhibit the produce of their gardens at the meetings at Leeds or elsewhere, by arrangement, or otherwise satisfy the Society in the matter of practical horticulture.

Miscellaneous.

The Royal Horticultural Society held an exhibition of forced spring bulbs on March 14 and 15. The trade section was somewhat disappointing, only one firm having entered. The first prize carried with it the gold medal of the General Bulb Growers' Society of Haarlem.—"The Sales for Agricultural Purposes Bill," which is to be introduced into Parliament is causing a great amount of uneasiness amongst seedsmen, who complain that it is likely to interfere seriously with their business and cause widespread annoyance unless its provisions are modified.—At a recent meeting of the Council of the newly formed National Hardy Plant Society, it was reported that encouraging progress was being made. Mr. Gill, of Penrhyn and Falmouth, Cornwall, exhibited a new hardy primula, *P. Winteri*, from the Himalayan Mountains. The species had only been seen previously in herbarium specimens, which were sent over to Britain forty years ago. This useful acquisition was awarded a first-class certificate.

W. H. ADSETT.

SEEDS

Asparagus Plumosus \$2.00 per 1,000. SPRENGERI \$1.00 per 1,000. STRAWBERRY GUAVA 30 cts. oz. SMILAX 25 cts. per oz. All from my own plants.

Easter Plants

Send your orders direct to the Mill, the great Mill of Plant Production that never ceases, of Godfrey Aschmann, well known for Easter Plants from ocean to ocean.

LILIUM MULTIFLORUM green as grass, good foliage from bottom up, 6-in. pots from 12 to 30 inches high. Plants with 5 to 10 buds, 10c. per bud; plants with 2 to 4 buds, 12c. per bud.

HYDRANGEA OTAKSA every branch nicely staked up, 6, 7 and 8-inch pots, 35c., 50c., 75c., \$1.00 to \$1.50.

SPIREA GLADSTONE, 6 and 7-inch pots full of flowers, 35c., 50c., 75c., \$1.00.

CINERARIA HYBRIDA GRANDIFLORA, all colors, mixed, 5½ to 6-inch pots, 25c., 35c., 50c., 75c., \$1.00.

AZALEA INDICA, selected by myself on my trip to Belgium last year, 1910. Good best American varieties, Mme. Van der Cruyssen, double pink, 75c., \$1.00, \$1.25, \$1.50 to \$2.00. Simon Mardner, double pink, Vervaeckiana, De Schreyeriana, Empress of India, double variegated, 50c., 60c., 75c., \$1.00, \$1.25, \$1.50, \$1.75 to \$2.00. Apollo, red, 50c., 60c., 75c. Deutsche Perle, Niobe, white, 60c., 75c., \$1.00, \$1.25 to \$1.50. Bernard Andreas Alba, also white, and large Niobe, \$1.50 to \$2.00.

CRIMSON RAMBLER ROSES, large plants 30 by 36-40 inches high, 75c., \$1.00, \$1.25, \$1.50.

HYACINTHS, four best colors: Gertrude, pink, King of the Blues, dark blue, Grand Maitre, light blue, La Grandesse, white, 4-inch pots, \$12.00 per 100.

TOURNESOL, best double variegated and Murillo double rose Tulips, 3 bulbs in one pot, \$1.80 per doz., \$15.00 per 100 pots.

VON SION DAFFODILS, best double yellow narcissus, 3 bulbs, in 6-inch pots, \$2.50 per doz. pots.

ARAUCARIA EXCELSA, 6 and 7-inch pots, 4, 5, 6 and 7 tiers, 4 to 5 years old, 25, 30 and 35 inches high, 75c., \$1.00, \$1.25, \$1.50 to \$2.00.

ARAUCARIA GLAUCA, 6 to 7-inch pots. **ARAUCARIA ROBUSTA COMPACTA**, 6 to 7-inch pots, \$1.25, \$1.50, \$1.75 to \$2.00.

KENTIA FORSTERIANA, 6-inch pots, 30 to 40 inches high, \$1.00, \$1.50 to \$2.00.

KENTIA BELMOREANA, single plants, 6 to 7-inch pots, \$1.50 to \$2.00.

KENTIA BELMOREANA, combination plants, 3 plants in one pot, 30 to 40 inches high, \$1.25, \$1.50 to \$1.75.

FERNS

ASPARAGUS SPRENGERI, 4-inch, 10c.; 2½-inch, 4c.

NEPHROLEPIS BOSTONIENSIS, 5½ to 6-inch, 40 to 50c.

NEPHROLEPIS SCHOLZELI, 6-inch, 50c.; 7-inch, \$1.00.

WHITMANI, 7 to 8-inch, \$1.25 to \$1.50. **SCOTTII**, 5, 5½ to 6-inches, 35c., 40c., 50c.; 7-inch, \$1.00; 8-inch, \$1.50.

NEPHROLEPIS GIATRASIL, a new fern very graceful, of weeping habit, 5, 5½-inch pots, 30c., 40c., 50c. Small 4-inch, 20c.

LATANIA BORBONICA (Chinese Fan Palms) 30-inches, 6 to 7-inch pots, 40c., 50c., 75c.

DRACAENA BRUANTI, 6-inch, 35c. to 40c.

BEGONIA REX, 5½ inches, 25c.

IPOMEA NOCTIFLORA or Aschmann's well-known, pure white, waxy Moon Vine, 2½ inch, \$5.00 per 100. Now is the time for you to plant them into 4-inch pots, will make plants for you by May 25th.

FERNS FOR DISHES, assorted, \$4.00 per 100.

Cash with order please, no references. All plants travel at purchaser's risk only. Mention if pots are wanted.

TARRYTOWN-ON-HUDSON, NEW YORK

THE QUESTION OF MOISTURE FOR MUSHROOMS.

Editor of HORTICULTURE:

I have read a great deal about mushrooms, including the articles in HORTICULTURE, during the past six months, and have experimented some. I don't know it all yet. Who can tell me something more?

Experiment 1. Soil, $\frac{1}{4}$ rotted manure, $\frac{3}{4}$ garden soil. Box 2 x 4 feet, located under bench in house ranging nights from 60 to 70 degrees, and days up to 80. Very little heat from soil fermentation. Spawned at 80 degrees F. Cased when down to 70 degrees. Surface lightly sprinkled when dry. Buttons appeared in seven weeks and a few matured. Then many buttons showed but nothing matured. At end of three months I gave the box a heavy soaking. Result, a crop of mature mushrooms in two days. This is contrary to all literary instructions, both as to temperature and watering.

Experiment 2. Soil, $\frac{3}{4}$ manure and topped with some garden soil. Moisture same as No. 1, but with 10 degrees less temperature of house. Not so many buttons matured at end of two months. Again I watered freely and again there was immediate production of mature mushrooms. More light is needed of a scientific nature as to the moisture and watering question. The experimentation seems to point to the possibility of growing mushrooms without much manure fermentation in the soil, controlling the soil temperature by the outside atmospheric temperature. I had quite a voluntary crop of mushrooms in my grape houses about a month after starting the same. Well rotted horse manure was forked in the borders about a month before we turned on heat, which was Dec. 1. The grapes are now beginning to color. We have grown some fine Telegraph cucumbers in large pots under the grape vines, and are crossing White Spine and Telegraph as an experiment.

J. M. W. KITCHEN, M. D.

THE BOSKOOP EXHIBITION.

We have received a large colored poster of the great exhibition of forced shrubs and plants which is being held from April 5 to 16, on the occasion of the 50th anniversary of the Pomological Society of Boskoop (Holland). The members of this society now apply themselves almost exclusively to the cultivation of all sorts of conifers, evergreens and shrubs and perennials for forcing. The exhibition will be highly interesting, for the great collaboration of the principal firms of Boskoop and its environs guarantees a complete survey of all kinds of shrubs and perennials for forcing, which are in cultivation in this well known nursery district. C. H. Claassen is president and C. Th. Moerlands secretary of the exhibition.

FIRE RECORD.

Reading, Pa.—On March 5th fire destroyed the building occupied by the flower store of Guy W. Payne.

Clarinda, Iowa.—The seed house of A. A. Berry was totally destroyed by fire March 19th. About 1500 bushels of onions, cultivating machinery, shipping crates, etc., were destroyed also. Insurance \$3,500.

LILIES FOR EASTER

Extra fine. Cut or in pots. Average four and five to the plant. Have some with three and six flowers and buds. Just the right height.

Spirea in 7 in. pots. Extra fancy.

Satisfaction guaranteed. Send for Prices.

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$1.50 per dozen, \$12.00 per 100, \$100.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinense Blue and White. 75 cents per dozen; \$5.00 per 100.

Choice and Rare Named Hybrid Varieties

Amos Perry. Symmetrically formed, semi-double flowers of a rich rosy-mauve, flushed sky-blue, conspicuous black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Amyas Leigh. Large spikes of rich sky-blue flowers, the inner petals rich rosy-plum with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Belladonna. The freest of all, never out of bloom. Beautiful turquoise-blue flowers. 15 cents each; \$1.50 per dozen; \$12.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye. \$2.50 per dozen; \$20.00 per 100.

Julia. Gigantic flowers of a pretty "Cornflower" blue, beautifully veined with rose and large pure white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$18.00 per 100.

Mme. Emma Zaiser. Flowers nearly 2 inches in diameter, rich cambridge-blue, flushed rose, jet-black-centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mme. Violet Geslin. One of the finest, flowers perfectly round, clear blue, centre lavender, with bold white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Musea. Large circular flowers of a curious shade of rosy-mauve, edged cambridge-blue, with dark eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Portia. Lovely "Cornflower" blue, with faint flush of rose and black centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Queen Wilhelmina. Massive spikes of sky-blue flowers flushed with rose, with very large pure white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Rembrandt. Large loose spikes of bright sky-blue flowers, inner petals rosy-lavender, the whole suffused with a silvery sheen. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

NEW WHITE DELPHINIUM.

Hybridum Moerheimi. The first really pure white Delphinium introduced and a sterling novelty; a strong vigorous grower and a remarkably free bloomer. Stock limited. \$2.00 each.

Dreer's Superb Double Hollyhocks

We have this season a fine lot of strong, clean, healthy, vigorous one-year-old flowering plants of the finest strain, as under:

BLOOMINGDALE'S

ADDRESS

C. C. TREPEL, Mgr., Plant Department, 59th St., New York

PHILADELPHIA NOTES.

Frank Jackson, late manager for Battles' Thornhedge greenhouses, has purchased a property at Sellersville, Pa., and will erect thereon a modern greenhouse establishment.

Everybody is congratulating the disseminators of the new Irish Rose "Melody" on the silver medal it won at the great Boston show last week. This is undoubtedly the loveliest of all the yellow roses to date and orders have been pouring in lately in recognition of its extraordinary merit.

John H. Dodds, superintendent at the country home of John Wanamaker, has disposed of his fine improved yellow sport of Pandanus Sanderi to the Robert Craig Co. who will disseminate it. The variety is named "Lindenhurst"—in compliment to its native home—the Lindenhurst estate of Mr. Wanamaker.

Herbert Baker, lately foreman for C. & G. L. Pennock, rose growers, Lansdowne, succeeds to the business of Aldrich Pennock, deceased—which has been conducted until now under the title of the A. J. Pennock Co., at Lansdowne. Mr. Baker will conduct the business under his own name, and will grow roses principally.

The continued cold weather is beginning to make the plant men worry. Efforts were all in the direction of holding crops back on account of the late Easter this year. Now, the growers find that they will have to put the heat to them in the most emphatic manner, if they are to be in good shape for Easter week. Conditions are all right for hyacinths, daffodils, tulips

and other bulbous stock—which prefer cool conditions—but most all other stocks are at the critical stage—and giving lots of anxiety.

Messrs. Logan and Batchelor of Newbold's are receiving congratulations on having won out at the Boston show with the finest specimen azaleas in the exhibition. This is no mean honor considering the advanced position the science of horticulture has reached around Boston—that locality being admitted as leading the procession in high-grade gardening. In commercial flower growing also, Pennsylvania can congratulate herself on having still a few good growers. Messrs. Farenwald and Towill held their ends up nobly in roses.

And we must not forget our good friend John R. Andre of Doylestown in the latter connection. He is following in his revered father's footsteps, and doing the rose better and better every year. How proud the elder Andre would have been if he had been alive to-day to see his son's success.

Visitors: G. W. Grandy, Jr., Norfolk, Va.; Mr. Hostetter, Manheim, Pa.; Philip Breitmeyer, Detroit, Mich.; W. B. Girvin, Lancaster, Pa.; William and Charles Feast, Baltimore, Md.; Henry W. and Harry F. Reiman, Indianapolis, Ind.

HOLLYHOCKS

WATER LILY SPECIALIST

Here's Nursery Stock That Every Florist Can Use NOW

Your customers are ready to buy a lot of things from you besides cut flowers, pot-plants and bulbs—for instance, you can sell a lot of Harrison's California Privet this Spring without going to much bother—and make money on every bit of it, too.

We have the soil and the facilities for growing California Privet right. We grow plants by the million—they are sturdy and stocky, branched close and thick right down to the ground, and with great heavy masses of roots that will take tight hold and get down to business almost anywhere your customers plant them—making a beautiful, dense hedge from the first season.

Harrison's Strawberry Plants are another thing you can sell a lot of this Spring—we have over 100 varieties, and are ready to dig millions of healthy young plants that will bear heavily next year.

Then we have scores of other shrubs and vines, trees and plants, many of which you could handle to splendid advantage—make money and please your trade. We'd like to "talk it over with you by letter." Drop us a line and we'll send full particulars, with our brand-new eye catching 1911 Catalogue, by first mail.

NEWS NOTES.

Beaumont, Calif.—A nursery is being started here by George De Huff.

Hagerstown, Md.—Edward Hoover will go into business here, having built a greenhouse. He is the son of C. C. Hoover, gardener.

Middletown, N. Y.—Edward A. Lorentz whose greenhouse addition was reported in last week's issue, writes that a dwelling house south of his greenhouses shaded them too much so he recently purchased the house and is moving it to a vacant lot also recently purchased across the street. This will give him more room for flowers out of doors and will enable him to lengthen his greenhouses later on if necessary. He intends to build an 8x30 lean-to propagating house this summer.

DAHLIAS Every Day in the Year

¶ In buying lily bulbs do you invest or do you speculate? The safest plan of course is to invest, and that means to pay the price and get the very best the market affords. The speculation plan is to buy the cheapest you can and take a chance. Now if it was only a mere speculation in bulbs the risk would not be so great, but the real danger in handling bad bulbs is the loss of valuable space in the greenhouse, and the profit on the sale of cut flowers. Of course an investment is not always absolutely safe, but in the long run it is much safer than a speculation and every experienced grower of lilies knows that the best bulbs are absolutely necessary for successful results and profitable returns. If you knew what we know about Horse-shoe Brand Giganteum of superior quality and assortment, no one could induce you to buy other brands. There are positively no better lily bulbs produced in the world and they are as safe an investment as you can possibly make in lily bulbs.

¶ Prices reasonable for quality delivered. Try them.

Decoration Day Roses

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low budded stock, in the following varieties, true to name: Price, 15 cts. for 5 (of one variety), \$13 per 100, \$120 per 1000 (immediate delivery).

Alfred Colomb. Carmine crimson.
Anne de Diesbach. Bright carmine.
Ball of Snow (Boule de Neige). Large, pure white.
Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Capt. Christy. Delicate flesh color.
Clio. Satin blush; very fine new sort.
Duke of Edinburgh. Bright vermilion.
Fisher Holmes. Dark velvety crimson.
Franz Karl Druschki. The finest white in existence.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson; the popular Rose.
John Hopper. Bright rose, with carmine center.
La France. Peach blossom pink.
Mme. Charles Wood. Bright carmine.
Margaret Dickson. White, with pale flesh center.
Marshall P. Wilder. Cherry rose and carmine.
Magna Charta. Dark pink.
Mme. Gabriel Luizet. Light, satiny pink.
Mrs. John Laing. Rich, satiny pink.
Mrs. Sharman Crawford. Deep rosy pink.
Paul Neyron. Lovely dark pink.
Persian Yellow. Hardy yellow rose.
Prince Camille de Rohan. Dark crimson maroon.
Soleil d'Or. Large, globular flowers, varying in color from gold and orange to reddish gold, shaded with nasturtium red.
Ulrich Brunner. Cherry red; grand rose; free. For Prices, see above.

English Moss Roses

Assorted. White, Pink, Red. Large dormant plants, from open ground. 75 cts. for 5, \$14 per 100.

Baby Rambler Roses

PHYLLIS. Very fine clear pink, highly recommended. \$1.25 for 5, \$20 per 100.
PHYLLIS (Grown as a Standard). \$2 for 5, \$35 per 100.
BOSKOOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30 per 100.
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85 cts. for 5, \$15 per 100.
BABY DOROTHY (Grown as a Standard). For description, see above. 50 cts. each, \$4.75 for 10, \$45 per 100.
CATHERINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85 cts. for 5, \$15 per 100.
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85 cts. for 5, \$16 per 100.
MME. NORBERT LEVASSEUR (Baby Rambler). Strong, field-grown plants, 75 cts. for 5, \$14 per 100.
BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40 cts. each, \$3.75 for 10, \$35 per 100.

Ramblers and other Climbing Roses

CLIMBING BABY RAMBLER (Miss C. Mesman). A novelty for 1911, where the Baby Rambler is popular, the climbing type will soon become so, too. We have a small stock, and offer same as follows. It is a true Polyantha type, color deep rose. 50 cts. each, \$2.25 for 5, \$10 per 100.
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown. \$1.50 for 5, \$22.50 per 100.
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15 per 100; 4 to 6 feet, \$2.25 for 10, \$20 per 100; 7 to 8 feet, extra heavy, \$4 for 10, \$35 per 100.
DOROTHY IERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15 per 100; 8 to 9 feet, \$2 for 10, \$18 per 100.
TAUSENSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15 per 100.
TAUSENSCHON (Grown as a Standard). Fine for forcing. 40 cts. each, \$3.75 for 10, \$35 per 100.

Something New in Roses for Florists

Half-Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40 cts. each, \$4 per doz., \$30 per 100.
BABY RAMBLER (Half Standard). Crimson. 40 cts. each, \$4 per doz., \$30 per 100.
BABY CATHERINE SEIMETH (Half Standard). White. 40 cts. each, \$4 per doz., \$30 per 100.
BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45 cts. each, \$4.50 per doz., \$35 per 100.
PHYLLIS (Half Standard). Carmine pink. 45 cts. each, \$4.50 per doz., \$35 per 100.
TAUSENSCHON (Half Standard). Soft pink. 40 cts. each, \$4 per doz., \$30 per 100.
MRS. CUTBUSH (Half Standard). Rose pink. 40 cts. each, \$4 per doz., \$30 per 100.

We own Climbers

Mme. Plantier. White.
Baltimore Belle. Pale blush color.
Prairie Queen. Red, changing to pink.
Seven Sisters. Clear pink.
 75 cts. for 5, \$14 for 100

English Grown Hybrid Tea, or Everblooming Roses, etc.

Hybrid Tea or Everblooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in Winter, they give a wealth of bloom all through the Summer months and late in the Fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp pink at the ends of the petals, center coral-red or salmon-pink, shaded with chrome yellow. Very fragrant. 40 cts. each, \$1.75 for bundle of 5, \$30 per 100.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5, \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for Summer-flowering and cutting.

Maman Cochet (Pink). Color is clear, rich pink, changing to silvery rose; very double and fragrant.

Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride.

\$1.25 for bundle of 5, \$22.50 per 100.

ROSE, Etoile de France. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson-red velvet, the center of the bloom vivid cerise-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field-grown, 85 cts. for bundle of 5, \$15 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10, \$22.50 per 100.

GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bedder. It is a perfect sheet of richest crimson-scarlet all Summer. A strong, vigorous grower, \$1.75 for 10, \$15.00 per 100.

VISCOUNTESS FOLKESTONE. A large full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous. \$1.25 for 5, \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower. \$1.25 for 5, \$20.00 per 100.

RICHMOND. The well-known red Rose of commerce, \$1.25 for 10, \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor Summer growing, \$1.25 for 5, \$22.50 per 100.

BETTY. Copper-yellow, overspread with golden-rose. A fine formed Rose, large and moderately full, \$1.75 for 5, \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 for 10, \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 for 10, \$22.50 per 100.

AMERICAN BEAUTY. Almost too well-known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong, field-grown plants, 75 cts. for bundle of 5, \$14 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center, large full, globular; sweet-scented, \$1.25 for bundle of 5, \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor Summer-blooming. Bundle of 5 for \$1.25, \$22.50 per 100.

MICHELL'S SEED HOUSE, 518 Market St., PHILADELPHIA

Seed Trade

The Next Convention.

It has been practically decided that the next convention of the American Seed Trade Association will be held either at Marblehead, Mass., or Swampscott, with the odds at present in favor of the Rockmere at Marblehead.

In view of the fact that the convention was held east last year and was due to go west this year, it is not altogether clear why it should be brought so far east again this year. It is generally understood that Milwaukee had been selected, but owing to the fact that another and very large convention was booked there the same week, the hotels could not take care of the Seed Trade Association. The chances are that the attendance will be large from the east but not very large from the west. However, it is doubtless the best arrangement that could be made under the circumstances.

Unseasonable.

Trade conditions have not improved in the last two or three weeks owing to the cold and inhospitable weather of March, and April opens with the same quality, and in New England and in eastern and western New York the weather is more like mid-winter than typical April. The mercury has been nearly half way to zero nearly every night since the first of the month, and within the last day or two there has been quite a snow fall, which, by the way, was regarded as more of a blessing than an evil, as the soil has been very dry and greatly in need of moisture.

Onion Seed.

It is now so late in the season that real spring weather cannot be long delayed, and if it is only continuously warm when the spring does open, vegetation may be just as far advanced at the first of June as last year.

There have been reports of serious damage to seed crops in California, but these annual complaints are largely discounted by the trade, and many would regard a considerable shrinkage of the onion seed crop as anything but an unmixed evil. It begins to look as

if we were going to experience the conditions of a few years ago when onion seed was peddled around the country below the cost of production. All clouds have their silver lining, however, and just at this time there has been a sharp and sudden advance in the prices of onions with a corresponding increase in the demand for seed. We have been informed by a number of the leading retailers that there has been a very satisfactory movement in the onion seed line during the last few weeks, and if this is general it will mean that a considerable portion of the surplus will be consumed. The very low price of onion sets has been in marked contrast to the high and advancing price of large onions, and while the latter continue to advance the former do not; but as a matter of fact there will be very little opportunity for a further decline in sets, unless they are absolutely given away.

Potato Outlook.

Some weeks ago onion sets and potatoes were coupled in the general decline, but within the last two or three weeks there has been a marked change in the market price of potatoes, and today they are higher than at any time during the winter and with a tendency to advance to a still higher level. We have been informed that the Maine crop has been largely marketed, and very small stocks are now held in first hands. From present indications we would not be surprised to see an advance of from 50c. to \$1.00 a barrel over the ruling prices of the present week.

Baltimore Changes.

In our issue two weeks ago we referred to the impending changes in the trade in Baltimore. Since that time one of the proposed new concerns has actually taken on corporate existence under the name of the C. F. Wiseman Seed and Implement Co. It is barely possible that the name of the new concern may be changed, and if so we will give information about the same at an early date. There is at least one other new concern seriously discussed which may or may not materialize, but the addition of even one new seed house in a town where

prices are so badly demoralized as in Baltimore, is an important factor to be reckoned with not only by the new concern, but by those already established.

Hobbling the Cannery.

Our so-called scientists of the Department of Agriculture find it often difficult to prove the necessity for their existence, consequently, they are discovering new sources of danger to the public health, and one of the latest is "Salts of Tin." No doubt, there is such a thing as "salts of tin," but it is very doubtful if in sufficient quantity to be a serious factor affecting purity of canned foods. The fact, however, that it has been discovered and discussed by the Department has caused the canners of the country a good deal of concern and also the manufacturers of cans. It is generally believed that this new discovery will be developed and ere long packers of food in tin will have conditions imposed on them that it will be well nigh impossible for them to comply with.

The relation of the seed trade to the canning industry is sufficiently close to make any matter of this character interesting, and as the seedsmen are having their own troubles with more or less ridiculous state laws, they will no doubt be interested to learn that the National Government is seriously contemplating hobbling an allied industry. Important developments along this line will be given from time to time in HORTICULTURE.

Thomas Evans has taken a position as gardener and greenhouse manager at Hillsdale Floral Park, Hillsdale, Mich.

In Boston this week: W. C. Langbridge, Cambridge, N. Y.; Ed. Roehrs, Rutherford, N. J.; W. Rehm, New York.

Richard E. Hannaford, florist, of Portsmouth, was thrown from his wagon while driving, Saturday, March 25, and severely hurt.

Mr. R. J. Windler, the well known St. Louis retailer, has announced his engagement to Miss Amy Zender of Chicago. Miss Zender is the daughter of a well known florist by that name in Chicago. The marriage will take place in June at the home of the bride's parents in Chicago.

J. W. Page, son of J. H. Page, Hampton, Middlesex, England (a large grower of lilies, carnations and narcissus for the Covent Garden Market), will join the forces of the E. G. Hill Co., Richmond, Indiana, in order to gain American experience and broaden his already extensive horticultural education. Mr. Page was one of the party of English visitors who have been touring this country for the past two weeks.

Recent visitors in Buffalo: George Asmus, Chicago; J. F. Wilcox and family, Council Bluffs, Mo.; E. J. Fancourt, representing Pennock-Meehan Co.; Mr. Zirkman, representing M. Rice & Co., Philadelphia, Pa.

Flower Market Reports

BOSTON Trade is certainly very quiet in this market—worse than it has been at any time during the present season. The public seem to be in a waiting mood and are not disposed to let any more money go out for flowers than they can help. No doubt they will make up for it next week but, in the meantime, the situation is more than tiresome. As to prices they have been going down and down and have now reached a very low level, which does no good to anybody, as nobody wishes to buy. Next week will, no doubt, see a bracing up of prices and backbones all along the line.

BUFFALO Winter weather was the condition the past week though a very satisfactory business was done. Stock was plentiful on most lines, especially carnations, which came in heavy supply. White Perfection is very fine also Winsor, White Lawson, Pink Delight, Victory, Melody and Ideal. There has also been a good supply of roses, especially white. Kaiserin has been added to the list and good stock is received. There is a good demand for peas, mignonette, lilies and Victoria daffodils but lily of the valley is still on quiet side. Smilax is a little short in supply, also asparagus in bunches. Good ferns are scarce and price rules high. The outlook for Easter business is bright and advance orders are being received.

CHICAGO The market has had its ups and downs during the past week. Some days would make the largest dealers exhaust their supply of stock to fill orders, only to have a surplus on other days. Of carnations was this especially true, the demand being stronger on the average this week than last. A decided check has been put on stock along all lines, by the cold and stormy weather and it may result in material advantage when Easter sales are footed up. Roses of all kinds are coming in now at about a normal pace for the season and many are worked off this week by the spring openings in the large stores. Bulbous stock is still plentiful and southern shipments are bringing more into the market than can be handled to advantage. Callas are in good demand for large blooms. Spanish iris, snapdragons, narcissus of all kinds, including Emperor and the smaller white Mrs. Langtry, give the buyer plenty to select from. Common ferns are remarkably scarce and are bringing four dollars per thousand.

DETROIT Last week produced enough work for most all of us to fully make up for the slow days experienced the week previous and the good business booked for next week we may safely say that the dreaded Lenten season has passed without injury to our bank account. Wholesalers have satisfactorily escaped the glut so usual at this time of the year. Carnations, roses and sweet peas are coming in good in quality as well as quantity and are cleaned up at fair prices. Bulbous stock is dragging to a great extent.

(Continued on page 54)

EASTER LILIES

Some people say "We can buy all the Lilies we want at 10c. and 12c." So they can, but what kind of stock is it. Such Lilies are very much more expensive; ours at 15c. are by far the cheapest, no waste, no short runty stock, but all choice, well grown, long stemmed flowers and very carefully packed, too. Per 100, \$15.00.

GARDENIAS

Special, per doz., \$4.00. Fancy, per doz., \$3.00. First, per doz., \$2.50.

VALLEY

Special, per 100, \$4.00. Extra, per 100, \$3.00.

CARNATION SPECIAL

Our selection as to colors, in lots of 500 or more, the best quality at \$6.00 per 100.

MELODY

Awarded Silver Medal (86 points) at the National Flower Show, Boston, 1911

NEWS NOTES.

Great Barrington, Mass.—E. B. Dilby of Pittsfield, has purchased the greenhouses of Theo. Dellert.

Maspeth, N. Y.—Emil Braun, florist, has just left the St. John's Hospital,

Long Island City, a comparatively well man after a most remarkable surgical operation. Although a similar operation has been attempted a number of times before, the percentage of recovery has been very small. Mr. Braun is to be congratulated on the outcome.

Flower Market Reports

(Continued from page 547)

The New York Herald in common with several Chicago dailies comes out with a scare head about the threatened shortage in the Easter lily crop. In and about the wholesale flower districts in this city, however, nobody feels any alarm as to the prospects for lilies or any other flower which the market provides for Easter. The situation at present is one of extreme dullness, characterized by a very light demand rather than by an excessive supply. Plant dealers are pretty well sold out in advance. Warmer and sunnier weather must be had for the next few days if the quality of stock generally is to be up to the standard. All are hopeful for a big successful Easter.

A canvass of the PHILADELPHIA wholesale centers here indicates that present market conditions compare favorably with a year ago—meaning not the same date but the same length of time before Easter. There is no marked increase in prices reported yet the trading is of large volume, and the clearance of surpluses is perhaps a little better than heretofore. It is thought that had milder weather conditions prevailed a still better average report would have been in order. Roses have been coming in quite liberally but nothing like what would have been the case if the weather had been milder. There is a good demand for carnations but prices rule low. Single violets are about over and the indications are that even doubles will be scarce for Easter—and that lily of the valley and sweet peas will have to be relied on to take their place. There will be no medium American Beauties for Easter—the specials and the shorts being about all that are in sight at present. Richmonds will also be scarce and dealers are going very slow about making large engagements in advance on these. Orchids have been plentiful and the demand rather sluggish for several weeks back, and forecasts of Easter trading in this item favor lower figures than ruled last year. Lilies seem to be in normal supply here and, as usual all kinds of prices, from 6 to 17 cents, are being asked. We think there is no scarcity; but that notwithstanding that condition good prices will be readily paid for first-class stock. Daffodils are plentiful now but it is doubtful if the southern stock will last until Easter

week. A fairly good supply of greenhouse-grown are in sight. Gardenias, lilac, antirrhinum, etc., are in first-class shape and promise to be in active demand.

ST. LOUIS The market last week showed some changes from last report and prices varied greatly from the week previous. Stock of all kinds was very much more than the local trade could consume on any one day and all the commission houses were loaded down with all seasonable stock of extra good quality. The demand was mostly for the better grade of stock, which sold at greatly reduced prices. Carnations brought \$2 per 100 for extra fancy but the bulk of them did not bring over \$10 per 1000. Sweet peas, too, were sold cheaper than any time this season with plenty left over after morning sales. Roses, the best select fancy, brought not over \$8 per 100 and good stock at \$5. Beauties have been scarce all week. Richmond, White Killarney and Killarney sold best. Violets are keeping up well but are smaller. Lilies are in abundance at \$8 to \$10 per 100 and it looks as though we will be well supplied for Easter. The retailers say they had a splendid March business.

Gary, Ind.—With the intention of building greenhouses and establishing a florist business here, George Poole, florist of Gloversville, N. Y., has been here looking over property.

NEWS NOTES.

Brush Valley, Pa.—John Keller has purchased the greenhouse of John Spayd.

Sellersville, Pa.—A Mr. Jackson has purchased the greenhouse of Herbert S. Nase and will use the greenhouse to grow flowers.

Indianapolis, Ind.—The Pahud Floral Co. contemplates building a range of houses as reported in another column. They also intend to remodel office at a cost of \$2500, the total cost of improvements will be \$9450.

Little Ads Bring Big Returns

Little ads in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

For List of Advertisers See Page 556

KROESCHELL EXHIBIT AT NATIONAL FLOWER SHOW.

Fred Lautenschlager, representing Kroeschell Bros. Co., Chicago, reports a good week at the National Flower Show, having sold a boiler to George

W. Marshall, Medfield, Mass., for 15,000 feet of glass and receiving several orders for delivery in the near future.

Obituary.

William A. Blaedel.

William A. Blaedel, for many years a florist at 252 West 23rd street, New York, N. Y., died March 15th. The business will be continued under the firm name of W. C. Blaedel & Sons.

Miss Fannie M. Anderson.

On March 20th, Miss Fannie M. Anderson, of Anderson & White, florists, Lexington, Ky., passed away. Miss Anderson has been associated with Miss White for many years, starting in a very small way, building up a very fine business.

William Schlatter.

William Schlatter, Springfield, Mass., died at his home on March 27th, at the age of 64 years. He was born in Switzerland and for many years had charge of the greenhouses and grounds of the Thompson Estate. In partnership with his son he ran a prosperous greenhouse business on Bay street. He leaves a widow, two daughters and one son.

Harry Yager.

News of the death of Harry Yager was heard with regret, April 1st, by his many friends among the florists of Chicago. Though not in the business himself, he was the husband of Emily Schiller Yager, and so was intimately acquainted with many in the trade, and the future flower shows in Chicago will not seem the same without Harry in the office.

NEWS NOTES.

Babylon, N. Y.—Twenty-five acres of land on Udalls's Road have been purchased by Mrs. William Arnold where she will erect commercial greenhouses.

Davenport, Iowa.—The stock of the Davenport Nursery Co., Fernwood avenue and Locust street, was sold on March 28th to G. L. Lewis of Evanston, Ill. The sale included all the stock and fixtures belonging to the nursery proper, the purchase price being stated as \$2500.

E. H. WILSON ARRIVES IN BOSTON.

On Thursday evening, April 6, this noted Asiatic explorer arrived in Boston on his return from the tragic collecting tour in Northern China which came so near costing him his life. He was at Vancouver on April 2 and

E. H. WILSON

came via Montreal and was met at the North Station, Boston, by Messrs. Farquhar, Dawson, Thatcher and Stewart, who extended to him a joyous welcome to the Hub.

St. Louis.—Friday, April 7, Arbor day will be celebrated, and trees and flowers will be planted by the school children. One enterprising department store, known as the Grand Leader, has advertised that they would have 200,000 catalpa trees, beginning Monday, April 3d, to sell to the school children at 1 cent each. The first day's sale was heavy.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

The Home Correspondence School

Dept. H, Springfield, Mass.

arithmetic, and general education training.

The subject of farm equipment comprises the following elements: A thesis, preferably upon some phase of the subject, to be submitted with the application; practical questions, and training and experience in the specific work covered by the subject.

The thesis may be either typewritten or in the handwriting of the applicant. Published articles written by the applicant may be submitted as a thesis. Applicants should at once apply either to the Civil Service Commission, Washington, D. C., or to the local secretary of the board of examiners for examination and application form 1312. F. J. DYER.

New Cumberland, Pa.—Proceedings have been started in the U. S. Court in Scranton, Pa. to have John A. Kepner declared an involuntary bankrupt. His greenhouse property had been up for sheriff sale, but bankruptcy proceedings have served to halt execution by the sheriff. It is said that the Harrisburg Boot and Shoe Mfg. Co. is a creditor to the amount of about \$35,000.

THE CURTIS BILL.

Washington dispatches state that the bill of Senator Curtis, designed to force a settlement of the potash controversy, will be again introduced at the special session of Congress. While this bill, which amends the law relating to meat inspection and importation of adulterated food, is skillfully drawn to arouse the patriotism of the heedless, the only purpose of it is frankly stated to be to aid the Fertilizer Trust, which is closely allied with the Beef Trust in the fertilizer business; and there is little likelihood that its provisions would be invoked in the aid of any other interest.

Before the bill is passed it should be amended so that its provisions cannot be invoked or applied in behalf of any trust, any corporation commonly known to be or to act as a trust, or any association of interests intended to control prices or to act in restraint of trade.

So far as the potash situation is concerned the American farmers can choose between the German Syndicate, which has been placed under the most rigid government control in regard to production and prices, and aims to increase its American trade by selling direct from the mines to the farmer at reduced prices, or the American Fertilizer Trust which is under no control of any kind and, as is claimed by some, aims to restrict the consumption of potash, because, it is said, it finds it far more profitable to compel the farmer to pay excessive prices for his plant food in the form of filled mixed goods, containing not what is best for the soil and crop but what will yield the biggest dividends on the grossly watered stock of the fertilizer companies.

VACANCIES IN BUREAU OF PLANT INDUSTRY.

Washington.—The Civil Service Commission announces that an examination will be held on April 26-27 to make certification to fill three vacancies in the position of scientific assistant, male (qualified in farm equipment), Office of Farm Management, Bureau of Plant Industry, Department of Agriculture. The entrance salary is from \$1,200 to \$1,500 per year. The age limit is 20 years or over.

The basis subjects of the examination consist of the following: English composition and report writing;

IMP SOAP SPRAY

Clean and odorless. Forms invisible films. Non-corrosive.

U-BAR PALM HOUSES

That same lightness and grace that make the U-Bar circular palm house so beautiful, gives to the U-Bar Curvilinear Type its superiority.

These twin houses are on the terrace just above the sunken gardens at F. W. Vanderbilt's estate at Hyde Park, N. Y.

Occupying such a prominent position, it was essential that the houses combine ornamentalness with unobtrusiveness. That is why the U-Bar was chosen. Send for catalog, it shows a full view of these houses and the three others we have erected in the garden.

What the Users Say.

KROESCHELL BOILER SAVES 35 TONS COAL.

"I bought a No. 7 boiler in 1901. It takes care of 10,500 sq. ft. of glass and could take care of 5,000 more. Must state that I am in business for 25 years and have attended to many boilers, but I must say for your boiler that it has given better satisfaction than any other, being easier to fire up, and it is easier to keep the temperature with your boiler in our houses than it is with any other.

I used 35 tons of coal less than I did with boilers I had before. I can keep the temperature to 75 or 80 degrees during the severest weather, if it is necessary to do so."

Fruits and Vegetables Under Glass

PEACHES AND NECTARINES

Peaches and nectarines which have finished stoning should now have any fruits which are above a crop removed before the second swelling commences. Do so by twisting them around until they drop into the hand, otherwise if they are just pulled off so much of the outer bark will be torn off with them. Spread the crop evenly over the tree and do not ask them to carry too many or the next year will show the results of this year's strain in the form of a poor crop. Pot trees will be benefited by having a strong stake put to them and from this the shoots carrying fruit can be supported by a strong piece of raffia. This will keep them from hanging down and keep the tree in good shape. Now is the time peaches and nectarines will stand heat without danger, and if fruit is required as early as possible raise the temperature to 65 degrees to 68 degrees by night and run up well with sun heat. When closing down in the afternoon the house can be run up to 90 degrees providing plenty of moisture is kept around. Syringe thoroughly morning and afternoon and give plenty of feeding until the fruit shows signs of coloring. Quick-acting manures are to be preferred, as some varieties take only a few weeks to complete their second swelling. The trees derive much benefit by placing a zinc rim four inches deep around the top of the pot and filling this with half decayed cow manure (as seen in illustrations of pot peach trees which have appeared in HORTICULTURE from time to time). New roots will at once run up into this, feeding from it as they go and are near the surface should other manure be applied.

SIZE VERSUS FLAVOR IN MELONS

These are the two most essential points in most fruits, especially so to those who are fortunate enough to eat them. In competition they play an important part in conjunction with shape, color, finish, etc. In melons the two qualities seem very averse to each other. No other fruit loses its flavor so quick and we often see fine, large specimens, grand to look at, but, oh, the taste! This accounts for what we often see on the show tables, a small fruit given the preference to a larger one. We all like to make the most of size, but if this is going to ruin the flavor what is gained? For, after all, the old proverb, "Goodness lies in a small compass," has got a say. Now, to obtain size it is often necessary to apply stimulating manures which seem to deteriorate the flavor, especially if applied after netting of the fruit commences; but as the better growing weather is coming on it will not be necessary to feed so much. Encourage the plants to grow and swell as many fruits as they will up to four and use no more manure than the plants require to keep them robust, as a highly fed plant is liable to grow a large and flavorless fruit. Feeding moderately with suitable manures will be beneficial to plants carrying three or four fruits each and will not impair the flavor if stopped in time. Give as much air as possible as the fruits commence to ripen and keep the plant slightly drier at the roots. Some growers nearly dry them off, but there is nothing to be gained by this. In melon growing under glass flavor should be considered first, and varieties which serve

up the best should be grown. These may differ with different growers as no two men use the same methods; one man may turn out a better flavored medium-sized melon with his method than his neighbor on another establishment and perhaps both using the same variety. These peculiarities should be noticed and preference given to the better flavored varieties. Superlative and Sutton's Perfection will be found good.

STOPPING AND TYING VINES

This is a thing which commands a good deal of attention where vines are grown on the short-spur system. Rods, after breaking should be gradually released from the ties which have kept them in a bending position—the object having been to push so much sap into the base buds, otherwise these would not break for some time after those at the apex. It is not advisable to tie them up to their permanent position right away, but allow the young growths to become accustomed to their new positions and when they have righted themselves make the main stems or rods secure with strong string. Lateral growths will soon make headway. If two should be coming away from the same spur remove the weaker one. Do not be in a hurry to tie these young growths into position so long as they are far enough from the glass; let them grow as they will. A mistake is often made by trying to tie these down too soon and the consequence is they break off. Nothing is gained by tying these down, so why risk a break? The bunch itself will bring them down and the laterals which are not carrying fruit can be brought down later. The only danger in so doing is that if the wires are too near the glass the young growths are liable to burn with strong sun. Leaders on young vines should not be cropped but let grow away. As the bunch makes its appearance stop two leaves beyond it; this concentrates the same into it. Any sublaterals which make growth after this should be rubbed out altogether between the spur and bunch and those beyond the bunch should be stopped at one leaf.

LATE VINES

Late vines which are intended for keeping as late as possible should now have the border soaked, as root action will have commenced and they cannot be held longer without causing the bud to deteriorate. Bend the rods over to ensure an even break and do not let the temperature go below 40 degrees at night. Syringe twice daily in good weather. Ventilators can still be left open, as no harm will be done to the young growths for a time if they are brought up to plenty of fresh air.

STRAWBERRIES

The last patches of strawberries will now be coming into flower. It is not necessary to keep all the flowers until after they are set as a set is sure now and so many flowers only take so much vitality from the plant. Remove all the weaker buds before they open, especially those which are a side growth from another stronger flower. If ten or twelve of the strongest flowers are left to open a crop is pretty sure. When set, reduce to six and push them right away. After swelling, fruit should be fed two or three times a week, but discontinue on first signs of coloring; after this give plenty of air and light.

Overdone? We have read with interest the ostentatious announcements and wondering press comments anent the sensational offer of a London newspaper of a prize of \$5,000 for the best bunch of sweet peas grown by an amateur and exhibited

at a special show to be held in London next July. The bunch must consist of not more than twelve spikes or sprays and must contain not fewer than three varieties." As an advertisement for the paper making the offer doubtless the investment will be a profitable one. As to the ultimate benefit to horticulture and to the sweet pea in particular, there is room for varying opinions and a good many of us will, in the meantime, incline to hail "from Missouri."

Once more it becomes our pleasant privilege to extend to the florists of America sincere Easter greetings and to express the earnest hope that, in all respects, the sweet and inspiring spring festival will bring to each and every one blessings in fullest measure and ample reward for all the preparatory toil and anxiety which they have undergone. As to the outlook as it has shaped itself during the few days before the great event it is safe to say that much will depend upon the weather and its influence upon the finishing off of the product and upon its sale. More than that, if said, is said at a risk. Predictions at such times are dangerous playthings. Yet we do not hesitate to take issue with those parties East and West who are dealing out scare lines to the newspapers about the alleged great famine in Easter lilies and the difficulties the florist will have in supplying the demand at any price. We don't think the trade at large will take any stock in this hue and cry. Like the annual ruin of the peach crop it is regarded as largely bugaboo.

The next great event

Now that the all-engrossing National Flower Show is over, we should at once proceed to warm things up for the Baltimore Convention—now only four months away. It has been the fear of some that the interposition of this Boston attraction might tend to detract from the interest in and attendance at the Baltimore meeting. We do not believe it will so turn out—we earnestly hope it will not—and we are very sure that the Boston people will be more than ready in the time that now intervenes, to do everything they possibly can do to promote the welfare of the summer convention and eliminate as far as in their power any possibility that the Boston event has exhausted any enthusiasm to which our sister city's enterprise is entitled. It should be the aim of all to make the Baltimore Convention the biggest and best in the Society's history thus far and there is no reason why this cannot be done if activity to that end is at once put in motion. There should be no delay in planning details and giving same prompt and widespread publicity.

Rose Mme. Second Weber

(See Cover Illustration.)

This is a Soupert & Notting 1908 introduction and has made a good impression wherever tried. As the picture on our title page shows, it is a vigorous, well-formed flower and the other qualities which the illustration does not convey, viz.; fragrance, which is strong, and color, which is a delightful tint of salmon pink, are vouched for by all who have grown this new addition to the list of desirable H. T. roses. Dreer says that it is "the most desirable rose of its color in our collection." E. G. Hill says "one of the grandest novelties of recent years." "As impressive as an American Beauty."

Seasonable Notes on Culture of Florists' Stock

ANNUALS

While the larger portion of annuals suitable for bedding are in flats and many in pots, there is still time to sow to good advantage those of rapid growth, such as *acroclinium*, *alyssum*, *balsams*, *candytuft*, *Centaurea imperialis*, *cosmos*, *dianthus*, *calendula*, *calliopsis*, *gailardia*, *mignonette*, *nasturtiums*, *Phlox drummondii*, *scabiosa*, *stocks*, *snapdragon*, *zinnias*, etc. A mild hotbed is just the place to sow these seed now. Give them plenty of room—say 4 or 5 inches between the rows—and don't sow too thickly. The *mignonette* can be sown in 2½-inch pots. Some of the hardier annuals can be sown outdoors now. In order to greatly relieve your houses almost any of the hardier or quite tender annuals can now be placed in mild hotbeds or coldframes if at command. They will be better and stockier in every way when grown in frames, with care as to protection on any cold nights and water when needed. Use judgment and ventilate with care.

BOUGAINVILLEA

To propagate this plant there is no better time than now. Choose half-ripened wood about six inches long, place these in sand where they will have some bottom heat, give them a good watering, and by frequent sprayings keep up the necessary moisture for their propagation. See that they are shaded from the sun. Under ordinary condition they should root in about three or four weeks. When potting them up use a good loam with a liberal sprinkling of sand and give them a syringe twice a day with some shading from the sun's rays until they get established. They will make roots rapidly and should be shifted as the condition of the roots require it. A good compost to use is one that is sufficiently open to allow the water to pass freely through it; mix one-fourth well-rotten cow manure with some loam, and about the same of leaf mold with enough sand to keep the whole open. They like to be continually in full sunshine. Syringe regularly once or twice a day and give them abundance of water at the roots. To have the wood of sufficient substance and ripeness for flowering they will be benefited by occasionally turning them around, thereby admitting every branch to light and air. Keep shifting through the summer and by September they should be nice plants in 6 or 7-inch pots and a month later they will need less water, so as to ripen up their growth.

PRIMULAS

If you wish to have nice flowering plants for December, sow now. Sow on light, porous soil. A good mixture is equal parts of loam and leaf mold, with enough of sand to make the whole gritty. Give the pans or flats a good watering previous to sowing the seed. Press and cover with some finely sifted soil of the above compost, but very lightly—just enough so the seeds are out of sight. Keep in a close, moist house of about 60 degrees and place a pane of glass over them until the seeds germinate, when they should be kept in the coolest house you have. When they are sufficiently large enough to handle prick off into flats. In about five or six weeks they should be potted singly in 2-inch pots, using a soil a trifle richer and heavier at every subsequent potting. When they become established a cold frame is an excellent place to summer them in. See that the glass is shaded and, as the weather gets warmer, raise the sashes back and front, for it is coolness that they want, with plenty of fresh air. By sowing at in-

tervals from now until August you can have nice flowering plants from December until spring.

RAMBLERS FOR NEXT EASTER

This is the proper time to start a good supply of *Ramblers* for the coming season. There are two ways in which *Ramblers* may be grown into suitable stock for forcing. The one most commonly followed is to plant out in the open field plants of one or two-year-old stock and give good cultivation during the summer and dig up and pot in November. Where you want first-class stock—something better than your neighbor—the best way is to grow this class of roses in pots from now on. Procure some good two-year-old plants and pot up into from 6-inch to 10-inch pots according to their size and strength, using a rich, well-composted soil. After they are potted cut them back to two good eyes and place in a cool house at about 50 degrees at night. They should be given careful watering with frequent spraying and in a short time they will break away with numerous shoots, which should be reduced to four or five to a plant. As they grow keep them tied up to stakes until July, when they can be plunged outside. Use the hose freely on them and by the middle of August shorten up on water supply so as to ripen up the wood by cold weather.

STEPHANOTIS

Any grower who has a sunny back wall in any of his houses that have a winter night temperature of from 55 to 60 degrees can grow this much neglected plant. Where there is call for bouquets it will be found a very valuable flower to have. It can also be grown well in 12 or 14-inch pots or large tubs and when grown this way they can be trained on a balloon-like trellis. They are quite easily propagated from last season's growth by placing each cutting in small pots of sand and leaf mold in equal proportions and plunging in a propagating bench where there is a good bottom heat with shade until they are rooted. Maintain a humid atmosphere so as to keep the cuttings from wilting. When these pots are fairly well rooted they can be shifted, using a fibrous loam well enriched with manure, re-potting and stopping during the first summer. The best to grow is *Stephanotis floribunda*.

SWAINSONA

This is a very serviceable plant, with its graceful and delicate green foliage in contrast to its pure white flowers, which makes it very desirable for various florist uses. Now is a good time to strike cuttings. When the cuttings are rooted they should be potted into 2½-inch pots, using a mixture of loam with plenty of fibre and some leaf mold and sand. Pot quite firmly and keep the atmosphere somewhat closer for a week or two until the roots get to work in the new soil. Continued and free use of the syringe is necessary all through the summer. Re-pot until 5 or 6-inch pots are reached and the soil after the first shift should be more lumpy, but still kept open and porous by a little leaf mold and sand. Pinch out the points of the shoots so as to make them bushy. They like a winter temperature of from 50 to 55 degrees at night. Keep them in full sun, as they like abundance of sunshine. During their flowering period give them a weekly dose of liquid manure.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: *Campulanas* For Next Spring; Care of Evergreens in Pots and Tubs; *Gloxinas*; *Lilies* for Decoration Day; *Odontoglossums*; *Pompon Chrysanthemums*.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

There was an excellent representation of the Club's membership present at the April meeting last Monday night and those who came were well repaid. All committees having reported, thanks were extended to Alex McConnell for decorative work at the annual dinner and to the many donors of flowers. The president was authorized to appoint committees on three recent deaths, viz.: Messrs. Kessler, Sr., Lorenz and Pierkovski, Sr.

Arthur Cowee gave his promised lecture on the *Gladiolus*, illustrating his remarks with a hundred or more beautiful stereopticon views. His talk was exceedingly interesting and his belief in the great future of his favorite flower was well substantiated.

F. R. Pierson, chairman of the National Flower Show Committee, followed with a speech concerning that great Boston event, giving especial credit to his colleagues in the work, praising the unanimity and good fellowship displayed throughout and the efficient management of Mr. Campbell. He stated that the receipts would more than cover the entire expenditures, including \$8,000 given in prizes, and that the guarantee fund would be returned intact to the guarantors, with a profit. He expressed the belief that New York will be in position to undertake the fourth National Flower Show.

J. H. Pepper showed some stereopticon views of the Flower Show. C. B. Weathered spoke of the hospitality of the Boston gentlemen, and the thanks of the Club were ordered sent to P. Welch and his associates, also to the Gardeners' and Florists' Club of Boston for their entertainment.

There was a very fine display of sweet peas on the exhibition tables from Wm. Sim, of Cliftondale, Mass., for which a cultural certificate was awarded. Among the varieties shown were Pink Beauty, rose; Helen Keller, variegated; Greenbrook, blush; Wm. J. Stewart, blue; Mrs. Smalley, salmon; Wallacea, lavender; Gov. Fort, salmon; Boddington's Snowbird, white; Christmas Captain, purple; Mrs. Geo. Lewis, white; Miss Josie Reiley, lilac; Mrs. Dolansky, pink; Watchung, white; Christmas Pink; Le Marquis, violet; Florence Denzer, white; Boddington's Canary, cream; Boddington's Christmas, pink; Mrs. Wild, magenta; Mrs. Hannan, rose; Mrs. Totty, blue; Mrs. Sim, salmon. Carnation Wodenethe from Frank C. Witney, of Fishkill, made a very favorable impression and the judges requested to see it again. A Mr. Lord showed a one-piece cut-flower and design box which seemed to meet the approval of florists who were present.

GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

At the Gardeners' and Florists' Club meeting, April 10, it was "Convention Night," and there was the largest gathering of members for many moons, and the consequence was a very enthusiastic harmonious meeting in which master strokes were accomplished towards completing the big

programme for the convention of the S. A. F. & O. H. A guarantee fund running into thousands of dollars was readily subscribed. Committees were all wide awake and vied with each other in reports of great progress. Indications are that Maryland florists intend to maintain the reputation which the state has for hospitality. Not only will the hand of fraternal fellowship be extended to visiting florists, but Lord Baltimore will in addition welcome visiting florists to Greater Baltimore. Robt. L. Graham, the new president of the club, said the recent flower show held in Boston was without doubt the finest ever held in this country. Hon. Edwin Warfield, ex-governor, was elected an honorary member of the club.

MASSACHUSETTS HORTICULTURAL SOCIETY.

Garden Prizes for the Year.

The garden and greenhouse committee of the Massachusetts Horticultural Society announce its schedule of prizes for the year. It calls the attention of owners of estates in New England to the premiums offered to encourage the development and ornamentation of private grounds and the establishment and maintenance of greenhouses for the culture of plants, fruits and vegetables.

The H. H. Hunnewell triennial premium will be given for an estate of not less than three acres planted in the most tasteful and effective manner, with the most desirable ornamental trees and shrubs, and kept in the best order for three consecutive years. This premium, to be awarded but once in three years, is \$160. A special prize will be given for an estate in Massachusetts of not more than three acres nor less than one acre that shows the best arrangement in planting and that is kept in the best order.

Silver and bronze medals will be awarded for a garden of spring flowering plants, one of summer or fall-flowering plants, a garden or collection of peonies, a garden or collection of hardy roses, a garden or collection of irises, a rock garden, a water garden, a fruit garden and a vegetable garden.

YONKERS HORTICULTURAL SOCIETY.

On Friday, 7th inst., a well attended meeting was held and matters of interest discussed. The executive committee reported that the June Show will be held on the 14th of that month and all seems favorable for a most successful exhibition. Some fine melons—"Sutton's Scarlet"—were exhibited by S. Untermeyer, superintendent M. Grey, and received cultural commendation. Louis Melliott exhibited the new rose Veltchenblau, but the variety did not impress members as being suitable for forcing. Hamilton Scott was elected president, and Messrs. Rennison and Melliott were selected members of the executive committee. Howard Nichols read an interesting and instructive paper, taking as his subject "Hardy Roses." H. M. B.

NEWPORT HORTICULTURAL SOCIETY.

The regular meeting of this society April 11 added another very interesting event to the credit of the organization. Two papers were read: The first by Alexander MacLellan, who gave a very complete history of the sweet pea family, covering a period from about the year 1650 when it is recorded to have been discovered in the Islands of Sicily and Ceylon and tracing its advances to the present day, speaking of the improvement made in this popular flower since its introduction in England about 200 years ago. Mr. MacLellan gave due credit to Henry Eckford and others of England also to California growers and members of the Sweet Pea Society of this country and paid a high tribute to the growers of the superb exhibits of that flower seen at the recent National Show in Boston. The other paper was by John Cox, a widely known veteran of the craft who is now here representing the James Veitch concern of Chelsea, England. Mr. Cox had for his subject "Legends of Flowers and Plants of Many Countries," his whole story being prepared in a very amusing and interesting way. A cheerful rising vote of thanks was accorded.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

The National Sweet Pea Society of America will hold their annual convention and summer exhibition at Philadelphia, Pa., June 23rd and 24th, 1911, under the auspices of the Pennsylvania Horticultural Society and in connection with their annual Sweet Pea Exhibition.

A guarantee fund for a general list of prizes has been headed by our president, Mr. W. Atlee Burpee, The Henry F. Michell Co., Messrs. Henry A. Dreer, Inc., Arthur T. Boddington and other seed houses contributing. A preliminary schedule will be published in a few days, showing list of prizes, cups, etc., and a general program for the convention. Contributions for additional prizes in the form of cash or cups, etc., are invited from the trade.

The prize list will amount to about \$500, which should act as a great stimulus to the lovers of sweet peas and intending exhibitors should make due preparations for this, the third annual exhibition given by our society.

For further particulars write to:

HARRY A. BUNYARD, Sec'y,
342 West 14th St., New York City.

TARRYTOWN HORTICULTURAL SOCIETY.

The Tarrytown Horticultural Society held its regular monthly meeting Friday evening, March 31, President Brunger in the chair and a good number of members present. The monthly prize for roses offered for this meeting by J. W. Smith was awarded to W. MacBean, Garrison, N. Y., for a fine vase of pink and white Killarney; James Stuart, Mamaroneck, N. Y., second for a vase of the same variety. A vote of thanks was awarded to W. G. Gomersall for an able and instruc-

tive essay on "Herbaceous Plants and Hardy Shrubs, how to harmonize them for effect in Landscape Gardening." For the April meeting E. W. Neubrand offers a prize for the best flowering plant.

GEO. McINTOSH, Cor. Sec'y.

CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club held its regular monthly meeting April 6th. A. W. Johnson and A. T. Pyper gave the club a description of the National Flower Show as it appeared to them. The committee on sports and pastimes was instructed to select a suitable place for holding a picnic in July or August and given power to act on the same. They reported the meeting of the bowling club in Milwaukee last month and said they had a most enjoyable time.

A committee, of which Peter Reinberg should be one, was proposed, to place the matter of permitting the use of flowers at the inaugural of the city officials, before the present council.

A. Swanson of Elmhurst, Ill., exhibited a vase of a new butterfly sweet pea that was much admired.

CLUB AND SOCIETY NOTES.

The Spring show of the Worcester County Horticultural Society was held at Horticultural Hall, Worcester, Mass., on April 6. H. F. A. Lange was the principal exhibitor. Others were E. W. Breed, L. C. Midgley and Mrs. J. C. Whitin.

Differences of opinion resulted in two resignations and the abandonment of the proposed floral show for November, at a meeting of the Columbus Florists' Association at the Chittenden last evening. Those who resigned their membership were the Fifth Avenue Floral Company and C. A. Roth. —*Columbus, Ohio, Journal.*

The Spring Flower Show of the Pacific Coast Horticultural Society and the California State Floral Society was opened on March 30, for three days, at the Fairmount Hotel, San Francisco. Trade and amateur interests were well represented. The judges in the trade section were Sidney Clack, John McLaren and George Walters.

The florists of Terre Haute, Ind., organized the Terre Haute Florists' Club, at N. B. Stover's place, on Monday evening, April 3. Officers elected are as follows: Fred Heinel, president; Henry Graham, vice-president; N. B. Stover, secretary; Fred Wunker, treasurer; Ed Cowan, Edward Reiss and Otto Heinel, executive board.

The Florists' Club of Washington held its 22nd annual banquet at the New Fredonia Hotel on the evening of April 4. William R. Smith was the guest of honor. The retiring president, John Robertson, was presented with a silver tea service, Mr. Smith making the presentation speech. The new officers were installed. W. F. Gude officiated as toastmaster.

Do you need young ferns for stock? See Buyers' Directory, page 583, this issue. The best growers are listed there.

ENGLISH VISITORS AT BODDINGTON'S.

Reading from Left to Right: Back Row—J. J. Pepper, Harry A. Bunyard, W. H. Hughes, J. S. Gunn, L. M. Graves, J. Brown, W. A. Call, Alfred T. Bunyard. Front Row—G. Prickett, S. South, C. Pratley, J. S. Brunton, C. Engleman, J. Simpson, E. Barker, S. S. Butterfield, Arthur T. Boddington.

During Recess

Milwaukee versus Chicago.

The Milwaukee team which so cordially entertained the Chicago boys a month ago has been invited to play a return game in Chicago, Sunday, May 7th, and have sent word that they will be here strong. All arrangements as to time of arriving, etc., will be made after Easter.

Chicago Bowlers.

As the close of the season draws near, the matter of scores assumes greater importance and the prizes daily become more alluring. But two meetings are left now and the standings to date are as follows:

INDIVIDUAL STANDINGS.

A. Fisher, 168-41.57ths; A. Zeck, 168-23.69ths; T. Yarnall, 167; J. Zeck, 161; E. Farley, 160; Friedman, 159; F. Ayers, 157; Wm. Wolf, 155-53.72nds; Wm. Graff, 155-39.75ths; E. Winterson, 153-37.51sts; J. Degnan, 153-15.51sts; E. Schultz, 152; J. Huebner, 151; Wm. Lorman, 147; Beyers, 141; O. Goerisch, 140; Krause, 139.

Games won and lost to date:

	Won	Lost		Won	Lost
Orchids,	56	19	Roses,	30	45
Carnations,	38	37	Violets,	26	49

High Team Game—Orchids, 921. High Three Team Average—Orchids, 860.

High Individual Average, 3 games—F. Ayers, total, 606; average, 202.

High Individual Score—Yarnall, 226; Farley, 226.

FLORISTS HAVE A GRIEVANCE.

Chatterton Warburton and Patrick H. Sullivan, representing the florists of Fall River, Mass., were callers at the mayor's office last week, for the purpose of requesting that the mayor ask the city solicitor for an opinion relative to the right of the park commissioners to insist upon caring for vases on graves in Oak Grove cemetery, other than those that come under the perpetual care plan. With the enlargement of the greenhouse at Oak Grove cemetery, the park commissioners have done a considerable business in the matter of looking after the vases and the florists have felt the effect of this upon their business.

THE QUESTION OF MOISTURE FOR MUSHROOMS.

Editor of HORTICULTURE:

As far as I could judge from Dr. Kitchen's experiments (see HORTICULTURE, April 8, page 536), I should say his trouble lay in not keeping his beds moist enough. He should not have waited until the surface was dry before sprinkling, but kept up a moist state of the surface at all times. No rules can be laid down in regard to watering as beds under different conditions will require more or less and judgment will have to be used accordingly.

The fact that mushrooms appeared abundantly after being watered thoroughly shows that dryness was the cause, the spawn lying dormant for the lack of moisture. It is often the case that beds that have cropped well, and kept dry for a period after going out of bearing, will when watered give a second crop. The temperature was far too high for the best results. There is no doubt that mushrooms can be grown at the temperature stated, but for the best results a lower temperature is necessary. Mushrooms grown in a temperature of 50 degrees to 55 degrees will be of better quality and the beds will produce heavier and over a longer period.

There seems to be something in the fermentation of manure that suits the mushroom and it makes one of the best mediums for the spawn to run in, and it is very doubtful if as good results can be had by any other method.

WILLIAM GRAY.

Rough Point, Newport, R. I.

A SPRING BLOOMING WITCH HAZEL.

It is generally known that the native Hamamelis flowers in fall and that the Japanese species blooms in spring. Jackson Dawson now informs us that Harbin has found for the Arnold Arboretum, in the North Carolina mountains a true spring blooming form, which in cultivation has retained its characteristic, blooming for the first time this spring.

BRITISH HORTICULTURE.

A Proposed National Daffodil Society.

In the making of new floral societies there appears to be no end. The latest suggestion has been to organize a National Daffodil Society. An adjourned meeting of those interested in the project was recently held in London. Rev. G. H. Engleheart, a well known enthusiast, presided. It transpired that some communication had taken place with the Royal Horticultural Society on the proposal. The following communication was received from the Council of that Society: "The Council, having considered the resolution sent up to them by the Narcissus Committee this day are willing (1) to hold a two days' show in April; (2) to issue a year-book, if the committee supply sufficient and suitable material for the same; (3) to issue a schedule for the show after receiving recommendations from the committee thereupon; (4) the Council consider all committees competent to sub-divide themselves into sub-committees for special and topical purposes." In view of this new development, it was decided to postpone the proposal until it is ascertained how far the Narcissus Committee's scheme is workable.

National Rose Society's Year Book.

The National Rose Society has for some years deserved the gratitude of all rosarians for the valuable contribution it has made to the literature of the "Queen of flowers." The Society's "Year Book" for 1911 is replete with the most authoritative details of all phases of rose culture. There is much cause for congratulation as to the progress made in rose culture, as revealed in the comprehensive article of the Rev. J. H. Pemberton, who reviews the season of 1910. A glimpse of continental methods is given in the review of the Paris Quinquennial Horticultural Show, furnished by Mr. George Paul. There are some helpful details on the dates of the flowering of different varieties of climbing roses, furnished by Mr. H. R. Darlington and Dr. A. H. Williams. Mr. Darlington finds something new to say on the subject of tea roses for bedding. Rose culture has its humorous side, as indicated by the Rev. F. Page-Roberts' essay on "Nosarrians and Antinosarrians."

More Garden Leaves.

During the last five years there has been a "boom" in books devoted to the sweet pea. One of the latest is from the pens of Messrs. Horace J. Wright and T. Stevenson. Mr. Wright was the former secretary of the National Sweet Pea Society, and is well known as a capable writer and lecturer on the subject. Mr. Stevenson writes with the expert knowledge of a leading prize-winner at the National shows. As an indication of the popularity of this pleasing flower, it is mentioned that the weight of seed sown annually is 40 tons. "Daffodils" have a volume devoted to them from the pen of Mr. R. A. Joseph Jacob, a regular contributor to the gardening press. The Rev. W. Wilks, secretary to the Royal Horticultural Society, supplies an appropriate preface. For garden and decorative purposes Mr. Wilks favors: Emperor, Empress, Horsfieldii, Barri conspicuus, Madame de Graaf, Baroness

Heath, King Alfred, White Queen, Lady M. Boscawen, Weardale Perfection, Golden Bell, Victoria, and J. B. M. Camm. "Pansies, Violas and Violets" receive ample treatment at the hands of Mr. W. Cuthbertson. Mr. Alex. Dean, V. M. H., gives the result of his long and ripened experience in "Root and Stem Vegetables," which is admirably embellished with colored plates. The four works referred to are contained in the "Present Day Gardening" series, published by Messrs. T. C. and E. C. Jack of Edinburgh, and edited by Mr. R. Hooper Pearson.

W. H. ADSETT.

The first Provisional Schedule for the International Horticultural Exhibition to be held in London May 22-30 inclusive has been distributed and copies may be procured from the Honorary Secretary, Edward White, 7 Victoria street, Westminster, S. W. The system of premiums adopted will consist in a combination of silver or silver gilt cups and money together with a diploma. A single form of cup is to be adopted and made in a variety of sizes to suit the larger and smaller classes and merits, the cups in all cases to be engraved with the seal or other official badge of the Exhibition committee.

PERSONAL.

Patrick O'Mara has gone south for a brief period of rest.

John Donaldson, of Elmhurst, N. Y., who has been very ill with rheumatism is now improving slowly.

E. Westergaard, formerly gardener for D. Carmichael, Wellesley, has now taken charge of the Francis Skinner estate in Dedham, Mass.

Ernest Bisson has accepted a position as market gardener for Charles H. Warren, Worcester, Mass., and will take up his work after Easter.

E. L. Palm has been engaged as grower for the Curtis Floral Co., Hampton, Iowa. He was formerly employed by the Clinton Falls Nursery Co.

E. H. Wilson is now in the Faulkner Hospital, Jamaica Plain, Mass., under treatment for the wear and tear of his long tedious trip from China to Boston. Recovery from the wounds sustained in his expedition is naturally slow and the journey home was a severe experience.

Visitors in Boston: Thos. W. Head, representing Stump & Walter Co., New York; J. F. Cowell, Buffalo, N. Y.

DETROIT PERSONALS.

Chas. Warnke, of Woodmere, rented a nice little store at 215 Woodward for the Easter season and secured the option for a lease of same.

The Detroit Floral Co. is completely settled at their new store 747 Woodward Ave. A very good location practically fitted up for the business.

Mr. Pautke, now with Breitmeyer's at Mt. Clemens, will, beginning May 1st, assist Mr. Knope in the management of Breitmeyer's greenhouses in Detroit. Mr. Knope is slowly recovering, but the many responsibilities incident to a place devoted to a general line of plants, are too many to bring about his complete recovery.

FRANK DANZER.

OBSERVATIONS AND QUERIES BY OUR PHILADELPHIA CORRESPONDENT.

A conference of the officers of the Sweet Pea Society was held in Philadelphia on the 5th inst. The President, W. Atlee Burpee, and the secretary, Harry A. Bunyard, were both present—as was also David Rust, representing the Pennsylvania Horticultural Society, under whose auspices the annual exhibition of sweet peas will be held this year. Friday and Saturday, June 23rd and 24th, are the dates selected for holding the show. This may be a little late or a little early for exhibitors from some localities, but it is thought that it will suit best those who are in a position to send the largest and most interesting exhibits—and therefore tend to the aggregate success of the exhibit as a whole.

According to the published list of the Sweet Pea Society the official scale of value points for judging are: Size 25, color 20, stem 25, substance 15, number of flowers to stem 15, total 100. In this connection we would like to know why nothing is allowed for fragrance? Are all sweet peas equally fragrant? We pause for reply. Come on, Mr. Kerr. What is any flower without fragrance?

Make memo. of the \$5,000 sweet pea prize of the London Daily Mail. Great advertising, not only for that paper, but for horticulture. We have had nothing in the way of such enterprise along rational lines in America, although a good beginning has been made by the Sweet Pea Society—which will hold its annual meeting and exhibition in Philadelphia next June. Why can't some of our great dailies get down to common sense, and good politics, like this, instead of spending their thousands on "Mutt and Jeff"? Is America so far behind in the race for distinction in the civilized world? It looks as if a few home truths would have to be fired at them! We certainly have retrograded in our daily press standards since the days of James Gordon Bennett and George W. Childs.

"Crocuses and scillas in appropriate receptacles are fine sellers," says a contemporary, and gives a picture of them. Very good. We echo the sentiment. But we would not, if we could have helped it, have used an illustration of a snowdrop, and then called it a scilla. Maybe the editors didn't know the difference. We must not expect too much from the wild and woolly west.

On page 534, HORTICULTURE for April 8, W. H. Adsett gives the British carnation scale of points as size 20, color 20, habit of plant 20, fragrance 10. What are the remaining 30 points given for? It would be interesting to compare them with the American scale which is thus: Size 20, color 25, stem 20, form 15, substance 10, fragrance 5, calyx 5.

Spring Flowering Bulbs? Yes, you'll find a list of the best dealers in the Buyers' Directory, page 582, this issue

PROPOSED SEED LEGISLATION IN NEW YORK.

Editor HORTICULTURE:

Dear Sir:—I herewith enclose copy of Assembly Bill, Int. No. 834, which was introduced by Assemblyman Gregg on March 3rd, 1911, in the New York State Legislature. The bill has been read once and was then referred to the Committee on Agriculture. The writer is arranging to have a hearing on the bill, which will take place some time after April 17th, as the legislature has adjourned until that date, owing to the fire in the State Capitol at Albany. As soon as I am advised as to the exact date of the hearing, will communicate further with you.

You will note after reading this bill that it is of the utmost importance, not only to the seedsmen of the State of New York, but to the seedsmen in other parts of the country as well. Unfortunately, the matter has come up at a very inopportune time of the year, but I hope as many New York seedsmen as possible will be present when the hearing on this bill comes up.

Yours very truly,

MARSHALL H. DURYEA,
New York State Correspondent of
the American Seed Trade Association.

STATE OF NEW YORK.

No. 925. Int. 834.

IN ASSEMBLY,

March 3, 1911.

Introduced by Mr. GREGG—read once and referred to the Committee on Agriculture.

AN ACT

To amend the agricultural law, in relation to the inspection and sale of seeds.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. Article fifteen and sections three hundred and forty and three hundred and forty-one of chapter nine of the laws of nineteen hundred and nine, entitled "An act in relation to agriculture, constituting chapter one of the consolidated laws," are hereby renumbered to be article sixteen and sections three hundred and sixty and three hundred and sixty-one, respectively.

Section 2. Such chapter is hereby amended by adding thereto a new article fifteen thereof, to read as follows:

ARTICLE XV.

Seeds.

Section 340. Inspection and sale of seeds.

Section 341. Samples, publication of results of examination.

Section 340. Inspection and sale of seeds. Within the meaning of this article "agricultural seeds" are defined as the seeds of alfalfa, barley, Canadian blue grass, Kentucky blue grass, buckwheat, alsike clover, crimson clover, red clover, white clover, monmouth clover, field corn, meadow fescue, millet, oats, orchard grass, rape, red top, rye, sorghum, timothy, wheat, peas, beans, vetch, cabbage, turnips, cauliflower, celery and onions, which are to be used for sowing or seedling purposes. No person, firm or corporation shall sell, offer, exchange or have in his possession for sale for the purpose of seeding any cereals or seeds as hereinafter mentioned, in quantities exceeding ten pounds, except cabbage, turnips, cauliflower, celery and onions, which shall be not to exceed one pound, unless every receptacle, package, sack or bag containing such seeds, or a label attached therein, is marked in a plain indelible manner as herein provided. Said marks shall be on the receptacle, package, sack or bag itself if there is more than three per centum of injurious foreign seed. Marks shall include the following:

a. The full name and address of the seller.

b. The name and the kind of the variety thereof of seeds except in the case of mixtures prepared for special purposes, when they shall be labeled as mixtures,

giving the per centum of each kind and variety.

c. The name of any foreign injurious seeds present of three per centum or over by count and both the name and per centum of the following adulterants present: Yellow trefoil in any variety of clover; yellow trefoil, burr clover, sweet clover or dodder in alfalfa; Canadian blue grass, in Kentucky blue grass; meadow fescue or rye grass in orchard grass, or orchard grass in meadow fescue.

d. A guaranty, stating the per centum of purity of the contents of the package by count, which shall upon official examination in no case fail to exceed three below the guaranteed per centum.

All persons offering agricultural seeds for sale for sowing or planting purposes in the state of New York shall make or cause to be made a test of their germinating powers and shall state on such package or receptacle the maximum percentage of the seed contained therein which are guaranteed to germinate.

The provisions of this article shall not apply to any person growing and selling agricultural seeds to seed merchants, or shipping to a general market to be cleaned or graded before being offered or exposed for sale for seedling purposes.

Section 341. Samples, publication of results of examination. Samples of seed shall be taken in duplicate. Both samples shall be sealed promptly and one shall be tendered and, if accepted, shall be delivered at the time of taking to the person apparently in charge and a receipt taken therefor, unless refused. The commissioner of agriculture is hereby authorized to publish in bulletin form, not later than February 1st of each year, the findings of the seed examiners, together with the names and addresses of the person or persons from whom the samples examined were taken. Examinations and tests shall be made at the New York experiment station at Geneva, by the agents of the department of agriculture who are or may be appointed to take samples of commercial fertilizers and feeding stuffs, with the date of the test. If upon testing by the New York agricultural experiment station at Geneva, said samples of seed shall fall more than ten per centum below the guaranty, the dealer shall be liable therefor as for a violation of this article. Any person who shall violate any of the provisions of this or of the preceding section of this article shall be guilty of a misdemeanor, and for such offense shall, on conviction thereof, be fined not to exceed one hundred dollars for the first offense, and upon conviction for each subsequent offense not exceeding two hundred dollars, or imprisonment not exceeding one year, or both, at the discretion of the court.

Section 3. This act shall take effect August 1st, nineteen hundred and eleven.

INCORPORATED.

Martinsburg, W. Va.—The Seibert Orchard Co., capital stock \$50,000. Incorporators, Alex. Clohan, H. S. Thompson, R. S. Thompson, L. H. Thompson and Ben J. Thompson, all of Martinsburg.

NARCISSUS.

One night, while yet the cold
Lay dormant with the cold,
I flung the casement wide
And pausing, ere I drew
The outer shutters to,
A lovely thing espied—
A thing of precious worth,
A bit of heaven in earth—
A star in water.
Beneath the rose-bush bare
A rain-pool glassed it. There,
By its own beauty glomored,
It poised above the brink,
Flashed down and seemed to sink
To darkness, self-euamored.

That vision of delight
Oft walked my dreams at night.
Lo! now 'tis fructified!
This morning when I rose
And scanned my garden close
What marvel I espied!
A wonder of new birth,
A bit of heaven in earth—
A star in blossom!
Beneath the rose-bush bare
It braves the chilly air,
With beauty's self to bless us;
Spring's herald true! Behold,
With horn of gleaming gold,
The heaven-born Narcissus!

—Tom Puley, in *Catholic Standard*.

Obituary.

Louis Kessler.

Louis Kessler, father of Kessler Bros., N. Y., died at his home in Seaucus, N. J., March 30th, age 76 years.

Milton Haussmann.

Milton Haussman, son of the late S. Haussman, Los Angeles, Cal., grieving over the death of his father recently, committed suicide. He is survived by Miss Pauline Haussmann who will now take up the business.

Mrs. L. B. Brosch.

Mrs. L. B. Brosch, wife of Anton Brosch, Lynchburg, Va., after an illness of several months, died March 29th. She has been associated with her husband in the florist business. She is survived by her husband, two sons and four daughters.

Mrs. August Gehring.

Mrs. August Gehring of Chicago, whose husband is gardener for the Northwestern Railway, died Sunday at the home of their daughter where the parents and their nine children were celebrating the birthday anniversary of Mrs. Gehring. In response to a joke made by a grandchild Mrs. Gehring laughed heartily and died of heart failure soon after.

Dr. Noah M. Glatfelter.

Dr. Noah M. Glatfelter, of St. Louis, Mo., died at his home on April 9, of injuries inflicted by a fall from a ladder, while he was repairing a fence in his garden. He was a noted botanist, and famed for his special knowledge of willow trees. He had written several valuable pamphlets on the care and culture of mushrooms. A son and three daughters survive him. He was 73 years old.

Walter H. Knapp.

Walter H. Knapp, for 26 years a florist in Newton and Wellesley, Mass., died April 11 at Rutland after an illness of two weeks, though he had been in poor health since early winter. His body was taken to Newton, where the funeral took place from his home at 121 North street, Thursday afternoon. Mr. Knapp was born in Brookline and obtained his education in the public schools and later at Amherst Agricultural College, from which he was graduated in 1875. His first appearance in the florist business was in partnership with Mr. Callender as Callender & Knapp. Since the dissolution of the firm he has done business in his own name. He made a specialty of daisies, coreopsis, centaureas, anemones and such flowers of lesser prominence in the markets for which he established a steady demand in the Boston flower stores, in addition to his own local retail trade.

Mr. Knapp was of a quiet gentlemanly personality and highly regarded by the trade. He was a member of the S. A. F. Aside from his vocation as a florist, he won considerable local prominence as a singer in church choirs in Newton and Wellsley Hills. He was about 56 years old and is survived by his mother.

CATALOGUES RECEIVED.

- Chas. C. Nash, Kalamazoo, Mich.—Folder of Nursery Stock.
- Maloney Bros. & Wells, Dansville, N. Y.—"Fruit True to Name."
- E. H. Riehl, Alton, Ill.—Price List Everbearing Strawberries, etc., 1911.
- N. D. Pierce, Norwood, R. I.—Price List of Trees, Shrubs and Evergreens.
- Peter Fisher, Ellis, Mass.—Folder of New Variegated Carnation "Benora."
- Old Colony Nurseries, Plymouth, Mass.—General Price List of Nursery Stock.
- Geo. Wittbold Co., Chicago, Ill.—Wholesale Price List of Trees, Shrubs, Perennials.
- Charles Black, Hightstown, N. J.—Spring Price List of Small Fruits and Shrubbery.
- Robert Craig Company, Phila., Pa.—Price List of Craig Specialties for Easter, 1911.
- H. W. Koerner, Milwaukee, Wis.—Annual Wholesale Price List of Dahlias, Gladioli, etc.
- H. F. Michell Co., Phila., Pa.—Advance List of Distinctly New and Rare Perennial Plants.
- F. & F. Nurseries, Springfield, N. J.—Trade List, Spring, 1911. A condensed and useful list.
- Fraser Nursery Co., Huntsville, Ala.—Boxed Lots in Cold Storage and Surplus List, March 15, 1911.
- Geo. R. Pedrick & Son, Pedricktown, N. J.—Surplus Price Lists of Vegetable Seeds, For the Trade Only.
- J. Murray Bassett, Hammonton, N. J.—Dahlias and Hardy Plants for Spring Planting. A select list.
- Rich Land Nurseries, Rochester, N. Y.—Fruit and Ornamental Trees, Roses, Shrubs, etc. Illustrated.
- Chicago Artificial Flower Company, Chicago, Ill.—Catalogue of dried and preserved and artificial flowers.
- F. W. Kelsey Nursery Co., New York.—Trees, Shrubs and Hardy Plants—Specials for Spring, 1911.
- Alonzo J. Bryan, Washington, N. J.—Wholesale Price List of Flowering, Decorating and Vegetable Plants.
- Conrad Appel, Darmstadt, Germany.—Wholesale Catalogue and Price List of Forest and Agricultural Seeds.
- B. Hammond Tracy, Wenham, Mass.—"Cedar Acres Gladioli." An elegant little pocket list of elegant things.
- National Co-Operative Show Gardens, Spencer, Ind.—Bulbs, Plants, Seeds. Especially strong on dahlias.
- Ross Brothers, Wichita, Kans.—"Seed Book." A good list of vegetable and flower seeds, grain, implements, etc.
- Geo. H. Walker, No. Dighton, Mass.—1911 Catalogue and Pocket Guide of Dahlias. A very complete list, all sections.
- Harrison's Nurseries, Berlin, Md.—Price List of Fruits and Ornamentals, Strawberry Plants, etc., for the Trade Only.
- M. Crawford Company, Cuyahoga Falls, Ohio.—Catalogue of Strawberry Plants, Small Fruits and Gladiolus Bulbs.
- Andorra Nurseries, Chestnut Hill, Pa.—Price List of Specimen Trees, Shrubs, Roses and Fruit, Spring 1911. Illustrated.
- V. Lemoine et Fils, Nancy, France.—Catalogue and Price List for Spring 1911. Contains, as usual, many promising plant novelties.
- Vaughan's Seed Store, New York.—General Catalogue for 1911. Gladiolus Mrs. Francis King in colors forms the frontispiece attraction.
- King Construction Co., North Tonawanda, N. Y.—Descriptive list and illustrations of different types of King Iron Frame Greenhouses.
- H. F. Michell Co., Philadelphia, Pa.—"The World's Most Beautiful Dahlias." A finely illustrated catalogue of the Michell dahlia specialties.
- Peter Henderson & Co., New York.—Farmers' Manual. This is a winner. The cover illustration is a gem in itself. Send for a copy and you'll agree.
- John D. Imlay, Zanesville, O.—List of Seeds and Flowers for 1911. A useful instructive pamphlet on the care of house plants accompanies the catalogue.
- Framingham Nurseries, So. Framingham, Mass.—Trade Catalogue of Ornamental Shrubs, Hardy Perennials, Roses, etc. Everything quoted singly, in 10s and 100s.
- Eastern Nurseries, Jamaica Plain, Mass.—Wholesale Trade List. Illustrated. Invaluable to anyone having a call for good things for hardy garden or park planting.
- Ellwanger & Barry, Rochester, N. Y.—Novelties in Trees, Shrubs, Roses and Hardy Plants. A neat little catalogue, illustrated and comprising many desirable new things.
- Rockmont Nursery, Boulder, Colo.—General Catalogue of Western Native Evergreens, Shrubs and Flowers, etc., for Western Planting. Cover illustration a group of aquilegias.
- J. Woodward Manning, North Wilmington, Mass.—Floramead and Reading Nurseries, 57th Annual Price List. A very attractive illustrated catalogue of ornamental garden material.
- American Forestry Co., South Framingham, Mass.—Nursery Department List. All the valuable hardy deciduous and coniferous trees are here offered in various sizes at 100 and 1000 rates.
- Conard & Jones Co., West Grove, Pa.—Roses, Cannas, Shrubs, for the Trade April and May, 1911. Cover illustration is a portrait of Antoine Wintzer, "the dean of canna hybridizers in America."
- Rickards Bros., Bridgeman's Seed Warehouse, New York.—Catalogue of Seeds, Plants, Bulbs, 1911. Very creditable to the boys, well composed and leading the way to a line of high-class seeds and plants.
- William Tricker, Arlington, N. J.—Water Lilies, Hardy Old-Fashioned Garden Flowers, Roses, Azaleas, Rhododendrons, etc. Mr. Tricker is the water lily man, all right, and catalogues a choice list.
- Arthur De Meyer, Ghent, Belgium; McHutchison & Co., New York, Sole Agents. Wholesale Trade List 1911. A very valuable catalogue of palms, azaleas, araucarias, etc. An azalea in colors adorns the title page.
- Good & Reese Co., Springfield, Ohio.—Spring Trade List. Nephrolepis Roosevelt holds the place of honor this year in this annual publication. But there are other good things and the trade will please take notice.
- J. L. Moore, Northboro, Mass.—Catalogue and Price List of Dahlias and Gladioli, 1911. This is a very slick little catalogue; contents concise, nicely illustrated and cover daintily adorned in colors. Wholesale list also.
- Pape & Bergmann, Quedlinburg.—General Catalogue of Flower and Vegetable Seeds, Plants, etc. Colored plate of new Cactus Dahlias is an attractive feature. Cover illustration, a young lady whose smile is irresistible.
- Elm City Nursery Co., New Haven, Conn.—General Catalogue for 1911. Printed in sepia, well arranged and illustrated, this comprehensive list of hardy garden and landscape material will be found very valuable by the planter.
- Wagner Park Conservatories, Sidney, Ohio.—Plants and Plans for Beautiful Surroundings. This is a beautiful publication and fills the bill to a nicety. Anyone interested in the subject on which it treats will enjoy its perusal.
- J. F. Noll & Co., Newark, N. J.—1911 Catalogue of Seeds, Plants, Bulbs, Nursery Stock and Poultry Supplies. Covers in rosy pink—illustrating Noll's New Discovery Tomato and Countess Spencer Hybrids Sweet Peas. An up-to-date publication.
- M. H. Walsh, Woods Hole, Mass.—Handbook of Roses. This is a beautiful production—far more than a mere catalogue and will be prized as a work of art by anyone of refined taste. The cover subjects are the new climbing roses Lucile and Excelsa.
- Dingee & Conard Co., West Grove, Pa.—Dingee Guide to Rose Culture. Mrs. Jardine and Charles Dingee roses adorn the front and back cover respectively, of this year's issue of this popular catalogue. It is attractive and readable throughout.
- D. Hill Nursery Co., Inc., Dundee, Ill.—1911 Catalog and Planting Guide. A complete and finely illustrated list of ornamental evergreen and deciduous trees, shrubs, hedge plants, etc. Handsomely illustrated with individual portraits and plantations of trees, etc.
- Heller Brothers Company, New Castle, Ind.—"The Roses of New Castle." Covers illustrated with American Beauty and Mrs. David Jardine roses in colors. Several finely colored plates are among the illustrations inside and the half-tone plates are excellent. A useful classified list of roses is included.
- Henry M. Robinson & Co., Boston, Mass.—Illustrated catalogue of Florists' Supplies, Flowers, Hardy Cut Evergreens, etc. No more finished production than this has been put forth by any of the florists' supply dealers, and this young and enterprising firm deserves credit for the very practical publication now issued.
- R. Vincent, Jr., & Sons Co., White Marsh, Md.—Wholesale Trade List of Vegetable, Greenhouse and Bedding Plants. Such specialties as geraniums, dahlias, hardy chrysanthemums, etc., for which this house is widely famed, are covered in wide variety and the lists will be found most useful by the plant grower.

Tuberous Rooted Begonias

In five separate colors — White, Scarlet, Crimson, Pink and Yellow —

SINGLE, \$2.50 per 100 \$20.00 per 1000
DOUBLE, \$4.50 " " \$40.00 " "

GLOXINIAS

In four separate colors — White, Blue, Red and Blue-bordered White. **\$4.50 per 100.**

Finest Mixed, all colors —

\$3.50 per 100.

CROTONS

Fine assortment, well-colored. 5-in. pots,

\$9.00 per dozen.

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12-in., pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted,—*Pteris Mayii*, *Wimsetti*, *Adiantoides*, *Aspidium tsusimense*, *Cyrtomium falcatum*, etc.

Nice plants, 2½-in. pots, \$3.50 per 100.

F. R. PIERSON COMPANY, Tarrytown-on-Hudson, NEW YORK

EASTER PLANTS, PHILADELPHIA.

Aided by the fine weather of the past few days the Easter plant men of Philadelphia, up to the present writing (Tuesday), have had the time of their lives. One of the principal shippers from this point, (the Robert Craig Co.) reported that last Sunday they had broken all records by getting off for that one day 180 big cases. A fierce struggle and strain, yet how few of the dainty ladies among our ninety millions will think of that next Sunday morning?

The azalea and the Easter lily are as usual the leaders in the procession for popularity; although the Rambler roses in their many varieties crowded the favorites more closely than ever before. The newer Ramblers, especially in the big, well trained specimens have met with extraordinary favor.

This certainly has been a great lily year. Many of the leading growers increased their plantings and yet every bit of good stock was sold out in advance and orders were being turned down by Tuesday. How the retailers fared in this proposition will not be known until next Sunday of course. The short lily was very much in evidence, and this was the class the department stores were retailing at 15 cents while the first-class flower stores could easily get 25 for good stock that cost wholesale 15 to 17½ cents. There is no diminution in the general popularity of the azalea and enormous quantities were grown and disposed of. Hydrangeas are extra good this year and in much favor. Mms. Moliere was in evidence in limited quantity. It has

a bigger flower and more substance than Thomas Hogg. The late season favored the genista also—this item being unusually well done. Chas. Mecky had one of the finest lots that have ever been grown in this neighborhood.

Gladstone still holds the fort as the best of the spireas for Easter trade and enormous quantities of well done stock were to be seen everywhere. This is undoubtedly the best all 'round commercial variety to date. The pink Queen Alexandra was shown in limited quantity and met with ready sale. Another good subject was the Marguerite (*C. frutescens*) white, yellow and Queen Alexandra. We have never seen these better done. Grand rhododendron year. Everything at all passable sold.

In the decorative plant line there was no active trading except in ferns and a few bright foliaged things like crotons and *Pandanus Veitchii*. But it was surprising to see how many ferns went. Nearly every order called for some, and all the many varieties of *Nephrolepis* from four-inch up to specimens went in goodly quantities.

The foregoing covers the situation; but we may add that some minor items such as hyacinths, daffodils, and tulips had a very good sale—the cool weather conditions having favored the bringing of these subjects to market in form and finish such as we seldom see. We may mention among the things not seen everywhere—a few items such as American Pillar rose—an outstanding gem of the first water among the Ramblers—notwithstanding that Robert Craig is up in the seventh heaven about Juanita.

Spirea, Anthony Waterer—This is a

nice thing; but not striking enough to ever make a really good Easter plant.

Ericas—These were in evidence in limited quantity and were eagerly sought for by the first-class stores for basket work. No local growers that we know of could supply these. The basket work seen around the big retail stores is as extensive and elaborate as ever and showed no diminution in the enterprise of the proprietors nor in the skill of the artists. In addition to dainty baskets, lovely ribbons, and other garnishings—they have this year gone a bit further and now add bird nests and butterflies! Stop it, gentlemen, before you get out of the fine-art realm and into the cheap tinsel of the Christmas tree territory! Your scribe will get his hide well curried for daring to make this last remark but it is true, nevertheless, and time will amply vindicate the proposition. There is just as much danger in overdoing as in under-doing. There were a good many specimen gardenia plants around. Hardly see how this can ever make a satisfactory Easter plant. Buds too easily tarnished.

A highly progressive Nebraska nurseryman, ever on the alert for new things, going into the woods a few weeks ago found, as he thought, a beautiful little plant holding its winter berries. "Just the thing exactly for borders," he said, and forthwith he gathered a large quantity and took them home to plant out. At once his wrists commenced itching and soon they were swollen to nearly twice their normal size. He said, "I never saw poison ivy before." He has seen it now

**OFFICE: 76 Wabash Av., Chicago, Ill.
GREENHOUSES: Hinsdale, Ill.**

CHICAGO NOTES.

Park Extension.

At "Greater Lincoln Park," assured to the north shore by the two-to-one vote on election day that authorized the \$875,000 bond issue, an extra force of men is at work on the extension that practically will double the area of the park and an attempt will be made to have the bulk of the undertaking completed before another winter sets in.

"The tremendous majority with which the bond issue was passed is a strong indication of the affection of the people of the North Side for Lincoln Park," said Francis T. Simmons, president of the Lincoln Park Commission. "Lincoln Park has been the people's park as probably no other park in existence has been. It is within two miles of the center of the city, while all the other big parks are several times as far away."

Trade News.

A. F. Longren is just back from a southern trip for the E. H. Hunt supply house and leaves at once for another. Mr. Longren reports business as good in the territory he has visited.

F. F. Lindsay and R. F. Stilling, of Hiawatha Gardens, Minneapolis, recently purchased a tract of land midway between Minneapolis and St. Paul and will put up 50,000 sq. ft. of glass this spring. They visited Chicago last week and purchased supplies.

Since moving their office into Chicago, the business of the Chicago Carnation Co. has increased materially. They will move May 1st to their larger quarters in the same building, where a fine large ice box is being built. They expect to build two new houses this spring. Some splendid Mary Tolman and Sangamo carnations were seen there Monday.

During his visit in Chicago last week T. D. Smedly, of Fargo, N. D., said business was good in the west. He also has a store in Miles City, Mont., and has found no difficulty in getting his stock from Chicago through without loss, during the coldest weather. Mr. Smedley used 3500 carnations for his Christmas trade and has ordered his Easter flowers from Chicago.

Personal.

E. B. Washburn, who has been ill for the past week, is convalescing.

Wm. Wolf of A. Lange's is ill and missing a busy week in the store.

Geo. Hoff was able to leave the hospital Wednesday, and is receiving the congratulations of his friends.

Myron H. West resigns his position

as superintendent and secretary of Lincoln Park and will go into business for himself. Mr. West has been associated with the Lincoln Park system for five years and is known for his successful work. His successor is A. S. Lewis, who has been assistant superintendent.

Jas. G. Hancock and family, of La Grange, Ind., were tendered a farewell dinner by forty friends and neighbors April 6, and were presented with a handsome token of their regard. Mr. Hancock is moving his family into

Chicago, and leaves his home in La Grange with regret. Mr. Hancock was for many years junior member of the firm of Geo. Hancock & Son, Grand Haven, Mich., and came to La Grange six years ago. He is now in charge of the office for F. Oechslein.

Visitors—F. E. Lindsay and R. F. Stelling, Minneapolis, Minn.; S. W. Pike and two sons, St. Charles, Ill.; T. D. Smedly, Fargo, N. D.; E. Wills, Indianapolis, Ind.; R. J. Windler, St. Louis, Mo.; H. Philpott, Winnipeg, Man.

DELPHINIUM BELLADONNA.

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$1.50 per dozen, \$12.00 per 100, \$100.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinense Blue and White. 75 cents per dozen; \$5.00 per 100.

Choice and Rare Named Hybrid Varieties

Amos Perry. Symmetrically formed, semi-double flowers of a rich rosy-mauve, flushed sky-blue, conspicuous black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Amyas Leigh. Large spikes of rich sky-blue flowers, the inner petals rich rosy-plum with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Belladonna. The freest of all, never out of bloom. Beautiful turquoise-blue flowers. 15 cents each; \$1.50 per dozen; \$12.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye. \$2.50 per dozen; \$20.00 per 100.

Julia. Gigantic flowers of a pretty "Cornflower" blue, beautifully veined with rose and large pure white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$18.00 per 100.

Mme. Emma Zaiser. Flowers nearly 2 inches in diameter, rich cambridge-blue, flushed rose, jet-black-centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mme. Violet Geslin. One of the finest, flowers perfectly round, clear blue, centre lavender, with bold white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Musea. Large circular flowers of a curious shade of rosy-mauve, edged cambridge-blue, with dark eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Portia. Lovely "Cornflower" blue, with faint flush of rose and black centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Queen Wilhelmina. Massive spikes of sky-blue flowers flushed with rose, with very large pure white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Rembrandt. Large loose spikes of bright sky-blue flowers, inner petals rosy-lavender, the whole suffused with a silvery sheen. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

NEW WHITE DELPHINIUM.

Hybridum Moerheimi. The first really pure white Delphinium introduced and a sterling novelty; a strong vigorous grower and a remarkably free bloomer. Stock limited, \$2.00 each.

Dreer's Superb Double Hollyhocks

We have this season a fine lot of strong, clean, healthy, vigorous one-year-old flowering plants of the finest strain, as under:

Double White,	Double Yellow,	Double Rose,
Double Pink,	Double Red,	Double Maroon.

Decoration Day Roses

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name: Price, 75 cts. for 5 (of one variety), \$13 per 100, \$120 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.
Anne de Diesbach. Bright carmine.
Ball of Snow (Boule de Neige). Large, pure white.
Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Capt. Christy. Delicate flesh color.
Chio. Satin blush; very fine new sort.
Duke of Edinburgh. Bright vermilion.
Fisher Holmes. Dark velvety crimson.
Fran Karl Druschki. The finest white in existence.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson; the popular Rose.
John Hopper. Bright rose, with carmine center.
La France. Peach-blossom pink.
Mme. Charles Wood. Bright carmine.
Margaret Dickson. White, with pale flesh center.
Marshall P. Wilder. Cherry-rose and carmine.
Magna Charta. Dark pink.
Mme. Gabriel Luizet. Light, satiny pink.
Mrs. John Laing. Rich, satiny pink.
Mrs. Sharman Crawford. Deep rosy pink.
Paul Neyron. Lovely dark pink.
Persian Yellow. Hardy yellow rose.
Prince Camille de Rohan. Dark crimson-maroon.
Soleil d'Or. Large, globular flowers, varying in color from gold and orange to reddish gold, shaded with nasturtium-red.
Ulrich Brunner. Cherry-red; grand rose; free. For Prices, see above

English Moss Roses

Assorted, White, Pink, Red. Large dormant plants, from open ground. 75 cts. for 5, \$14 per 100.

Baby Rambler Roses

PHYLLIS. Very fine clear pink, highly recommended. \$1.25 for 5, \$20 per 100.
PHYLLIS (Grown as a Standard). \$2 for 5, \$35 per 100.
BOSKOOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30 per 100.
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85 cts. for 5, \$15 for 100.
BABY DOROTHY (Grown as a Standard). For description, see above. 50 cts. each, \$4.75 for 10, \$45 per 100.
CATHARINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85 cts. for 5, \$15 per 100.
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85 cts. for 5, \$16 per 100.
MME. NORBERT LEVASSEUR (Baby Rambler). Strong, field-grown plants, 75 cts. for 5, \$14 per 100.
BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40 cts. each, \$3.75 for 10, \$35 per 100.

Ramblers and other Climbing Roses

CLIMBING BABY RAMBLER (Miss C. Mesman). A novelty for 1911, where the Baby Rambler is popular, the climbing type will soon become so, too. We have a small stock, and offer same as follows. It is a true Polyantha type, color deep rose. 50 cts. each, \$2.25 for 5, \$40 per 100.
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown. \$1.50 for 5, \$22.50 per 100.
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15 per 100; 4 to 6 feet, \$2.25 for 10, \$20 per 100; 7 to 8 feet, extra heavy, \$4 for 10, \$35 per 100.
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15 per 100; 8 to 9 feet, \$2 for 10, \$18 per 100.
TAUSENSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15 per 100.
TAUSENSCHON (Grown as a Standard). Fine for forcing. 40 cts. each, \$3.75 for 10, \$35 per 100.

Something New in Roses for Florists

Half-Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40 cts. each, \$4 per doz., \$30 per 100.
BABY RAMBLER (Half Standard). Crimson. 40 cts. each, \$4 per doz., \$30 per 100.
BABY CATHERINE SEIMETH (Half Standard). White. 40 cts. each, \$4 per doz., \$30 per 100.
BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45 cts. each, \$4.50 per doz., \$35 per 100.
PHYLLIS (Half Standard). Carmine pink. 45 cts. each, \$4.50 per doz., \$35 per 100.
TAUSENSCHON (Half Standard). Soft pink. 40 cts. each, \$4 per doz., \$30 per 100.
MRS. CUTBUSH (Half Standard). Rose pink. 40 cts. each, \$4 per doz., \$30 per 100.

Well-Known Climbers

Mme. Plantier. White.
Baltimore Belle. Pale blush color.
Prairie Queen. Red, changing to pink.
Seven Sisters. Clear pink.
75 cts. for 5, \$14 for 100

English Grown Hybrid Tea, or Everblooming Roses, etc.

Hybrid Tea or Ever-blooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in Winter, they give a wealth of bloom all through the Summer months and late in the Fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp pink at the ends of the petals, center coral-red or salmon-pink, shaded with chrome yellow. Very fragrant. 40 cts. each, \$1.75 for bundle of 5, \$30 per 100.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5, \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for Summer-flowering and cutting.

Maman Cochet (Pink). Color is clear, rich pink, changing to silvery rose; very double and fragrant.

Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride.

\$1.25 for bundle of 5, \$22.50 per 100.

ROSE, Etoile de France. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson-red velvet, the center of the bloom vivid cerise-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field-grown, 85 cts. for bundle of 5, \$15 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10, \$22.50 per 100.

GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bedder. It is a perfect sheet of richest crimson-scarlet all Summer. A strong, vigorous grower, \$1.75 for 10, \$15.00 per 100.

VISCOUNTESS FOLKESTONE. A large full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous, \$1.25 for 5, \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5, \$20.00 per 100.

RICHMOND. The well-known red Rose of commerce, \$1.25 for 10, \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor Summer growing, \$1.25 for 5, \$22.50 per 100.

BETTY. Copper-yellow, overspread with golden-rose. A fine formed Rose, large and moderately full, \$1.75 for 5, \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 for 10, \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 for 10, \$22.50 per 100.

AMERICAN BEAUTY. Almost too well-known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong, field-grown plants, 75 cts. for bundle of 5, \$14 per 100.

CAROLINE TESTOUT. Bright satin-rose, with brighter center, large full, globular; sweet-scented. \$1.25 for bundle of 5, \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor Summer-blooming. Bundle of 5 for \$1.25, \$22.50 per 100.

FIELD STUDIES OF TREES AND SHRUBS.

Mr. J. G. Jack will conduct a Field Class at the Arnold Arboretum on Saturdays during the spring and early summer, to assist those who wish to gain a more intimate knowledge of the native and foreign trees and shrubs which grow in New England. The instruction will be given in informal outdoor talks and examination of the plants. Unless otherwise notified the class will meet promptly at 10 o'clock in the morning, on Saturdays, in the Arboretum, at the Forest Hills entrance.

The class will open Saturday, April 15th, and close June 24th. Two hours will be devoted to each meeting. During the season the class may meet two or three times outside of the Arboretum at some favorable place for the study of trees. These meetings may each take up a half-day. The course is open to both men and women. The fee for the course is \$5.00, payable in advance.

Applications or further inquiries may be addressed to Mr. J. G. Jack, Jamaica Plain, Mass.

Seeds for Spring Planting are now in order. If you want straight stock from straight dealers, see the list of offers in Buyers' Directory, page 586, this issue.

C. H. Gardiner, South Pasadena, Calif.

¶ We understand some people are offended occasionally by our advertising. Now we don't expect to please everybody and we are always willing to be criticised, for none of us are perfect in our lives; but it seems strange that no one will write us just why they are offended. Some people like to be lathered with flattery and then massaged with egotistical slush. It makes them feel their oats, as the farmer says, and as soon as they are truthstruck it paralyzes them. Their judgment is so warped that their thoughts run like a scenic railway car. Be a man and use common sense. If we are wrong, criticise us—we want criticism. The only difference between us and some other firms in this line is that we tell you right out what we think while the others think the same but say nothing. Don't be afraid of just criticism—you ought to be thankful for it.

¶ Our goods we praise because we sincerely believe they are positively the best imported. We don't care what others say nor what the prices of other firms are—we make our own prices and we deliver the goods—the best money can buy.

Ralph M. Ward & Co.

12 West Broadway
NEW YORK CITY

Not How Cheap
But How Good

Seed Trade

Weather a Drawback.

Cold unseasonable weather continues and retail seedsmen who are largely dependent on counter trade are becoming very anxious over the outlook. Many feel that ground once lost in this business is never wholly recovered and there is ample reason for more or less discouragement. However, warm weather must soon make its appearance and then there will be busy times ahead for all those in the retail trade.

Canning Machinery and Supplies Association.

Some weeks ago the directors of the Canning Machinery and Supplies Association met in Chicago and decided to hold a machinery exhibit at the annual convention in 1912, provided the place selected for the convention is not so remote as to make the transportation charges on the machinery back and forth too expensive to make an exhibit desirable. Some time ago it was announced that Rochester, N. Y., would probably be the place chosen and it still looks that way, although the matter has not been finally disposed of, and other cities have been bidding for the convention. Some time this month the matter will be finally settled.

Canners' By-products.

These seedsmen who are subscribers to "The National Canner and Dried Fruit Packer," the leading organ of the canning industry, may have noticed the advertisements of seed for sale mainly by canners. Odd lots of peas, beans, corn, and tomato seed are offered, and one may often wonder where all this stuff comes from. Well, some of this seed offered is no doubt high-grade stock, but much of it is junk, being largely by-products of the canneries. While these concerns are very severe in their criticisms of the seedsmen, if everything does not pan out to their entire satisfaction, they do not hesitate to unload any old thing on one another.

Conflicting Legislation.

Reference was made in a recent issue to legislation affecting canned goods, and it was remarked that our canner friends are having their troubles much as the seedsmen, from ignorant and more or less ridiculous and impractical legislation. It would seem as if these two industries might very properly work together to secure a national law that would be reasonable and practical, and so far as possible bring about the repeal of state laws, many of which are conflicting, and in trying to carry out the provisions of one state act they not infrequently find themselves in conflict with those of other states. The only sensible course to follow in the adoption of laws regulating inter-state commerce, is for the National Government to legislate in the matter and we believe the necessity for this will ultimately be seen by all interested parties and put into effect.

American Seed Trade Association.

It has been decided to hold the next annual convention of the American Seed Trade Association at Marble-

head, Mass. The convention will meet on June 20th, 21st and 22nd, 1911.

The hotel selected is the "Rockmere," one of the very best hotels on the famous North Shore of Massachusetts. The hotel occupies a beautiful and commanding view of one of the finest harbors, as well as the most interesting on the Atlantic Coast. On one side the deep waters and bold rocks of the coast lined with beautiful summer homes, and on the other the old colonial fort, form a vivid and contrasting picture of the old and the new.

Nearly every room at the "Rockmere" commands this beautiful view. The old town of Marblehead with its ancient churches, hip roofed mansions, with brass-door knockers, little old-fashioned flower gardens and the winding, twisting streets, with its ancient and historical landmarks, makes it one of the most interesting places on the New England coast. Marblehead is only 17 miles from Boston. Trains on the Boston & Maine Railway leave every hour from the North Union station and tickets can be purchased direct to Marblehead and baggage checked through.

It is thought by some of the officers of the Association, that this, the 29th Annual Meeting of the Association will be the largest ever held. Extra efforts are being made for an unusually good program and there will be plenty of amusement, with special entertainment provided for the ladies.

Free Seeds in Bayonne.

Bayonne has a "growing" population. Several sacks filled with flower and vegetable seeds were received at the Bayonne City Democratic Clubhouse, Broadway and Twenty-seventh street, recently, and before nightfall two or three thousand packages had been distributed. The callers from the Centreville section started a run on tomato, lettuce and other vegetable seeds, while the flower seed packages were much in demand by residents in the Bergen Point section and the territory north of Twenty-seventh street. The seeds were sent under the frank of Congressman Eugene F. Kinkead. The Bayonne City Republican Club was not forgotten either. There are numerous Republicans in Bayonne who like vegetables and flowers grown by themselves in their own garden plots. *"Jersey City Journal."*

Where's O'Mara?

Notes.

The Jensen Floral Farms of Cockerham, Lancashire, England, has opened an office at 546 Fifth Avenue, New

York City, for the sale of English flower seeds, so-called.

We have heard nothing recently about damage to California seed crops and conclude that the reports which recently came from the coast had not a serious foundation, or at least that the alarm expressed by some of the California seed growers was hardly justified by the facts.

Potatoes from Maine are being placed on the market in St. John, N. B., at 40 cents a barrel less than the prevailing wholesale price for the home product. Several local grocers have placed orders for potatoes with Maine dealers for \$1.60 per barrel, delivered in St. John, freight and duty paid. The same dealers found that they could not get the home-grown product delivered there for less than \$2 a barrel. And yet the Maine Grangers are afraid of reciprocity!

ton Cut Flower Co. have moved to
larger quarters at 19 Capital street.
The greenhouses will still be run at
the old location.

SOME GOOD POINTS IN THE RECI- PROCITY TREATY.

Clover and timothy seed, heretofore
paying 10 per cent into Canada are to
be admitted free of duty. Garden and
field seeds are also made free as
against a former duty of 10 per cent.

We see nothing about cut flowers.
We trust someone will make an amend-
ment before the bill becomes a law,
so that the lovely blooms of our sunny
south may not be prohibited from the
bosoms of the brilliant and charming
sisters across the line. We want real
reciprocity—not the sham kind. And
no Canadian that we know would be
ungallant enough to charge a tax on
the corsage bouquet of their young and
fair. Perish the thought!

APRIL WEDDINGS

The Two New Roses

"DOUBLE PINK KILLARNEY" and the new Irish Rose "MELODY"

are proving their genuine and extraordinary merit as cut flowers, not only from the grower's standpoint but also from the retailer's point of view. Wherever exhibited they have created a furore among the buying public.

AN EXCLUSIVE OFFER OF THE CUT FLOWERS

to the customers of the S. S. Pennock-Meehan Co. is now a possibility. If you want something extra choice for your April weddings—here is your opportunity.

PRICES:

"DOUBLE PINK KILLARNEY"	
Special	per 100, \$20.00
Fancy	15.00
First	10.00

NEW IRISH ROSE "MELODY"	
Special	per 100, \$15.00

Flower Market Reports

BOSTON The flower markets are loaded to the doors with flowers of all descriptions and at present writing—three days before Easter—buying is almost at a standstill. Plantsmen are hustling on all sides, the flower stores are veritable forests of pot plants—lilies, azaleas, acacias, bougainvilleas, astilbes, etc., etc.—and all interest is centered for the time being on this department. The conviction grows that every year the cut flower, as an Easter specialty, is driven farther and farther into the rear ranks. Saturday will tell the story and next week we shall give it publicity. It is not possible yet to foresee how it will come out. The only things that show any tendency to advance in price are carnations and roses and in both of these the reason for the advance is not apparent other than that it has become a habit. The quality generally is excellent on all lines.

CHICAGO Chicago market is very satisfactory as Easter draws near. There is no glut in anything and prices are not exceptionally high though few flowers are sold in job lots. Really good red and white carnations are scarce and fancy red brought five cents, but plenty of good average stock sold for much less. Each day the market has cleaned up on all good carnations. Roses have been quite plentiful and at this, the opening of the last week before Easter, there is no change. There is not a surplus, however. Lilies are selling well, much to the satisfaction of the growers whose stock came in a little

too early. Single violets are near an end and no great quantity of double ones are expected for Easter week. Good tulips are scarce and bring a good price. Some excellent Kaiser Kroon are selling for five cents this week, and really good daffodils three cents. Southern stock is coming in rapidly and brings a low price, generally selling by the box. Fancy sweet peas with extra long stems find ready sale while short ones go rather slowly. Green moves nicely. Good smilax is scarce and few good common ferns are to be had.

Last week's business **DETROIT** conditions reminded one of the calm before the storm. The general tendency was slack and prices remained weak. The great scarcity of carnations last winter caused many a wholesale grower to rush their bulbous stock to the market and while there will be enough of these for the legitimate trade, fakirs, grocers, druggists, etc., who take a flyer in flowers around holidays will have to do without it this time.

Flower Market Reports

(Continued from page 579)

There is very little NEW YORK thus far transpiring to indicate the approach of a flower holiday and it is plain that not until the close of the week will the cut flower demand assume any especial proportions because of Easter necessities. Conditions of overstock and sluggish demand exist all through the wholesale cut flower district and a pessimistic feeling prevails among those who are exclusively interested in the cut flower trade, while those who have any connection with the plant industry have been, and still are, worked to death. No raise in market values is possible as the situation now stands, except that lilies are held for an advance over recent quotations. As to the final outcome on lilies and everything else we shall have the facts all in for next week's report.

Business in cut PHILADELPHIA flower circles was very fair here last

week, especially Friday and Saturday. Prices did not advance very much—a trifle perhaps. The cold and stormy weather held stocks back somewhat yet there seemed to be enough for all demands. White carnations were a little scarce by Friday—and it is suspected that some of the growers are holding back. Some lots that came in late in the week had a pretty salty look. We fondly believed this ridiculous and suicidal practice was obsolete years ago; but it seems there is a new fool born every day, and a fool must act according to his folly and even bitter experience fails to teach some of them. American Beauty roses are more plentiful. Quality good. Mostly specials. White roses in excellent demand. Some magnificent White Killarney arriving. Orchids are in good shape but trading in these has not been very brisk of late for some reason. Violets are showing the effects of sunshine, and singles are almost entirely over—except limited lots from cold frames. The latter and the doubles are in good shape for Easter trade. Lily of the valley is moving a little better and is fully up to standard as to quality. There seem to have been fewer southern daffodils this year. The season did not commence until late, and they are already over; but there are still plenty of good greenhouse-grown in sight. These and sweet peas and lily of the valley help out in medium-priced spring work, and are favorite material for corsage bouquets instead of violets. Yellow

daisies sell better than the white. Both are first-class stock at present. Greens of all kinds selling well, and no over-supply.

The wholesalers seem to be well supplied with cut stock of all kinds. The weather has been clear and cool and this should make them all of excellent quality. Prices too, are not so high as expected. This is Holy Week and all of our greenhouse men are busy with plants and decorations for churches. Plants are in plenty and a great sale is expected on them. Wholesale prices on lilies average about \$12.50 per 100 blooms for the best quality. Carnations will run not over \$5 per 100 for the best and \$2 to \$3 for good stock. Violets, 50 cents for Californias and about \$1.00 per 100 for Mazzuras. Sweet peas from 35 to 75 cents, lily of the valley \$3, tulips \$3, Dutch hyacinths \$3 to \$4, auratum and candidum lilies \$8. In roses the market has a big cut at present and long, fancy Beauties are coming in fine at \$6 per dozen. Other roses bring from \$5 to \$10 per 100.

PHILADELPHIA NOTES.

Arthur MacIver, for twelve years with Graham's and Habermehl's opened recently a retail store at 8th below Chestnut street. He reports business so far very gratifying and away beyond his expectations.

CARNATIONS—Continued

Early carnation cuttings. Place your orders now and you will get immediate delivery. Enchantress, Perfection, Beacon, \$3.00 per 100, \$25.00 per 1000; Rose-Pink Enchantress, White Enchantress, Winsor, \$2.50 per 100, \$20.00 per 1000. We can fill orders from 1000 to 100,000 and guarantee the stock. Write us for Chrysanthemum cuttings, ready early in March. J. D. Thompson Carnation Co., Joliet, Ill.

THE NEW HARDY EVER-BLOOMING CARNATION "CRIMSON KING."

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy Carnation Crimson King. Per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

CATALOGUES RECEIVED.

David Nursery & Seed Co., Utica, N. Y.—"Bountiful and Beautiful" New Annual for 1911.

Wm. H. Moon Co., Morrisville, Pa.—Hardy Trees and Plants for Every Place and Purpose. Handsomely illustrated.

I. N. Kramer & Son, Cedar Rapids, Ia.—General Spring Catalogue of Flowers and Vegetable Seeds, Florists' Plants, etc.

David Herbert & Son, Atco, N. J.—Dahlias. A comprehensive list of the varieties offered by this well-known dahlia house. A list of gladioli and cannas is also included.

Kramer Bros. Foundry Co., Dayton, Ohio.—Catalogue of Iron Vases, Settees, Chairs, Window Boxes, etc. Very elaborate in make-up and illustration. Shows some elegant designs.

T. C. Thurlow's Sons, Inc., West Newbury, Mass.—A most attractive publication, in which much choice material is listed. *Kalmia latifolia* makes a lovely cover-page illustration.

W. W. Barnard Company, Chicago, Ill.—Market Gardeners' Price List of High Grade Vegetable Seeds and Gardening Tools. A business getter from cover to cover. Also General Catalogue for 1911. Covers in colors; subjects, vegetables and *Lilium auratum*.

L. Duehnfeldt, Odense, Denmark—Specialties for America. Second edition 1911 wholesale prices for the trade only. Cauliflower, cabbage, tomato, cucumber, cineraria, cyclamen, aster, pansy and root seeds are the specialties. The catalogue is richly illustrated.

Bobbink & Atkins, Rutherford, N. J.—General Catalogue for Spring, 1911. A splendid publication on heavy paper finely illustrated. Trees, shrubbery, hardy and tender plants, rustic work and plant tubs are fully described and priced. A wistaria bower and a rhododendron group in dark green ink form the cover illustrations.

New England Nurseries, Inc., Bedford, Mass.—New England Trees and Plants, Fifth Edition, Spring, 1911. Like its predecessors, this is a hand-

some catalogue, with well-selected lists and should fill its place as an incentive and inspiration to the planting of the best grades and varieties of hardy garden plants, shrubs and trees.

James Vick's Sons, Rochester, N. Y.—Vick's Garden and Floral Guide for 1911. This well known and ever-welcome visitor comes this year dressed in ivory white with richly colored pansies embossed thereon. "Vick's Masterpiece Mixture" is the name by which these pansies are known and the title is not misapplied, judging from the pictures.

Julius Roehrs Co., Rutherford, N. J.—General Catalogue for 1911. A high-class production, typographically and in contents. The illustrations are original and beautiful. Stove and greenhouse plants, bays, conifers and hardy herbaceous plants are included. Also Orchid Catalogue, equally elegant as to illustrations and descriptive notes. Many rare varieties are figured.

NEWS NOTES.

Klamath Falls, Ore.—E. G. Ehle intends to establish a nursery on five acres of land he has recently purchased here.

Pasadena, Cal.—Property on Lake avenue has been purchased by the Altadena Nursery and they will move to the new location.

Brookside, Pa.—Fred Frank of Philadelphia has purchased the Brookside Greenhouses formerly conducted by Irwin H. Anderson.

Salem, Ohio.—The Fawcett Greenhouses formerly conducted by Lemuel Fawcett have been leased by Arthur Scraggs who intends to make immediate repairs.

Exeter, N. H.—George H. McAlpine, who is building a rose house here as reported in the Jan. 7th issue of HORTICULTURE, will make a specialty of White Killarney and Richmond for the Boston market. He was formerly employed by W. H. Elliott of Madbury, N. H.

Perhaps you want Dahlias. See Buyers' Directory, page 583, this issue. The best growers and best stocks are there represented.

Warren, Ohio.—The Maple Shade Gladoli Nursery, Wilbur A. Christy, proprietor, has been moved here from Kinsman.

Waco, Tex.—The Rush Park Wholesale Seed Co. of Independence, Iowa, has opened a branch in the Mailander Bldg., South Fifth street. M. D. Webster is manager.

New London, Conn.—The entire stock and fixtures of S. J. Reuter & Son have been moved from State and Main streets to Frank Smith's market, which they recently leased, where a splendid new store is being arranged.

Kenton, Ohio.—William Sabransky, for 17 years proprietor of the Kenton Floral Nursery, retired from business on April 6th, being succeeded by his son John Sabransky. William Sabransky is 69 years of age and started in the business at the age of 14 in New York City. He engaged in the floral business at Richmond, Va., and at Springfield before going to Kenton. The name of the business is to be changed from the Kenton Floral Nursery to John Sabransky, the Florist.

William Rehm, who was raised in the flower business by his uncle, the late R. Maitre, of New Orleans, has recently taken a position as representative of L. Daehnfeldt, Odense, Denmark, and is now making a trip among the seedsmen of Canada and the New England States. Carlos Jensen, manager of the export department of this house was a visitor at the National Flower Show in Boston.

HELP WANTED

HELP Furnished for greenhouses, gardens, estates, etc. Skilled and unskilled. **National Labor Exchange, 918 Walnut St., Phila., Pa.** **HENRY C. PRICE**

WANTED

Outside foreman; a young man accustomed to managing a large force of men in nursery. State salary expected, and qualifications. M., care HORTICULTURE PUB. CO.

WANTED—A gardener that understands planting and care of outdoor flowering crops and shrubbery. All outdoor work. One willing to work. With board. Single man preferred. Address E. C. Ludwig Floral Co., 710 E. Diamond St., N. S. Pittsburgh, Pa.

MAN with some experience in landscape or ornamental gardening; able to sell goods. Excellent opportunities to advance. "P. D." care HORTICULTURE.

HELP WANTED—An experienced plant grower to work under foreman; send references and wages expected to Thomas Roland, Nahant, Mass.

WANTED—Man with general knowledge of ornamental nursery stock, landscape planting, etc. Address N. D. Pierce, Norwood, R. I.

WANTED—Two first-class greenhouse men. State qualifications and salary expected. W. M. W., care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED—By florist and gardener on private or commercial place, age 23, German, single, 6 years' practical experience in roses, carnations, mums, pot plants, flower garden, fruits and vegetables. Good references. Edward E. Henderson, 56 Tappan Street, Melrose, Mass.

SITUATION WANTED by a single, middle aged man as gardener and florist; good propagator and planter. Long experience in the business. Massachusetts preferred. Can furnish references. X. T., care HORTICULTURE

BUSINESS CHANCES

A GOLDEN OPPORTUNITY

A good practical grower of greenhouse and outdoor crops can take over at a nominal rental a greenhouse plant of about 16,000 square feet of glass; a fine heating-plant with 100 tons of coal in the cellar; houses well stocked with Carnations, Sweet-peas, Freesias, Farsley, Asparagus Plumosus and Sprengerii. A good cottage is a part of the plant, with from 10 to 20 acres of the very best land. Fine location. Markets for crops already established. Plant has been conducted as a semi-commercial establishment; owner now wishes to be relieved of all responsibilities. For further particulars apply to JOHN T. WITHERS, 1 Montgomery St., Jersey City, N. J.

FOR SALE

FOR SALE—Greenhouse must be sold at sacrifice. 20,000 feet glass, steam heat, over an acre of ground. Town and suburbs of 35,000. Within easy shipping distance of Pittsburgh, Cleveland and Buffalo wholesale markets. This is a great opportunity, but requires quick action. D. W., care HORTICULTURE.

A VISIT TO PROF. HARSHBARGER, TOPEKA, KANS.

Several months ago I wrote you of what this gentleman was doing with roses. He has ransacked Europe and America. He had English, German and French books piled on his desk. His aim was to hunt out and classify the different families and if possible secure their parentage. Probably no man in America has the subject so well in hand. He has now growing 210 varieties and he is ready for business. He proposes to make crosses so that he can give the pedigree of both parents. He begins work next summer.

Prof. W. A. Harshbarger is professor of mathematics in Washburn College where he has been a good many years. He was born in West Virginia near the close of the war, and was brought up in extreme poverty in that country, desolated by the contending armies. His struggles and successes border on the heroic. He is a man of tremendous enthusiasm. He balances cold mathematics with the warm breath of roses. He takes his vacations largely in his garden.

C. S. HARRISON.

SOME NEW PLANTS FROM CUBA.

Prof. J. F. Cowell, of the Buffalo Botanic Garden, who has just returned from a two months' collecting tour in Cuba, states that he thinks he has discovered four new palm species. He sent up fourteen species alive which included four Coponessias which have never been in cultivation. Hitherto, twenty-seven species of palms have been credited to the island.

He found a Microcycas—the rarest cycad in North America if not in the world—one specimen 20 ft. high having 120 leaves in the new crown. It is found in the arid regions of Cuba, often on cliffs difficult of access. Another prize was a Broughtonia, a large flowered one, color, clear bright rose—probably a new species. Still another find was a Colpothrynx, presumably new.

NEWS NOTES.

West Washtucna, Wash.—J. G. Crosby of Kennewick has purchased ten acres of land in the Washtucna Valley where he intends to start a nursery.

Fergus Falls, Minn.—S. N. Mehlin has purchased four acres of land on Lincoln avenue west, where he intends to build a greenhouse, cold frames, etc., during the coming summer.

Macomb, Ill.—W. N. Bonham, a brother of F. E. Bonham, proprietor of the local greenhouses, will purchase an interest in the business after the first of June. Additions to the greenhouses are being planned.

Toronto, Ont., Can.—A stock company to be known as the A. E. Moore Floral Co., Ltd., has been formed here and has purchased the property of the Georgetown Floral Co., intending to take possession May 1st. They intend to immediately commence building and extending the plant. The McIntyre and Trimbee greenhouse property on Marjory street has also been purchased. This company will be a close corporation consisting of A. E. Moore, Samuel Kirke, James Trimbee and Donald McIntyre.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale and all soft bodied insects, without the slightest injury to the tenderest flower or foliage.

An excellent cleanser for decorative stock. You can rely on it for positive results, without fear of failure or dissatisfaction. \$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material, particularly adapted for the greenhouse.

\$2.00 per gallon, 75c. per quart.

ADDITION TO KING CONSTRUCTION COMPANY FORCES.

It is announced that E. P. Lovejoy has resigned from the Lord & Burnham Company, and become associated with King Construction Company at North Tonawanda, becoming vice-president of that concern. The King Construction Company has, in the last year, enlarged its field of operation to include the building of all descriptions of ornamental conservatories and palm houses for private estates, florists' show rooms, parks, etc., many orders for this class of work having already been executed. To satisfactorily handle this department a new factory building has just been completed on the premises at North Tonawanda and special modern equipment installed. The acquisition of Mr. Lovejoy, who in addition to assuming the duties of vice-president, will become superintendent of the plant at North Tonawanda, will be of material benefit to this new department.

Mr. Lovejoy during his long residence at Irvington, was held in high regard by his many acquaintances and was the recipient of many tokens of esteem by fellow employees on the occasion of his leaving Irvington for North Tonawanda.

GREENHOUSES BUILDING OR CONTEMPLATED.

Attica, Ind.—W. S. Kircher, two houses.

Niles, Mich.—David Wolf, house 22 x 70 feet.

Bellevue, Ohio.—R. C. Arlin, house 24x125 feet.

Bismarck, N. D.—Hoskins Floral Co., one house.

Raleigh, N. C.—C. A. Lyle & Co., range of houses.

Chicago, Ill.—Weiland & Risch, range of houses.

Wenatchee, Wash.—Milot-Mills Co., house 10 x 160 feet.

La Grange, Ill.—Mayer & Wagner, house 25 x 125 feet.

Monroe, Mich.—Greening Bros., block of plant houses.

Toronto, Ont., Can.—A. E. Moore Floral Co., Ltd., addition.

Toronto, Ont., Can.—Miller & Sons, three houses, each 20 x 300 feet.

Mitchell, S. D.—Mitchell Greenhouses and Nurseries, house 14 x 120 feet.

Greensboro, N. C.—J. Van Lindley Nursery Co., carnation house, 42½ x 300 feet.

Batavia, Ill.—Batavia Greenhouse Co., three houses, each 27 x 275 feet; one house 27 x 100 feet.

Macomb, Ill.—F. E. Bonham, chrysanthemum house 50 x 100 feet; additions to his two carnation houses; bedding plant house 10 x 30 feet.

Livingston, Tex.—A nursery will be started on a large tract of land near here by H. E. Stockwell and T. J. Horner.

FIRE RECORD.

Peru, Neb.—Fire recently destroyed a barn belonging to the Peru Fruit Farm Co. J. R. Duncan lost considerable stock in this fire.

Philadelphia, Pa.—One greenhouse was slightly damaged and the carpenter shop entirely destroyed at the plant of Robert Craig Co., loss about \$1500.

Waynesboro, Pa.—Fire destroyed the greenhouses of Charles Happel with all their contents recently. Loss is estimated at about \$2,000; the houses will be rebuilt at once.

Benton Harbor, Mich.—Twin City Celery Co. suffered a heavy loss from fire recently when their greenhouse containing vegetable plants was destroyed. Practically the entire crop of plants was killed.

Lancaster, Ohio.—Fire on March 30th destroyed five greenhouses and other buildings owned by M. M. Miesse near this city. The greenhouses were stocked with early tomatoes and lettuce plants and the loss will run into thousands of dollars.

Joplin, Mo.—The property and nursery business of Charles A. Davidson has been purchased by F. E. Millner.

Mushroom and storage cellar underneath the palm house. The boiler room is under the garage, which is near by.

Henry Ford, The Big Automobile Maker of Detroit Bought This House of Our Chicago Office Last Fall

Wm. Roberts is the gardner—perhaps you know him? He is well known out Boston way. He says "these houses are just the very best that can be built. No man's money can buy any better." Roberts has worked in a good many different houses and we have a notion he knows what he is talking about. By the way have you seen that New Cataloge? If you think of building you certainly want it handy by.

WHAT THE USERS SAY:

Greenhouse and Residence Heated by One Kroeschell Boiler

"Had different kinds of cast-iron boilers. I am assured that I can save about one-third fuel with your boiler. I started firing October 10th and the fire never went out up to this time, May 12th, 1907. This boiler heats both my dwelling and greenhouses and gives the best of satisfaction. My dwelling is about 40 feet from the boiler. Can recommend your boiler to anybody. It is the only greenhouse boiler."

RICE'S FOR US EVERY TIME

April 14, 1911.

Messrs. M. Rice & Co.,
Philadelphia, Pa.

Dear Sirs:—

The 5 large Plant Baskets ordered by telegram yesterday arrived early this morning, which gave us ample time to fix them up for our Decoration this noon. Being of an unusually large size and the fact that the six Baskets had to be alike, caused us some worry as to whether our order could be filled. We are greatly pleased with your prompt attention to our order. Wish to say the baskets are just exactly the kind we wanted.

"Rice's for us every time!"

Very truly yours,

We are pleased to say that we receive quite frequently such expressions of approval. ISN'T IT GOOD JUDGMENT to buy your Supplies and Ribbons from US, and avoid disappointment?

Seasonable Notes on Culture of Florists' Stock

CARE OF EVERGREENS IN POTS OR TUBS

In our growing cities and towns there is an increasing and continuous demand for evergreens in pots or tubs for inside and outside decorations. The Sweet Bay—or properly *Laurus nobilis*—is preeminently ahead of all other evergreens for this purpose, but all such plants as boxes, laurels, aucubas, hollies, and many other evergreens are also used. All these plants that have been kept in a rather dark shed or house should be placed outdoors now without delay, for if left too long inside they scorch badly when placed in strong sunlight. Give a top-dressing of loam and cow manure in equal quantities, with a liberal sprinkling of fine bone. Remove as much of the old surface soil as possible and replace with this mixture. Just before the new growth starts they should have some judicious pruning and trimming, to overcome any imperfections. Keep them freely syringed and give them occasional liquid feeding.

GLOXINIAS

Tubers that were started early will now be coming into flower. They should be given a light shade and so situated that they will get a requisite amount of air without cold draughts striking them. Plants that are coming into bloom should have a temperature of 60 degrees at night with a rise of 10 degrees during the day, but when the flowers are well opened they can be placed in a house where the temperature is 10 degrees cooler. This will make the foliage firmer and the flowers will have a greater amount of durability. Be very careful not to wet the foliage any more than is absolutely necessary when watering, as they soon get scorched. Tubers that have been kept back but are now starting up naturally should be potted up, using a mixture of two parts leaf mold and one part fibrous loam and enough sand to keep the whole open. Those seedlings that were started in January should be of good size now for potting into 3-inch pots. Use a soil similar to the foregoing. Shift as they may need it and treat them throughout the season with shade, but give plenty of light and moisture.

LILIES FOR DECORATION DAY

To have these lilies about right for Memorial Day you should be able to see the flower buds distinctly a full month before that date. You should be able to judge now whether your plants are sufficiently early or not. If the buds are not showing by this time I should say give them more heat—say from 8 to 10 degrees more. In order to have them right with the most of us, it is more a matter of holding them back rather than forcing. Those who have their lilies in a house by themselves are better able to control the temperature by the way of firing than those who only grow a few hundred with other plants. Lilies that are very far advanced and open two weeks before the required date can be kept in very fair shape if they are placed in some cool shade or cellar, or, where this is not at hand a deep frame that is shaded will do. See that the plants are kept nicely staked or they will swing about with the

syringing and frequently break off from the bulb. It is important now not to overlook fumigating or spraying with a solution of nicotine. It is always well to use these weekly as a preventive. From now on soil in the pots will be one mass of hungry roots, so it will be essential to give them a constant supply of water and occasional liquid manure.

ODONTOGLOSSUMS

Now that the hot weather will soon be with us the culture of the orchid becomes very difficult. Giving conditions such as prevail in their native habitation where a maximum of 65 degrees is very rarely exceeded, cultivators are now having much better success than a decade ago for they have broken away from the old way of keeping them in a north house from start to finish. Some of the best growers now give them a sunny house from the middle of October until now, which helps to harden up the foliage and leaves them in a condition

ODONTOGLOSSUMS, MILTONIAS AND ODONTODAS
In Stuart Low & Co.'s Orchid Houses.

better to stand our hot summer. They should be moved before the arrival of warm nights to a house of northern exposure that has elevated rolling shades about 20 inches above the glass, as this admits an abundance of air, which helps to keep the house cooler. Now that the flowering season is nearly over with odontoglossums any that need resurfacing or potting should have attention. Use some sphagnum moss and chopped fern fibre for the compost. Give them a judicious syringing overhead once a day and always allow a free ventilation, as this is very essential at all times with these orchids. The crispum section require quite a supply of water at the roots during all seasons, but the grande section do not need so much water at the roots, but should be allowed to dry out frequently.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Campanulas for next Easter; Pompon Chrysanthemums; Azaleas; Compost; Hydrangeas; Ferns; Polusettias; Smilax.

Arrangement and adaptability

Our cover illustration shows the first prize group of hyacinths and tulips at the Jubilee Horticultural Exhibition in Haarlem last year.

Two gold medals, two silver medals and one special of honor for the manner of staging the exhibit, were won by this display. One of our reasons for presenting the picture now is the fact that the question of arrangement and adaptability of certain things for use together is fast coming to the front in connection with our flower shows in this country and if there is anything to be learned from our older and presumably more experienced friends across the sea we should not hesitate to avail ourselves of any favorable opportunity for so learning. Now, we are told that the manner of staging the exhibit in question won for it especial honor in

Haarlem, but we must say that we fail to see why. If this picture shows the best our European artists can do we fear there is little that we can learn from them. Are kentias for a background and small ferns for foreground and filling appropriate or artistic accessories to a hyacinth and tulip display? Are high tables, such as are shown in the picture, to be commended for the purpose? We should like to have the views of some of our readers on the foregoing points.

Hyacinths barred!

The Boston Journal of the 16th inst. states that City Forester D. Henry Sullivan has barred the sweet-blooming hyacinths from his Public Garden decorations this year because they contain a poison injurious to the face and hands. While it is a well-known fact that the dry outer scales of hyacinth bulbs are irritating to some individuals in handling them, we have never heard of any instance of poisoning or irritation arising from contact with the growing plant or flower. The growers in Holland are careful to remove decayed hyacinth foliage from their fields, but this we understand is to prevent the lodgement of bacteria in the ground, which might attack a future crop of hyacinths rather than from any danger of poisoning the ground against any other crop, which Mr. Sullivan suggests may happen. The exquisite colors and delicious fragrance of hyacinths are not equalled in any other Spring flowers. The displays of them in the Boston Public Garden have been noted for their excellence, and it seems a great pity that they should be discontinued, unless there is convincing evidence that there is danger in their use, which our personal experience does not confirm.

Holiday famines no more

Results show that our forecast of conditions in the lily market last week was well-founded and that, in denouncing the newspaper "famine" stories as bugaboos, we spoke the truth. We were glad to see that there were, here and there, sensible representatives of the florists' trade who did what they could to counteract the mischievous stuff emanating from ill-advised trade sources and to assure the public that there would be flowers in abundance for all and at reasonable prices. President George B. Hart of the Rochester Florists' Association, for instance, came out with a statement in the "Post Express" to the effect that Easter lilies and other flowers would be more abundant, more beautiful and less costly than they had ever been before in Rochester and there can be no question but that the Rochester florists enjoyed a larger and more cheerful public patronage because of this frank assurance. Thousands of lilies left unsold and unsalable, even at half-price, in certain markets told the story of the effect of the stupid policy of trying to bully the public. Let it be marked down, once for all, that never again will there be a holiday flower famine in this country or any valid excuse for attempting to advance prices on such days. The "good old times,"—if such they were—have gone forever.

A municipal greenhouse

Boston, ever at the front in matters horticultural, is now discussing the question of a municipal greenhouse. Not the ordinary plant-producing and storage greenhouse, for the city has had for many years a well-equipped range of such houses for the propagation of bedding plants and winter care of many thousands of palms and other decorative plants that in summer so elaborately decorated her public gardens and grounds. The present movement, as outlined by Mayor Fitzgerald, is for a very large conservatory which would form an attractive winter resort in the heart of the city.

This idea was first publicly advocated over a year ago in one of the Boston dailies in giving an account of an interview with Mr. John K. M. L. Farquhar, who suggested filling up the present lake in the Public Garden, and building on its site such a gigantic glass structure.

"The lake in the public garden is in no way attractive, as it is at present," said Mr. Farquhar. "But it has a central location, and other facilities are afforded which make possible improvements on an extensive scale, which will make a public garden in reality that will be a credit to Boston. My proposal is that a building somewhat like the Crystal Palace, London, be erected. It would be perhaps in the form of an immense glass-covered conservatory. The interior appearance would be that of a tropical grove, through which run promenades. One or two bandstands might be erected and seats and tables provided where the people might read.

"An important feature would be miniature playgrounds here and there for the smaller children, and there would be restaurants, where good food might be bought at reasonable prices. The Palmen Garten in Frankfurt, Germany, is a fair example of the thing I propose. Some kind of recreation place where large numbers of poor people could come in winter or summer for free amusement I think should be provided. The Crystal Palace in London will accommodate 50,000 people; we might construct a similar building in Boston to accommodate from 25,000 to 30,000. I would think that for such a cause it would be justifiable to use a part of the income from the Parkman fund."

Fruits and Vegetables Under Glass

WATERING BORDERS

With increasing sun power and more fully developed foliage and fruit to be supported by the roots, borders will be drying out much oftener than they have been. Shallow borders filled with roots will need examining every few days, as any lack of moisture at the root is detrimental to any fruit that the trees may be carrying. As is the case with watering a bench or pot, these will need enough water to soak them through, should any attempt be made to water them. Do not give enough to dampen the top or perhaps half way down and leave the rest underneath dry. In this way some roots are left to die or only perform half their duties. In growing houses where a humid atmosphere is needed it is an excellent thing to thoroughly damp the whole surface of border once a day—preferably soon after noon. Let the hose run long enough for water to run into the surface nearly an inch. This has two points to recommend it, viz.: humidity will be continually rising from this damped surface and through the night there will be sufficient moisture in the house to keep down red spider. Secondly, surface roots are encouraged and they will always find nutriment from the surface soil and the air. Later as mulchings are applied this will keep the mulch in a suitable state for the roots to work into. If this surface damping is practised see that it is not overdone and you are given false impressions as to the state of the soil underneath. With the surface being moist one is apt to forget what may be underneath. The date of last watering put down on the back of memorandum boards will often be of assistance. No law can be laid down as to how often to water fruit borders. The question is often asked by amateurs and no satisfactory answer can be given. Water when they need it and when doing so do it well. If any doubt exists as to what state any border may be in insert a piece of thin iron or very strong wire for a few hours and examine as it is withdrawn.

FIGS

Pots or tubs which are swelling a crop will need a top

dressings. Half decayed cow manure laid lightly on the surface will be relished by the ever-seeking feeding root of a fig. Roots will grow through this as it decays and if necessary more can be added to it later until at the end of the season it will be one net-work of fibrous roots. This was my reason for advocating in an early issue of *HORTICULTURE* making borders for fig houses a few inches below what is their level, as the same thing happens there once they are filled with roots. The fig is one of the most peculiar plants we have both in taste and its mode of formation. In nearly every other fruit we get a flower first and the fruit really is nothing more than part of the flower, i. e., the ovary which at the time the flower expanded contained sacks of ovules. These were fertilized by the pollen grains that attach themselves to the stigma, germinate and are passed down to the ovules. After this a swelling of the ovary commences and the petals, stamens and pistil gradually wither and fall away. In *Ficus carica* the small fruit form in the axils of the leaves and are half developed before they flower. It needs a close inspection to discover when a fig is in flower; the eye of the fruit will open to admit a little air and assume a pinkish color. This should be noted and syringing discontinued for a few days as the similar functions take place in the formation of a fig as any other fruit, but the formation is more complicated. Trees will sometimes cast their first crop after partly developing them; about the time of flowering the fruits assumed a sickly yellowish hue and drop off. This is a more general occurrence with first crops than the second and third and is generally due to poorly ripened wood caused by over-crowding. Other irregularities may cause it, such as dryness at the roots, or in the atmosphere and cold draughts. If a tree is kept in good growing condition this will be avoided.

APPLES AND PEARS

Apples and pears having half-developed fruit will need continual feeding. Take off any superfluous fruits—do not overcrop especially if grown in small pots. Stop young growths at four leaves and continue to do so, as this throws more sap into the fruit as well as causing better flower bud formation later on. Give plenty of light and syringe continuously twice a day, closing down to one inch early enough to allow the house to run up to 80 to 85. Support any weak growths which may be bearing fruit and give a liberal supply of water to the roots at all times.

ORCHARD HOUSE TREES

These will now be swelling away. It is not advisable to hurry any stone fruit too much before it has stoned, consequently plums, cherries, nectarines, etc., will be better to have a temperature of 55 by night with usual advance by day. Apples and pears also seem to swell a more even crop if not rushed too much in the early stages. If not already applied, an occasional solution of lime in the water will be beneficial. Green fly is very troublesome in these houses. Good pressure can be used in the hose when syringing and the house must be fumigated at intervals. Any later trees which may be in flower should have a slightly dryer atmosphere for a few hours previous to noon and the trees given a sharp shake to distribute the pollen.

George H. Benson

CLUBS AND SOCIETIES

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The meeting on April 4 brought out a good attendance anxious to hear from the fortunate members who had attended the Boston Flower Show. One after the other detailed their experiences and impressions. One said he would be willing to go to Europe to see a like good show. All agreed the rose exhibit was fine; Walsh's climbers were exquisite, and the sweet pea exhibit was a revelation to our people. Such superb blooms were a surprise to Pittsburghers. The carnations were not quite as fine as at the Carnation Convention in Pittsburgh last year.

On exhibition before the club were fine displays of bulbous stock and azaleas—Holland-grown stuff—and this brought out from one of our members some pointed remarks on the long credits granted by the Holland growers, on account of which the small florist is frequently led into buying stocks beyond his needs, resulting in the spring with his being burdened with narcissi, tulips, hyacinths and Spanish iris without a market. He dumps them on the wholesale commission house, and the result is a general slump in values, not only in bulbous stock but extending to other lines of cut flowers as well. Messrs. Van Acker of Belgium and Huge of Holland were present, and Mr. Huge defended the Holland system of long credits on the ground that if they were not given the Holland growers would sell but little stuff.

The president called attention to some *Harrisii* lilies grown by him that in a temperature of 50 degrees showed no signs of disease but on raising the temperature to 60 degrees signs of disease had at once become manifest.

The judging committee, Messrs. David Fraser and J. Hutchinson, awarded to James Wiseman for calceolarias a cultural certificate. To Frank Crook for *Cineraria stellata* a cultural certificate.

Fred Bartsch, for *Cineraria hybrida* and azaleas, cultural certificate. Jno. Bader for group of Easter plants, award of merit. Phipps Conservatories, for astilbe, cultural certificate. Phipps Conservatories, Schenley Park, for group of Easter plants, first class certificate and cultural commendation.

The subject for May meeting will be Plants and Flowering Shrubs.

H. P. JOSLIN, Sec'y.

HORTICULTURAL SOCIETY OF NEW YORK.

A meeting and exhibition of the society were held on Wednesday, April 12, at the American Museum of Natural History. Twenty-three new members were elected, 6 of these life members, the remainder annual. A large audience listened to an interesting lecture by Dr. E. B. Southwick on "Hyacinths: Their History, Cultivation and Present-day Types," illustrated with lantern slides.

The exhibition was held in the West Assembly Hall and was largely attended. The same good-fellowship, which has been so marked at the previous exhibitions, was again manifest among the gardening fraternity. Those

interested in horticulture are beginning to realize that they now have a place where they can come together once every month and be mutually helpful in discussion and suggestion.

Below will be found the premiums awarded. Messrs. Thos. Aitchison and A. Herrington kindly consented to act as judges.

Lilies, Mrs. F. A. Constable, James Stuart gardener, 1st. Tulips, Mrs. A. M. Booth, E. Fardel gardener, 1st. Narcissus, H. Darlington, P. W. Popp gardener, 1st. Schizanthus, A. Lewisohn, John Canning gardener, 1st; H. Darlington, 2nd. Antirrhinums, Mrs. F. A. Constable, 1st; Mrs. A. M. Booth, 2nd. Calceolarias, A. Lewisohn, 1st; Mrs. A. M. Booth, 2nd. Hydrangea, Wm. Ziegler Estate, A. Bieschke gardener, 1st.

Certificates of Merit were awarded to: C. G. Roebing, J. W. Goodier gardener, for *Odontoda Bradshawiana* and *O. Charlesworthii*; A. Lewisohn, for a new hybrid Impatiens; John Lewis Childs, for three pots of *Calla Elliottiana* and one of *Calla Sulfatere*.

Honorable Mention was given to: John Lewis Childs, for two pots of *Amaryllis formosissima* and one of *Lilium tenuifolium*; H. Darlington, for vase of an ever-blooming *chrysanthemum*.

Silver Medals to: Lager & Hurrell, for a fine plant of *Miltonia Blueana*; Henry Goldman, A. Bauer gardener, for a fine plant of *Cattleya Mossiae*.

Silver Medal and a special cash prize to C. G. Roebing, for a large group of orchid plants and of cut orchids.

Special cash prizes to: Mrs. A. M. Booth, Queen Alexandra Stock and Enchantress carnation; Wm. Ziegler Estate, for a fine group of hydrangeas; Mrs. F. A. Constable, for swainsona; Henry Siegel, Thos. Aitchison gardener, for schizanthus and nasturtiums.

Please note that the next exhibition, which will occur on Wednesday, May 10, and succeeding exhibitions during the summer, will be held in the Museum Building, New York Botanical Garden, Bronx Park, New York City.

GEORGE V. NASH, Sec'y.

NEW JERSEY FLORICULTURAL SOCIETY.

The regular monthly meeting of the N. J. F. S. was held on Friday evening, April 14th. The exhibition of orchids, roses, carnations, and other seasonable flowers was the best and largest for a long time. The question was brought up whether an exhibit that is in competition for points could get a certificate at the same time. After quite some discussion the society decided in the negative. F. A. Cutter was elected to membership and four other names were put in nomination. Following are the awards by the judges:

CLASS A.

Amer. Beauty Roses—Thos. Edison, gard. Frank Drews, 90 points; A. B. Jenkins, gard. A. F. Larson, 87. Mixed Roses—S. M. and A. Colgate, gard. Wm. Reid, 90; A. F. Larson, 85; Frank Drews, 85. Carnations—Wm. Reid, 85; A. F. Larson, 93. *Miltonia Blueana*—Lager & Hurrell, 98. *Cattleya Schroederiae alba*—J. A. Manda, 95. *Cattleya Mossiae*—Thos. Jones, 95. *Cattleya Schroederiae*—Wm. Reid, 85. *Lycaste Skinnerii*—A. F. Larson, 83.

CLASS B.

Stocks—Chas. Hathaway, gard. Max Schneider, 95. Carnations—Fritz Bergland, 75.

CERTIFICATES.

Certificate of merit—Frank Drews for roses. Cultural certificates—Lager & Hurrell for orchids; Max Schneider for lilies and stocks; Frank Drews for antirrhinums.

The judges were C. W. Ashmead, G. H. Strange and D. Kindsgar.

WM. REID, Sec.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular monthly meeting of the above society was held in Pembroke Hall, Glen Cove, Wednesday evening, April 12. President Trepess occupied the chair and there was a good attendance. The result of the prize competition was as follows:

Carnations, 1st, James McDonald. Calceolaria, 1st, Alexander McKenzie. Flowering shrub, 1st, Alexander McKenzie. Carnations, certificate of culture, to Wm. Eccles. Gardenias, certificate of culture to J. W. Everett. Antirrhinums, hon. mention to James McDonald. Mushrooms, hon. mention to Geo. Dorber. Roses, hon. mention to Geo. Dorber.

Messrs. Barton, Wright and Westlake acted as judges. Henry Jones, Thos. Rolley and Andrew McHenry were elected to active membership. A. McKenzie and J. W. Everett and Geo. Dorber spoke as to their methods of culture of their exhibits which were of interest and benefit, and the question box brought out some interesting answers.

It was decided to hold the fall exhibition on Nov. 1st and 2nd. The executive committee were requested to submit a preliminary schedule at the May meeting for the fall exhibition and also one for the rose show which will be held on the night of the June meeting. J. Ingram offered \$5 for sweet peas, 24 varieties, 12 sprays of each. Mr. Sperling, of Stumpp and Walter Co. offered \$5 in prizes for tulips for the May meeting, 6 varieties, 6 of each. The society's prizes for May will be for 12 tulips, vase of outdoor flowering shrub and three heads of lettuce.

ERNEST WESTLAKE, Rec. Sec.

AMERICAN ASSOCIATION OF NURSERYMEN.

The thirty-sixth annual convention of this Association will be held on June 14, 15 and 16, at St. Louis, Mo. The headquarters and meetings will be at the Southern Hotel. For information regarding exhibition application should be made without delay to Mr. J. W. Schuette, 5600 Gravois avenue, St. Louis, Mo., chairman of committee on exhibits. Intending exhibitors should write him now.

We learn that no special rates will be authorized for members attending the convention. The guarantee required is prohibitive as far as this Association is concerned. A "special party rate" may be obtained in cases where ten or more can gather at some central point, the conditions being that the same route be used both going and returning, all traveling on one and the same ticket.

Mr. Frank Weber, chairman of the entertainment committee, advises us that the program, as outlined up to the present, includes visit to Missouri Botanical Gardens; automobile ride through the residence sections, the parks and main business sections of the city; "special car" trip for ladies only to a popular summer garden theatre; "Shaw Banquet" for members, and a boat ride for all on the beautiful and majestic Mississippi river, with music and refreshments. A royal good time is assured. The secretary of the Association is Mr. John Hall, 24 Granite building, Rochester, N. Y.

AMERICAN ROSE SOCIETY EXHIBITION NOTES.

The great exhibition of flowers in Boston was a wonderful display of ornamental horticulture. It can be stated, without any disregard to any section or portion, that, to the eye, the most striking exhibit that was offered there was the roses. The American Rose Society put up for three days a display of cut flowers that was the attraction of all visitors. The three exhibits in the second edition of the show on the last three days, were also the center of attraction. Each of the three was so different in make-up that each added to the other by comparison. President Elliott's cabin-shaped exhibit, showed the roses that took the eye for variety. A. N. Pierson, Inc., great group was so extraordinary that the crowd looked with amazement at the extent of the mass. Adolph Farenwald's display of roses and ferns in a circle on the floor showed up to advantage.

F. R. Pierson Co. received a certificate of Merit. Myers & Samtmann received a certificate for the new rose, "Hilda." S. J. Reuter & Son and Robert Scott & Son were awarded silver medals. A. N. Pierson, Inc., was awarded three certificates and carried off the first prize of \$250. The honors for pot roses were divided between M. H. Walsh and Thomas Roland. The Society of American Florists' silver medal was awarded to M. H. Walsh. The judges made memorandum: "The rose Madison, exhibited by the Brant, Hentz Flower Co., in the opinion of the judges an excellent rose, apparently a variation from the Bride, is shown in excellent shape." So close was the character in quality of the mass of exhibits that the judges made the following special report at the conclusion of their awards: "The judges wish to call attention to the special excellence of the total exhibits staged. The competition was so keen that there was very little difference in quality and size between those awarded first and second prizes, and the exhibits of the roses at large were of a quality exceedingly even and close seconds to the best. William F. Kasting, Frederick Burki, Otto G. Koenig, Walter F. Sheridan, judges. The judges for the second division were Messrs. Emil Buettner, Park Ridge, Ill., and Joseph Hill of Richmond, Ind.

The display of pot and climbing roses by M. H. Walsh of Woods Hole, Mass., most certainly was an enormous exhibit. Adjoining this was a rose garden laid out in a wonderful manner by Thomas Roland, of Nahant, Mass. These two exhibits covered so much space and along the main aisle that they were seen and admired and talked about without limit, and the number of questions that were asked regarding these plants, the time of their bloom, whether they would grow around a porch, would they grow in a back yard, will they grow on a northern exposure, is the southern sun too hot for them, etc., would make a small book. The retailers who exhibited under a special class put up five fine and interesting exhibits.

At the annual meeting which was well attended the delegation of English gentlemen was present. Adolph Farenwald was elevated to the presidency and Philip Breitmeyer was chosen vice-

IBERIS SEMPERVIRENS LITTLE GEM.

The hardy perennial candytuft is too well known to need any description here. The dwarf variety shown in the picture is well named, for it is a "little gem," being a perfect sheet of pure white flowers in the spring. As a pot plant for Easter it meets with a ready sale. M. C. Ford, the New York

wholesaler disposed of an enormous quantity for Easter, also of pink flowered Phlox subulata, which brought \$3.00 to \$4.00 per dozen wholesale in 4-inch pots. We are indebted to H. A. Dreer, Inc., for the photograph of this Iberis also for that of Nierembergia rivularis which appears herewith.

president. Eber Holmes, of Montrose, Mass., was added to the executive committee and Mr. Wallace R. Pierson was re-elected for a term of three years. Treasurer H. O. May was re-elected as was also the secretary. The question arose concerning the holding of the next Rose Show and the Carnation Show upon the same date in Detroit. Twenty-eight new and old members paid dues during the exhibition.

The medals and certificates and special prizes will be delivered without undue delay.

BENJAMIN HAMMOND, Sec'y.

NIEREMBERGIA RIVULARIS.

This is a very desirable hardy perennial well adapted for rockeries and Alpine gardens in which much interest has been aroused of late. As the pic-

ture shows the flowers are large and beautiful. The flowers which are produced abundantly from June to September are bell-shaped, creamy white with yellow throat. It makes a close matted growth seldom reaching more than six inches in height.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

Preliminary schedule for Summer Exhibition to be held in Philadelphia, Pa., June 23 and 24.

Class 1. President Burpee's cup, value \$25.00, for the finest collection of Sweet Peas, 12 vases, 12 varieties.

Class 2. The W. Atlee Burpee prizes for vase of one variety of Spencer type Sweet Peas introduced 1911; first prize, \$5.00; second, \$3.00; third, \$2.00.

Class 3. The W. Atlee Burpee prizes for vase of grandiflora type of Sweet Peas; first prize, \$5.00; second, \$3.00; third, \$2.00.

Class 4. The Henry F. Michell Co.'s prizes for 6 vases of Sweet Peas in the following six varieties: Nora Unwin, Asta Ohn Spencer, Lovely Spencer, Captain of the Blues Spencer, King Edward Spencer, Blanche Ferry. First prize, \$10.00; second, \$5.00.

Class 5. The Henry F. Michell Co.'s prize, for the best vase of Spencer Sweet Peas in mixed varieties; \$2.50.

Class 6. The Henry F. Michell Co.'s prize for the best vase of "magnificent" Sweet Peas mixed; \$2.50.

Class 7. The Peter Henderson & Co.'s prize of \$15.00 to be awarded to the exhibitor of the best vase of not less than 50 stems of Martha Washington Sweet Peas, own foliage (amateurs only).

Class 8. The Peter Henderson & Co.'s prize of \$10.00 to be awarded to the best collection of 12 distinct varieties of the Waved Spencer Sweet Peas, not less than 12 stems to a vase, own foliage (amateurs only).

Class 9. The Arthur T. Boddington prize, a silver "Challenge Cup," value \$50.00, for a collection of Sweet Peas, 25 varieties, not less than 25 stems to a vase, to be shown with Sweet Pea foliage only. To be won twice by the same exhibitor. Arthur T. Boddington will also award to the winner of this cup (each time won) a cash prize of \$25.00, also \$15.00 second prize and \$10.00 third prize.

Class 10. The Harry A. Bunyard prizes for vase of vari-colored Sweet Pea. First prize, \$3.00; second, \$2.00; third, \$1.00.

Additional prizes are invited from the trade, which will be published from time to time.

For further particulars write to:

HARRY A. BUNYARD, Sec.,

Obituary.

Emile Michel.

Emile Michel, florist, died at his home in Little Neck, L. I., N. Y. on April 3rd, age 44 years. A widow and several children survive him.

John F. Sharkey.

John F. Sharkey, formerly in the employ of Thos. Young, Jr., and who later conducted a retail florist store at 46th street and 6th avenue, New York, N. Y., died April 4th at the age of 32 years. He is survived by a widow and daughter.

Dr. Edward Palmer.

Dr. Edward Palmer, a well known botanist and explorer, died at Washington, D. C., April 11th at the age of 80 years. He was for many years connected with the National Museum, Smithsonian Institute and Bureau of Ethnology.

Mrs. George Stollery.

Mrs. Catherine W. Stollery, wife of Geo. Stollery passed away April 10th, at her home at 5063 Southport Ave., Chicago, after a short illness. Interment took place at Rosehill and services were held at Rosehill chapel, Thursday, April 13th. Mrs. Stollery leaves four small children and a husband.

Wm. R. Starrett.

The many friends of William R. Starrett were greatly shocked to learn of his sudden death April 12. He had been at the office of the Chicago Carnation Co., where he was sales manager, each day as usual, and left for the last time Tuesday evening, in the best of spirits. That night he succumbed to heart failure and at the inquest headache powders were named as a probable cause.

Will Starrett was born in Chicago twenty-six years ago and was the son of the well known florist John Starrett of the La Salle Hotel. He was married seven years ago to Julia Hoff, who, with two sisters and two brothers survive him. The funeral took place on Friday from the residence at 3635 Cottage Grove Ave and interment was in Mt. Olive Cemetery. Will Starrett was one of the most popular young men in the trade. Always obliging and of a kindly disposition he will be missed by his associates. On Easter Sunday his sister Mrs. Roy Coppersmith passed away at the Lakeview Hospital and the family have the sympathy of the trade in their double bereavement.

Edward A. Moseley.

Edward A. Moseley, secretary of the Interstate Commerce Commission, author, publicist, legislator and philanthropist, died on April 18, at Washington, D. C., after an illness of six months.

In the passing of this big-hearted, magnetic man the country loses one of its most useful citizens and horticulture a devoted enthusiast. The daily papers have recited his public achievements, his unique services on behalf of the traveling public and transportation interests, his tact and administrative ability as displayed during his 24 years' as Secretary of the

Interstate Commerce Commission, from the time of its appointment until his death, and we shall therefore confine these notes to a brief and most inadequate recognition of his association with horticultural interests and the personal esteem in which he was held by all with whom he came in contact in this circle.

It was his intense love for flowers and his unbounded esteem for those engaged in their culture, that had much to do with the whole-hearted kindness and courtesy which Mr. Moseley extended to the representatives of the Society of American Florists in their appeal against the injustice of the United States Express Company a few years since. The Society of American Florists, of which he was a life member, owes a big debt of gratitude to Ed. Moseley as also does every

EDWARD A. MOSELEY

individual interested in the transportation of flowers by express.

The Florists' Club of Washington loses, by his death, a member who was a member because he loved the organization, the art for which it stands and the boys who are its moving spirits. He was at all times ready to place himself at their disposal whenever he could be of service. To all he was a most delightful companion, a steadfast friend, a personality both loving and lovable. After funeral services in Washington, the body was taken to his native town, Newburyport, Mass., for burial. Mr. Moseley was 65 years of age. He leaves a widow and one daughter.

CHICAGO NOTES.

Trade Notes.

Wm. Lynch, in charge of the cut-flower department of the E. H. Hunt Co. is reported as about to take up the growing part of the business.

The Chicago Carnation Co. are rapidly getting their new rooms in shape for occupancy on the first of May. Mr. Kline has been engaged as sales manager.

Jas. Fitzgerald, night watchman for many years in the florists' stronghold, the Atlas Block, corner of Wabash

and Randolph, met his death April 14, by falling down the elevator shaft.

The Desplaines Floral Co. will rebuild four of their greenhouses this spring and equip them with cement benches. Some very fine Sangamo and May-day carnations were seen there just before Easter and Mr. Blewett stated that he would grow the latter extensively next year.

A. Lange tried a new method of delivering his Easter plants and flowers which proved very successful. Instead of employing taxicabs as formerly he engaged high school boys to deliver with wagons. The students from the North Western University also proved good help in the sales department.

O. J. Friedman is moving from his store in the Stratford Hotel Block and will combine all his forces for the present in the one store in the Congress Hotel. A new office for the cashier is under way and other changes will be made to increase the facilities for handling the trade. Another store may be opened later.

Personal.

E. B. Washburn is back again at his desk entirely recovered from his recent illness.

Just before Easter E. C. Amling had the misfortune to be taken down with tonsillitis, but everything went on as before in that well ordered store.

A. Meyer, of South Holland, Ill., is again one of the first to send in pansies. His immense seedling daisy is keeping up to its reputation made last year.

Kalamazoo, Mich.—Former City Treasurer Abraham Newland who with William Van Peenan conducted a greenhouse and florist business on Cork street has been missing since March 27th. As far as can be learned there was not the slightest reason why he should leave Kalamazoo without telling of his destination and purpose of departure.

Bargain in 2½ inch Carnation Stock

READY TO FIELD AT ONCE.

We offer until sold, for spot cash, 30,000 selected stock raised for our own planting. Established in pots in February, extra strong. Also 20,000 R. C.

DELPHINIUM BELLADONNA.

Dreer's Hardy Delphiniums

Belladonna. The freest flowering of all the Delphiniums and the most valuable for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants, \$1.50 per dozen, \$12.00 per 100, \$100.00 per 1000.

Dreer's Gold Medal Hybrids. Unquestionably the finest strain of mixed hybrids ever brought together, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants, \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

Formosum. A splendid strain of this popular favorite dark blue variety, 85 cents per dozen; \$6.00 per 100; \$50.00 per 1000.

Chinense Blue and White. 75 cents per dozen; \$5.00 per 100.

Choice and Rare Named Hybrid Varieties

Amos Perry. Symmetrically formed, semi-double flowers of a rich rosy-mauve, flushed sky-blue, conspicuous black eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Amyas Leigh. Large spikes of rich sky-blue flowers, the inner petals rich rosy-plum with white centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Belladonna. The freest of all, never out of bloom. Beautiful turquoise-blue flowers. 15 cents each; \$1.50 per dozen; \$12.00 per 100.

Duke of Connaught. Rich oxford-blue, with distinct bold white eye. \$2.50 per dozen; \$20.00 per 100.

Julia. Gigantic flowers of a pretty "Cornflower" blue, beautifully veined with rose and large pure white eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Lemartin. Similar in growth and habit to Belladonna, but with rich Gentian-blue flowers with white centre. 20 cents each; \$2.00 per dozen; \$15.00 per 100.

Mrs. Creighton. Semi-double, outer petals deep sky-blue, centre rich plum with black eye. 25 cents each; \$2.50 per dozen; \$18.00 per 100.

Mme. Emma Zaiser. Flowers nearly 2 inches in diameter, rich cambridge-blue, flushed rose, jet-black-centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Mme. Violet Geslin. One of the finest, flowers perfectly round, clear blue, centre lavender, with bold white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Musea. Large circular flowers of a curious shade of rosy-mauve, edged cambridge-blue, with dark eye. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Portia. Lovely "Cornflower" blue, with faint flush of rose and black centre. 25 cents each; \$2.50 per dozen; \$20.00 per 100.

Queen Wilhelmina. Massive spikes of sky-blue flowers flushed with rose, with very large pure white eye. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

Rembrandt. Large loose spikes of bright sky-blue flowers, inner petals rosy-lavender, the whole suffused with a silvery sheen. 30 cents each; \$3.00 per dozen; \$25.00 per 100.

White Seedlings. These have been carefully selected and will be found desirable in any collection. 30 cents each; \$3.00 per dozen.

NEW WHITE DELPHINIUM.

Hybridum Moerheimi. The first really pure white Delphinium introduced and a sterling novelty; a strong vigorous grower and a remarkably free bloomer. Stock limited. \$2.00 each.

Dreer's Superb Double Hollyhocks

Decoration Day Roses

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

Hardy Perpetual Roses

We offer extra-strong forcing stock, in the following varieties, true to name: Price, 75 cts. for 5 (of one variety), \$13 per 100, \$120 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.
Anne de Diesbach. Bright carmine.
Ball of Snow (Boule de Neige). Large, pure white.

Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Capt. Christy. Delicate flesh color.

Clio. Satin blush; very fine new sort.
Duke of Edinburgh. Bright vermilion.
Fisher Holmes. Dark velvety crimson.

Frau Karl Druschki. The finest white in existence.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson; the popular Rose.

John Hopper. Bright rose, with carmine center.
La France. Peach-blossom pink.
Mme. Charles Wood. Bright carmine.

Margaret Dickson. White, with pale flesh center.
Marshall P. Wilder. Cherry-rose and carmine.

Magna Charta. Dark pink.
Mme. Gabriel Luizet. Light, satiny pink.
Mrs. John Laing. Rich, satiny pink.

Mrs. Sharman Crawford. Deep rosy pink.
Paul Neyron. Lovely dark pink.
Persian Yellow. Hardy yellow rose.

Prince Camille de Rohan. Dark crimson-maroon.
Soleil d'Or. Large, globular flowers, varying in color from gold and orange to reddish gold, shaded with nasturtium-red.

Ulrich Brunner. Cherry-red; grand rose; free. For Prices, see above

English Moss Roses

Assorted, White, Pink, Red. Large dormant plants, from open ground. 75 cts. for 5, \$14 per 100.

Baby Rambler Roses

PHYLLIS. Very fine clear pink, highly recommended. \$1.25 for 5, \$20 per 100.

PHYLLIS (Grown as a Standard). \$2 for 5, \$35 per 100.

BOSKOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30 per 100.

BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85 cts. for 5, \$15 for 100.

BABY DOROTHY (Grown as a Standard). For description, see above. 50 cts. each, \$4.75 for 10, \$45 per 100.

CATHARINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85 cts. for 5, \$15 per 100.

MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85 cts. for 5, \$16 per 100.

MME. NORBERT LEVASSEUR (Baby Rambler). Strong, field-grown plants, 75 cts. for 5, \$14 per 100.

BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40 cts. each, \$3.75 for 10, \$35 per 100.

Ramblers and other Climbing Roses

CLIMBING BABY RAMBLER (Miss C. Mesman). A novelty for 1911, where the Baby Rambler is popular, the climbing type will soon become so, too. We have a small stock, and offer same as follows. It is a true Polyantha type, color deep rose. 50 cts. each, \$2.25 for 5, \$40 per 100.

GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown. \$1.50 for 5, \$22.50 per 100.

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15 per 100; 4 to 6 feet, \$2.25 for 10, \$20 per 100; 7 to 8 feet, extra heavy, \$4 for 10, \$35 per 100.

DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15 per 100; 8 to 9 feet, \$2 for 10, \$18 per 100.

TAUSENSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15 per 100.

TAUSENSCHON (Grown as a Standard). Fine for forcing. 40 cts. each, \$3.75 for 10, \$35 per 100.

Something New in Roses for Florists

Half-Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40 cts. each, \$4 per doz., \$30 per 100.

BABY RAMBLER (Half Standard). Crimson. 40 cts. each, \$4 per doz., \$30 per 100.

BABY CATHERINE SEIMETH (Half Standard). White. 40 cts. each, \$4 per doz., \$30 per 100.

BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45 cts. each, \$4.50 per doz., \$35 per 100.

PHYLLIS (Half Standard). Carmine pink. 45 cts. each, \$4.50 per doz., \$35 per 100.

TAUSENSCHON (Half Standard). Soft pink. 40 cts. each, \$4 per doz., \$30 per 100.

MRS. CUTBUSH (Half Standard). Rose pink. 40 cts. each, \$4 per doz., \$30 per 100.

Well-Known Climbers

Mme. Plantier. White.
Baltimore Belle. Pale blush color.
Prairie Queen. Red, changing to pink.
Seven Sisters. Clear pink.
75 cts for 5, \$14 for 100

English Grown Hybrid Tea, or Everblooming Roses, etc.

Hybrid Tea or Ever-blooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in Winter, they give a wealth of bloom all through the Summer months and late in the Fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp pink at the ends of the petals, center coral-red or salmon-pink, shaded with chrome yellow. Very fragrant. 40 cts. each, \$1.75 for bundle of 5, \$30 per 100.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5, \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for Summer-flowering and cutting.

Maman Cochet (Pink). Color is clear, rich pink, changing to silvery rose; very double and fragrant.

Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride.

\$1.25 for bundle of 5, \$22.50 per 100.

ROSE, Etoile de France. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson-red velvet, the center of the bloom vivid cerise-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field-grown, 85 cts. for bundle of 5, \$15 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10, \$22.50 per 100.

GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bedder. It is a perfect sheet of richest crimson-scarlet all Summer. A strong, vigorous grower, \$1.75 for 10, \$15.00 per 100.

VISCOUNTESS FOLKESTONE. A large full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous, \$1.25 for 5, \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5, \$20.00 per 100.

RICHMOND. The well-known red Rose of commerce, \$1.25 for 10, \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor Summer growing, \$1.25 for 5, \$22.50 per 100.

BETTY. Copper-yellow, overspread with golden-rose. A fine formed Rose, large and moderately full, \$1.75 for 5, \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 for 10, \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 for 10, \$22.50 per 100.

AMERICAN BEAUTY. Almost too well-known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong, field-grown plants, 75 cts. for bundle of 5, \$14 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center, large full, globular; sweet-scented, \$1.25 for bundle of 5, \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor Summer-blooming. Bundle of 5 for \$1.25, \$22.50 per 100.

A GREAT HAIL STORM IN ST. LOUIS.

A great hail, wind and rain storm visited this city on Thursday, April 13th, at 5 P. M., and all the florists of the city suffered a heavy loss of glass and plants. The store men in the western part of the city with show houses had a great loss, as all were stocked up with their Easter plants. Out in Kirkwood where all of the violets, sweet peas and the bulk of the carnations come from there was an almost complete loss of glass and the heavy rains that followed soaked the blooms to such an extent that many were ruined. The majority of the losers carry hail insurance and those that did not undoubtedly will do so after this.

The heaviest losers in the city were the C. Young & Sons Co. President Young says he can't estimate the loss but thought it would run near to \$25,000. Other sufferers are Bentzen & Co., Koenig Floral Co., F. H. Meinhardt, Chas. Bleekert, Alex. Waldbart, C. C. Sanders, Grimm & Gorly, Huettermann, A. G. Greiner, R. Frow, A. Sanger, Robt. Scott, Alex. Johnson, J. Nyflot, Schilds, Steers and a host of smaller places. Those in the city with plant houses who lost heavily were Kalisch Bros., F. C. Weber, F. H. Weber, Ellison Floral Co., Theo. Miller, J. F. Windt, Volkman & Townsend Floral Co. Mrs. M. M. Ayers and George Waldbart just escaped the hail. The city park departments sustained a heavy loss at their Forest Park Greenhouses. Cannon Floral Co. and Jos. Hauser at Webster also had a big loss. At Kirkwood there are so many that it would take up too much space to mention all the names. The Oakland Floral Co., Wm. Winter, F. W. Ude, Jr., and Hugo Gross, who have the large plants had a complete loss. The estimate of glass destruction in Kirkwood is upwards of 215,000 feet.

The aggregate loss to florists by this hail storm will perhaps run close to \$75,000, if not more.

CORRECTION.

The report of the sale of stock of the Davenport Nursery Co., Davenport, Iowa, given in the April 8th issue of HORTICULTURE was secured from an apparently reliable source. It appears not to have been authentic, however, as Mr. Bryant informs us that the stock has not been sold.

In ordering goods please add "I saw it in HORTICULTURE."

One wise man can fool ten fools easier than ten fools can fool one wise man.

The wise lily bulb buyer never buys just because the price is low, even from his best friend for the simple reason that since he is in business to make money, he can't afford to buy anything but that which will net him the most profit on his investment.

There is no brand known which will net a larger real profit on the average than Horseshoe Brand Giganteum.

They cost only a little more per bulb but not a cent more than they are worth.

Now, are you willing to pay just a little more for a real first class article in lily bulbs? Write us for catalog.

Seed Trade

Seeds and Bulbous Roots for Canada.
(From Consul Frank Deedmeyer, Charlottetown, Prince Edward Island.)

Under the pending American-Canadian reciprocity agreement flaxseed or linseed, cotton seed, and other oil seeds; grass seed, including timothy and clover seed; garden, field, and other seeds, except flower seeds not specially mentioned, when in packages weighing over 1 pound each, will enter the Dominion free of duty.

The value of imports by Canada of seeds and bulbous roots declined from \$3,559,454 in 1908 to \$2,083,619 in 1909 and to \$1,181,173 in 1910. Of the 1910 imports \$1,030,218 worth came from the United States. Freed from duty and under the stimulus which agriculture in the Dominion is likely to receive with the unhampered admission to the United States of farm products, American seeds and bulbous roots will be in great demand in the Canadian Provinces this year. The principal imports in the fiscal year ending March 31, 1910, in this line were: Mangolds and beet, \$44,241; carrots, \$9,421; grass and clover, \$855,440; other field and garden seeds, \$291,613; mustard, \$21,761; rape seed, \$9,407; turnip seed, \$10,867.

In eastern Canada agriculture is becoming more diversified. The farmers, leaving the production of the cereals for export to the West, aim more at a variety of crops raised from selected seed. To extend the sale of seeds and bulbous roots it is suggested that American exporters exhibit at the agricultural and seed fairs held in the fall in all sections of the Dominion. The dates and places where such fairs are held can be ascertained on application to American consular officers.

In Prince Edward Island agriculture is intensive and diversified. With few exceptions the farms are under 100 acres in area and owned by the occupants. In 1910 the value of the farm and animal products of this island was \$12,000,000, or about \$900 per farm. With free markets in New England and New York for their products, the income of these farmers will be increased 25 per cent.

(A list of dealers in seeds and bulbous roots in the Province of Prince Edward Island may be obtained from the Bureau of Manufactures.)

Notes.

We are informed that the price of French bulbs this year is to be still higher than last year. The reason for the advance is not apparent.

Sam. M. Sibley, genial representative of Leonard Seed Company, Chicago, is laid up sick in Baltimore. Nothing serious, though, we are assured.

Rocky Ford, Colo.—D. V. Burrell has purchased 10 acres of land here for experimental work and plans to build a greenhouse later and use the whole 10 acres for seed growing.

Providence, R. I., seedsmen report that the cold weather and tardy spring have had a discouraging effect on the retail seed trade which up to date, is a long way behind where it should be.

Ole K. Olson, the industrious farmer

Phila., Pa.

of Parker, has contracted for 800 acres of seed peas to be grown in this section of the country, all of which has been contracted through the Coulter-Adams Seed Co., of Ogden, for the various large seed houses of New York, Michigan and California, etc. The farmers will be paid an average of three cents per pound F. O. B. St. Anthony.

J. R. Sharp, on Route 2, has contracted to grow ten acres of seed peas on his farm for Ole K. Olson.—St. Anthony, Ida., Chronicle.

PUBLICATIONS RECEIVED.

The Gladiolus.—Published by Vaughan's Seed Store, Chicago and New York.—This book purports to be a practical treatise on the culture of the gladiolus, with notes of its history, storage, diseases, etc., and a perusal of its contents shows that it fills the bill. It comes at an opportune time when the gladiolus is rapidly coming to the front as a specialty and with the impulse of an energetic society to help promote its advancement. The authors of this book are Matthew Crawford and Dr. W. Van Fleet. All useful details, such as soils, planting, cultivating, digging and curing, cleaning and grading and storing, growing from seed and from bulbets, crossing, enemies and diseases, are fully explained and the gladiolus fraternity will, no doubt, extend a hearty welcome to the book. There are 100 pages and several full page illustrations.

Grand Rapids, Mich.—The council committee on parks reported that it favored the proposition of M. A. Tuinstra to sell the property known as the Smith greenhouse to the city for \$12,500, the same to be made a part of John Ball park. It recommended, however, that the matter be referred to the park board, which was done.

Easter Market Reports

BOSTON

About Easter? Oh, yes; judging from the state of the wholesale flower markets in this town the growers must have made a mistake and thought it was Christmas they had to deal with. There was no particular evidence of flowers having been stored up for the occasion—the production was simply far greater than the demand. Carnations sustained the worst shock. Of this staple there were actually wagon loads which could not be moved at \$7.50 per 1000—one-third of the average winter price of such stock. It was indeed a hard blow. As to roses, the best sellers were the 18 to 24-inch stem class. Small roses were a glut. Beauty had only a limited sale. Cut lilies sold unexpectedly slow bringing one-third to one-half less per bloom than those on pot plants. There were quantities of stocks which nobody cared for and daffodils and tulips for which no use could be found. Now we come to the other end of the story. Lily of the valley experienced a splendid demand. Violets were used in enormous quantities but not equal to past years. Sweet peas were the surprise of the season. They seemed to have captured the violets' best stronghold as corsage favorites and their sale was something wonderful. Another surprise was in the smilax demand. It seemed to have recovered its former popularity for church draping and the call could not be met. There is not much to be said about the plant trade. As heretofore—but even more so—the plantsman got the biggest share

of the public's money. Azaleas were actually at a premium at the wind-up. Lilies sold well, the only drawback being the excessively short-stemmed ones which were not liked by the buyers. Acacias, hydrangeas, rhododendrons, astilbes and all other Easter staples sold out satisfactorily.

CHICAGO

The history of the Chicago flower market during Easter week was not in any marked degree different from that of other years. There was every indication of plenty of stock along all lines except Beauties, and this held

true to the end of the week. Prices on first class stock held as quoted for Easter, but lower grades dropped towards the latter part of the week, when every one cut and sent into the market every available flower. There was lively discrimination then on quality and poor stuff sold for what it would bring. Everything cleaned up fairly well and made room for rush stock for the last days, and many retailers replenished their supply Saturday and Sunday after they considered trade nearly over. The low price of

Easter Market Reports

(Continued from page 579)

all flowers compared with that of many former years was in favor of an increased total when sales are footed up and made work easier for the salesman also. All in all, the season that tries the patience and makes a florist wish he was anything else, passed without any serious happenings and the prices pleased the people, and only poor stock, with few exceptions, was left unsold. The retail florists are all pleased with the comparatively low prices for Easter and are not experiencing the sudden cessation of business that usually occurs after a holiday.

Reports concerning CINCINNATI business for Easter vary. Some report business as good and better, while others say it was not quite up to last Easter. Owing to the absence of Beauties the call for Richmond was far in excess of the supply. Killarney and White Killarney were next in line. While the supply was good still a good many more could have been sold. Other roses cleaned up nicely with no orders too large and price very reasonable considering the quality. Good fresh carnations cleaned up at good prices, the call for different colors being evenly balanced. As is usual around a holiday there was a noticeable evidence of pickled stock on the market and these were sold for whatever they would bring. About ten days before Easter the local papers came out with an article stating that according to several of the local growers, lilies would be scarce in this market for the Easter trade. Undoubtedly by this time the boys who were responsible for this item are thoroughly convinced, for never before were there so many lilies to be had as this year. There being only a limited amount of bulbous stock offered it moved to good advantage. Snapdragon, stocks and sweet peas met with a ready sale. Many were the complaints regarding New York double violets, for when exposed to the air they went all to pieces. All green goods were in good supply with the exception of smilax.

Detroit florists are slowly recovering from the biggest Easter trade ever. Work was considerably aggravated by inclement weather Friday and the prevailing tendency of ordering late; in fact, hardly any Easter orders were booked before

Thursday. There was an abundance of stock and everything cleaned up nicely at the same prices as prevailed last year. No particular preference was noticeable, but considering violets one is justified in calling it a cut flower Easter.

NEW YORK The supply of flowers on hand for the Easter trade in this market was something unprecedented. Knowing this in advance and fully realizing how disproportionate the Easter cut flower demand has been in recent years as compared with that for plants, the flower wholesalers, generally, expected a slump. They got it. As to lilies there were untold thousands of them and thousands were left over unsold, although six and eight dollars a hundred would have been a welcome offer. As to roses—everybody seemed to be exactly on crop. Beauties—there seemed to be cords of them and the growers were frantic in their efforts to unload. Nobody thought of asking over \$20 a hundred for the finest specials and lots of such were let go at half that figure. Specials of other varieties of roses could not be moved at \$8.00 per 100. The severity of the break in roses is believed by some to be due largely to the advent of the Killarneys, which produce so much heavier crops than the older favorites and as to the Beauty at the present time it undoubtedly suffers from the presence of an abundant supply of splendid Brunners. Brunner always administers a black eye to the Beauty during its few weeks of prominence. Carnations shared in the general shrinkage and had to bear the unenviable repute of being practically the only line of flowers in which any evidence of "holding back" was seen. Violets cleaned up

We can fill orders from 1000 to 100,000 and guarantee the stock. Write us for Chrysanthemum cuttings, ready early in March. J. D. Thompson Carnation Co., Joliet, Ill.

THE NEW HARDY EVER-BLOOMING CARNATION "CRIMSON KING."

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy Carnation Crimson King. Per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

Easter Market Reports

(Continued from page 613.)

fairly well. Lily of the valley took a wonderful sprint; everybody wanted it. Orchids were in insufficient supply and brought stiff prices. Among the things that deserved a big sale but were badly turned down were the lancifolium lilies of which there was a good supply of lovely blooms of the magnificum and Melpomene type. The retail dealers gave little attention to the cut flower end of their business until Saturday night and then they bought only as required for immediate use. The plant business kept them hustling and everything was well cleaned up in most stores. The most noticeable increase seemed to be in the way of Rambler roses, in many varieties, which, with lilies and azaleas, had the lion's share of public favor. The lilies suffered on account of the prevalent short stems, many being only a few inches in height. Genistas, formerly a leading feature, were only occasionally seen. Plants, as a rule, were dressed with taste and an improvement in the arrangement of basket and jardiniere groups was noted. The prevailing opinion among wholesale and retail dealers is that there was as much money spent in New York this year as at any previous Easter for both flowers and plants but it took a considerably larger amount of goods in both cases to make up the amount, because of lower values all through the list.

Easter week

PHILADELPHIA passed off satisfactorily to all

concerned in the wholesale cut flower markets of Philadelphia. A big business was done and it would have been even better except for the rainy Friday and part of Saturday. But when the sun came out at noon Saturday, presto, what a business there was—outdoors and indoors! That one little glint of sunshine made all the difference in the world, and turned gloom into glory and doughnuts into dollars. There was for the week an enormous volume of business (according to all accounts, considerably larger than last Easter) with plenty of everything. There was no scarcity in any line, and in one line in particular—the carnation—there was too much. The carnation growers "got it in the neck," as they richly deserved, for holding back and over-loading the market with "bum" stock, when it was not wanted. Not only did the salted stock fail of a market, but its mere presence and potentiality pulled down the price of first class stock, not only in carnations but good stock in other lines. There never was such a lily of the valley market in our history. Everything went and it was all good stock, too. There never was such a good sweet pea market in our history. Fortunately these two items were at their best and gave satisfaction to all purchasers. These were the two bright and particular spots in the whole situation, and curiously enough, the conditions seemed to take the old timers by surprise. Things had never got that way before in their experience. Heretofore the violets were the thing. As for orchids,

they thought they had too many—but by the wind-up everything in that connection melted away. If the growers had sized things up better, in advance, for this market, better prices could have been got. Roses were plentiful; no shortage except on Richmond and Liberty. In the American Beauty class a good many more might have been sold in the medium grades, but specials and shorts were the order; nothing else in sight.

The Easter trade with
ST. LOUIS the St. Louis florists

was phenomenally large in the sale of plants and in cut flowers it was as large as in any of the previous years. But it does seem as though blooming plants are crowding out the cut flowers at Easter time. Lilies, of course, were the leaders and there were plenty of them. A nice line of Dutch bulb plants were seen and they say they sold well, as did also azaleas and hydrangeas. Most of the West End show houses were covered with burlap and owing to the broken glass from the hail storm a good deal of their stock was damaged, but was soon replaced from local growers. The down-town florists who do not carry so many plants made a fine show of cut stock and say they had a great business. Fortunately the weather was with us and it was lucky for the open-top houses.

The wholesalers had an immense stock of almost everything and at reasonable prices were not near as what the retailer expected to have to pay. Top prices realized for the finest grades were about as follows: American Beauty \$40 to \$50; other roses \$8; lilies \$15; sweet peas \$1; carnations \$5; violets \$1; lily of the valley \$4; hyacinths and tulips \$3. Anything short of highest grade went far below the above quoted figures.

The Easter trade here
SYRACUSE was the largest ever;

stock was very plentiful and good and no advance in prices on pot stuff which was preferred to cut flowers. The most noticeable feature was the largely increased sale of pot roses, Ramblers, and H. P's. Every dealer was practically cleaned out of them while bulb stock hung fire, especially daffodils and tulips, of which large quantities remain unsold. Lilies were in good demand, but the supply was greater. Azaleas sold well, especially the smaller priced ones, those at \$1 to \$2 each being much sought for. Prettily arranged baskets of pansies and ferns, hyacinths and ferns, as well as the larger ones with roses and lilies sold remarkably well. In cut flowers, violets had the call; in roses, Richmond led. There were no special novelties. The trade was much cut up, by fruit stands, department stores and groceries. A great many hyacinths were given away as premiums by rival tea stores.

Providence, R. I. reports a very fine Easter trade, many of the florists declaring that it exceeded by a substantial sum the record of any previous year.

Atlanta, Ga.—W. A. Hollingsworth, florist, has moved to the corner of Houston and North Pryor streets from his former location at 89 Peachtree street.

CONNECTICUT HORTICULTURAL SOCIETY.

Our society has for several years desired to hold an exhibition of bulbous flowers, just before Easter, and this year we made a good beginning. At the meeting of April 11th, the special feature was a fine display of tulips, narcissus, daffodils, Easter lilies, Dutch hyacinths, etc., mostly by Howard A. Pinney, from the greenhouse plant of John Coombs, of which Mr. Pinney is one of the foremen. He won a diploma, and Alfred Cebelius a certificate of merit for three splendid plants of *Calceolaria hybrida*. William H. MacKenzie, of the Sessions greenhouses at Bristol, also was awarded a certificate of merit for his exhibition of sweet peas, narcissus and tulips.

Mr. Pinney gave a talk on the culture of the various bulbous plants, bringing out many facts of value to greenhouse men. The judges for the evening were J. A. Weber of Hartford, George B. Baker of New Britain, and W. H. Shumway of Berlin.

Of great interest was the report of various members concerning the National Flower Show at Boston. James M. Adams, President Huss, J. A. Weber, John Gerard and W. H. Shumway, all described in glowing terms the features of that wonderful exhibition that most appealed to them.

During the last month, we have lost one of our oldest and most estimable members, Mrs. Maria L. Barnes, who was a life member, and Wm. W. Myers, of Hartford, an amateur horticulturist.

On the 28th instant, our schedule calls for "Hardy Primula Night," with a paper by President Huss on Alpine plants. The lateness of the season may prevent the schedule being followed.

GEORGE W. SMITH, Sec.
Melrose, Conn.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next monthly meeting of the club will be held at Horticultural Hall, Boston, on Tuesday evening, April 25, 1911. The hall being rented on April 18, a postponement was necessary. B. Hammond Tracy of Wenham, Mass., will lecture on the Gladiolus and its culture. The reports of the committee on the S. A. F. National Show entertainment will be given and should prove interesting. There will be some fine exhibits and something to please and enthuse everyone who attends.

W. N. CRAIG,
Secretary.

DURING RECESS.

New York Bowlers.

The New York Florists' Bowling Club meets every Friday evening at Thumm's Alleys, 31st street and Broadway. Contests for the team membership to represent New York at Baltimore next August will begin May 6. Matches with Tuxedo, Madison, N. J., and other clubs are being arranged for.

Cincinnati Bowlers.

The following were the scores bowled Monday, April 17th:

Schubbruch, 178	247	L. Fritz, 151	155
Hackman, 172	205	T. Jackson, 160	189
Chaffin's tr., 155	169	O. Hoffman's tr., 125	138
Horning, 176	187

HELP WANTED

HELP Furnished for greenhouses, gardens, estates, etc. Skilled and unskilled. National Labor Exchange, 918 Walnut St., Phila., Pa.
HENRY C. PRICE

WANTED

Outside foreman; a young man accustomed to managing a large force of men in nursery. State salary expected, and qualifications. M., care HORTICULTURE PUB. CO.

WANTED—A gardener that understands planting and care of outdoor flowering crops and shrubbery. All outdoor work. One willing to work. With board. Single man preferred. Address E. C. Ludwig Floral Co., 710 E. Diamond St., N. S. Pittsburgh, Pa.

WANTED—An assistant florist at once at Connecticut Agricultural College. A single man having one or two years' experience can fill the position. Must be of good habits. Address reply, stating experience and salary expected to A. G. Gulley, Agricultural College, Storrs, Conn.

MAN with some experience in landscape or ornamental gardening; able to sell goods. Excellent opportunities to advance. "P. D." care HORTICULTURE.

HELP WANTED—An experienced plant grower to work under foreman; send references and wages expected to Thomas Roland, Nahant, Mass.

WANTED—Man with general knowledge of ornamental nursery stock, landscape planting, etc. Address N. D. Pierce, Norwood, R. I.

SITUATIONS WANTED

GARDENER wishes position on private place; single man, efficient in greenhouse work, flower garden, fruit and vegetable growing. Best references. J. Bennett, Hillhurst, Orchard Park, N. Y.

BUSINESS CHANCES

A GOLDEN OPPORTUNITY

A good practical grower of greenhouse and outdoor crops can take over at a nominal rental a greenhouse plant of about 16,000 square feet of glass; a fine heating plant with 100 tons of coal in the cellar; houses well stocked with Carnations, Sweet-peas, Freesias, Parsley, Asparagus Plumosus and Sprengerii. A good cottage is a part of the plant, with from 10 to 20 acres of the very best land. Fine location. Markets for crops already established. Plant has been conducted as a semi-commercial establishment; owner now wishes to be relieved of all responsibilities. For further particulars apply to JOHN T. WITHERS, 1 Montgomery St., Jersey City, N. J.

MISCELLANEOUS

WANTED—Several thousand English Ivies, 4-in. pot plants or field-grown plants. Give price per 1000. Wm. Plumb, South Natick, Mass.

FOR SALE

FOR SALE—Greenhouse to take down; new up-to-date, 35 x 135 feet, about 4 feet high at one end, 10 feet at other. Glass 16 x 24. Iron frame house bolted together. About 20,000 feet hot water piping. Would sacrifice for immediate sale. H. Y. P., care HORTICULTURE.

FOR SALE—Steel galvanized-Iron Wind-Mill Tower, 75 ft. high; tank capacity, 5000 gallons. Also a 2½ h. p. Mertz & Weiss kerosene engine. Everything in perfect condition. Address Beau, Larchmont, N. Y.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

PATENTS GRANTED.

Cocoanut Fibre Soil

Fertilizer, tonic, moisture and everything necessary for bulbs, seeds, plants, lawns and especially your fruit trees, young and old. Nature's grower, not forcer.

20th Century Plant Food Co., Beverly, Mass

FOR SALE

For Sale

Greenhouses covering 8200 square feet of ground, with 1 to 10 acres of ground to suit purchaser. Well stocked with roses, carnations, mums and bedding plants. In Ohio, doing good business. Good reason for selling. Address E. S. C., care HORTICULTURE.

BOILER FOR SALE.

A Hodge make of East Boston tubular steam boiler in use a few months only, and in splendid condition. Length 13 ft. 4 in., diameter 40 in. 2 in. tubes, modern rocker grate, and complete front and all irons for bricking in. Price, loaded on your team here or on cars, \$100.00—and it is worth \$400.00. W. C. Ward, 577 Adams St., E. Milton, Mass.

FOR SALE—Greenhouse must be sold at sacrifice; 20,000 feet glass, steam heat, over an acre of ground. Town and suburbs of 35,000. Greenhouses located just outside of Sharon, Pa. This is a great opportunity, but requires quick action. D. W., care HORTICULTURE.

What the Users say

FIRED BOILERS SINCE 1885—THE KROESCHELL IS THE BEST OF ALL.

"Have fired greenhouse boilers since 1885, both steam and hot water. Yours suits me the best. I have two of your boilers. At one time I had two cast iron boilers working together and during a blizzard the rear section of one boiler gave out and the front section of the other sprung a crack a couple of months later. No more cast iron boilers for me. I came very close to freezing out in both instances."

G. M. THOST, DeSoto, Mo.

TO BUYERS

Patronize our advertisers, they will treat you right

One of Our Farmstead Greenhouses

And why do we call it a "Farmstead"? Simply because it is a farm greenhouse attached directly to the farmhouse. It only goes to show how indispensable greenhouses are getting to be. Cold frames are all right in their way, but if you really want to raise top notch plants, with the least trouble and a surety of success, then a greenhouse is the thing.

Here and there we hear every once in a while of some one putting up an old wooden house on a private place. Of course you and I wonder at it in these days of the splendid iron frame construction, with all their lightness, attractiveness and wonderful endurance.

Any iron frame house is better than a wooden one, but there are certain hard and fast reasons why Hitchings is actually the best. Give us a chance to give you the reasons. As a starter, send for the new catalog. It is beautifully illustrated.

Hitchings and Company

Main Office and Factory: Elizabeth, N. J.

New York Office: 1170 Broadway

Tuberous Rooted Begonias

In five separate colors — White, Scarlet, Crimson, Pink and Yellow —

SINGLE, \$2.50 per 100 \$20.00 per 1000
DOUBLE, \$4.50 " " \$40.00 " "

GLOXINIAS

In four separate colors — White, Blue, Red and Blue-bordered White. **\$4.50 per 100.**

Finest Mixed, all colors —
\$3.50 per 100.

CROTONS

Fine assortment, well-colored. 5-in. pots,
\$9.00 per dozen.

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12-in., pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted,—*Pteris Mayii*, *Wimsetti*, *Adiantoides*, *Aspidium tsusimensis*, *Cyrtomium falcatum*, etc.

Nice plants, 2¼-in. pots, \$3.50 per 100.

Fruits and Vegetables Under Glass

DISBUDDING PEACHES AND NECTARINES

Varying methods are used in disbudding peach and nectarine trees grown on a trellis. Since it is necessary to remove so many growth buds some system must be practised to secure a uniform and symmetrically shaped tree. Some men tell us to leave growths on both sides of the shoot; some advocate the bottom, others again say the top side only. I am one of the latter and my reasons are forthcoming. After the fruit is set trees should be gone over three or four times at intervals of a few days. The first time remove all breastwood; second time over, remove half the buds which are to come off and finish later. Now, if buds are left on both sides, it often makes a complicated job of pruning. The old growth in the center wants removing and you have two to take its place and where it comes to going back to take a large piece of old wood out you leave a big gap which is hard to fill. If one side methods had been used probably less would have to come out at once and is more readily filled in because that which is left is drawn down into its place. By leaving your growths on the top of the shoot you are continually building the tree up, and the center can be kept open. It is claimed by some that growth left on the under side grows weaker and throws more flower bud. Possible—but if this is used you have to use the other side so much to build up a tree that it amounts to using both sides. Given plenty of room there will be no lack of flower bud on any growth and to secure the best shaped tree by the simplest method growth should be left on the top side as much as possible. There are always a few exceptions, especially at the base of older trees when it would be a folly to stick to this hard and fast rule.

CROPPING PEACH TREES

What should constitute a crop for a peach or nectarine has often been asked. Much depends on what you are going for—quantity or quality. Should it be a combination of both or—to be more exact “the happy medium”? I would say one fruit to every square foot of trellis covered by the tree. This may not seem much, but if evenly distributed will show up well and finish first-class fruit. To obtain the best finish to a peach or nectarine, they should be propped up by placing a piece of smooth lath behind the fruit and in front of the trellis. This brings them up to the light and sun, which puts the color into them. The second swelling can have advanced three or four weeks when this is done. Take care to sprinkle a light shade on the glass with a hand syringe for a few days after this is done or the sun may mark a few which were hidden away under the foliage. Use whitening or something which will soon wear off, as it is only required for a few days. If not off then it must be gradually taken off.

SUCCESSION HOUSES

Those which have been thinned should have a little manure sprinkled on the border during watering. It is

better to go over them once with the hose and then apply the manure and water it in. By so doing the manure is not washed through to the drainage. A light top dressing of half decayed cow manure spread loosely over the border will be found a great advantage to established vines and also peach and nectarine trees which are swelling a crop. This will serve as a mulch, which is needed through the hot weather and also furnish food substances for the roots. Notice that I say *half decayed* cow manure. This must be so, as green manure would contain too much ammonia and in one night probably half the foliage would be burnt off the vines, as though a fire had hit them. If it is difficult to get the manure in the required stage, get the green stuff and spread it in the sun for a few days, which will dry it and allow some of the gases to escape. The house should never be closed up for a few days after applying this. Leave a crack of air on night and day to allow some of the remaining gases to escape. Peach trees are not so easily burnt as vines; the manure should be applied immediately after stoning and any weak growing varieties or weak trees which may be showing the result of a heavy crop last year can be given enough to cover the root balls soon after going out of flower.

POT VINES

Pot vines will now be coloring and feeding should be gradually withheld. Do not let them become at all dry at the roots. Less moisture will be needed in the house as the fruit nears ripening, especially at night time. Any watering or damping that is needed should be done early enough to let the house dry up before night. Until the fruit is ripe they will need the floors, etc., dampened two or three times daily, during the early and hottest part of the day, but when the crop is ripe and being used, one damping at mid-day is sufficient. A light shading on the glass will help the berries to retain their color and flavor; this can be put on before they finish if the foliage is lacking in giving the bunches a little shade. When grapes are nearly finished and ripe it is essential that a little heat be kept in the pipes in all dull and damp weather to cause a circulation of air and prevent the moisture from condensing on the berries. Fruit should be cut in the early morning before the sun has been on them long and placed in a cool cellar or ice box.

MADRESFIELD COURT GRAPES

This is one of the finest black muscats we have in cultivation and has some peculiar characteristics not to be found in any other grape. It takes its name from where it was originated—Madresfield Court, Worcester-shire, England, the Earl of Beauchamp's country place. Barron gives its parentage as Muscat of Alexandria and Black Morocco. We trace the former in shape of berry and bunch and flavor—the latter in color and mode of growth. Following its Muscat parent it likes plenty of air and goes even further to demand more. It is wonderful how even each bunch will come. Throughout a house the bunches will not vary half a pound. Its chief fault is a liability to crack the berries when near finishing. This can be obviated by letting some of the

top laterals grow and careful watering. Do not let the border get dust-dry and then suddenly soak it. As coloring commences cover the border over with clear straw to help retain the moisture; keep a steady temperature and a crack of air on right along. This will be found a good acquisition to grow as an early or second early grape. Its freeness makes it worthy to be bracketed with Black Hamburg, if the other difficulties can be overcome. The same flavor is not found in any other variety.

CUCUMBERS

From now on cucumbers will need a light shade on the glass, as a growth will be made faster. Pinch a little harder and make the beds firmer. Cucumbers are best cut in the early morning and plunged in cold water in a cool cellar or ice box for a few hours before shipping.

OUTSIDE MELONS AND SWEET CORN

Two or three weeks can be gained on outside melons by making a sowing inside in pots and planting them out on the hills as soon as warm enough, which probably would be the day of making the first sowing otherwise. Allow about three weeks from date of sowing until time of planting out. A quantity of seed can be sown in a seven or eight-inch pan and potted off into threes and when rooted through shift on into sixes. This will give a good-sized plant at time of planting. Grow as cool as possible, which will harden them to the outside conditions they may meet when going out.

The same is applicable to sweet corn; insert five or six seeds in a six-inch pot which has been filled loosely with good soil and give a temperature of 60 degrees. Reduce the number of plants to four, should all come, and gradually harden off. It is very injurious for the plants to become root bound in these pots, so gauge the time of planting out as near as possible. Allow the plants about three weeks in the pots.

George H. Penson

Mr. Penson's next notes will be on the following: Canker of Melons; Muscat Vines in Flower; Packing Peaches; Ice Boxes.

Laelia Gouldiana

(See Cover Illustration.)

This beautiful and brilliantly colored *Laelia* flowers in the middle of the winter with 18 to 24-inch long spikes, carrying from three to seven large flowers of a beautiful crimson purple color, with a velvety hue. The flowers sometimes exceed 4 inches in diameter.

The form and the intense color of the petals and sepals are superior to all other *Laelias* known. The lip is divided into three lobes, the middle one being purplish crimson of a very dark shade, and having a golden fleshy crest in the center. In fact this *Laelia* is the most beautiful in existence. Its fine robust foliage is about a foot long, and born in pairs on the round spindle-shaped slightly corrugated bulbs.

The rich coloring of this noble orchid is of dazzling effect. Our collector who found these plants in flower, writes that the sight was marvelous. The contrast with the flowers of the white *Laelia anceps* was really fairy-like.

ED. ROEHRS.

Seasonable Notes on Culture of Florists' Stock

CAMPANULAS FOR NEXT EASTER

If you want nice, large plants by next fall, it is not too early to sow some of *Campanula Medium*, or its sub-variety *calycanthema* (cup and saucer). The seed may be sown in a cold frame where the soil has been made rich, fine and mellow. Draw shallow rows across the surface of the frames, three to four inches apart, and sow the seed evenly, but not too thickly; cover with fine soil and press it all over with a board, then water gently with a fine rose. Shade with cheese cloth until the over-drying sunshine passes, when it can be taken off. This is an excellent way to do with all seedlings until germination appears as it is a great preservative of the moisture. When the seedlings come up give them full light and sunshine and when they are two or three inches in height they can be potted into 2½-inch pots. When they have filled these pots with roots they can be planted out in the open ground about 18 inches apart, and with good cultivation they will make large clumps by October, when they can be dug up and potted.

POMPON CHRYSANTHEMUMS

Those who lifted a batch of pompons last fall and stored them in frames during the winter will have good stock to propagate from now. Florists should grow quite a few of these, for they come in handy. They are sufficiently hardy to be recommended to any customer as a profuse autumn-flowering perennial. They can be grown either in the open ground and dug up and potted early in September or grown under continuous pot culture. To be really at their best they should be allowed to come into flower under glass. In order to grow fine sprays, especially the taller varieties, they should be grown on a bench in a well ventilated house from start to finish. This is a good time to plant a border from divided plants or from cuttings, as these will give you fine material to cut from.

AZALEAS

Plants that were left over should be attended to at once before the new growth has made much advancement. Some of them will probably need repotting. Use a compost of equal parts of fibrous loam, peat, leaf mould, with addition of some clean sand. Give the roots a careful examination before potting to see if the ball is dry, and, if so, stand them in a tub of water until they are wet through and then let them drain before you pot them. After potting they should be kept a little close for a couple of weeks and syringed regularly every day. In the case of plants that don't need potting, that have flowered with perfect and uniform development of bud, just clean them of any faded flowers, and if out of balance prune them into shape. Place them on their sides and give them a hard syringing so as to strike the under side of branches and foliage and give them a cold frame and gradually harden them off previous to putting outside. They are better to be

plunged and grown under lath frames during the summer.

COMPOST

It is time now to prepare compost for all cut flower stock. Those who had their sod piled up last fall and exposed to severe freezing should have soil of a fine friable nature by this time. The preparation of all compost should be done in a thorough going manner. To be right it should be turned several times before it is used. For all such crops as roses, carnations and chrysanthemums, there is plenty of time during May or June to have it in good shape for these crops. A turning over during May will suffice to render it in good condition for nearly all bench crops. If manure was added to it last fall in the proportion of one load of manure to three loads of sod, it will have changed the proportion by this time to one fifth by the gradual decomposition that takes place with the manure. So all such soil would be better to have a load or two of barnyard manure added to every four of soil during these turnings, but the application of additional fertilizing matter should be deferred until later in the form of mulches or liquid stimulants, as the plants may actually require it.

HYDRANGEAS

These plants are very useful and fast selling around Memorial Day. Plants intended for that date should have their flower heads well forward by this time, and by the 10th of May should show their color well. If any are backward they can be forced by applying a temperature anywhere from 60 to 65 degrees at night. Give them frequent sprayings overhead, and grant plenty of room for each plant if you want nice specimens. From now on until the trusses show good color give them manure water two or three times a week, and be sure to give them needful quantities of clear water so that they may not receive any check. For the last ten days in May give them a cooler temperature in a well ventilated house, which will give intensity of color in the bloom and a deeper color of the foliage. Put in a batch of cuttings now for next year and grow on.

FERNS

At this season all ferns require shade in a greater or less degree, but if the shade is too heavy, in many cases it will spoil the fronds by producing a weakly growth. Just apply enough of shade to prevent the strong sun from burning or taking the color from the fronds. Now when there is not so much fire heat needed, the atmosphere of the house naturally becomes charged with moisture, so it is important to give more air during the day, and later to keep air on both night and day in order to prevent condensation, especially dangerous to the younger and more tender ones. Where it is intended to grow large specimens they should be kept moving as fast as possible now. Most of this class of ferns can be materially assisted by the careful use of liquid manure, but the pots should be well filled with roots before applying any stimulants. From now on sow successional batches of spores, as it takes from 6 to 8 months from the time of sowing to give useful sized plants. All the soil used for sowing spores should be sterilized so as to kill any weeds or fungi. Use pans and fill half full of good drainage material. Then fill the pans to within half an inch of the rim with a sifted mixture of soil, leaf mold, peat and sand in equal proportions. Give these pans a good watering and allow them sufficient time to drain, then sow the spores thinly over the surface and plunge up to the rim in a propagating frame where there is a temperature of at least

65 degrees night, and see that they are protected from the sun. Seedlings should be pricked out in small clumps when they show signs of making a leaf.

POINSETTIAS

It is time now that we began to think of poinsettias for next holidays. Remove all stock plants to a well-lighted bench where there is a temperature of about 65 degrees at night. When cutting in, you can use the old-wood cuttings by placing in a warm frame and keeping the temperature from 65 to 70 degrees and in about 3 or 4 weeks they will be rooted. Pot them into 3-inch pots, using a good loam to which has been added one-fourth of rotten manure. To prevent flagging see that they are shaded from the sun. These will need several shifts during the summer. The best stock is those taken from the new growth of old plants; they produce the largest heads of bracts. When taking these cuttings off leave one eye, so that you will have another batch of cuttings later on. See that the sand is kept wet and spray them twice a day, and in about three or four weeks they will be rooted. Lift and pot into either 2½ or 3-inch pots. Keep moist and shaded until they take hold of the soil, when they can be given the fullest sunshine.

SMILAX

The beds that were cut down for the Easter trade will begin to show new growth now and will be greatly benefited by a top dressing of about an inch of cow manure and loam in equal parts with a sprinkling of bone dust, as they are very strong feeders, and give them abundance of water at the roots with a good syringing twice a day. As the plants throw up their shoots be sure to keep the strings in position so that the new growth will not become entangled. Give the young plants a shift into 3-inch pots before they become too pot-bound using a good loam with about one-fourth of cow manure. Keep them in a temperature of 60 degrees at night.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Acacias; Bedding Plants; Carnation Stock; Orchids; Dahlias; Stevia.

A Pointer for Local Florists

ISMENE CALATHINA

Plant the bulbs in succession from the middle of April to July. This item does not force well and is best planted outside when conditions warrant. Gives two, three or four lovely white flowers to the stalk, and is a grand thing for funeral work. It is a poor shipper and that is the reason why it is not a standard item in the commercial markets of the country. Local florists have to raise it for themselves from the bulbs. An excellent keeper. Won't stand rain. In brief, these are its merits and its faults; but its merits far outweigh, and we feel we are doing a favor to the retail interests of the country in giving them this pointer. The botanists have now got this plant named *Hymenocallis calanthina*, but the old name is retained here for popular reasons. *Paneratium maritimum* is another good subject in this connection, and it also has been drawn under the *Hymenocallis umbrellae*. Plenty of good bulbs to be had cheap.

Now is the season of activity in all horticultural work. The call for efficient and reliable men is heard from every department and no one need now be long out of work if he seeks

it in sincerity. Watch the Help and Situations Wanted columns of HORTICULTURE, all ye who are in quest of a position or who need help. An advertisement does not stay there long; a week or two, at this season of the year, especially, suffices to accomplish its object. There are many good men filling good positions today who got there through HORTICULTURE's Want Column.

In another column of this issue will be found the introductory chapter of a series of law on "Mendel's Law," by Dr. Herrmann Decker, published in Germany and now translated into English for HORTICULTURE by G. Thomen.

Within the last decade much has been said and much written about Mendel's law, but as to imparting any clear conception in the average horticulturist's mind of what it all means, most of it might as well have been left unsaid and unwritten. These articles by Dr. Decker differ from most of the literature on this subject in their freedom from scientific unintelligibility and the simple, easily understood terms in which the author expresses himself. We believe that very many of our readers will peruse these plain talks on this all important subject with pleasure and benefit.

Anyone reading the flower market reports in HORTICULTURE regularly cannot fail to note the frequent coincidences in widely separated localities as to the popular demand for certain things. A satisfactory cause for the phenomenon is often beyond the reasoning of the most observant operators. During the past few weeks, for instance, we find that sweet peas and lily of the valley have experienced a most remarkable popularity, not in one locality, merely, but "here, there and everywhere," whilst other staples which have repeatedly outclassed and outsold these items are spurned. Wait a while and the tables will turn, with equally wide-spread accord. Rather curious, is it not?

As stated in our news columns, Governor Foss has seen fit to veto a special appropriation for additional buildings and equipment for the Massachusetts Agricultural College at Amherst. The grounds upon which his disapproval is based are that he believes the College should be self-supporting. Massachusetts, he asserts, is too liberal with free scholarships and should require payment from students coming, not only from outside but from within the State. He further recommends that all demonstration work in the various departments be put upon a commercial basis and adds that "if such demonstrations are to help the farmers to make money they ought to demonstrate money making power." The eminent gentleman has perhaps taken his stand without due consideration of the indirect effect the adoption of his policy might have on the attitude of the rural people towards this useful institution. We have a vivid recollection of the rumpus which was started a few years ago over some trifling sales by the College of certain of its horticultural products. The protest which was voiced against this alleged harmful competition against the citizens of the State made lively music around the State House for a while. It's a dangerous proposition and "the more thou stir it, the worse it will be."

Legislative Insanity

What causes all this insanity among our legislators? Why this burning desire to hit the seedsmen with prohibitory and impossible bills? The mania is not local. It extends east, west, north and south. The two latest are New York and Pennsylvania. Both of the latter bills are enough to make the angels weep in the ignorance and intolerance they exhibit. The drawers of these bills not only don't know what they are talking about, but they are forging weapons that are bound (if consummated) to do incalculable damage to the agricultural interests of the country.

There seems to be but one answer to the question:—The desire on the part of these legislators to cater to the farmer vote. The legislator says to himself: How can I get myself "in good" with the farmer? The answer is "Go" for someone who supplies the farmer with something. Right or wrong does not matter. "Go" for something furnished or somebody who furnishes the farmer, and the farmers will all flock to you!

It has been suggested that Department officials, State and National, are back of it all; but we have too much respect for the common sense of these men to give that argument a moment's consideration.

We are thoroughly convinced that the whole insanity has its origin in the crude belief of legislators that they must "get busy" for the farmer.

In most of the bills as drawn there is a ludicrously lame attempt to exempt the farmer and hit the seedsman. Section 4 of the Pennsylvania Bill is a conspicuous instance of this. Now, how in the world can any one tell where the farmer stops and the seedsman begins? As a matter of fact there is no such distinction. The seedsman is a farmer and the farmer is a seedsman. The seed industry is but an auxiliary branch of the farming industry. If you hit one you hit the other. In their blind efforts to cater to the farmer by hitting the seedsman they defeat their own object and make themselves ridiculous in addition.

As a sane and well tempered reply to an inquiry (from Harrisburg to a Philadelphia seedsman on the pending bill) the points covered by the following brief telegram are worthy of earnest consideration:—

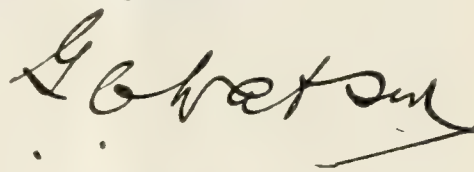

"Depends entirely what you mean by purity. The Zurich test figures chaff and immature seeds impurity. If this act goes into effect the farmers of Pennsylvania will be unable to get seeds at any price. You might as well try to stop the Almighty giving us little eggs and little apples as try to stop Him from giving us light seeds as well as plump. An act of Legislature will not make water run up hill. To my mind section four makes the proposed act unconstitutional, as it violates equality before the law—guaranteed to all citizens."

The point for the seedsmen to observe, therefore, is to make it absolutely clear, and spare no pains in driving this point home—and this point only—that the farmer and the seedsman are one and indivisible. Don't waste effort on details. Hit them (the legislators) on the fundamental weak spot—that they are hurting instead of helping the farmer!

Don't argue with the legislators about purity tests and vitality tests. These are commercial matters, regulated by price—the haggle of the market. Point out to

them that the farmer and seedsman are absolutely one and that they (the legislators) have everything to lose and nothing to gain by monkeying with such a delicate machine as seed producing with its innumerable uncontrollable conditions.

Rubbish will generally show the highest vitality. Some of the finest and most valuable strains of seeds often show weak vitality. As a general rule the higher the breeding the lower the vitality. The very finest strains are usually shy seeders and the seeds of same are generally much lower in vitality than common rubbish. To establish arbitrary percentages is, consequently, the height of folly—and any legislator who proposes such a thing should be confined for life, as a dangerous maniac and a menace to the fundamental industry of the nation—Agriculture!

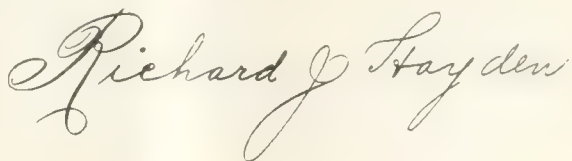

The Hyacinth Scare

Editor HORTICULTURE:

There has been considerable discussion in the public prints recently in connection with the statement attributed to the Superintendent of the Public Grounds Department of Boston that the hyacinth is dangerous to health as a poisonous bulb, and your editorial under the caption, "Hyacinths Barred," in your last issue has led me to say a few words on this important subject. These bulbs have been eliminated from the public gardens of this city and the assertion is made that they are injurious to the face and hands as well as to the soil in which they grow. An experience of some twenty years in handling hyacinths, however, has convinced me that the hyacinth is not such a dangerous bulb as the public have been led to believe and in this I am supported by many of the greatest authorities on the physiology of plants. Little, if any, definite knowledge is known of the toxic effects of plants on soil but all agree that the hyacinth has no more injurious effects on the soil than other plants. Of course, without the replenishing of food elements, any soil will in time become impoverished.

The most that can be said against the hyacinth in its relation to poison is that people handling the bulbs of hyacinths are sometimes subject to an eczema which is produced by the raphides in the plants but this does not amount to poison as the alarmists would have us believe, and different species of hyacinths vary somewhat in their irritating properties.

I am intensely interested in this subject and think a large amount of good would be accomplished if the views of your numerous readers could be obtained upon this question. To me it seems a great hardship that the public should be debarred from enjoying the cultivation of these exquisite plants, whose fragrance and beautiful shades of color are superior to any of the harbingers of spring.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting of this club at Horticultural Hall on Tuesday evening, April 25, was well attended. Various reports in connection with the recent National Flower Show were in order. Thomas Pegler, chairman of the entertainment committee, told of the work they had done and was followed by Peter Fisher, treasurer, who reported all bills paid and a balance unexpended of \$481.18. It was voted to add to this the amount of a former similar overlay, making \$600, and deposit same as a separate entertainment fund for possible future needs.

A letter from the secretary of the New York Florists' Club extending thanks for courtesies received by its members visiting the Flower Show was read. Secretary Craig announced that Olmsted Bros. were in a position to place four or five competent young gardeners at San Diego, Cal. A knowledge of tropical plants would be a prerequisite. Eleven new members were added to the roll.

The exhibits of the evening were a calla with double spathe from David Weir; gladioli, Mrs. James Lancashire and Dawn, from Peter Fisher; *Choisya ternata*, from Mrs. A. Hemenway; *Prunus Davidiana*, from an unnamed exhibitor; violets of fine quality, from H. F. Woods, and a vase of *Lilium candidum*, from W. N. Craig. The latter were superb, many of the spikes carrying ten and eleven flowers and buds. They were of the sturdy Northern France type and the flowers broad petalled and heavy.

The special feature of the evening was a brief paper on the *Gladiolus*, by B. Hammond Tracy. Mr. Tracy urged that this flower should be more largely forced for the cut flower trade, for which it is particularly valuable because of its wide range of clear colors and its capacity for long keeping. He alluded to its origin, the habitat of the various original species, the character of the hybrid forms, classification, etc., and threw some light on the sources and manner of the introduction of the popular modern varieties. He recommended deep plowing of the ground and the planting of the corms five or six inches deep, or even more in sandy soil. Owing to the fact that the large sized bulbs mature earliest, he recommended the planting of corms of various sizes to ensure succession of bloom. For fertilizer he advised the application of bone meal and agricultural lime to the soil, with stable manure—the latter only in the fall, unless well rotted. He cuts his spikes as soon as four or five flowers have opened, this being better for the corms and the flowers open perfectly in water. As to hardness the "bulb-lets" are hardy but not the mature corms. As to diseases, the most troublesome are dry rot and soft rot. The old corms should not be forcibly removed from the base of the new ones, but allowed to dry up until they easily drop off and the peeling of bulbs is also a fruitful source of rot, which is induced by abrasions or bruises.

In reply to a question he named

America, Mrs. T. King, Branchleyensis, Dawn, Canary Bird or any other good yellow and Augusta as his selection of the best six varieties. A discussion on the possibility of forcing some scarlet variety for Christmas brought out little of value, but it appeared to be the consensus of opinion that some plan for early maturing by growing in pots or otherwise the previous year would be a prerequisite to successful forcing in early winter.

Mr. E. H. Wilson being called upon, made a few brief remarks, voicing the pleasure he felt at being again amongst old friends after a year's wandering. He said that the traveler finds all sorts and conditions of people, but in his case he felt he had been extremely fortunate in coming in contact with good people and in Boston, especially, he had found the greatest crowd of large-hearted people he had met anywhere in the world.

BAR HARBOR HORTICULTURAL SOCIETY.

At the meeting of this society, April 6th, Wm. T. Burton, gardener for Mrs. John S. Kennedy, read a very instructive paper on Civic Improvement on the "Resident Home" gardens, and a very general discussion followed. Some weeks ago this society appointed a committee of five to offer prizes the coming summer for the best kept resident home gardens and lawns. On Thursday evening, April 13th, Prof. E. F. Hitching, horticulturist at the University of Maine, gave a very interesting lecture on "The Apple and Apple Growing in Maine," at the Horticultural Rooms, under the auspices of this society. There was a large attendance of the public, who asked a great many questions, which goes to show the interest there is arising in the State of Maine for apple growing. The lecturer stated that he had had communications from nearly every state in the Union in reference to Maine's future and the orchard outlook there.

The Spring of 1911 will go on record as being one of the coldest, if not the coldest for a great many years. Lots of frost in the ground and not a vegetable or flower seed put in yet.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of the New Orleans Horticultural Society was held Thursday, April 20, and was well attended. John T. Reeks and Frank Quinette was admitted to membership. A paper on "Store Management" was read by P. A. Chopin.

The Metairie Ridge Nursery Co. exhibited a splendid lot of Golden Glow chrysanthemums, the flowers of which were perfect in every respect.

At the next regular meeting of the society a paper on "Landscape Gardening" will be read by Max Scheinuck.

Wm. B. Cleaves, well known as the representative of Arthur T. Boddington, has taken up his permanent residence in New Orleans as an agricultural engineer.

YONKERS HORTICULTURAL SOCIETY.

At a meeting on Friday, 21st inst., H. Scott assumed his presidential duties and received a hearty welcome. Three new members were elected. Discussion centered principally upon the culture of vegetables, both early and late. The society's regular social session will be observed on Friday, May 5th, and Messrs. Millott, Cochran and Blanche were appointed to make arrangements for same.

H. M. B.

CLUB AND SOCIETY NOTES.

The North Shore Horticultural Society met April 21, at Manchester, Mass. Speaker, Joseph Tillson; subject, "Grape Culture Under Glass." Mr. Tillson's paper was much appreciated and a full discussion followed. A committee was appointed to report back on plans for a picnic next summer to take the place of the annual banquet.

The fifth annual meeting of the Playground Association of America will be held at the New Willard Hotel, Washington, D. C., on May 10 to 13, 1911. Practical questions confronting those interested in playgrounds and public recreation will be discussed by experts. For program and additional information write to Secretary Playground Association of America, 1 Madison Ave., New York City.

The Albany, N. Y., Florists' Club met on April 6. It was decided to co-operate with the Albany Mother's Club in the observance of Mother's Day, Sunday, May 14, to donate white carnations to the Club and to discourage the practice of raising the price of carnations for that occasion. Louis Schaefer, who succeeds Patrick Hyde as chairman of the entertainment committee, announced a "smoker" for the May meeting.

SPRING LECTURE COURSE AT N. Y. BOTANICAL GARDEN.

Lectures will be delivered in the lecture hall of the Museum Building of the Garden, Bronx Park, on Saturday afternoons, at 4 o'clock, as follows:

April 29—"The Preservation of Our Native Plants," by Dr. N. L. Britton.

May 6—"What Is Botany?" by Dr. C. Stuart Gager.

May 13—"Transforming an Old Swamp," by George V. Nash.

May 20—"The Reef-Building and Land-Forming Seaweeds," by Dr. Marshall A. Howe.

May 27—"The Influence of Soil Acidity on Plant Distribution," by Frederick V. Coville.

June 3—"How Plants Are Distributed," by Prof. Carlton C. Curtis.

June 10—"The Royal Gardens at Kew, England," by Dr. William A. Murrill.

June 17—"Collecting in the High Mountains of Colorado," by Fred J. Seaver.

June 24—"Past Climatic Conditions Indicated by Fossil Plants," by Dr. Arthur Hollick.

The lectures will be illustrated by lantern slides and otherwise. They will close in time for auditors to take the 5.35 train from the Botanical Garden station, arriving at Grand Central Station at 6.03 P. M.

MEDEL'S LAW AS RELATED TO HEREDITY AND BREEDING.

By Dr. Herrmann Decker.

Translated from "COSMOS," by Gustave Thommen.

"Heredity", is the name given to the generalization of certain facts, concerning the transmission of physical and psychical characters from the parent to the offspring. Among all living beings, people, animals and plants, we find that certain characters, attributes and qualities, belonging to either one of the parents, are reproduced in the young. They have been inherited (transmitted by heredity.)

The action of heredity can be traced through all the ages. In our own families we find among our children, marks and distinctions; as: a certain form of nose, color of the eyes or the hair, texture of the skin, height or other proportions, which we recognize as belonging to either the father or the mother.

Why is this so? How are these things transmitted to the offsprings in ever recurring order? Heredity is a phenomenon in regard to which, until a few years ago, only vague and conflicting notions were entertained. In fact it was mostly taken for granted that it just happened so. There was no apparent law recognized. In every rule and law of nature there is a certain logic, a legitimacy, but until recently there was no way of explaining satisfactorily the question of heredity, consequently the results of many breeders did not come up to expectations and the outcome of many crosses would seem to be simply some vagary of nature.

Breeders had to face the great and important problem of heredity hopelessly and helplessly and many an ill-advised cross was made, simply with the hope that somehow or other the wished for result would show itself. Even Darwin stood yet upon this ground, groping and experimenting helplessly. He was still moving in the rut of popular thinking.

Now comes Mendel. Gregory Mendel, Augustinian monk in the convent of Bruenn, province of Maehren, Austria. In the seclusion of his convent garden he solved the problem, silent and thoughtful. Patient trials, made according to a carefully considered plan, revealed to him the great secret of heredity. He found that it is not only possible, but absolutely safe, to predict the result of matings if the necessary terms and conditions of nature are complied with. His discovery lets him perceive the systematical working of the laws of heredity. The principle which he discovered is simple and selfevident.

In 1865 Mendel modestly placed his discovery before the members of a small circle of scientific men. None of these was able to comprehend the immense scope of it. Even eminent botanists like Naegely did not grasp the idea. So the quiet abbot was forgotten, so was his labor of research and for the time being his discovery came to naught. Nobody remembered Mendel and this happened at the time when Darwin filled the world with new and great ideas about evolution and creation. Unfortunately Darwin never heard of Mendel's lifework; he would certainly have recognized its worth and importance.

Mendel died in 1884, totally unknown

in the world of science. Grass obliterated his resting place. But in time the problem of heredity claimed the attention of serious investigators more and more and when they began to rummage among the papers of former researchers, his secret was found among the papers which he had left behind.

In 1900, Tchermack, Correns and DeVries, three men at the same time, but independently, found his writings and at once recognized their worth. They read the papers with surprise and admiration. Enthusiastically the experiments were repeated and put to trial. They were found to be correct and nobody could understand how such a valuable discovery could have sunk into oblivion. Mendel's manuscripts were published and his theory was proved and strengthened. The name of the dead abbot is now known all over the world.

Now wherein does Mendel's work deserve especial credit? Wherein was Mendel ahead of his time? He recognized the importance and also the limitations of the problem from the start and after clearly outlining the plan for the work before him he carried it to the end through the patient labor of many years. He approached the problem of heredity in its most simple form; he put his questions up to mother nature and let her answer them through her own children, the plants. Plants are patient and increase rapidly.

Mendel chose for his trials the pea. Even this shows his shrewdness, for, as the pea blossom is self-fertile and its construction almost totally precludes fertilization through extraneous agencies, it left him free to exact from nature clear and concise answers to his questions. He knew that if he wished to solve this great question of heredity he must employ only the most simple and easiest controllable means. In this way only could he hope to succeed. All of the former investigators and breeders had been trying to solve the problem by means of the most complicated and unsuitable agencies and so it was only natural that the results of their labors did not harmonize and prevented the formulation of any law of heredity. No wonder that those men did not succeed. A student of chemistry, for instance, is not supposed to start in on his studies by analyzing a mince pie.

(To be continued.)

BRITISH HORTICULTURE.

The Easter Flower Trade.

Each season there appears to be an increased demand at Easter for flowers for decorative purposes. The growing of bloom for market has now reached extensive limits in Britain, besides the tons of bloom which are imported from southern France and elsewhere. Just before Easter we experienced a second edition of winter, with snow and occasional blizzards. This had the effect of seriously retarding the development of the out-door daffodils, with the result that the supplies have not been as heavy as usual. Excellent prices have been made, these being in advance of the average. A good trade was done in arums, white stock, scarlet pelargoniums, and other flowers for church decoration. The florists in London are expecting a busy time in

making preparations for the coronation festivities. Queen Mary has chosen pink carnations as the chief flower for the bouquet which is to be presented to her by the Gardeners' Company. This choice is likely to set the fashion in the popular adoption of the carnation for decorative schemes, notwithstanding the zealous booming of the sweet pea in some quarters.

Electricity in Horticulture.

At a recent meeting of the Farmers' Club, in London, Professor J. H. Priestley, of Bristol University, lectured on "Electricity as a factor in crop production." The methods were described by which electricity has been applied to the crops, either by small electric currents running through the soil, or by the use of atmospheric electricity collected by conductors, also by the discharge of high tension electricity from overhead wires, as well as the use of the electric light. In reply to questions, the lecturer stated that he preferred to employ electricity outside rather than inside a greenhouse, as owing to the moisture in the latter case there was a great leakage of current. He agreed that much research work had yet to be done, and that the apparatus must be so perfected as to be workable by non-experts. So far he had proved that it was possible to stimulate the growth and vitality of plants and it was in that direction he proposed to continue his experiments. At the close of the meeting, a resolution was passed inviting the Board of Agriculture to assist in further experiments which are necessary for additional research.

Jottings.

An experimental station has been established at Burbage, Leicestershire, by C. C. Hurst, for the purpose of applying Mendelian methods of research to the practical breeding problems of agriculture, horticulture, and forestry.—The National Gladiolus Society has now been launched for the advancement and improvement of this flower. The Secretary states: "It is the intention of the Society to compile a handbook as soon as possible, giving valuable information, and a classified list of named varieties, with their flowering season. It is felt that the gladiolus, second only in beauty, form and coloring to the orchid, is not nearly wide enough known, and the Society hopes through its members to increase its cultivation till it is grown in every garden."

Silas Cole, head gardener to Earl Spencer, has been appointed director of "The Times" experimental station at Guildford, in succession to the late Mr. Chas. Foster. Mr. Cole was the raiser of the Countess of Spencer sweet pea, the first waved variety which was the fore-runner of the latest development of sweet peas.

In connection with the "Festival of Empire" to be held at the Crystal Palace, from May to Oct., a special feature is to be made of the floral displays.

W. H. ADSETT.

Middletown, N. Y.—Someone on the night of April 6th forced an entrance to F. H. Rau's greenhouse and destroyed a large stock of plants by sprinkling saltpetre over them. The police are searching for the culprit and a reward is offered for his arrest.

A PACIFIC COAST EXHIBITION.

As stated in our issue of April 15, the Spring Flower Show of the Pacific Coast Horticultural Society and the California State Floral Society at San Francisco was a gratifying success in extent and quality. Since then we have learned the pleasing fact that it was also a splendid success financially.

We present herewith views of three of the many attractive groups of which photographs have been sent to us and we feel sure that our readers will agree with us, after seeing them, that San Francisco florists stand second to none in the art of plant grouping. The show was under the direction of Angelo J. Rossi, of the firm of Pelicano, Rossi & Co., who has good reason to feel elated over the artistic and financial success achieved.

PUBLICATIONS RECEIVED.

The Carnation Year Book, 1911. This is the second annual edition of this valuable publication, published by Hayward Mathias, Lucerne, Stubbington, Fareham, Kents, England. The Perpetual Flowering Carnation Society was inaugurated in 1906 and the prime movers in its organization were the two gentlemen concerned in this publication—the editor, J. S. Brunton, Burnley, Eng., and the publisher, as above. The book is in fact the official organ of the Perpetual Flowering Carnation Society. The contents include the Report of the Society; rules for exhibitions; registrations of names of new varieties, both in England and America, during 1910; selected lists; report on bedding out trials; useful papers on cultural points, decorative values, etc., by Messrs. M. Todd, M. C. Allwood, C. Harman Payne, Rev. Joseph Jacob, P. Smith, A. Grubb, F. Fitch and J. Gardner; a list of the prize winners at the June and December exhibitions last year. There are many full page illustrations. The book is bound in stiff covers. It is for sale by Mr. Mathias at 1 shilling, 3

Group of Evergreens at San Francisco Exhibition.

pence, or may be obtained from the office of Horticulture, post paid, for 50 cents.

The premium list for the June exhibition of the Newport Horticultural Society has been published. The show will be held at Masonic Hall, Newport, R. I., on Thursday and Friday, June 22 and 23. This is always a very attractive exhibition. Copies of the list of prizes may be had on application to the secretary, Daniel J. Coughlin. The dates happen to be the same as for the National Sweet Pea exhibition at Philadelphia.

The Preliminary Premium List of the Cincinnati Florists' Society has been issued and copies can be

had by addressing the secretary, Geo. S. Bartlett, 131 East Third Street, Cincinnati, Ohio. The exhibition will be held on November 13 to 18, 1911, inclusive, at Horticultural Hall—Music Hall. The prizes for table decoration, handle baskets and bride and bridesmaid bouquets are especially liberal.

MASSACHUSETTS AGRICULTURAL COLLEGE.

In a special message to the legislature, accompanying the report of Expert C. L. Harpham of the Massachusetts Agricultural College, Governor Foss commended the working spirit of the college and suggested that its usefulness to the farmers of the State be increased. He also recommended that all demonstration work at the farm in poultry, market gardening and horticultural work be put on a commercial basis.

He called the attention of the legislature to the fact that although thirty-seven of the States charged tuition to all students coming from outside the State, and in some cases to those within the State, Massachusetts gave free scholarships to all students. He advocated the charging of tuition to students from other States, and approved of Expert Harpham's recommendation to charge tuition to all students.

Because of the present methods the Governor would not approve of the appropriation of \$50,000 for a new dining hall and new dormitory. He approved the granting of \$129,282 for the current expenses of the year, while \$145,800 was asked.

NEWS NOTES.

Macon, Mo.—M. H. Roth is planning to open a greenhouse here.

Lithbridge, Alberta, Can.—The A. Mitchell Nursery Co. is establishing large nurseries at Lacombe and Coaldale.

Lexington, Mass.—Meadow land near Monroe Station has been leased by the New England Nurseries of Bedford.

Plant Group at San Francisco Exhibition.

PERSONAL.

M. P. Lynch is now employed by Julius W. Niesen, Chicago, Ill.

Philip Lavery is now in the employ of Jas. B. Canning, Providence, R. I. Reinhold Schilling has accepted a position with the Park Floral Co., Denver, Colo.

Harry Gray has accepted a position in the store of the State Nursery Co., Helena, Mont.

W. C. Johnson, formerly with E. H. Hunt, Chicago, has opened a flower store in Grand Forks, N. D.

Col. W. W. Castle has been quite ill with inflammatory rheumatism at his home in Weymouth, Mass., since April 17, but is now convalescing.

W. B. Jackson, of Manchester, Mass., has accepted a position as gardener for Mr. C. P. Bassett, on his estate at Summit, N. J.

David Welch, of Welch Bros., Boston, has started on a trip South, by order of his physician, on account of a severe attack of bronchial trouble.

Invitations are out for the marriage of Maurice L. Glass, of the firm of A. Moltz & Co., wholesale florists of New York, to Miss Rebecca Moltz, on May 16.

Mrs. H. Bayersdorfer of Philadelphia has just been discharged from the hospital, fully recovered from a very serious operation. Relieved of the anxiety of the past few weeks, Mr. Bayersdorfer is now preparing to start on his annual European trip and will sail on May 11 on the Amerika.

E. H. Wilson is now out of the hospital at Jamaica Plain, Mass., where he has been confined since his return from China. He hopes to be able to sail for England about ten days hence. Mr. Wilson is enthusiastic over the elegant courtesies extended to him by H. Suzuki of the Yokohama Nursery Co., during the time he was in Japan. Mr. Suzuki sent regards to Boston friends by Mr. Wilson.

Among the visitors in New York

this week is John H. Dunlop of Toronto, Canada.

Visitors in St. Louis: A. Miller, representing Skidelsky & Irwin, Philadelphia; J. J. Karins, representing H. A. Dreer, Philadelphia; D. D. P. Roy, Chicago.

A MEMORIAL DAY DISPLAY.

Following their annual custom, H. Bayersdorfer & Co., of Philadelphia, have been making a two weeks' display of Memorial Day specialties and other seasonable florists' supplies at the Quincy House, Boston. Three large show rooms have been utilized for the array of cypas wreaths, novelty crepe flowers, metal wreaths, sheaves, baskets, statice wreaths with ammobium flowers, brides' bouquet holders, etc. The exhibit is in charge of I. M. Bayersdorfer, Martin Reukauf and Stephen Green and they report a very heavy business done, 19th of April, a Boston holiday, having exceeded any one day hitherto in this respect.

THE BLUEBIRD.

I know the song that the bluebird is singing,
Out in the apple-tree where he is swinging.
Brave little fellow! the skies may be dreary,
Nothing cares he while his heart is so cheery.

Hark! how the music leaps out from his throat!
Hark! was there ever so merry a note?
Listen awhile, and you'll hear what he's saying,
Up in the apple-tree, swinging and swaying:

"Dear little blossoms down under the snow,
You must be weary of winter I know;
Hark! while, I sing you a message of cheer,
Summer is coming and springtime is here!"

"Little white snowdrop, I pray you arise;
Bright yellow crocus, come, open your eyes;
Sweet little violets hid from the cold,
Put on your mantles of purple and gold;
Daffodils, daffodils! say do you hear?
Summer is coming and springtime is here!"

Emily Huntington Miller.

DURING RECESS.

New York vs. Tuxedo.

The Tuxedo Horticultural Society's bowling team were the guests of the N. Y. Florists' Club Bowling Association at the Thumm's Bowling Alleys on Friday evening, April 21st. This was Tuxedo's first game since the team was organized and the boys had very little previous practice, so when defeat came it was not altogether unexpected. The visitors greatly enjoyed the game and the generous hospitality which was extended to them by the members of the New York Club. A prize of five dollars was given by the Revere Rubber Co. for the guests' highest individual score and was won by Albert Fischer. Three games were played and the scores are as follows:

NEW YORK.		TUXEDO.	
Manda,	163 207 137	F. B'rth,	176 152 163
Shaw,	113 170 133	Fischer,	177 171 120
Kakuda,	109 127 123	E. B'rth,	141 157 145
Scott,	146 118 146	Miller,	172 145 116
Ch'dw'k,	159 194 226	Thomson,	90 160 118
690 816 765		756 785 662	
Total2271		Total2203	

The next match of the New York team will be at Madison, N. J.—N. Y. vs. Madison—on May 2. A return match will be played with Tuxedo early in May.

Chicago Bowlers.

Scores for April 19 were as follows:

ROSES.		CARNATIONS.	
Byers,	116 144 150	Kraus,	163 153 142
Katzel,	101 94 89	Ayers,	113 212 190
Myers,	174 172 144	Goerisch,	117 133 145
Craig,	102 92 109	Schultz,	169 174 136
Fischer,	245 196 179	A. Zech,	161 183 148
ORCHIDS.		VIOLETS.	
Huebner,	116 201 152	Wenzil,	140 149 143
Farley,	144 200 165	S'l'ssm'n,	103 183 159
Graff,	147 175 179	Lusson,	128 117 105
Degnan,	123 192 126	F'r'dm'n,	178 170 135
J. Zech,	178 148 146	Lorman,	164 143 172

The last game will be played Wednesday, April 26th and the prizes awarded.

Vaughan & Sperry have at their store a 15-inch silver loving cup which is their prize to the bowler making the highest individual score. It bears the inscription "Individual Championship, Bowling League, 1910-11.

Al Fischer last week made the highest record thus far, an average of 206 2-3 for three games played and his chances are considered good for carrying off the prize.

The Sports and Pastimes Committee of the Chicago Florists' Club have decided to hold the annual picnic at Park Ridge, July 23rd. Allie Zech is chairman of committee.

The annual dinner of the Lenox (Mass.) Horticultural Society was held at the Curtis Hotel April 18 and there were about 75 present. The table was decorated with sweet peas, potted plants, carnations and hyacinths. George H. Cooper of Pittsfield was toastmaster and toasts were given by William G. Clifford, John O'Hearn, John McQuaid and John Enright.

East Brookfield, Mass.—Warren E. Tarbell, vice-president of the Miller Floral Co., Farmington, Utah, will leave for Farmington about June 1st. He will be accompanied by Mrs. Tarbell. Several other easterners are interested in the company.

Plant Group at San Francisco Exhibition.

THE ST. LOUIS HAIL STORM.

Secretary John G. Esler, of the Florists' Hail Association, has sent us a list of the parties suffering loss of glass to greater or less extent in the great hail storm in the southwestern suburbs of St. Louis, which shows that the list we published last week was far from complete. Omitting those names we recorded last week there are on Mr. Esler's list the following: Edward Sexauer, W. Bruecker, Wm. Mackle, Chas. Kronsberg, August Hartman, W. J. Pilcher, Woodbine Floral Co., G. Ahuer, Geo. H. Goebel, Chas. H. Main, Mrs. Theo. Richter, C. A. Hicks, Jos. Deutschmann, Phil J. Goebel, J. F. Ammann, R. Wolfsberger, Arnold Scheddigger, Frand & Aug Venneman, Wald. M. Stretzing, J. E. Muldoon, J. G. Rahner, Mrs. L. S. Werth, M. Niemeyer, J. R. Steinicke. From local newspaper clippings we also glean the following additions: Luther Armstrong, A. Abner and W. S. Hutchinson. Also at Leavenworth, Kans., Sunnyside Floral Co., and the Soldiers' Home greenhouses.

Fred Ammann, who is an officer of the Hail Association, made the rounds to ascertain the exact amount of loss. He thinks the total will run up to nearly 400,000 ft. of glass. Quite a number of the damaged houses have already been repaired and are again in good running order.

FIRE RECORD.

McKeesport, Pa.—The greenhouse of Chas. Dougherty, stocked with Easter plants, was burned down a few days before Easter.

Hudson Heights, N. J.—The greenhouses of W. Bluethgen, Jr., were damaged and residence destroyed by fire, April 7. Only \$1000 insurance.

The National Clock and Electric Company, of St. Louis, who manufacture florists' thermostats, lost their entire plant by fire on Saturday, April 22, their loss is estimated at \$25,000, according to President Bolin. This company is well known among florists from the big display they made at the Rochester S. A. F. convention.

ONE ON TRELEASE.

"Tulips Free, Shaw's Garden."

A display ad. bearing this simple information appears in the local newspapers, and now the management of Shaw's Garden is fearful of the outcome.

The intent of the advertisement is to convey the idea that the exhibition of tulips is free. The flowers or plants are not to be had without risk to the personal welfare of the one bold enough to pluck them.

The ad. was written by Director William Trelease, who, it is expected, will be compelled to arm his staff of gardeners to preserve the tulip beds.

The tulips will flourish for the next two weeks, the weather permitting, and a large crowd of flower lovers are expected at the garden. The garden attaches will be put on their mettle defending the plants and keeping their tempers during long passages of explanations to visitors, who lured by the ad., will come with trowels and baskets to cart off the plants.

A similarly worded ad. during the chrysanthemum season caused no little confusion at the garden several years ago.

—St. Louis Republic.

CHRYSANTHEMUMS and ASTER SEED

ELMER D. SMITH & CO., Adrian, Mich.

Laelia Gouldiana

A natural hybrid between *Laelia autumnalis* and *Laelia anceps*, very rare. Flowers 4 inches in diameter having a wonderful dark crimson color, lasting a long time in perfection.

Decoration Day Roses

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name: Price, 75 cts. for 5 (of one variety), \$13 per 100, \$120 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.
Anne de Diesbach. Bright carmine.
Ball of Snow (Boule de Neige). Large, pure white.
Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Capt. Christy. Delicate flesh color.
Cléo. Satin blush; very fine new sort.
Duke of Edinburgh. Bright vermilion.
Fisher Holmes. Dark velvety crimson.
Frau Karl Druschki. The finest white in existence.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson; the popular Rose.
John Hopper. Bright rose, with carmine center.
La France. Peach-blossom pink.
Mme. Charles Wood. Bright carmine.
Margaret Dickson. White, with pale flesh center.
Marshall P. Wilder. Cherry-rose and carmine.
Magna Charta. Dark pink.
Mme. Gabriel Luizet. Light, satiny pink.
Mrs. John Laing. Rich, satiny pink.
Mrs. Sharman Crawford. Deep rosy pink.
Paul Neyron. Lovely dark pink.
Persian Yellow. Hardy yellow rose.
Prince Camille de Rohan. Dark crimson-maroon.
Soleil d'Or. Large, globular flowers, varying in color from gold and orange to reddish gold, shaded with nasturtium-red.
Ulrich Brunner. Cherry-red; grand rose; free. For Prices, see above

English Moss Roses

Assorted, White, Pink, Red. Large dormant plants, from open ground. 75 cts. for 5, \$14 per 100.

Baby Rambler Roses

PHYLIS. Very fine clear pink, highly recommended. \$1.25 for 5, \$20 per 100.
PHYLIS (Grown as a Standard). \$2 for 5, \$35 per 100.
BOSKOOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30 per 100.
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85 cts. for 5, \$15 for 100.
BABY DOROTHY (Grown as a Standard). For description, see above. 50 cts. each, \$4.75 for 10, \$45 per 100.
CATHERINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85 cts. for 5, \$15 per 100.
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85 cts. for 5, \$16 per 100.
MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants, 75 cts. for 5, \$14 per 100.
BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40 cts. each, \$3.75 for 10, \$35 per 100.

Ramblers and other Climbing Roses

CLIMBING BABY RAMBLER (Miss C. Mesman). A novelty for 1911, where the Baby Rambler is popular, the climbing type will soon become so, too. We have a small stock, and offer same as follows. It is a true Polyantha type, color deep rose. 50 cts. each, \$2.25 for 5, \$40 per 100.
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown. \$1.50 for 5, \$22.50 per 100.
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15 per 100; 4 to 6 feet, \$2.25 for 10, \$20 per 100; 7 to 8 feet, extra heavy, \$4 for 10, \$35 per 100.
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15 per 100; 8 to 9 feet, \$2 for 10, \$18 per 100.
TAUENDSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15 per 100.
TAUENDSCHON (Grown as a Standard). Fine for forcing. 40 cts. each, \$3.75 for 10, \$35 per 100.

Something New in Roses for Florists

Half-Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40 cts. each, \$4 per doz., \$30 per 100.
BABY RAMBLER (Half Standard). Crimson. 40 cts. each, \$4 per doz., \$30 per 100.
BABY CATHERINE SEIMETH (Half Standard). White. 40 cts. each, \$4 per doz., \$30 per 100.
BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45 cts. each, \$4.50 per doz., \$35 per 100.
PHYLIS (Half Standard). Carmine pink. 45 cts. each, \$4.50 per doz., \$35 per 100.
TAUENDSCHON (Half Standard). Soft pink. 40 cts. each, \$4 per doz., \$30 per 100.
MRS. CUTBUSH (Half Standard). Rose pink. 40 cts. each, \$4 per doz., \$30 per 100.

Well-Known Climbers

Mme. Plantier. White.
Baltimore Belle. Pale blush color.
Prairie Queen. Red, changing to pink.
Seven Sisters. Clear pink.
75 cts. for 5, \$14 for 100

English Grown Hybrid Tea, or Everblooming Roses, etc.

Hybrid Tea or Ever-blooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in Winter, they give a wealth of bloom all through the Summer months and late in the Fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp pink at the ends of the petals, center coral-red or salmon-pink, shaded with chrome yellow. Very fragrant. 40 cts. each, \$1.75 for bundle of 5, \$30 per 100.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5, \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for Summer-flowering and cutting.

Maman Cochet (Pink). Color is clear, rich pink, changing to silvery rose; very double and fragrant.

Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride.

\$1.25 for bundle of 5, \$22.50 per 100.

ROSE, Etoile de France. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson-red velvet, the center of the bloom vivid cerise-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field-grown, 85 cts. for bundle of 5, \$15 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10, \$22.50 per 100.

GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bedder. It is a perfect sheet of richest crimson-scarlet all Summer. A strong, vigorous grower, \$1.75 for 10, \$15.00 per 100.

VISCOUNTESS FOLKESTONE. A large full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous, \$1.25 for 5, \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5, \$20.00 per 100.

RICHMOND. The well-known red Rose of commerce, \$1.25 for 10, \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor Summer growing, \$1.25 for 5, \$22.50 per 100.

BETTY. Copper-yellow, overspread with golden-rose. A fine formed Rose, large and moderately full, \$1.75 for 5, \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 for 10, \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 for 10, \$22.50 per 100.

AMERICAN BEAUTY. Almost too well-known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong, field-grown plants, 75 cts. for bundle of 5, \$14 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center, large full, globular; sweet-scented. \$1.25 for bundle of 5, \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor Summer-blooming. Bundle of 5 for \$1.25, \$22.50 per 100.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK CITY

PHILADELPHIA NOTES.

Mothers' Day only a week away. Are you making ready? The thing may be silly, but there's business in it.

Memorial Day next. Just one month from now. The peonies here are only three inches high in the red shoot stage, at this writing—and look very dubious for the great occasion.

The magnolias and tulips are in bloom in Washington Square. The customers are six deep in the seed stores. She is here at last! A month late but better late than never. Sweet spring. Thrice welcome!

Stephen Mortensen has nearly completed repairs on his range at Southampton and the stock has recovered beyond expectation from the fire. The foundations and piping are already in for a big new house, which will be rushed to completion as rapidly as possible.

Fred Lautenschlager, of Kroeschell Bros., Chicago, accompanied by the writer, visited the new Dreer establishment at Riverview on the 19th inst. E. H. Michel, the manager of the new range, was courtesy itself in showing and explaining every detail of this immense place. Mr. Lautenschlager was much impressed with the perfection of the design, and the economy, strength, utility and durability of the completed structures. He considered this the best yet for its special purpose, and an object lesson in progressiveness.

M. Rice, of M. Rice & Co., will arrive in New York on the 29th or 30th, home from his European tour, and will be met at the pier by his partner, B. Eschner and a number of other close friends and relatives who will give him the glad hand. We understand Mr. Rice has had a very successful trip and has combined business and pleasure in about equal proportions. Some of his finds in the way of novelties and improvements in florists' supplies have already commenced to arrive, and every steamer, almost, for this port will add its quota for months to come. Welcome home, Knight of the Market and Counting Room.

Our esteemed and venerable friend, John Clark, of the Botanic Gardens, Washington, D. C., celebrated his 80th birthday on the 23rd inst., by making a brief visit to the home of his son, James, at Riverton, N. J. The latter holds an important position in the Dreer Nurseries. The occasion was made an enjoyable family reunion, as another son, George, who is in the seed department of Dreer's in Philadelphia, was able to attend with his family, as were also other relatives and friends. John Clark is one of the few old-school gardeners still spared to us. He is advanced in years but as young as ever in "Standfast for Truth and Right." John, we salute you, and are brushing up our arguments for the next discussion with you over the House of Lords. May you live long and prosper. You are a credit to Scotland, the land of your birth, and to America, the land of your adoption.

Visitors: Mr. and Mrs. Chester I. Campbell, and Mr. and Mrs. W. P. Edgar, Boston, Mass.; Fred Lautenschlager, Chicago; C. B. Knickman, N. Y.; Jas. Brown, Coatsville, Pa.; Jos.

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft-bodied insects. An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

Tree Renovation by Expert Operators.
Stereopticon lectures on Horticulture and Arboriculture.

Sometimes we receive unsolicited testimonials pertaining to Horseshoe Brand bulbs, of which the following letter from Messrs Hall & Robinson, Montreal, Canada, is an example:

Dear Sirs: Just at this time of the year, when Easter lilies hold command, we think is the time to criticize or exploit the quality of the bulbs supplied the florists by the respective dealers. So we just want to tell you that we are delighted with the quality of bulbs supplied by your firm — Giganteum especially. Our entire stock will average 7½ blooms per plant and the plants average 2 ft. high. They are the best lot of lilies we ever had at Easter time since we have been in business. Hoping you will be able to maintain this high standard, we are

Yours truly,

Hall & Robinson,

per G. A. Robinson.

April 10th, 1911.

Besides the above letter we have many other extracts. You will find by inquiring throughout the country that there is no other brand which will average as high a standard of merit as the Horseshoe Brand. When you want good bulbs, please write us.

any time.*

Dreer's Select Potted Roses

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Seed Trade

The Weather and Its Effect.

The weather, while pleasant for the most part, remains unseasonably cool, greatly retarding vegetation and affecting local retail trade in practically all parts of the country. There will doubtless be an abrupt change one of these fine days to July temperature and those who are grumbling now about the cool weather will be glad to have a little to temper the heat which no doubt will be uncomfortable to all. Looks very much as if we were going to have a very late season and business will probably extend well into June. Whether the total volume will be equal to last year is problematical, but the chances are that it will not.

Pea and Bean Surpluses.

Notwithstanding the extremely short crop of peas and the great scarcity during the past winter, quite a number of retailers have a surplus to offer at this time, but such offerings are, as a rule, too late to be available for those who could have used them to advantage early in the season. No doubt, the total quantities which will be carried over this year will be small, but each one is eager to dispose of every bushel of surplus at present market values, knowing full well that it may be many years before we again see prices at this season's levels. We have not seen as many surplus lists floating around as usual at this season of the year, but there are a few which of course, could not possibly be omitted by those who send them out. There seems to be beans enough of nearly all varieties to fully satisfy every requirement, and doubtless there will be some surplus carried into the coming year.

Rochester's Convention Prospects.

We are informed that there is to be a meeting of the presidents of the Canners' Machinery & Supplies Association and the Brokers' Association at Rochester the coming week to decide on the place for the next National Canners' Convention. We have expressed the opinion heretofore that Rochester would be the place selected, and there is nothing at the present time to indicate any other conclusion. As soon as the matter has been definitely decided we will be pleased to advise the trade.

Germination of Seed Corn.

There has been more or less fault found with the germinating qualities of seed corn this season, very few samples of the late varieties showing germinating qualities as high as 80 per cent. Notwithstanding this fact, however, there has been comparatively little complaint thus far, but should weather conditions be unfavorable at the time of planting so as to retard the growth to any extent, then complaints will doubtless be many and loud. It is earnestly hoped that the weather and soil conditions will be favorable when the seed is planted so as to derive full benefit from every sound grain planted.

Ohio Seed Bill Criticised.

That Ohio will be taking an unwise step in the passage of the Huber pure seed bill is the belief of Charles Cranston of the Livingston Seed Company. The bill has passed the house and as amended is recommended for passage by the Senate committee on agriculture. The committee struck out section 12, which exempted farmers selling to each other seeds they had grown.

The bill provides for tests by the State Department of Agriculture and the minimum standard is one impure seed in 2,000 seeds sold. Cranston pointed out that the Department of Agriculture would have to be multiplied many times in order to give it enough men to make the tests required. As they could not stop the importation of seeds into the state, Ohio, he said, would become the dumping ground for the bad seed of the entire country.

The enlargement of the department, Cranston declares, might easily cause the building of an unwieldy organization and unscientific methods. "It would make for the wiping out of the Toledo inspection bureau, whose work is accepted all over the world," said he.

Another effect of the high standard, he said, would be to compel the farmer to buy and sell outside the state.—Columbus (O.) Journal.

"Transparent" Seed Packets.

Even the amateur gardener in the rural districts is beginning to wonder at the vagaries of Uncle Sam's post office at Washington, which heretofore they held in high reverence and admiration. A lady in a small village in Connecticut, writing to W. Atlee Burpee & Co., of Philadelphia, says:

"Why do they have such fool laws in the post office? That mentioned in the catalogue about putting seeds in paper that can be seen through! Anyone who ever sent anything or received a package through the mail knows it is necessary to have strong paper. I have often received things where the wrapper was in tatters; the piece with the name fell off. A last Christmas present came 30 miles and the envelope was just ready to drop off, worn through on the edges.

"The fellows who own the P. O. want us to feel subjugated; so they treat the people as if we were all criminals, without any rights."

The New York State Pure Seed Bill. Editor HORTICULTURE.

With further reference to Assemblyman Gregg's pure seed bill, No. 834, I beg to advise that the hearing on this bill at Albany on April 19th was largely attended by the seed trade throughout the state. We have filed a protest against the bill and the matter is now in the hands of the Agricultural Committee, whose decision we are awaiting.

MARSHALL H. DURYEA,
New York State Correspondent of the
American Seed Trade Association.

Notes.

Big Stone, S. D.—The seed and feed business of J. B. Hublou has been purchased by J. A. Wilson.

Lansing, Mich.—The Leonard Seed Co., Chicago, Ill., and Portland, Mich., have incorporated with a capital stock of \$150,000.

We learn that Mr. and Mrs. J. B. Rice are expected home next week. It was reported that they would arrive during the present week, but we are informed that they have been delayed and probably will not arrive before some time during the coming week.

CHICAGO NOTES.

Conservation.

An association with great possibilities was organized in Chicago, April 22nd. It is known as the Illinois Conservation Association, with R. R. McCormick as president. Its object is to guard the public interests of the state in the streams, the submerged lands and natural beauty spots of Illinois. It is non-partisan.

Charity.

The Home for Destitute Crippled Children in Chicago received the benefit of an annual flower sale, which this year made its fifth, on April 22nd, at Lincoln Hall. The receipts amounted to \$1,500 and some of the florists contributed generously.

Philanthropy.

Martin A. Ryerson, a wealthy lumberman, gave the city of Muskegon,

Mich., a valuable tract of land in the down town district for a small park.

Prosperity.

If any are inclined to believe the use of flowers at funerals is dying out they should have been at the County Hospital on the 21st. While the room already contained all the flowers that could be arranged in it a procession of florists was still arriving with their auto deliveries. Twelve were said to be in line.

Shakespeare Day.

The observance of Shakespeare Day by placing flowers on the monument in Lincoln Park has become an annual event of importance to florists. The floral tributes were very numerous and largely in the form of wreaths. E. Wienhoeber had twenty-seven orders, including one from Madam Sara Bernhardt, which was a large wreath of lavender, yellow and blue iris. A. Lange furnished a beautiful magnolia wreath. Practically all the well known actors of the day sent tokens.

Trade Notes.

Frank Oechslin will begin work very soon on a range of greenhouses.

The southwest side is noted for its small flower stores and it is expected that three more will be opened this spring.

The O. J. Friedman store at 185 Michigan Ave., is now of the past and the old force are retained at the 226 Michigan Ave. store, known as The Congress Floral Co.

The Winterson Seed Store is a very busy place these days and the senior member of the firm, now eighty years old, is as lively as the youngest in looking after the wants of customers. Three car loads of stock from Belgium and Holland arrived this month.

This week will see all the moving florists in their new places of business. The name of J. A. Budlong on the door at 82 E. Randolph is becoming familiar and with him will be located Sinner Bros., Hunt Bros., Frank Beu, M. Gunterberg, Sidney Wippen and H. C. Blewitt. The Chicago Carnation Co. takes their more commodious rooms across the hall where a large, new ice box has been installed and they will have with them Hartha Tonner and A. Frere. It looks now as if the Percy Jones business would be the only one left in the old Flower Growers' Market.

Personal.

Wm. Groff is now with Kennicott

Bros., where he has a permanent position.

H. C. Blewitt of Desplaines is slowly improving, but not yet able to be at the market.

The family of Phil Schup will go to their summer home at Williams' Bay, Wis., about the middle of May.

T. E. Waters has left the A. L. Randall Co. and it is reported that he will go into business for himself.

Geo. Woodward is very ill at the Passavant hospital where he underwent an operation two weeks ago.

W. Lynch, for many years manager of the E. H. Hunt cut flower department, leaves this week and will shortly go into business for himself.

C. Frauenfelder is in Phoenix, Ariz., where he was called by the death of his sister. He is accompanied by his daughter and may visit some other cities before returning.

Visitors: H. Wills, Minneapolis, Minn.; F. L. Tornquist, Benton Harbor, Mich.; Gus. Frederickson, St. Joseph, Mich.; F. Fischer, Evansville, Ind.

Flower Market Reports

BOSTON Trade has fallen down this week. The receipts are tremendous and, comparatively, the heavy local production at all points cripples the shipping trade to localities that have been usually good consumers for the Boston accumulations. There is nothing the matter as to quality on any kind of stock; the continued cool weather is favorable to fine production under glass and even violets are being received in acceptable winter quality and quantity. But the violets have outlived their welcome and their place has been usurped by the May-flowers—trailing arbutus—which is also seen in unusually fine quality and with each season shows a strong advancement towards a position as a commercial staple of the wholesale flower houses. Lily of the valley continues to jump and is good property right along. There are barrels of carnations and while a few choice blooms in small lots bring as much as \$3.00 per 100, the greater part of them are unloaded in quantity at an average of about \$1.00. The market is still overcrowded with lilies which, in occasional small orders bring as high as \$8.00 or even \$10.00, but do not command on the average over \$6.00. Sweet peas are booming at profitable figures. So is smilax. Little doing in tulips and daffodils. Asparagus bunches in good demand. Gardenias and cattleyas low and slow.

The Easter report from **BUFFALO** Buffalo showed a very heavy plant trade with an over-supply of lilies and excellent quality and demand on all others. In cut flowers the business was fairly satisfactory considering over-supply on most lines and very unpleasant weather. Violets, lily of the valley and sweet peas were in especial demand. Cut lilies were left on the wholesalers' hands. Receipts were light during the early part of the following week, but in the latter half the bargain signs were again brought out and the accumulation was moved only at a sacrifice.

The week following **CHICAGO** Easter opened with considerable stir in the wholesale market, but by the middle of the week trade dropped off and prices went down. Only the best quality of stock cleaned up, the poorer grades going into the barrel. Carnations lagged the worst and very low prices were made to move large lots. Good tulips held up well, but this week will about finish them. Southern parrot tulips are arriving and meet with much favor. There is a fair demand for daffodils, though all but the single ones will soon be gone. Smilax continues extremely scarce in this market; common ferns still bring four dollars per thousand with quality poor. There were a good many Easter lilies left over, and each day has added more till the supply far exceeds the demand. Special low prices have been made to move them. Callas have fared still worse for nothing yet has found purchasers for them. Sweet peas have sold at good prices more uniformly than has anything else and stock is of good qual-

(Continued on page 651)

SWEET PEAS

Through improved culture and the new introductions, Sweet Peas in all shades are now to be had the year round. At present the Sweet Pea is our typical Spring flower—selling more freely than at any time during the season. A number of our growers are now cutting from the new crops—quality very choice indeed.

Extra Long, - - - - - \$1.50 per 100
Medium Stems, good quality - \$1.00 per 100

Flower Market Reports

(Continued from page 649)

ity. The first out-door lilacs were seen in the market this week but did not sell readily. Iris so far has been a disappointment, the price being low and sales slow. The probable cause is the great abundance of all other kinds of stock.

The first days of the week were extremely quiet, being right after Easter and carnations accumulated to the danger point. Towards the middle of the week things began to enliven perceptibly so that very little was left over at the wholesale houses and retailers had a chance to look back to a successful week. Lilies at present are a glut on the market. Smilax, on the other hand, has reached highest price for many a month. While florists throughout the country are reporting a very prosperous Easter, it seems a rather uncertain way of judging business conditions. Not disputing the reports at all the real point is—what was the concrete result or in other words the actual profit made? That, these reports do not show. Neither individually nor collectively can we judge the benefits derived from Easter nor the prosperity of the tide at large unless the percentage of profit is given.

FRANK DANZER.

The long delayed warm sunny spring weather which has now come is not likely to have any beneficial effect on the flower business. If the production has been far in excess of the demand through the cold and dismal days which have been the rule up to the present time, what is the outlook for the benign summer days that we are now experiencing? There have been avalanches of flowers of all kinds and an outlet at any reasonable rate was out of the question. The situation is now intensified. Roses of all varieties and grades, carnations, lilies, violets, etc., are all accumulated in every wholesale establishment. Sweet peas, lily of the valley and smilax and other greens bring the only ray of sunshine to the wholesalers' daily grind just now.

Movings are in order, and 28th street especially will in a few days have undergone another transformation. Growers' Cut Flower Company and A. H. Langjahr migrate to the next block, west. James McManus moves from No. 42 to No. 55, which Langjahr vacates, and if you want orchids don't forget the number.

Sauer moves up one flight in the Cogan Building. Among the retailers there is also something doing, McConnell, Thorley and Leikens all going to new locations as recently noted in this paper.

The volume of business for the past week was larger than the post-Easter period, but the quantity of stock arriving was also greatly in excess—especially in roses—and prices sagged considerably. Roses of all kinds, American Beauty included, were in immense supply. Towards the end of the week vast accumulations of unsold surplus went to the speculators at any absurd figure they were willing to give. Carnations, while bad enough, did not reach these lowest depths. They were plentiful, but not so much so as the week before. American Beauty is as fine now as at the height of its winter glory and can be had in all grades—long, medium and short, all top-notch. On this item a few of the new crop flowers are already to be seen on the market. In the midst of the general gloom as to prices there were three little sunshiny places occupied respectively by the sweet peas, the orchids and lily of the valley. These three were in great demand and were the only items on which the dealers could stand by their guns and get quoted rates. The market held stiff on them and everything was cleaned up. In sweet peas the long stems went best and although there was a good percentage of shorts, even these found a market before all was over. Gardenias and white lilac are still in fine shape and hold their own with other seasonable staples. Lilies are still plentiful and as is usual after Easter are going slow in the wholesale centers. Many of the retailers are still cutting from the left-over plants.

Greens are none too plentiful. Wild smilax being over causes a better demand on other decorative greens and this situation will probably continue for some time. New crop dagger ferns made their appearance this week.

Nixon H. Gano, Martinsville, Ind.

THE NEW HARDY EVER-BLOOMING CARNATION "CRIMSON KING."

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy Carnation Crimson King. Per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

Flower Market Reports.

(Continued from page 651.)

The wholesale markets ST. LOUIS carried a great amount of stock all of last week at greatly reduced prices from the previous week. The local store men thought there would be a scarcity of stock from local growers after the hail storm, but it came in heavy on everything that was seasonable. The glut includes lilies, special Beauties, sweet peas, carnations, Killarney, Bride and Bridesmaid roses, lily of the valley, etc., all at very low figures. Violets have about finished. Tulips are fine. Smilax, asparagus and all greens sell well.

IRON VASES

Made with reservoir containing sufficient water to last 10 to 15 days. Desirable for lawns, invaluable for cemeteries. Thousands in use.

Over 100 styles and sizes
\$3.00 to \$75.00 each

What the Users say

THE KROESCHELL A COAL SAVER—HEATS UP QUICK

"The No. 4 boiler we purchased of you in 1909 has given the very best satisfaction would wish no better. Have taken out return tubular boiler this Fall, which used one-half more coal than your present boiler. Your boiler is so easy to regulate that in a few minutes I can run up the temperature by opening drafts. The flow and return connections with Generator all work the very best, according to your plans. We cannot give your boiler enough praise: so far as I have given it a test, my old boiler would not be in it comparing to how much more attention the old one took."

FRANK A. WAGNER, Tiffin, O.

CROTONS

Fine assortment, well-colored. 5-in. pots,
\$9.00 per dozen.

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12-in., pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted,—*Pteris Mayii*, *Wimsetti*, *Adiantoides*, *Aspidium tsusimense*, *Cyrtomium falcatum*, etc.

Nice plants, 2¼-in. pots, \$3.50 per 100.

Fruits and Vegetables Under Glass

CANKER OF MELONS

Canker of melon stems is a most provoking trouble; it not only means the loss of so many fruits but the house has a very unfinished appearance. More than often it is one of the most conspicuous plants that is sure to go. If this happens after the fruit has set it is no use planting another in its place, as there is not time to finish it. The usual time the trouble commences is as the fruits are setting, but there have been instances of the plants going off before they were stopped. It is surprising how this disease affects some places and not others; some never look for it under any conditions, while others are continually guarding against it. Guarding must be the word if any place is subject to it, for there is no better instance of prevention being better than cure. When moving or potting up seedlings they are generally inserted to the seed leaf, which is a decided benefit to most things, but the melon has its own peculiarities, and there seems to be no benefit in so doing, and where canker is at all prevalent the reverse should be practiced. Allow the seedlings to get drawn and put a small stake to them to prevent falling over, and when potting or planting out only just cover the balls. The trouble usually commences at or near the seed leaf, and if this is some little distance from the soil it is easier kept dry, thus preventing canker. When the plant has grown about eighteen inches gradually remove the seed leaves and also the whorl leaves growing with them. This allows the sun to shine on the stem, which is the greatest preventive we have. Leaves must be removed one at a time, allowing each cut time to dry up before the next one is made. Do not wet the collar or base of stem after the fruit has started to set; a dry stem seldom cankers. If a wet fungus rot—what canker really is—should be noticed on any part of the stem (not necessarily to be the bottom, as it will sometimes show itself at a bend or where the stem has had a twist) newly slacked lime should be rubbed well into the diseased part until it is dry and the foliage tied back so that the sun can shine on it all day. If taken in time this will save a plant long enough to finish its fruit.

MUSCAT VINES IN FLOWER

The vines now have the season with them and there should be no difficulty to get a set. Muscat of Alexandria is one of our bad actors in this respect—in fact it is her only fault. Give a minimum night temperature of 70 degrees and keep a crack of air on all night. Admit air freely through the day, using both top and bottom ventilation if weather permits. With good weather the house should stand between 85 and 90 degrees at noon when the flower trusses should be gone over and fertilized, after which the floors of the house can be thoroughly damped, no damping having been done previously. Thinning Muscat of Alexandria is usually more a case of cleaning off rubbish which has refused to set, but if there is enough to make up the bunch, we can say "It's an ill wind," etc., for there is not much scissors work.

PACKING PEACHES

The farmer usually just fills up his peach basket and that is the last of them. We have not got them to handle this way at this date. We might say a peach is a peach and every one counts. Care must be taken when taking them off the tree. Give each one a gentle twist. Have a box or a basket ready, lined with cotton

wool, and a sheet of oil paper on top, to carry them away with. Wooden boxes should be made specially, deep enough to carry one layer of fruit—say 18 x 12 x 5. These can be packed in trunks or other boxes. A larger box causes more weight to bear on the fruit. Line the bottom with cotton wool. Cut oil paper up into squares large enough to cover three-quarters of the peach. Place the fruit in the center, wrap the paper around and also a fair thickness of cotton and place in rows in the boxes. This leaves the top of the fruit exposed. A large piece of oil paper can be laid over the whole box and enough cotton wool to fill in. Make the whole firm, but not hard enough to bruise. This allows of the top packing being taken off and the box placed in a cellar or ice box until fruit is wanted, thus saving once handling. Select fruits which are under-ripe for shipping.

ICE BOXES

Now that the warmer weather is coming all eyes will be turned to the ice box. All fruit grown under glass will be greatly improved by being placed on the ice for five or six hours before using. Melons, especially, firm up and the flavor is improved. Avoid gathering any fruit through the middle of the day, early morning being the best time. Fruit which has been packed should be given air and allowed time to firm up before using.

George H. Benson

Manettia bicolor

Among the many good things at the national show recently held in Boston I noticed a plant of the fine old-fashioned climber *Manettia bicolor*. This very attractive plant ought to be taken up by florists, as it is easily trained to any desired shape, and a good specimen will always be admired. Also if pinched severely, nice little plants can be had in small pots, in bush form.

Manettia bicolor belongs to a genus of herbaceous climbers found in tropical America and sub-tropical Australia, but it grows well in this country in a night temperature of 55 degrees, rising to 70 or 75 during the day. Flowers are to be found on this plant at all times, but I have seen it especially well flowered from Christmas until late spring. The flowers are bright scarlet at the lower portion, turning to yellow at the mouth of the tube, hence the name *bicolor*.

Propagation is effected by cuttings procured from a portion of the stem cut into convenient lengths. The cuttings will root in three weeks in an ordinary propagating bed. Peat, loam and sharp sand in equal parts is the best potting material, but where peat is not available, half-decayed leaves will prove a good substitute. After the plants are potted into five-inch pots or over, one-third of well decayed cow manure can be added to the compost, and when the desired size of pot is attained they ought to be fed twice a week with manure water; also a little fertilizer may be applied occasionally.

annually-recurring spring pest, with its disheartening accompaniment of blasted fruit prospects, as well as ruined wistarias, magnolias and other prized gems of the early garden. But now, as we write, comes the news of a devastating freeze with snow in its train, extending over the entire west and bound east. It is to be hoped that this unwelcome visitor may be dismantled and broken up before it has done any serious damage. We can all agree with Shakespeare as to the incongruity of "a snow in May's new-fangled mirth." A frozen landscape in the time of cherry blossoms is the worst kind of a misfit.

An ever-narrowing sphere

Mr. Chopin, in his paper on the flower trade of New Orleans which appears in this issue, touches on some things that are not exclusive to that city. New Orleans and other cities similarly dependent upon remote sources for their supply of cut flowers are just passing through the experiences that many other places formerly so situated have gone through and the outcome will, in every case, undoubtedly be the same—the establishment of local means of supply and a gradual withdrawal of the regular support heretofore extended, of necessity, to distant shipping centres. Any place where there is a considerable flower-buying public is bound to become restive, sooner or later, under the constraint of imported flowers and this fact, constantly forced upon the attention of the shipping trade, is one of the most disturbing features of the wholesale dealers' existence. While it is undeniable that the now defunct flower-shipping industry of certain eastern centres did most of the digging for its own grave, yet the movement everywhere must be in the direction of shorter and shorter distances between producer and consumer, regardless of care in packing and attention to minute detail, and, as shipping demands gradually narrow down to special emergencies and scarce items, the responsibility of using up the product must fall eventually upon the home market.

An expensive salesman

We have always leaned towards the conviction that the selling market was a costly place at any season of the year for a flower grower in which to spend much of his time. The most prosperous growers will, as a rule, be found right at home watching every detail of their growing establishment and fully alive to the fact that in regularly absenting themselves from the same they are paying a ruinously extravagant price for the privilege of being salesman. Especially at a time like the present when the plans and foundations for next season's business must be put in motion and when, with overstocked markets, goods are only unloaded in bulk at sacrifice figures we cannot see how any grower who aims to lead in the quality of his product can afford to devote the best hours of the day in clerking in the market and leaving the conduct of his place to subordinates. Thoughtful proprietors are coming to realize this fact more clearly than heretofore, judging from the constantly increasing number who are adopting the system of sending their goods to be disposed of by a regular salesman working on a salary or a commission. We refer now particularly to the Boston markets but have no doubt the tendency will be noted elsewhere in greater or less degree. We have no prejudices in the matter and have no intention of making a plea for any particular interest. There may yet be perfected much better and more economical methods of marketing cut flowers than have thus far been tried. We would simply put forth the proposition that the grower who does justice, personally, to his home establishment will find very little time at his disposal for the haggle and barter of the city market place.

Interest the colleges

Our reading notes show that horticulture and its branch, floriculture, are making good progress as live departments in the State College of Pennsylvania, as is also the case in a number of Agricultural Colleges in other States. Now is the time, when the students are evincing an interest in such work and the governing bodies are recognizing its claims, for the friends of horticulture to get busy and insist upon a reasonable share of the appropriations being devoted to practical horticultural teaching and demonstration.

A visitor to be dreaded

One year ago, last week in April, the entire country, more particularly the southern and western sections, suffered severely from a sudden freeze of unparalleled ferocity, for so late a date. Considering the backward season this year and the slowness with which spring verdure has materialized we have been hoping that we should be spared the ravages of this almost

Seasonable Notes on Culture of Florists' Stock

ACACIAS

All these plants that were unsold at Easter should be pruned into shape by cutting them back to about half of the previous summer's growth. Where they are pot-bound they should be shifted into larger pots. A good compost to use is turfy loam four parts, leaf mold two parts, peat one part, and enough sand to keep the whole open, as these plants are thirsty subjects. After potting give them a genial temperature of about 55 degrees at night with plenty of syringing and abundance of air which will encourage the new growth to break away. By the end of May they can be plunged outdoors. Choose a place where the water will not stand, for the copious watering and syringing that acacias need daily would soon ruin them if not given a place of good drainage. Don't plunge them too closely together for they will make good growth during the summer. Each plant should be allowed enough space so that the light and sunshine will get between. Give them a good syringing every day during the summer.

BEDDING PLANTS

Where you have room to spare in your propagating bench put in cuttings of ageratums, begonias, achyranthus, coleus, heliotropes, petunias, double sweet alysum, verbenas, etc. as there is a call for this class of stock away into June. By this time you will find yourself crowded for bench room, so this is where your hotbeds will come into play. There is no better place for all such stock as alternantheras, cannas, coleus, geraniums, begonias, etc., than a mild hotbed and with a little care as to watering and ventilation they will be better off here than indoors. All half-hardy stock can now be removed to frames to make room inside for other stock yet to be pricked or potted up from flats. There is no better place for this class of stock as they will become hardened up before they go out into the open air. The more important kinds of bedding plants are now beyond their last shift, such as are in 3 or 4-inch pots. On all bright days they will dry out remarkably fast, so will need constant watching so as not to let them suffer for want of water. All subtropical plants used for beds should have a house where abundance of air can be given them so as to make them hardier by planting out time.

CARNATION STOCK

The nature of the soil and weather will control planting in different localities. Very little is gained by too early planting, but now when the weather is more favorable, planting should go on with haste so as to get the stock into the field as quickly as possible. When planting out from pots see that ball is thoroughly soaked. Each plant should have at least eight inches from the center of the plant all around, for proper development, and then whatever extra room you wish to allow for cultivation. See that each plant is pressed firmly around and then a good watering should be given. Plant varieties in batches by themselves and label each plainly; it will save you trouble later on. The more care and attention they get in every detail the better foundation you will be laying for future success. During their stay in the field they should be assiduously cultivated, as it serves the purpose in dry weather of checking evaporation to a certain extent, and after heavy rains of keeping the ground mellow and open.

See that your plants have never-failing attention in the way of stopping the leading growths.

CARE OF ORCHIDS

Now as the season advances the Cattleya department will need more air, thus necessitating more thorough and frequent damping of the walks and under the benches, with a syringing overhead once or twice a day. When there is a spell of damp weather don't do much damping, and it will be necessary to kept on air with a little fire heat so as to keep them in good shape. All such cattleyas as Mossiae, Mendelii, Warneri, etc., that are through flowering should be given new material, and when in poor condition repot, using osmunda fibre and sphagnum moss with a liberal drainage. Give them a good sponging to remove any scale, thrips, or other insects before the young growths start up. Give phalaenopsis now a house where the air can be kept continually laden with moisture, as it is essential for their well-doing, but keep the atmosphere active by admitting air in greater or less quantities, but preventing any direct drafts from striking them. During now and through the summer see that they don't suffer for the want of water. These orchids require every encouragement in the way of heat, light without direct sunlight, and moisture, for they have baffled quite a few who have tried to grow them.

DAHLIAS

The popularity of dahlias for cut flower purposes has increased from year to year. Any time from the middle of May up to June will do for planting as they require some warmth in the ground. To attain the best results dahlias should receive no check from start to finish. They will grow in any fertile soil, but their preference seems to be for a rich, deep, moist, and sandy loam. The ground should have a liberal amount of suitable plant food well incorporated. Well-decayed stable manure will be found the most satisfactory, but when this cannot be procured, sheep manure, or any chemical fertilizer rich in ammonia and phosphoric acid will answer as a substitute. Plant so as to permit of easy passage between the plants—say about 2 feet in the rows with at least 4 to 5 feet between the rows. Give frequent and shallow cultivation during their growth. When they are about a foot high, they should be secured to stout stakes so as to assist in holding the shoots in an upright position.

STEVIA

This plant can be grown either in the open ground or under pot culture during the summer. When grown in the field don't make the ground too rich for they make a very rampant growth. Give them a space of at least two feet apart, and give frequent cultivation and pinchings. Where it can be done I think pot grown stock is preferable to those grown in the field. When grown under pot culture they should be shifted into larger pots before the roots get too matted, using any good carnation soil for these shifts. They should be transferred before the middle of August into 8 or 9-inch pots or boxes and given their last pinching in September. If you are short of stock you can propagate now and these will give nice material for 6-inch pots.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Aquaticles; Bourcardias; Chrysanthemums; Ericas; Stock for Vases and Boxes; Vincas.

ARNOLD ARBORETUM BULLETIN.

Persons interested in plants often complain that they do not know when the trees and shrubs in the Arboretum bloom and therefore miss flowers which they want to see. To meet this difficulty it is proposed to issue from time to time from the Arboretum bulletins of popular information in which attention will be called to the flowering of important plants and other matters connected with them. During the spring and autumn these bulletins will probably be issued every Saturday and from time to time during the remainder of the year when the necessity for them exists; and in them notice will be given of what will be best worth seeing during the following week.

Copies of the Bulletin will be mailed without charge to any one interested in trees and shrubs and their cultivation who desire to receive them.

An illustrated guide to the Arboretum containing a map showing the position of the different groups of plants has recently been published. It will be found useful to persons unfamiliar with the position of the different groups of plants. Copies of this guide can be obtained at the Administration Building in the Arboretum, from the Secretary of the Massachusetts Horticultural Society on Massachusetts avenue, Boston, from The Houghton, Mifflin Company, 4 Park street, Boston, and at the Old Corner Bookstore, Bromfield street, Boston.

C. S. SARGENT, Director.

Bulletin No. 1.

The hot days of last week have brought out suddenly the flowers of several plants belated by the exceptional cold of the early part of April.

Many of the magnolias of eastern Asia, which produce their flowers before the leaves appear, are now in bloom. The flowers of the earliest of these, *Magnolia stellata*, are already passing. The delicate pink flowers of one form of this handsome and hardy Japanese shrub deserve special notice. The white-flowered *Magnolia conspicua* from China, the two forms of *Magnolia Kobus* from Japan, and the hybrid *Magnolia Soulangiana*, with pink flowers are particularly noticeable. They are in the immediate neighborhood of the Administration Building and near the Jamaica Plain gate.

Several of the Asiatic cherries are in bloom. The most attractive of these are *Prunus pendula* and a variety of this Japanese tree with erect branches, *Prunus pendula ascendens*, often called *Prunus subhirtella*. This is one of the most beautiful of the early spring flowering trees. Attention is called, too, to *Prunus Sargentii*. This is a large cherry tree from the forests of northern Japan with single flowers, pink on some plants and rose-colored on others. *Prunus Sargentii* is a valuable timber tree in its native country and one of the most desirable of the hardy trees of recent introduction. These cherry trees and many others are on the right-hand side of the Forest Hills road.

In the shrub collection, near the Forest Hills gate, a number of species of *Ribes* (currants and gooseberries) are already in flower and here the different forms of *Forsythia* may be seen. The handsomest of them at this time is *Forsythia intermedia*, a hybrid

between *F. suspensa* and *F. viridis-sima*, and a more desirable decorative plant than either of its parents. Less beautiful but of particular interest to students of plant geography is *Forsythia europaea*, discovered a few years ago in Albania and the only species found beyond the limits of the Chinese empire.

On Azalea path a number of plants of *Rhododendron mucronulatum* are now in good condition. This is a native of the mountains of northern China, and is now covered with bright rose-colored flowers which are produced before the leaves. It is the earliest of the rhododendrons and azaleas to bloom in the Arboretum.

The Service Berry, or Shad Bush tree, will soon be in flower. Two species, *Amelanchier canadensis* and *A. obovalis*, grow naturally in the Arboretum, and the latter has been planted in large numbers through the border shrubberies. Large plants of *A. canadensis*, easily distinguished by the deep red color of the unfolding leaves, are growing at the foot of the wooded slope near the junction of the Forest Hills and Meadow roads.

The plum trees near the shrub collection will soon be covered with sheets of white flowers. Some of the apricots here are already in bloom, and the pink petals of *Prunus Davidiana* are already dropping. This is the wild peach of northern China, by some botanists believed to be the plant from which the cultivated peach has been derived.

BROOKLYN'S BOTANIC GARDEN.

Work has begun on the new Botanic Garden and Arboretum to be located in Brooklyn, N. Y. In several weeks bids will be taken for the contracting of a part of the main building and the greenhouses which are to be built at a price not to exceed \$50,000.

The general plans for the garden were prepared by Olmsted Brothers, landscape architects. The plans and specifications for the instruction building and plant houses were prepared by McKim, Mead & White. When finished the garden and arboretum will be unique features of the Brooklyn park system.

AN ENEMY OF THE SCALE.

We learn from reports from Seymour, Ind., that the fungus known as the "red-headed fungus" has appeared there as the enemy of the San Jose scale and has been doing some surprising work in eradicating the pest. It is believed that if the fungus can be made to grow artificially and can be transplanted to scale infested orchards, it will solve the San Jose scale question. It is said the fungus has been grown with success in the entomological laboratory at Indianapolis during the winter months.

AN APHINE DEMONSTRATION.

Manager Ebel of the Aphine Manufacturing Co., tells us that he has arranged with the Florists' Exchange of Baltimore to hold a public demonstration at their market rooms at an early date, to show the merits of Aphine as an insect destroyer. Mr. Ebel gave similar demonstrations at Boston, New York, Philadelphia and other floral centers some time ago, and in every instance made a favorable impression, his preparation fully supporting the claims advanced for it.

FLOWER SHOW AT THE PENNSYLVANIA STATE COLLEGE.

The Department of Horticulture and the Penn State Crab Apple Club, the horticultural student organization of the Pennsylvania State College, managed a flower show the last week of April that was decidedly successful. The florists throughout the state were requested to contribute and those who responded did so most liberally. Floriculture is rapidly coming into prominence in the college and the show did much to arouse interest on the part of the students and the general public. The department is at present hampered somewhat by want of space under glass but with the proposed addition of several more houses this branch of horticulture will receive rapid development. Professor Gregg has charge of the work in floriculture and the success of the show was very largely due to his untiring efforts.

The exhibition was staged in the well lighted service room of the new greenhouses and its capacity was taxed. It will probably be necessary in the future to use the college armory. The center of the room had a long table upon which were the roses, the center of interest to most visitors. The sides were given over to the carnations and potted specimens. Not all of the florists who received announcements of the show responded, but there were enough generous contributions to make the show a success. Myers & Samtman, of Chestnut Hill, Pa., sent a magnificent display of American Beauty, My Maryland and Hilda roses. The Pittsburgh Cut Flower Company made the largest display, including splendid specimens of Richmond, My Maryland, Pink and White Killarney roses; and Lawson, White and Pink Enchantress, Winsor and Victoria carnations. S. S. Pennock-Meehan Co., of Philadelphia, contributed American Beauty roses, snapdragons and Victoria and Enchantress carnations. Other contributors were Floral Exchange, Edgely, Pa., Golden Gate, Bride, and Bridesmaid roses; Oakwood Rose Gardens, Oil City, Pa., Richmond, Bride, and Bridesmaid roses; Wm. Allen, Homewood Cemetery, Homewood, Pa.; Primrose and Spiraea; Finleyville Floral Co., Finleyville, Pa.; Enchantress, Beacon, Winona and White Perfection carnations; W. M. Deyoe, Oil City, Pa., several varieties of carnations; Stafford Flower Farm, Stafford, Pa., White Perfection and Winsor carnations; Saxonwald Greenhouses, Castle Shannon, Pa., Enchantress carnations, snapdragons, and Killarney roses. The New Jersey Agricultural Experiment Station, New Brunswick, N. J., exhibited several specimens of roses and carnations grown with commercial fertilizer only.

The Hilda rose showed the most substance and keeping quality. It was followed closely by a vase of White Killarney. The Enchantress and Beacon carnations commanded the most praise.

Jamestown, N. D.—The Wheeler Floral Co. sustained a damage of about \$600 during a storm on April 14. A portion of the roof and a bench of carnations were destroyed.

MENDEL'S LAW AS RELATED TO HEREDITY AND BREEDING.

By Dr. Herrmann Decker. Translated from "Cosmos" by Gustave Thommen.

II.

When Mendel began his experiments he intentionally selected one factor only for his first trials. He decided to find out what principles determined the height of plants. There are tall sorts and dwarf sorts of peas, and Mendel was well aware that the difference in size is not a result of any sufficient or insufficient nourishment or any certain condition of the soil. He knew, of course, that the tallness or dwarfness of each resided in itself as a characteristic quality, and that these dispositions are always present in the seed.

Mendel transferred the pollen from a dwarf sort to the stigma of a tall one, and waited. Popular belief would expect to get as a result from such a cross (tall and dwarf) medium sized plants. But the seed from his cross gave him plants of one size only. They were all tall. Where now was the influence of the dwarf sort? Had it disappeared completely? Was the pollen parent, the father, of no consequence whatever? Mendel left these plants of the first generation to themselves. They bloomed, self-fertilized and made seed. This seed he planted again. This time he planted the seed from each plant upon a separate bed. When the plants were full-grown the result showed the utmost irregularity as to size, apparently. In each bed Mendel found the progeny of each plant to consist of tall and dwarf plants. This confirmed his opinion: "that the influence of the dwarf sort could not be entirely lost, but had only been laying dormant in the tall plants of the first generation."

The wise monk carefully counted and tabulated the plants according to height. Now, the veil of the secret began to lift; a strange and wonderful coincidence was revealed to him. Among the progeny of each of the plants of this first generation he found the same proportions as to size. Three-fourths of the plants were tall and one-fourth was dwarf. Of course only approximately, more or less accurate, the larger the number of plants the closer the proportions. A rule of probabilities.

(The larger the numbers we deal with, the more definite the proportions. As plants multiply 100 and 1000 fold, it is very easy to find Mendel's proportion of numbers among the progeny, although very seldom entirely pure. It is naturally more difficult to give a numerical confirmation of Mendelian proportions in the case of animals, because the number of individuals in any family is relatively very small, so that results very often seem anything but correct. We know that children are born in equal proportions as to sex. The very small, actual difference is here of no consequence. So we might also expect that of six children in one family, three would be boys and three girls. But we know that

PENTSTEMON GENTIANOIDES.

This illustration inadequately shows the attractiveness of the improved large flowering pentstemon hybrids. These flowers are not so well known

this is seldom so, and that we will have to use the average of a large number of births to find that in relation to numbers the sexes are equally divided.)

The progeny of the first generation was represented as follows: [Suppressed character is marked *].

Again Mendel let his plants flower and ripen the seed. Again he sowed this seed carefully, the seed of each plant in a separate row. Now the result. The seeds of the dwarf plants produced nothing but dwarf plants (and ever afterwards the same). They remained true to type (the type was fixed, as the gardener would say), even though they had passed through the tall plants of the first generation. The seeds from the tall plants behaved quite differently; some of the rows brought tall peas only, and these afterwards proved true to type also. Upon the remaining rows planted with seed from the tall plants, Mendel again found the plants mixed in regard to size, three-fourths tall and one-fourth dwarf, exactly as in the second generation. Now mark this: The seed of all the dwarf plants gave him dwarf plants, which afterwards proved true to type in the seed. One part of the tall plants also was true. In the others of the tall plants the disposition to dwarfness had been suppressed—"put to sleep," so to speak—for the time being. In counting up and tabulating the result, Mendel found that "of the seed from the second generation that of all of the dwarf plants proved true (dwarf); of that of the tall plants, only

as their beauty in garden decoration entitles them to be. Florists making a business of bedding plants would do well to give the pentstemons a prominent position on their spring lists.

one-third proved true (tall); the remaining two-thirds were bastards.

And so it continued throughout the generations. Mendel followed it up for twelve generations. Tall pure, produced invariably tall pure. Tall impure, always tall and dwarf impure (bastards). Dwarf pure, again only pure dwarf.

These were the facts that nature presented to Mendel. And what nature demonstrated in regard to size of plants, Mendel later on also proved to hold true in regard to any of the other characters, position and constitution of leaves, color and form of seed or flower, form of stem, etc., etc.

Mendel experimented with many different factors. Hundreds of other investigators have since shown that Mendel's law applies to any and all attributes of living things.

"In crossing two specimens of plants or animals, differing in any character (it is immaterial which is the father), there occurs no blending or amalgamation of these characters in the resulting bastard, but one of the characters is always suppressed by the opposing one of the same attribute."

This is the "FIRST LAW OF MENDEL."

Mendel's discovery, "That the units of all hereditary characters are indivisible and pass through the generations self dependently and unimpaired, without ever becoming obliterated or amalgamated with any others, has been a great advance in the knowledge pertaining to heredity.

(To be continued.)

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

At first he was only a florist. After a few million years of development he woke up one day and found he had to be an artist. Another million years rolled around and then it dawned on him that he had also to be a merchant. Such, in effect, was the diagnosis of the patient as presented by L. D. Blackstone at the monthly meeting of the above club held on the 2d inst. Mr. Blackstone came from Washington to tell us Philadelphians how to do things in the way of advertising special sales for the retail trade. He gave us a splendid summing up of his experience—well thought out, well digested and most happily expressed. The wisest and wittiest resume of the subject we have had in the past twenty years; and we have had many discussions along the same lines during that period.

The essay committee are giving us plenty of variety, and something covering some different branch of the business every month. They are something like a committee! For next month they promise us a talk from the distaff side—something we have never had before. Mrs. Smith of Secane will talk on violets and carnations. She is, I think, the only lady member of the Florists' Club, and may give the boys a few jabs incidentally while the violets are under discussion. Glorious opportunity for her! They "dassent talk back"—as they would to a mere man. Paul Hueber is promised as an early attraction on the subject of R. R. Gardening. Xavia Schmidt will be on deck later with a good talk on Bedding Plants.

There was a fine turn out to hear Mr. Blackstone—and the orators of the Club had a splendid opportunity. The retailer blamed all the ills on the wholesaler, the wholesaler shifted them to the grower, and the grower promptly sent the charges back along the line. Edward Reid, Fred Ehret, Chas. E. Meehan, Robert Kift, Leo Niessen, Adolph Farenwald, Chas. Fox and others too numerous to mention, had their say, and after the smoke cleared away they seemed to be all better friends than ever. The sun rose all right Wednesday morning; and the Delaware river continues to flow in the same old direction.

BOOMING THE GLADIOLUS.

There has recently been organized in England the "National Gladiolus Society," and I am informed by the secretary, Mr. K. Atkinson, Locksheath, Southampton, that they are working very much along the same lines as the A. G. S. and will gladly co-operate with us for the mutual interest and advancement of the gladiolus. I hope to give at an early date further particulars concerning this new society. Now, then! Germany and France, and then all together—an international society! The gladiolus is here!

The Henry F. Michell Co., of Philadelphia, has offered for our Baltimore exhibition a silver cup valued at \$25.00 to be awarded for the best 25 spikes of the new gladiolus Kunderdi "Glory" exhibited in one vase.

L. MORTON GAGE, Cor. Sec'y.

AMERICAN ROSE SOCIETY.

Registration of American Roses.

At the Boston Exhibition a matter was suggested, in regard to the permanent registration and record by the American Rose Society of all the roses that had been originated in America for the last twenty-five years and to embody the list as a permanent record in the next Bulletin. During the last two years, records have been received of several new varieties or sports, and the same have been published. We want to go further than that and gather an accurate record of all the roses and the stock from which they were obtained and place the same in a Book of Registration, that would be available for general information. This idea was suggested to the Secretary and in speaking with a few rosarians the plan was deemed an advisable one to carry out if possible and, therefore, I would ask all parties that may have any accurate information bearing on this subject or who may be the originators of a new rose, to file a statement with the idea of compiling an accurate list for publication by the American Rose Society.

BENJAMIN HAMMOND, Sec'y.

Fishkill-on-Hudson, N. Y.

DETROIT FLORIST CLUB.

Our last meeting was graced with the presence of several traveling salesmen who helped to make this meeting a memorable one. Mr. Seligman of Wertheimer Bros. and Mr. Karins of Dreer's so much enjoy our club that they made application for membership. Mr. Miller, the walking horticultural dictionary of Skidelski, was another visitor, and last but not least Wm. A. Starret of the Kenneth Anderson Co.

The principal discussion of the evening was devoted to ways and means to bring about a general celebration of Mothers' Day, May 14th. It was decided to get up a number of banners to be used on every florist's delivery wagon also cards to be displayed in department stores, etc. Every advertising retailer has agreed to add a few lines relative to Mothers' Day to his regular advertisement. Under advisement is advertising in front of each street car and possibly a donation of one carnation to each motorman and conductor. We therefore are straining every nerve to establish Mothers' Day in this city.

HORTICULTURAL SOCIETY OF NEW YORK.

The next exhibition by the Horticultural Society of New York will be held on May 10 and 11 in the Museum Building of the New York Botanical Garden. Prizes in cut flower section are offered for collections of herbaceous plants, shrubs and trees, tulips, narcissi, gladioli, campanulas and wild flowers. Pelargoniums and campanulas are included in the plant schedule. All exhibits for competition must be staged by 1 p. m. on the first day.

At the next meeting of the Gardeners' & Florists' Club of Boston, Tuesday evening, May 16, E. J. Shaylor of Wellesley Hills will deliver a lecture on "Peonies."

CONNECTICUT HORTICULTURAL SOCIETY.

On the evening of April 28th, when the schedule called for an exhibition of hardy primroses, there were none owing to the unusual lateness of the season. President Huss made a splendid display of hybrid amaryllises, Spirea Queen Alexandra, azalea and Bougainvillea Sanderiana. Mr. Huss, and his able assistant, Francis Roulier, both related many facts concerning the culture and characteristics of these plants. J. A. Weber also staged May King lettuce, and Marshall strawberry in bearing. William A. Kinne, of New Britain, showed a fine white dendrobium.

The judges, Howard A. Pinney, John Gerard, and T. B. Brown, made awards as follows: Diploma to Mr. Huss for each of the azalea and amaryllis displays, honorable mention for the Bougainvillea; certificates of merit to Mr. Weber and Mr. Kinne.

On the 23rd of October next, we are promised a treat in the form of a lecture in Hartford, by J. K. M. L. Farquhar, of Boston, on "Japanese Gardens."

GEORGE W. SMITH, Sec'y.
Melrose, Conn.

LADIES' SOCIETY OF AMERICAN FLORISTS.

The president, Mrs. J. V. Phillips, appoints as Introduction Committee to serve at Baltimore, the following ladies: Chairman, Mrs. E. V. Boone, Baltimore, Md.; Mrs. James Glass, Baltimore, Md.; Mrs. Richard Vincent, Jr., White Marsh, Md.; Mrs. W. F. Gude, Washington, D. C.; Mrs. J. R. Freeman, Washington, D. C.

MRS. CHAS. H. MAYNARD,
Secretary.

ST. LOUIS FALL SHOW.

The Preliminary Premium List of the Fifth Fall Floral Exhibition of the St. Louis Horticultural Society, to be held jointly with the Chrysanthemum Society of America, has been issued and copies may be obtained by addressing Otto G. Koenig, 6473 Florissant Ave., St. Louis, Mo. The exhibition will be held on November 7 to 11 inclusive, at the Coliseum. Many special prizes are included in the list and the outlook is for a very large and impressive display.

CLUB AND SOCIETY NOTES.

J. B. McArdle has been elected secretary of the Westchester and Fairfield Counties Horticultural Society at Stamford, N. Y.

The St. Louis Florist Club will hold their regular monthly meeting on next Thursday afternoon, May 11th, in Odd Fellows Hall. Secretary Beneke expects a very large attendance at this meeting as very important business has to be transacted.

The next meeting of the New York Florists' Club on Monday evening, May 8, will be enlivened by a series of five-minute talks on practical and pertinent topics by a number of club members, and those who absent themselves will find they have missed a pleasant and profitable evening.

THE RETAIL FLORIST IN NEW ORLEANS.

A Paper read before the New Orleans Horticultural Society by P. A. Chopin.

I do not believe there is another city in the country where the florist business has increased and developed at the same rate in the past few years as it has in New Orleans. When we consider how far removed we are from our present source of supply, and the fact that there is always something in bloom in our private gardens, the great increase in the volume of business transacted by the local florists is very gratifying. The people of New Orleans have been very liberal with their patronage of the florist and I find are constantly clamoring for the best, being more content with a smaller quantity of select quality than a liberal supply of an inferior grade.

It is my opinion that for the liberal patronage given our profession, we in turn should make every effort not only to retain that which we have, but to encourage a still greater use of flowers by sparing no pains to execute every order with care. It is well known amongst us that three-fourths of the flowers and floral offerings ordered by our customers are never seen by them, some going direct from the florist to the home of a friend, or some sanitarium, and others sent to the funeral of a friend where the sender can never identify his flowers among the many others there. So we can readily see that the trade of the florist greatly depends upon the confidence his customers have in him, and he should make special effort to retain this confidence by being prompt in deliveries, sending nothing but the quality of goods ordered, and see that what is put up at the store with the greatest care and artistic arrangement is not all battered up and out of shape when it arrives at its destination by the carelessness of the delivery boy. Just the same as first-class stock advertises, so will poor stock hurt the one who sends it out. The flower buying people of our city, I believe, are among the most critical in the country, and are mighty well informed, and now no longer order the flower they want by color, but call the particular name of their favorite rose, carnation, chrysanthemum, or other flower wanted.

It is unfortunate that during the course of a season hundreds of thousands of dollars should be sent away from here by us for cut flowers. In reference to this matter I wish to mention that during the past season I have almost entirely used southern-grown roses, and they have been better both in appearance and lasting qualities than those from my former source of supply, and have given better satisfaction than any northern-grown roses handled by us before; but the supply is not equal to the demand, showing that there is an excellent field here for a wholesale establishment that would prove very profitable to the one who undertakes it. An establishment of this kind would be a great boon to our city florists, would reduce the present price the consumer has to pay, and would provide the public with flowers of better lasting qualities than most of those now sold by us. It might be

A MODEL FLORISTS' OFFICE.

This picture shows the business office connected with the new flower store of the Park Floral Co., Denver, Colo., of which we published some other views a few weeks ago. It is not many years since florists came to realize the necessity of a separate office for their accounting work and cor-

respondence, and we are probably safe in saying that the great majority of stores are still deficient in this respect. Mr. Valentine has set a good example of what is demanded in the equipment of an up-to-date florist today, and we commend it to the attention of our readers.

well to mention that if an industry of this kind were promoted we would owe it to ourselves to give it liberal patronage, and even to give it preference to outside establishments.

The disappointment and loss sustained, especially during the holidays, when our carnations and other flowers arrive in a sleepy condition, withered and unfit for use, could be overcome by inducing our customers to use other varieties of flowers, something that we can grow in our own section instead of being dependent on flowers grown a thousand miles from us and sometimes kept in storage for three or four days before being shipped to us. The time has come when I am sure the public would gladly co-operate with us and would be willing to purchase flowers grown at home that could be supplied fresh, instead of accepting flowers of doubtful age and lasting qualities that come from our present source of supply.

It might be well to mention a few words in regard to collections of accounts due us—the most important part of our business. From a good customer who pays promptly we can by not being prompt ourselves in rendering statements and collecting our accounts as soon as possible after they are due, make a very indifferent customer who will always in the future expect us to wait a few months before settling up, and who does not care to buy more flowers as long as he is in debt to his florist.

Fulton, Ill.—Mr. Hills, of Hills & Kirman, has retired from business, his share being purchased by John E. Kirman.

A SAN FRANCISCO FLOWER STORE.

See Cover Illustration.

Our illustration shows the interior of the new "Flower Palace" of Pelicano, Rossi & Co., San Francisco, Cal., mention of which was made in our reading notes last week. It is one of the most magnificent and richly appointed flower shops in America and is the climax of 20 years catering to the flower-loving public of the Pacific metropolis. After the great fire of 1906 this firm was the first in the florist business to reopen and the conduct of the establishment has been characterized by enterprise and ability of a high order.

CATALOGUES RECEIVED.

J. G. Harrison & Sons, Berlin, Md.—Folder of Surplus Trees, Plants and Shrubs. An enormous quantity at low wholesale rates. Also price list of Maryland farms, large and small, for sale by their real estate department.

Alex McConnell, 611 Fifth Ave., New York City.—Limited Descriptive List of Selected Ornamental Trees, Shrubs and Herbaceous Perennials for the Improvement of Country Homes. An excellent list well adapted to its purpose.

INCORPORATED.

Denver, Colo.—The Denver Nursery Co., capital stock \$50,000. Incorporators, W. A. Deuel, C. C. Anthony, C. A. Parker.

Louisville, Ky.—The Jefferson County Greenhouse Co., capital stock \$12,000. Incorporators, George Kopmeier, Charles Schultz, Jr., and A. J. Driesback.

Indianapolis, Ind.—The firm of Baur & Smith will dissolve on June 1, 1911, by mutual consent. A. F. J. Baur will take over Mr. Smith's interest in the greenhouse and ground at 38th street and Rockwood avenue, whilst F. S. Smith will remain at the old stand at 38th street and Senate avenue, conducting the business on much the same lines as at present. Carnations, chrysanthemums and geraniums will be specialties.

Decoration Day Roses

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter become better established and force better, and are more satisfactory in every way, and you can retard or force them at your leisure.

Hardy Perpetual Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name: Price, 75 cts. for 5 (of one variety), \$13 per 100, \$120 per 1000 (immediate delivery).

Alfred Colomb. Carmine-crimson.
Anne de Diesbach. Bright carmine.
Ball of Snow (Boule de Neige). Large, pure white.
Baron de Bonstetten. Blackish crimson.
Baroness Rothschild. Satiny pink.
Capt. Christy. Delicate flesh color.
Clio. Satin blush; very fine new sort.
Duke of Edinburgh. Bright vermilion.
Fisher Holmes. Dark velvety crimson.
Frau Karl Druschki. The finest white in existence.
Gloire de Margottin. Dazzling red.
Gen. Jacqueminot. Brilliant crimson; the popular Rose.
John Hopper. Bright rose, with carmine center.
La France. Peach-blossom pink.
Mme. Charles Wood. Bright carmine.
Margaret Dickson. White, with pale flesh center.
Marshall P. Wilder. Cherry-rose and carmine.
Magna Charta. Dark pink.
Mme. Gabriel Luizet. Light, satiny pink.
Mrs. John Laing. Rich, satiny pink.
Mrs. Sharman Crawford. Deep rosy pink.
Paul Neyron. Lovely dark pink.
Persian Yellow. Hardy yellow rose.
Prince Camille de Rohan. Dark crimson-maroon.
Soleil d'Or. Large, globular flowers, varying in color from gold and orange to reddish gold, shaded with nasturtium-red.
Ulrich Brunner. Cherry-red; grand rose; free. For Prices, see above

English Moss Roses

Assorted, White, Pink, Red. Large dormant plants, from open ground. 75 cts. for 5, \$14 per 100.

Baby Rambler Roses

PHYLIS. Very fine clear pink, highly recommended. \$1.25 for 5, \$20 per 100.
PHYLIS (Grown as a Standard). \$2 for 5, \$35 per 100.
BOSKOOP BABY. Color beautiful shade of China rose, very free-flowering and easily forced. \$3.25 for 10, \$30 per 100.
BABY DOROTHY. "Baby Dorothy," when planted out, flowers perpetually from Spring until Autumn. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85 cts. for 5, \$15 for 100.
BABY DOROTHY (Grown as a Standard). For description, see above. 50 cts. each, \$4.75 for 10, \$45 per 100.
CATHARINE SEIMETH. A very important novelty. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. It has the true rose perfume. 85 cts. for 5, \$15 per 100.
MRS. WM. H. CUTBUSH. A grand acquisition to the Baby Rambler class. Color intense crimson and exceptionally free-flowering. 85 cts. for 5, \$16 per 100.
MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants, 75 cts. for 5, \$14 per 100.
BABY RAMBLER (Grown as a Standard). The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40 cts. each, \$3.75 for 10, \$35 per 100.

Ramblers and other Climbing Roses

CLIMBING BABY RAMBLER (Miss C. Mesman). A novelty for 1911, where the Baby Rambler is popular, the climbing type will soon become so, too. We have a small stock, and offer same as follows. It is a true Polyantha type, color deep rose. 50 cts. each, \$2.25 for 5, \$40 per 100.
GLOIRE DE DIJON. Color buff, orange center, very sweet-scented. Field-grown. \$1.50 for 5, \$22.50 per 100.
CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 5 feet, \$1.75 for 10, \$15 per 100; 4 to 6 feet, \$2.25 for 10, \$20 per 100; 7 to 8 feet, extra heavy, \$4 for 10, \$35 per 100.
DOROTHY PERKINS. Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. 4 to 5 feet, \$1.75 for 10, \$15 per 100; 8 to 9 feet, \$2 for 10, \$18 per 100.
TAUSENSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$1.75 for 10, \$15 per 100.
TAUSENSCHON (Grown as a Standard). Fine for forcing. 40 cts. each, \$3.75 for 10, \$35 per 100.

Something New in Roses for Florists

Half-Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. Easily forced. They are offered in the following varieties:

BABY DOROTHY (Half Standard). Deep pink. 40 cts. each, \$4 per doz., \$30 per 100.
BABY RAMBLER (Half Standard). Crimson. 40 cts. each, \$4 per doz., \$30 per 100.
BABY CATHERINE SEIMETH (Half Standard). White. 40 cts. each, \$4 per doz., \$30 per 100.
BABY "STARS AND STRIPES" (Half Standard). White and red grafted on the same plant; most attractive. 45 cts. each, \$4.50 per doz., \$35 per 100.
PHYLIS (Half Standard). Carmine pink. 45 cts. each, \$4.50 per doz., \$35 per 100.
TAUSENSCHON (Half Standard). Soft pink. 40 cts. each, \$4 per doz., \$30 per 100.
MRS. CUTBUSH (Half Standard). Rose pink. 40 cts. each, \$4 per doz., \$30 per 100.

Well-Known Climbers

Mme. Plantier. White.
Baltimore Belle. Pale blush color.
Prairie Queen. Red, changing to pink.
Seven Sisters. Clear pink.
75 cts for 5, \$14 for 100

English Grown Hybrid Tea, or Everblooming Roses, etc.

Hybrid Tea or Ever-blooming Roses are becoming more popular every year. As hardy as the perpetuals, with slight protection in Winter, they give a wealth of bloom all through the Summer months and late in the Fall till frost checks them.

THE GRAND ROSE LYON. Originated by the raiser of Etoile de France. Perpetual flowering. Vigorous grower. The blooms are very large with broad petals, full and globular in form; shrimp pink at the ends of the petals, center coral-red or salmon-pink, shaded with chrome yellow. Very fragrant. 40 cts. each, \$1.75 for bundle of 5, \$30 per 100.

THE KILLARNEY ROSE. This is a grand Rose for either indoor or outdoor cultivation; is a strong grower and the blooms, which are of a beautiful pink, are borne in great profusion. Strong, 2-year-old field-grown stock, \$1.25 for bundle of 5, \$22.50 per 100.

MAMAN COCHET ROSES. The best of all Roses for Summer-flowering and cutting.

Maman Cochet (Pink). Color is clear, rich pink, changing to silvery rose; very double and fragrant.

Maman Cochet (White). A sport from the above, with all its characteristics; color a beautiful snow-white, at times tinted with the faintest suggestion of blush, the same as is often found in the Bride.

\$1.25 for bundle of 5, \$22.50 per 100.

ROSE, Etoile de France. Flowers large, possessing petals of very good substance; magnificent cupped form. Superb crimson-red velvet, the center of the bloom vivid cerise-red. The flowers are very fragrant and last very long. The Queen of the Everblooming Red Roses. The most free-blooming and vigorous Red Rose ever introduced. Strong, 2-year-old plants, field-grown, 85 cts. for bundle of 5, \$15 per 100.

BESSIE BROWN. Creamy white, \$2.50 for 10, \$22.50 per 100.

GRUSS AN TEPLITZ. No Rose in commerce can compare with this as a bedder. It is a perfect sheet of richest crimson-scarlet all Summer. A strong, vigorous grower, \$1.75 for 10, \$15.00 per 100.

VISCOUNTESS FOLKESTONE. A large full flower of creamy pink, shading to deep salmon-pink at the center; very floriferous, \$1.25 for 5, \$22.50 per 100.

HERMOSA. Soft pink; flowers full and freely produced; a good grower, \$1.25 for 5, \$20.00 per 100.

RICHMOND. The well-known red Rose of commerce, \$1.25 for 10, \$22.50 per 100.

PRESIDENT CARNOT. Almost pure white Rose, shading to soft pink, very distinct and excellent for indoor or outdoor Summer growing, \$1.25 for 5, \$22.50 per 100.

BETTY. Copper-yellow, overspread with golden-rose. A fine formed Rose, large and moderately full, \$1.75 for 5, \$25.00 per 100.

MADAME ABEL CHATENAY. Carmine-rose, shaded salmon-pink, \$2.50 for 10, \$22.50 per 100.

MILDRED GRANT. Cream, with a faint blush of pale rose, \$2.50 for 10, \$22.50 per 100.

AMERICAN BEAUTY. Almost too well-known for description, but as popular today as twenty years ago. Rosy carmine, shaded salmon, flowers large and full; very floriferous. Strong, field-grown plants, 75 cts. for bundle of 5, \$14 per 100.

CAROLINE TESTOUT. Bright satin rose, with brighter center, large full, globular; sweet-scented. \$1.25 for bundle of 5, \$22.50 per 100.

We carry a much larger list of Hybrid Teas in our retail catalogue, which will be sent on application.

KAISERIN AUGUSTA VICTORIA. An almost pure white Rose. Shaded a beautiful primrose. Fine for indoor or outdoor Summer-blooming. Bundle of 5 for \$1.25, \$22.50 per 100.

ARTHUR T. BODDINGTON, Seedsman, 342 West 14th St., NEW YORK CITY

OBITUARY.

Theodore S. Strickler.

Theodore S. Strickler, florist, of N. Y., died at his home on April 16th. He was one of the oldest florists in that section, being 72 years old.

Herbert S. Price.

Herbert S. Price, gardener for many years for James B. Laughlin died at his home, 623 Richland street, East End, Pittsburgh, Pa., on April 23.

George Engel.

Word has reached us of the death of Geo. Engel, pioneer florist of Xenia, Ohio. Details are lacking, however. The bereaved family has the sympathy of the craft.

Mrs. Wm. Winter.

Mrs. Wm. Winter, wife of William Winter, a prominent grower at Kirkwood, Mo., died on Saturday, April 29, after a short illness. Mrs. Winter was well known in the local trade and many attended the funeral which took place on Monday. Mr. Winter selected the pallbearers from his friends in the trade at Kirkwood. Mr. Winter is a member of the St. Louis Florist Club and the members extended to him their sympathy.

BRITISH CARNATION SCALE OF POINTS.

Editor of HORTICULTURE,

Dear Sir:—On page 568B, April 15th, I note Philadelphia correspondent's enquiry are the points given by the British Carnation Society. Our scale of points for judging is as follows:

	Points.
Color	20
Size	20
Fragrance	10
Substance	10
Calyx	5
Habit of Plant.....	20
Form	15

100

Yours sincerely,

J. S. BRUNTON.

PROTEST ON HYACINTH BULB DUTIES SUSTAINED.

The U. S. Court of Customs Appeals has, we are just informed by Curtis Nye Smith, of Boston, the attorney conducting the trial of the case, reversed the Board of U. S. General Appraisers' decision and sustained the protest of Joseph Breck & Sons Corporation against the payment of an importation duty of \$2.50 per thousand on hyacinth bulbs, the proper duty being fifty cents per thousand. The Breck protest was the test case.

Fort Hancock, N. J.—Joseph Carter has succeeded his brother James in the florist business here.

CHICAGO NOTES.

A Joint Club Meeting.

An invitation has been extended by the Milwaukee Florists' Club to the Chicago Club to hold a joint meeting with them June 1st. At the regular meeting of the Chicago Club May 1st, action will be taken regarding it and no doubt Milwaukee will have an opportunity to be host on that day.

Trade News.

There has been a decided movement toward the remodeling and enlargement of retail stores lately. C. A. Samuelson, Mich. Ave. and 21st St., is taking his turn now and his already handsome store will be made still more convenient and attractive.

Florists are large owners of real estate and the Real Estate Show at the Coliseum is proving of interest to them. May 3rd will be known as Elmhurst Day, so named after that beautiful suburban town, and thirty thousand elm trees will be given away as souvenirs.

Florists are anticipating a lively demand for white carnations for Mothers' Day, which has been named as May 14th. Last year considerable sentiment was expressed in favor of making it a carnation instead of a white carnation day.

E. E. Peiser, head of the Kennicott Bros.' wholesale commission house, opened a branch store May 1st, in a portion of what was known as the Flower Growers' Market, now rented by the Percy Jones estate.

Personal.

H. C. Blewitt, who has been in poor health for several months, was able to be in the market Monday.

D. D. Johnson has just returned from a business trip to Buffalo, N. Y., and reports trade excellent in Evergreen Brand Fertilizer.

George Woodward is convalescing and plenty of flowers are finding their way to the hospital where he will stay another two weeks.

Fred Munsing, well known in Chicago, who has been in England the past year returned last week and re-enters the employ of F. Oechslein.

John Davey, who has made tree surgery a life study, has given some interesting and instructive talks on his "brothers," the trees, at the Coliseum.

Otto Freese took his friends by surprise Saturday when he took a trip to Milwaukee and brought home a bride, formerly Josephine Trude. Mr. and Mrs. Freese will make their future home in Western Springs, Ill.

Julius Schnap and family have gone to Seattle, Wash., to make it their future home. Mr. Schnap was for several years in the retail business on 47th street, and Miss Elsa Schnap has for the past two years been with the Alpha Floral Co.

Visitors—Geo. Serviss, Batavia, Ill.; J. A. Peterson, Cincinnati, O.; Wm. Graff, Columbus, O.

PHILADELPHIA NOTES.

Mr. and Mrs. M. Rice returned Monday on steamship "President Lincoln" from a nine weeks' trip abroad. They both enjoyed their trip very much. Mr. Rice will tell later of some of the good things he has secured.

Chas. E. Meehan, of the Pennock-Meehan Co., accompanied by his wife has been on a trip to Old Point Comfort, Norfolk, Portsmouth and Washington. The week consumed has been in the nature of a vacation combined with a little business on the side.

Anadarko, Okla.—The Anadarko Greenhouses are now owned by Mrs. C. G. Loving.

Lawrence, Mass.—Thornton Bros. have announced that they intend to dispose of their general art stock and will then enlarge their flower and seed departments.

A few years ago we lost a customer temporarily because one of our competitors bought bedding plants from him in exchange for his lily bulb order. He called it "reciprocity." For two years now he has had lilies a-la-dandelion blend which were hardly worth the space they occupied. After figuring it all out he finds his loss on lilies, based on his cut flower purchases to supply his trade, is far more than the entire value of the bedding plants. It took just three years to figure it out. It is all right to reciprocate when the values are the same, but on such a lopsided proposition it does not pay. Buy your goods where it pays you best to buy and sell your goods likewise, but don't let any one tell you where to sell and where to buy your goods because no one knows your business as well as yourself. When you want first class lily bulbs or French bulbs, you can get them here at prices consistent with the quality delivered. You can make more money on our kind than on any other kind you can buy. Write for prices.

Seed Trade

Hearing at Harrisburg.

A delegation of the Philadelphia seed trade headed by W. Atlee Burpee went to Harrisburg on the 2nd inst. to reason with the legislators on the pending seed bill. The senate committee gave them a most courteous hearing and readily agreed to the amendments suggested. Mr. Burpee stated that it was the general opinion of the trade that no bill was required but if there must be a bill of some kind to please the politicians then it should be made as reasonable as possible. In its present shape the bill now covers only half a dozen or so of the ordinary grasses and clovers in common use by farmers—all grasses and clovers not mentioned being exempt. On most of the items covered the percentage has been greatly reduced and it would seem as if the bill, if passed in its present shape, would do no great harm and would furnish a good easy berth for somebody as inspector. Vegetable and flower seeds are not mentioned at all. The general feeling seemed to be that if we are to have seed legislation it should be federal and not state. Mr. Miller of the Albert Dickinson Co. was present at the hearing and made some interesting statements. He said that thirty states had already passed seed laws of more or less severity but that up to date not a single prosecution had been heard of under any of these statutes. He thought that this showed their impracticability. To the writer's mind it also shows the high standing of the seed trade of the country—and that there hasn't been and there isn't now, any necessity for legislation of this kind. Harry L. Holmes of the Holmes Seed Co. of Harrisburg, has been a strenuous worker in looking after the seed interests in connection with this bill for a month back and has given generously of his time and money for the general good of the trade. Wm. Henry Maule of Philadelphia also deserves a hearty vote of thanks from the trade for his unselfish efforts to protect the general welfare. It was stated on good authority that if the bill was not reported from committee inside of a week it would not be possible to pass it. The hope of the trade therefore is that it may stay where it is and die a natural death but if it does go through it is not such a monster as it was. The amendments take away its most objectionable features.

On the Pennsylvania Seed Bill.

An expression of opinion from a farmer and seedsman of thirty-five years' experience in Europe and America. Submitted to the Legislative Committee at Harrisburg, May 2, 1911.

If such a bill is passed it will do away with another good old Pennsylvania industry and allow other states and foreign countries to supply an inferior article but yet give the almighty "purity and growth" which this extraordinary bill calls for.

Owing to our peculiar climatic conditions it is impossible to hold our farmers down to arbitrary germination of their seed crops; and while it is a well-known fact about Pennsylvania seeds, that while not always giving the high germination and purity that can be guaranteed by less desirable stocks, they when sown yield the farmer much more desirable and more satisfactory

crops. Take the past two seasons; both have been poor seeding years, and if such a bill had been in force the farmers would have been prohibited from getting any Pennsylvania seed at all at any price. Just think of the monstrous absurdity and wickedness of such a law.

Then consider things as they are. Everybody can get now just what they want and at their own valuation (as to fair price), and the crops in the Keystone State will be as good if not better than ever before (weather permitting; droughts, floods, bugs, blights, old Boreas, and other circumstances beyond human control, not counted).

On the other hand, if this bill be passed no Pennsylvania farmer in his senses will dare to save any of his own seeds but will have to depend on the legislative article from elsewhere (which will pass the letter of the law but will be very inferior in every other respect). The hardness to stand any winter such as Pennsylvania has will count for nothing. The drought-resisting qualities of the breed such as the hot summers of Pennsylvania call for, will count for nothing. No, nothing counts but that the rubbish from outside shall come up to the law standard of purity and germination. What ludicrous absurdity! Is a selfish, self-sufficient little coterie of pedants insisting on they know not what, going to be allowed to ruin the agricultural interests of Pennsylvania?

So far as any sane person can see, there is no necessity for any such bill. The farmers of Pennsylvania ought to do their utmost to place this matter in its proper light before their legislators, and thereby conserve the ancient industry of Pennsylvania Seeds for Pennsylvania Farmers. Must we throw away our valuable Pennsylvania seeds that suit our climate just because we have to sow them a little thicker after a bad season? Most farmers would rather have stocks growing 50 to 60 per cent. of acclimated and tested strains than the same thing growing 99 per cent. from some different environment; the latter, likely as not, picked up anywhere with nothing to recommend them but purity and germination.

Selection and improvement in seeds are the great things for Pennsylvania farmers, but these cannot be got by prohibitory laws based on "purity and germination" foolishness. How is it

that the agricultural industry of our state has managed to go on profitably and on an ever-improving scale for the past two hundred years without any grandmotherly supervision from Harrisburg? Why all this excitement now? Why these bills? There seems to be a mania for making bill and bills and bills, and it looks to an outsider as if a halt ought to be called somewhere.

I am a believer in progressiveness, but there is very little chance of any progress in repressive and impossible laws. Rather offer rewards for merit and then see how things would improve. To penalize where there is no crime and make a crime of innocence and virtue is both absurd and wicked.

Notes.

J. W. Edmundson has been appointed sales manager of the Braslan Seed Growers Co., San Jose, Calif.

On April 19 John C. Bodger, of John Bodger & Sons Co., Los Angeles, Calif., was united in marriage to Miss Bertha Jones.

Dallas, Texas.—The Texas Seed & Floral Co. is building a 100 x 150 foot warehouse of reinforced concrete construction to cost \$65,000.

San Antonio, Texas.—The United States Seed Co. has been incorporated with capital stock \$25,000. Incorporators, C. M. Rathbun, F. M. Roesch.

The Huber pure seed bill has been taken off the calendar in the Ohio senate and committed to the judiciary committee, which, it is said, is equivalent to a final burial.

Des Moines, Ia.—An Ohio seed man has made inquiry as to the practicability of establishing a wholesale seed store here. Also if from five to twenty acres of land suitable for an experiment farm could be secured.

Albert Dickinson, the millionaire seedsman of Chicago, was married on April 22 to Miss Emma L. Benham. Mr. Dickinson is 69 years of age and the marriage is said to have been the culmination of a twenty years' romance.

Dreer's Select Potted Roses

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plants should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

ager of the Harry Rowe store in Chicago, states that the florists of New Orleans are enjoying good business there this spring. Their Bermuda lilies, known there as Creole lilies, were in the best of shape at Easter. Mr. Eichling, who is president of the Avenue Floral Co., has great faith in the future of the South.

CONDEMNNS "CREPE PULLING."

A bill defining a "house of mourning" and making it unlawful to solicit floral trade at such a house, was introduced in the House of Delegates recently by Delegate Lawton at the request of Attorney Randolph Laughlin, representing the Retail Florists' Association of St. Louis. A house of mourning is defined as "a place of human habitation, whether house, flat, apartment, tenement or other residence, in which some one has died within four days preceding, and which has on its front door crepe or some other like emblem of bereavement." The solicitation is made a misdemeanor, punishable by a fine of not less than \$25 nor more than \$500. -St. Louis Globe-Democrat.

Flower Market Reports

BOSTON Street hawkers with arm-loads of Enchantress, Beacon and other popular varieties of carnations, with two-foot stems, 25 for 10 cents; a florists' window in Bromfield street with Killarney roses—pink and white—Richmond, etc., with 15 to 18 in. stems, neatly arranged in boxes of 25 each at 50 cents a box; these instances tell the story of the cut flower market just as well as a volume. Never before has the carnation end been so utterly swamped and demoralized; it is not a question of price, but simply what to do with them and how to get rid of them. The market at present is declared by wholesale dealers to be the worst on record. Demand has shrunk away to almost nothing and the only way to unload is by special outlet—such as department stores for gift purposes, etc., at special prices for large quantities. The prices as quoted in our printed lists afford practically no idea of the figures at which most of the stock is unloaded. Among the lively sellers heretofore were lily of the valley and sweet peas, but both have now flattened out and peas are selling at one-half of what they brought a week ago. Daffodils are coming in now from outside. Other outdoor material from southern points is due to begin soon and this will further embarrass the market. Some anxiety is expressed as to the Memorial Day supply, as heavy crops of roses and carnations may be entirely off by that time.

BUFFALO m weather prevailed the past week and the receipts were enormous, especially in the rose and carnation line and stock of all kinds accumulated to over-supply. Easter lilies were offered in abundance, but with no demand at all; nothing would move them. The same may be said of callas. Sweet peas were fine, also lily of the valley, which were about the only items that had a demand save smilax, which was the one scarce article. Unloading day was looked for on Friday and Saturday, but the day opened with threatening weather and a constant rain set in which lasted over Sunday, and the wholesaler had a good portion of material to carry over.

CHICAGO Local sales have been slow the past week and more stock has been sent in than the wholesalers could handle to advantage. Out-of-town orders have relieved the situation considerably for those who are fortunate enough to have acquired a good shipping trade which seems to be the key to the situation a large portion of the time. With quantities of carnations and roses it seems as if there could be no room for the southern stock which has been coming in for several weeks and while much is sold at all sorts of prices there is reason to believe that it has not paid very liberally this year to the southern shipper. And now the peony season is upon us and the prize shipments are here, adding another flower to an overfilled market. Lilacs have reached us in poor condition. Bulbous stock is good in quality but

SWEET PEAS

Through improved culture and the new introductions, Sweet Peas in all shades are now to be had the year round. At present the Sweet Pea is our typical Spring flower—selling more freely than at any time during the season. A number of our growers are now cutting from the new crops—quality very choice indeed.

Extra Long, - - - - \$1.50 per 100
Medium Stems, good quality - \$1.00 per 100
Short Stems, - - - - \$5.00 per 1000

BEAUTIES

Specials, \$25.00 per 100

Plenty shorter ones, also at correspondingly low prices; quality fine in all grades.

Three Splendid New Roses

“MELODY” the best yellow rose today; awarded Silver Medal at the National Flower Show, Boston, 1911.
“DOUBLE PINK KILLARNEY” the Killarney that will supersede the Killarney now grown.
“PRINCE DE BULGARIE” entirely different from any rose grown.

Flower Market Reports

(Continued from page 683)

has been so continually before the buyers for many months that they are not enthusiastic over it. Good lily of the valley is scarce; lilies far too plentiful; violets the same and sweet peas probably hold their own the best of all the flowers since the holidays.

The feature of the

CINCINNATI market the past week was the good demand

for sweet peas, with a very light supply. Lily of the valley had the next call and as usual the supply is light when the demand is heaviest. Beauties which were on the short side of the market are now coming in more freely, the price low considering the quality. Other roses are in heavy crop and moving slowly, Killarney, White Killarney and My Maryland cleaning up to better advantage than others. While the cut of carnations is heavy the demand is keeping in step so that the average price is good for the season. There is an overabundance of lilies and prices are sacrificed to make sales. The end of the glut on these is very near and prices soon will resume their normal level. There is a goodly amount of antirrhinum offered. Out-door lilac is now to be had. Stocks both single and double, daisies and out-door daffodils move freely. Smilax is on the short side; other green goods plentiful.

Very little to say about **DETROIT** business. Everybody is more or less hustling with an overabundance of stock to select from. Between special sales in some of the stores and great activity among fakirs this stock is kept down fairly well. Lilies are as much in excess of demand as ever and smilax is very scarce.

There is nothing in the present or near future that holds any hope of improved conditions in the cut flower line. The supply of roses, carnations, bulbous stock, gardenias and sweet peas is far in excess of the demand, which seems to be growing less day by day. If anything has the preference at times it is American Beauties of the best quality; these do have an occasional spurt and have the distinction of advancing once in a while even though they decline the day after. The disposal of stock in general is a problem and clean-ups are the exception. It has been possible to move carnations up to this week and now they are accumulating for lack of buyers. Products from out-doors include lilac, tulips, lily of

the valley and jonquils. Violets have gone off in quality and those coming in cannot be sold.

ST. LOUIS slow again all of last

week and stock of all kinds is as plenty as the week previous and with a promise to so continue all of this week. Prices have taken a big drop on all stock in big lots. The heavy downpour of rain which continued from Thursday to Monday caused a depression on the florists all over the city and any kind of transient trade was out of the question. Some of the West End florists say that they have a number of weddings for this month and that the plant trade has opened up in splendid shape and all plants are selling well.

CARNATIONS—Continued**THE NEW HARDY EVER-BLOOMING CARNATION "CRIMSON KING."**

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy Carnation "Crimson King." 2½ in. pots, per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

Flower Market Reports.

(Continued from page 685.)

There was an abundance of flowers of all kinds in this market the past week. No shortage was apparent anywhere and in nearly every case far too many. Half of them could have been kept at home and the same average returns realized. In roses there was a larger surplus than has been experienced since the season commenced. American Beauty is plentiful and of fine quality. There is a good sale for same but at low figures. The hot weather has brought all roses in with a rush and many of them are rather soft and do not keep very well. Carnations have not suffered quite so much and, on the whole, may be considered a more satisfactory proposition for the time being. They move more freely but of course the prices are away down. As to quality, all are pretty good, with probably the exception of Beacon and Enchantress, which are a little soft in most cases. Orchids are in good demand and slightly more plentiful. Gardenias are fine but for some reason do not move off as quickly as they ought. Outdoor daffodils and tulips are now to be had in quantity, but these are mostly of the smaller flowered varieties as yet. In another week there will be much better stock. The aftermath of Easter is still in evidence in regard to the lily crop—those who missed connections keep piling in their stock—and the results are bad as might be expected. This item will not get back to its normal healthy condition as to supply and demand for some little time yet. Sweet peas of the new crop are very choice indeed, but there is a big lot of old-crop short-stem arriving, and these do not go. Lily of the valley is selling fine—one of the most satisfactory items on the market. New lilac, outdoor lavender, just commenced.

NEWS NOTES.

Brooklyn, N. Y.—The florist supply establishment of J. W. Merritt has moved to 386 Pearl street.

Bangor—Mrs. Jeannette Merrill, retail florist, was one of the sufferers by the great fire in this city, losing her residence and most of the contents.

Pint.....	\$ 1.50
1/2 Gallon.....	5.50
Gallon.....	10.50
5 Gallons.....	47.25

Destroys green, black and white fly, red spider, thrips, mealy bug, brown and white scale, and all soft-bodied insects. An excellent cleanser for decorative stock. Used as a spray, you can rely on it for positive results, without fear of failure or dissatisfaction.

\$2.50 per gallon, \$1.00 per quart.

"FUNGINE"

An infallible remedy for mildew, rust and other fungus diseases. A clean, safe and easily applied spraying material. It has no equal for destroying mildew on roses, and carnation rust.

\$2.00 per gallon, 75c. per quart.

FOR SALE BY SEEDSMEN

Send for name of nearest selling agent.

Our products are not alone endorsed, but are continuously used by leading commercial growers, professional gardeners, park departments and state colleges of the country.

Aphine and Fungine can be used in house or field.

MANUFACTURED BY

APHINE MANUFACTURING COMPANY
MADISON, N. J.

Cocoanut Fibre Soil

Fertilizer, tonic, moisture and everything necessary for bulbs, seeds, plants, lawns and especially your fruit trees, young and old. Nature's grower, not forcer.

20th Century Plant Food Co., Beverly, Mass.

"SCALECIDE"

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water.

Send for Booklet, "Orchard Insurance."
B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

NEWS NOTES.

Lawrence, Kan.—The business of C. M. & S. E. Luther has been taken over by Norval Kline.

Gardena, Calif.—The Edendale greenhouses of Wright's Flower Shop, Los Angeles, are to be moved here soon.

Chicago, Ill.—Kennicott Bros. are to open a branch store on the second floor of the building at 60 Wabash avenue.

Le Roy, N. Y.—The Barlow greenhouses have been purchased by Fred Walter, who will remove them to his own place in North street.

To-Bak-Ine Products Kill Bugs

You can buy it in Liquid Form, Fumigating Paper, Fumigating Powder and Dusting Powder (Booklet—Words of Wisdom—free).

Use any form you choose but buy it of

E. H. HUNT, 76-78 Wabash Avenue, Chicago

What the Users say

THE KROESCHELL A COAL SAVER — HEATS UP QUICK

"The No. 4 boiler we purchased of you in 1909 has given the very best satisfaction—would wish no better. Have taken out return tubular boiler this Fall, which used one-half more coal than your present boiler. Your boiler is so easy to regulate that in a few minutes I can run up the temperature by opening drafts. The flow and return connections with Generator all work the very best, according to your plans. We cannot give your boiler enough praise: so far as I have given it a test, my old boiler would not be in it comparing to how much more attention the old one took."

NEWS NOTES.

Waterbury, Conn.—The greenhouses of Alexander Dallas, on Willow street are being dismantled and moved to Mill Plain.

Champaign, Ill.—The Illinois Central greenhouse, which supplies all the flower gardens along the Illinois Central line, will be moved to Flossmoor, about June 1.

Smith's Ferry, Mass.—The 46-acre Collins' Farm has been purchased by George H. Sinclair, florist, of Holyoke. He expects to improve and develop it and next year will build a large greenhouse.

Oklahoma City, Okla.—A severe hail storm on April 13 did considerable damage at Angel's Greenhouse. All the glass in the greenhouses at Wheeler was broken by this same storm.

This Is That House We Built For D. C. Blair, at Bar Harbor, Maine.

It has four compartments, one of which is a graperly. A fine compact house it is, without an inch more wood in it than absolutely necessary. Its Iron Frame takes all the strain. Some owners of our houses claim they will last 100 years. Maybe they will. That's a long time. You get your money's worth, that's sure. Going to build? Then we ought to build it.

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12-in., pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardest varieties assorted,—*Pteris Mayii*, *Wimsetti*, *Adiantoides*, *Aspidium tsusimense*, *Cyrtomium falcatum*, etc.

Nice plants, 2¼-in. pots, \$3.50 per 100.

BOBBINK & ATKINS

Nurserymen and Florists

RUTHERFORD, N. J.

World's Choicest Florist and Nursery Products.

We are growing in our greenhouses and in our 250-acre nursery a large variety of material constantly in demand by florists. Our New Illustrated General Catalogue describes all the stock we grow. We shall gladly mail it to any florist upon application.

B. & A. SPECIALTIES

Palms, Bay Trees, Boxwood and Hardy Herbaceous Plants, Evergreens, Roses, Rhododendrons, Vines and Climbers, Bulbs and Roots, Conifers, Pines,

We have a quantity of H. T. ROSES in fine assortment of kinds, ask for Lists and Prices.

Florists are always welcome visitors to our nurseries.

We are only a few minutes from New York city; Carlton Hill station is the second stop on main line of Erie Railroad.

Bobbink & Atkins Heart Cypress Tubs

We take pleasure in directing the attention of our patrons to our Plant Tub Department. We are now thoroughly well equipped to supply tubs in any quantity, size or shape. Write us for prices on special sizes and shapes.

Phalaenopsis X leucorrhoda

This beautiful Philippine orchid has been in cultivation since 1875. It first appeared among an importation of *Phalaenopsis Aphrodite* and *P. Schilleriana*, made by Messrs. Hugh Low & Co. of England. Its hybrid origin was suspected and Reichenbach correctly described it as a natural hybrid between *Phalaenopsis Aphrodite* and *P. Schilleriana*. This has since been proved by artificial hybridization. Several forms have appeared of this natural hybrid, but in all of them the characters of both parents can easily be traced. There is one plant in bloom here at present which has white sepals and petals, flushed with pink toward the base. The lip partakes more of *P. Schilleriana* with slightly longer tendrils, but the influence of *P. Aphrodite* is plainly shown in the side lobes of the lip.

It grows freely under the same treatment given its two parents, of which about 400 are grown here, all of which flower with the greatest freedom. In winter the temperature at night ranges from 60 to 65 degrees, with an occasional drop to 55 degrees, which will do no harm if the plants are kept on the dry side. 70 to 75 degrees during the day in winter is warm enough for them. During summer from 5 to 10 degrees more heat is given, also more moisture both at the roots and in the atmosphere. From the middle of February to the middle of September shading must be carefully attended to; for the rest of the year shade just enough to break the rays of the sun and ground glass answers the purpose here. We use osmunda fibre, but wherever sphagnum moss can be made to grow freely it is to be preferred.

M. J. Ope

Naugatuck, Conn.

A Gardener's Views on Mendel's Law

Editor HORTICULTURE:

Dear Sir:—Congratulations for your enterprise in introducing the readers of your magazine to the vitally important and intensely interesting "Mendelian law." To the thoughtful it will open various avenues of meditation that will be instructive mentally, and perhaps profitable commercially. I have in mind an esteemed craftsman who has thus been singularly favored from the latter standpoint, as no doubt he has from the other "mentally instructive." Yet I think he has been entirely unconscious as to the identity of the Mendelian law in relation to his adopted method and success of doing things.

He has established a method that might occur to any observant and practical person, only he has scrupulously adhered at all times to his plan of procedure wherein lies his uniform success in my estimation.

In short the method thus referred to, consists of the keeping of his seedling plants no matter how promising and excellent they may appear the first year, for a series of years, and until, figuratively speaking, they settle down from the exuberant vagrancy resulting from mixed progenitors to steadfast, everyday characteristics. No one studying Mendel's law but what must be struck with the necessity of adopting a plan of this kind if a reasonable assurance of permanent fixed characteristics be the objective point.

The person that I had in mind as above mentioned is "honest Peter Fisher of Ellis, Mass."—as they call him in England, and surely we honor him not less than the Englishman on the same grounds that called forth the latter eulogy. Doubtless, as premised, Mr. Fisher has arrived on parallel lines with the Mendelian law from nature's gift of cannyness backed with a scrupulous honesty of aim.

I have been drawn to say more than I intended to say when I started to congratulate you for your praiseworthy enterprise in putting before your readers such an interesting subject as the Mendel law, for more than one reason. First, the importance as I see it, of its study to the younger generation of horticulturists, and the tucking away of its salient points in their memory vest-pockets, to be recalled as necessity requires for further practical uses. Secondly, I always have had and do now have an idea that, hitherto, even successful raisers of plants have approached the subject in a bungling and child-like way, largely dominated by the "curious" rather than by the practical. When we eliminate the curious, and try to establish the practical sources of success in doing things in this particular line, there will be less disappointment to contend with, less waste of energy, time and space.

H. Finlayson

Choisya ternata

THE "MEXICAN ORANGE BUSH"

This is one of the most interesting plants that have been shown for some time before the Gardeners' and Florists' Club of Boston and at the last meeting attracted considerable attention. As the common name implies it is a native of Mexico and forms a large bush five to six feet in height and proportionately broad. The dark, glossy evergreen foliage is in itself very strik-

LIBRARY
NEW YORK
BOTANICAL
GARDEN.

ing, but its beauty is much accentuated by the handsome white, sweetly-scented flowers which are freely produced in flat heads at the end of the stems during May. In England this shrub has been largely cultivated for many years, and is perfectly hardy around London, but to see it at its best one must visit the gardens of the south or west. There it is generally grown on a shady wall where it often attains a height of twelve or fifteen feet and the foliage and flower heads are very much larger than they ever appear when grown in bush form, the latter often measuring from eight to ten inches in diameter. In the more favored parts of this country it should be largely grown as a most desirable evergreen but in this locality, of course, it could only be cultivated as a cool greenhouse shrub. Either as a pot subject or for clothing the walls of conservatories it has few superiors. Propagation is easily effected by inserting cuttings of half-ripened growths and a well-drained loamy soil will suit it to perfection.

Arthur. E. Thatcher

Fruits and Vegetables Under Glass

YOUNG POT VINES

These will now be growing freely and will need continual attention keeping them tied into position, stopping laterals, etc. The canes should be grown tall enough to suit the house they are to be forced in. Short canes are as serviceable as long ones and it is useless to let them run up further than the desired length. When this is attained stop them by pinching out the point of the growth. Lateral growths will appear and in due course must be stopped at one leaf. Any growths made beyond this should be rubbed out which will throw more energy into the bud. This is where it is needed. A good plump bud in the fall means a fruiting lateral next spring.

Give plenty of air to promote a sturdy growth and syringe twice daily using a good force to keep down red spider and other pests. No shade will be necessary for these if proper attention is given to watering.

PACKING GRAPES

Grapes are about the worst fruit to pack and ship any distance. The delicate bloom or gloss on the berries being so easily rubbed off makes them appear unsightly when placed on the table. No damage may be done to the berries and they will eat just as good, but no one likes to see the shiny half of a berry or berries and the remainder still retaining its natural hue. When shipping by express it is almost impossible to avoid this as packages are turned upside down and "any old way." If a message can be sent with them all this can be avoided and the fruit served up with scarcely a brush. The mode of packing must necessarily differ. The simplest method and one which has been adopted largely by commercial grape growers in England is to use strong willow baskets, being deep enough to allow a bunch to hang down the sides. The top must be considerably larger than the bottom, making the sides to slope. The whole inside is lined with cotton wool and a double thickness of oil paper placed on top of this. The bunch can now be laid on the sides fastening securely (the lateral cut with the bunch) to the top side of basket, placing a piece of paper between each bunch. Baskets made to hold four or five bunches will be found most serviceable. If one can be sure of their being kept the right side up no further packing is needed other

than some strong paper placed over the top, sewing it to the sides to keep it in position. Strings can be run across the top of the paper if thought necessary. This is the best method of packing grapes when sending by messenger. There is little trouble to it once the baskets are lined and very few berries are noticeably rubbed. A few baskets can be made large enough to hold the daily shipment.

Where boxes have to be used and packing from all sides is necessary it is impossible to retain very much bloom. Something has to touch the berries to keep them in position and once touched by anything the bloom is sure to go and leave the shiny surface. Deep boxes should be used and packing material placed in the corner made by the bottom and the side so as to form a slanting side. Cover this over with paper and place the bunches in, securing the top with string which is pushed through holes previously made in sides near the top. If both sides are used do not place the bunches opposite to each other; angle them. Place a separate piece of paper over each bunch and fill in with cotton wool. In all cases see that the bunch is hanging from the piece of wood that was cut with it. This keeps the top from moving and the whole from falling down in a heap. Shipping grapes for exhibition is a different matter and is not meant to come under this heading.

EARLY FORCED APPLES AND PEARS

These will now be finishing and should be placed where they can have all the sunlight and air possible. Cease feeding, but an occasional syringe will be beneficial. If the weather permits and a suitable position can be given them these can be finished outside. Plunge the pots to the rim to keep them from being blown over and drying out. Give a good supply of water right along. Do not neglect any peaches or nectarines that may have finished a crop. See that they are kept watered and the foliage free from insect pests.

YOUNG FIGS

Young figs propagated in the early spring will need shifting on into "eights." Take care that the ball is moist before repotting and water in soon after potting. Trees swelling their second crop should have feed when watering. Liquid cow manure will suit them. Trees in pots or tubs will take any quantity of feed. The small quantity of soil is soon deprived of its nutriment, and must be continually restored to obtain the best results. Continue to stop the growths at four leaves and syringe with force to prevent pests getting a foothold.

LATE VINES

Late vines will now be coming into flower. Most of these are free setters so there is no need to fertilize with a brush unless muscats are included. The house can be damped down first thing in the morning and then let go until noon when the rods should have a sharp knock to distribute the pollen, after which the house can be damped again. Such varieties as Apply Towers, Gros Colman, Gros Moroc, Alicante (black) and Lady Downes will be found to set as free as Black Hamburgh at this season and should be thinned early as a wait of a few days will mean a tight bunch to commence on with the scissors.

George H. Penson

Mr. Penson's next notes will be on the following: Spider on Peach Trees; Packing Melons; Keeping Grapes; The Mixed Orchard House; Scorching, Scalding and Mildew on Grapes.

Seasonable Notes on Culture of Florists' Stock

AQUATICS

All florists who have the advantage of a pond, stream, or even a small pool should grow some hardy or tender nymphæas. Those who have not these natural water advantages can grow many nymphæas and other aquatics in artificial pools or tubs. The best way to start them is to plant the dormant rhizomes of the hardy and tender nymphæas now in boxes about 10 inches deep and from 3 to 4 feet square, using a compost of three parts fibrous loam and one part of cow manure. Fill to within two inches of the top then plant two or three rhizomes in the box, so that they are just covered. After planting place a layer of coarse sand over the surface. These boxes should be placed where they are to remain and sunk so that they will be covered with about three inches of water until the first leaf floats on the water, when they should be gradually lowered until they are covered with water from 12 to 14 inches deep. Each box should be allowed a space of about 60 square feet so as to show up well. All of the nelumbiums and many of the nymphæas, besides other aquatics, can be successfully grown in tubs made from half-barrels filled with the above mentioned compost about half full and sunk in the ground. As these grow they will be benefited by an application of dried blood at the rate of a half pound for every tub or about one pound for every twelve square feet of water surface. Just throw it broadcast on the water. Tender nymphæas should not be planted before the 25th of May. Plant all nymphæas and other flowering aquatics so they will be exposed to full sunshine.

BOUVARDIAS

Bouvardias should not be planted out too early. Give them an outdoor frame until the first week in June, where they can be kept fairly warm during cold spells and when the weather is warm they can be given lots of air, which will insure a degree of sturdiness before being planted out. Give them a light soil that has been well enriched with stable manure so that they will make a vigorous growth. See that they get a good watering after being planted out. When the hot and dry weather comes don't allow them to suffer for want of water. It is necessary to keep on pinching them back during the summer so as to have sufficiently bushy plants by lifting time. If you want to have them in flower for the holidays don't pinch any after the middle of August and lift before the first week in September is over.

CHRYSANTHEMUMS

For the growing of exhibition blooms great care should be taken from the time the cuttings are struck until they have their last shift. The plants should never be allowed to get pot bound. As soon as the pots are well filled with roots repot into 3-inch and up to 8 or 9-inch pots. Compost that was prepared last fall and cow manure added at the rate of one to three will grow good plants. Soil for 5 and 6-inch pots should have a 5-inch pot of bone meal and the same of some high-grade fertilizer with a sprinkling of soot to every barrow load of soil. Mix it thoroughly and let it stand for a few days until needed. Be careful after potting and don't overwater, and as they get well rooted never allow your plants to suffer from want of water. Syringe every sunny morning and again in the afternoon on very warm days, but do it early so they will have sufficient time to dry their foliage before night. Look out carefully for aphids and fumigate regularly. There is time yet to put in cuttings for cut flowers. All late varieties such as Nonin, Chadwick, Swinburne, etc., will

make plants in good time for planting about the end of June. Early varieties such as October Frost, Golden Glow and Monrovia should be benched now if you want good growth and buds that can be taken in July, which produce flowers superior to buds taken in August.

ERICAS

Ericas that were cut back into shape after flowering should have attention in the way of potting. Plants that are perfectly healthy should be given more root room; those that are in 6 or 7-inch pots, or specimens in larger sizes will bear two or three sizes larger in a pot. It must be borne in mind that the erica family cannot exist in a material that is too retentive and the compost should be such that the water can pass freely through. A good compost is a turf-like fibery loam two parts, peat two parts, and a quantity of silver sand. By the beginning of June they can be placed out of doors. Plunge in some litter, to keep the roots cool. They will be better if placed on the north side of fence, wall or trees. They can remain here until the first week in September. Give careful watering at all times not allowing them to become dry and at the same time not keeping the soil in an over-saturated condition. Epacris will grow under this treatment also.

STOCK FOR VASES AND BOXES

The filling of vases and boxes will be an important item with many florists from this time out. Those who have a call for many vases and boxes to fill find it sometimes a very laborious work. Quite a few can be done at the greenhouses now, by going around to your steady customers and collecting their veranda boxes, baskets and any vases that can be lifted off and brought to your houses where they can be much more satisfactorily filled and given a start before being placed outside by end of May. All climbing and drooping plants should have attention. Give the climbers stakes with proper tying so as not to allow them to become all tangled up. For the drooping plants give them a place where they can hang down along the edge of some bench. Give all your plants particular attention in regard to watering from this time forward. Geraniums should form the majority for filling vases and boxes, along with coleus, achyranthes, petunias, ageratums, acalyphas, centaureas and Vinca rosea. For centers there is nothing to equal *Dracæna indivisa*. *Phoenix canariensis* is especially valuable as it stands sun and wind well. For trailers use vincas, *Abutilon vexillarium*, German ivy, *maurandia*, *nasturtium*. For shady places use begonias, fuchsias, small *Ficus elastica*, ferns, *aspidistras* and others for the erect growing plants. For droopers use *tradescantia*, *lygodium*, Kenilworth ivy, *selaginellas*, and moneywort.

VINCAS

Reserve a sufficient lot of these plants for propagating purposes. Now, or later as your propagating bench is less used, you can put in a good batch of cuttings leaving a heel, and they will most all root if kept shaded and moist. When they are rooted pot them into 2½ or 3-inch pots and plunge in a cold-frame during the summer. They will make fine little plants by winter. Cuttings that were rooted during the winter and planted out will make plants of sufficient size by cold weather. You never can have too much of these most generally used trailers.

John J. M. Farrell

Mr. Farrell's next notes will be on the following: Antirrhinums for next winter; Cinerarias for Christmas; Callas; Cycas; Miltonias; Roses.

A happy
choice

Professor Sargent has made a master stroke in securing the services of E. H. Wilson for the Arnold Arboretum. Not only the Arboretum and Boston, but New England and the entire country are gainers, horticulturally, by the decision of this eminent botanist and collector to make his home with us. Already with a record of new and valuable plant introductions far exceeding that of Robert Fortune, this young man, so highly endowed by nature and experience, has before him in the ordinary course of years, a life of rare usefulness and we predict that he will leave the impress of his work on American gardening to a degree unexcelled by any who have preceded him.

Prepare for
Memorial Day

Indications are that the situation in the flower trade is improving and that the height of the great spring crop has already passed. As to Memorial Day, so much depends upon the weather that nobody can yet predict what is going to happen as regards flower supply either outdoor or indoor grown, but there can be no excuse for the florist who neglects to provide in good season for such other supplies as are especially in demand for Memorial Day. The supply dealers—those that deal in fresh green material and those offering manufactured goods have all put their best foot forward and have not been backward in advertising their wares. Each year sees a decided advance in variety and quality of the stock offered by these enterprising allies of the florist business and they well deserve all the prosperity which they now enjoy after years of patient industrious effort to excel.

A field
for business

Our "seasonable notes" correspondent has something to say in this week's letter on the subject of vase and window box plants. This is a branch of the florists' business which should count among the most profitable but which, for some inscrutable reason, is neglected by the majority of florists. If a customer sends an order to have a veranda basket or box or cemetery vase filled, of course the commission is attended to but any earnest effort to get people generally interested in the adornment of their homes and their places of business, public buildings, etc., is a very rare occurrence. The dwellers in our American cities are criticised, with good reason, by visitors from abroad for the barren appearance of their residential districts and the unattractiveness of their business streets as compared with the greenery and floral embellishment so freely used in many European cities. There are old-country customs and conditions which we do well to shun but here is one that has everything to recommend it and it does seem as though the florist trade would be doing itself a much larger and more permanent benefit if they would put in motion a well-directed and persistent exploitation of this promising branch of their business and endeavor to arouse the public to an appreciation of such things rather than to spend their energies fussing over such trifles as a few carnation boutonnières for "Mothers' Day."

All kinds in Next Week's Issue. IF YOU ARE A BUYER consult the advertising columns of that issue.

MENDEL'S LAW AS RELATED TO HEREDITY AND BREEDING.

By Dr. Herrmann Decker. Translated from
"Cosmos" by Gustave Thommen.

111.

But how about this remarkable proportion of numbers in the second generation, this ever recurring formula of 3:1? The answer is very simple, as we shall see. To illustrate: If we should cross a black guinea pig with a white one, we would have represented the two colors black and white as the color characters, of which, as the result of the cross would show us, the black was predominating. So according to Mendel all the young would be black; the white is suppressed, but not lost.

Every living being is the outcome of the union of one male cell with one female eggcell. Heredity is dependent upon these sexual cells, "GAMETES," and only what is contained in these cells can be inherited; the gametes of the black father contained the disposition for "black" only, those of the mother for "white" only.

Let these different sexual cells now be represented by slips of glass, black ones and plain ones. Uniting two of these will give us: black-plain, which, looked at, shows to our eyes "black." So, also is our first generation of guinea pigs black; the white of one of the parents is there, but it is suppressed or covered up by the predominating black of the other parent.

Now what will happen if we cross these bastards? What sort of gametes has the male and what sort has the female? Mendel says: The gametes can contain the foundation of one character only. But the bastards have in their bodily cells, the black of the father, as well as the white of the mother (the latter suppressed), consequently, in the formation of the gametes of these bastards, the two characters are separated again; the male forms gametes containing either the "black" or the "white," the female forms eggcells which contain the disposition for one or the other color alone also.

Representing the gametes by the slips of glass, we see that the male forms white ones and black ones, ○ ○ ○ ○ ● ● ● ●, the female forms egg cells in the same way, ○ ○ ○ ○ ● ● ● ●.

Now, any one of the black, male slips may be united with either a black ● or a plain ○ female slip and any one of the plain ○ male slips may unite with a black ● or plain ○ female slip.

This will give us the following four combinations (the other combinations are not possible), $\bullet \times \bullet$, $\bullet \times \circ$, $\circ \times \bullet$, $\circ \times \circ$. We have now four pairs of slips, of which three pairs show black and one pair which shows plain, $\bullet \times \bullet$, $\bullet \times \circ$. But of the three black pairs only one is pure black, $\bullet \times \bullet$, two pairs are impure, because each pair contains one plain slip, $\bullet \times \circ$, $\circ \times \bullet$. The fourth pair is pure plain, $\circ \times \circ$.

If we should divide up the slips and put them in two boxes, into one box those of the male, ●●●●○○○○, and into the other box those of the female, ●●●●○○○○, and should now, blindfolded, take one slip from each box at a time, to form a pair, we could form no other combinations.

This is why in the second genera-

tion of our guinea pigs, three of the litter are black and one is white, or should there be eight to a litter, six black and two white. Of these six black ones, two are pure black and, crossed among themselves, will produce pure black again. The other four are bastards (with the white in them, but not showing, because it is covered by the black) which, crossed among themselves, will again throw three blacks and one white. The white one is pure.

That in the impure bastard, the dispositions governing the foundation of the characters, separate again, is the

SECOND LAW OF MENDEL.

Considering, how easily this law is

[denotes that one character is suppressed.

demonstrated with our slips of glass, we might almost become sceptical as to whether any such simple law can really explain the often seemingly very complicated conditions under which heredity is many times displayed. But numberless experiments, made by many of the foremost investigators, have proven the absolute correctness of Mendel's laws.

Mendel says: When the disposition for one of the characters which is present in the one parent, meets, in crossbreeding, another of the same character, in the other parent, then one of the two will suppress the other and predominate in the offspring.

Crossing a red-flowered pea with a white-flowered one, will give seed producing red-flowering peas only; the red suppresses the white totally, but the second generation brings again one white to each three red peas. In cross breeding two specimens which differ in their characters, we can of course at the start not know which of the characters will predominate. We can realize this only by observing the result of the cross. But having noticed this fact in the first generation, puts us in a position where we can force nature to confirm and corroborate our surmises, through the second generation.

As the astronomer is able to chart the path of a planet (knowing originally only a fraction thereof and computing from this) and to predict how this planet will travel eternally, so can now the breeder, by close observation of the bastards from his crosses, predict which qualities and characters of the parents can be transmitted and fixed in the progeny, according to nature's law of heredity. This is a tremendous gain, because it

gives to purity of type a specific meaning.

The eminent botanist, De Vries, has coined the words "to mendel" and "mendeling." These words, on account of their directness, have become very popular. Any quality or character "mendels," when in breeding it combines with another similar character according to Mendel's law and separates from it again. Such "mendeling" character-pairs, have through extended experiments been found in a large number.

So "mendels" for instance: the serration and form of many sorts of leaves. This can plainly be seen in crossing the plain-leaved *Urtica Dodartii* with the tooth-leaved *U. pilulifera*.

Professor Arnold Lang of Zurich, has made exceedingly careful and painstaking experiments in crossing the unbanded garden snail (*Tachea hortensis*, with its five-banded variety). He proved that the five-bandedness is suppressed, in exact accordance with Mendel's law. (Illustration from photographs.)

"Mendeling" can take place in the color of flowers and fruits, of feathers of birds and coats of animals, of designs in wings of butterflies, of petals of flowers, in the form of leaves, and arrangement of spines and thorns of fruits and plants; in the size, shape or presence of horns in animals, form of combs in fowls, etc. Also, many qualities and characters which do not strike the eye so vividly, obey Mendel's law. Earliness and lateness of ripening, immunity to disease in animals or rust in plants, follow the same rules. Many varieties of wheat are subject to rust. In crossing these with varieties which are immune it was found that immunity is suppressed. Letting self-fertilization take place in the bastards, gave in the second generation, plants which

were rusty and immune in the proportion of 3 to 1. Immunity being proven a "mendeling" quality, certainly opens to the breeder a large field for activity.

So far, dear reader, demonstration of Mendel's law, has been rather an easy task, but Mendel's law, like all things has its perplexing points.

We have taken it for granted that in "mendeling," one quality or character is suppressed by the other, even to the point of almost total disappearance. This is not always so. Sometimes the suppressed character remains plainly visible to the eye. Cases of this kind are especially instructive.

If we mate a Black Andalusian cock with a White Andalusian hen, vice-versa, so suppresses the black the white, but not completely, and as the result, we will in the bastards have blue (1st generation). All the blue Andalusian fowls, which are so much admired, are only bastards and it is not possible to breed from them a race of true "blues." Black parents will always give black chicks, white ones always white; black with white always blue. But, these blues crossed among themselves, never will have all of the offsprings blue. There is always $\frac{1}{4}$ black, $\frac{1}{4}$ white and $\frac{1}{2}$ blue. These blues, crossed, always split up again in the same proportion in every generation. This explains the always occurring "throw backs" when breeding "Blue Andalusians" and also shows why the breeder has to use black and white parents to get the blue.

(To be continued.)

NIEREMBERGIA GRACILIS—A DESIRABLE BASKET PLANT.

"Get plenty of Nierembergia! You never will have too much of it!"

This was the advice of an expert and experienced florist, years ago when I was consulting him about greenhouse stock. I did not then know what Nierembergia was, and I think that today many florists are not familiar with it, nor aware of its value, but I followed his advice and got some Nierembergia—and have been glad of it ever since. Also, I have found his prophecy true, that I would "never have too much of it," for although I have been growing a little more each year for nearly 20 years, I never yet have had enough to supply the demand. We use it mostly in filling porch and window boxes, cemetery vases, baskets, etc. Our customers like it, and every year they want more and more. One lady on our street fills a box with only Nierembergia and vines, and her box is one of the delights of the neighborhood. Nierembergia gives such a constant show of bloom, and is so graceful, so durable, and so satisfactory, that we have found it one of our most indispensable greenhouse plants.

W. J. O.

ARNOLD ARBORETUM SECURES E. H. WILSON.

Mr. E. H. Wilson sailed from Boston on Tuesday, May 9, on the Cymric, of the White Star Line and will return from England about Sept. 1, accompanied by his wife and daughter, to take up regular work at the Arnold Arboretum.

Obituary

Jacob Rudesule.

Jacob Rudesule, florist, Glendale, Brooklyn, N. Y., died April 21, aged 69 years.

John Dodds.

John Dodds, florist at the new Grand Trunk shops, expired suddenly at his home, Battle Creek, Mich., on April 28.

Mrs. Caroline O. Schilder.

Mrs. Caroline Ober Schilder died at her home in Chillicothe, Ohio, on April 25. She was the widow of the late Martin Schilder.

Martin Kelly.

Martin Kelly, a well known gardener in that vicinity, died of lock-jaw on April 29, at the Norwalk Hospital, South Norwalk, Conn. He was 49 years old.

William Hamilton.

William Hamilton, former superintendent of North Side Parks, Indianapolis, Ind., died recently. He has been in charge of the parks for years and had a wide acquaintance among the florists.

George Rogers.

George Rogers, florist, died at Hempstead, Long Island, N. Y., on April 30. Mr. Rogers was born in Bristol, England, coming to the United States in 1867. For the past thirty-three years he has had a large florist business in Hempstead. He is survived by a widow and five children.

George Hollis.

George Hollis, a florist of South Weymouth, Mass., died on Thursday night, May 4, aged 71 years. Mr. Hollis is best known to the florist trade as a peony fancier and has received many awards from the Massachusetts Horticultural Society for seedling peonies of recognized merit. He was a pleasant, affable gentleman and enjoyed the respect of the trade and his townsmen.

Henry Lohrenze.

Henry Lohrenze of St. Louis, Mo., died on Saturday, May 6, after a lingering illness. He and his wife ran a small store known as the Park Floral Co., near Lafayette Park. Mr. Lohrenze has not been of right mind for the past ten years. He was well known in the trade, who extend to the bereaved family their sympathy. The funeral took place on Monday, May 8th. He leaves a wife and two children to mourn his loss.

Niles Nelson.

Niles Nelson, prominent in politics and floriculture, died at his home in South, Portland, Me., on May 5, aged 51 years.

For several weeks Mr. Nelson has been suffering with acute Bright's disease and neuralgia of the brain and as a result his system was not able to stand the strain and following the surgical operation which was performed he passed away. He leaves a widow, two sons, two daughters and two sisters, one of the latter being

the wife of the well known florist, E. J. Harmon, of Portland. Mr. Nelson's greenhouses are located on High, Franklin and School streets.

Mary Eva Reissig.

Mary Eva Reissig, for many years in the florist business at Riverside, Ill., just west of Chicago, died of heart trouble May 5th. She was one of the best known of the older florists in this vicinity and was actively engaged in the business until her death. When the writer saw her a few weeks ago she was as active and full of interest in the work as in her younger days. Mary Eva Becker was born in Baden, Germany, 63 years ago and came to America when quite young. She was married in 1872 to Chas. Reissig, who passed away in 1892. Four of their six children survive and one is in charge of their fine range of greenhouses. Their retail store on Wabash avenue was given over to their nephew, Phil Hauswirth, at the time of Mr. Reissig's death.

PHILADELPHIA NOTES.

Samuel J. Irvine of the Grovedale Nurseries reports a successful season with everything sold out at good prices. He is credited with having sent in the best hydrangeas for Easter that reached the Philadelphia market this year.

We understand that Mr. Condon of the Castle Circulator has booked some good orders on his recent trip to this vicinity. Louis Burk, J. W. Pepper and many others are reported to have become impressed with the efficiency and money-saving potentialities of this wonderful device.

You have all heard of the Wotherspoon Watering pots and the Eureka Fumigators. These two lines of galvanized iron goods have been sold by the seedsmen of the United States and Canada for a quarter of a century. James R. Wotherspoon began by making a good article and in spite of the keen competition of cheap imitations has held his own and grown, and resisted all temptations to cut prices by cutting quality. Our readers will regret to hear that Mr. Wotherspoon had a serious fire at his factory on Front street on the 5th inst. Completely gutted. Damage estimated at fifty thousand dollars.

Visitors: Andrew Wilson New York; John Condon, Boston, Mass.; Jno. A. Pennypacker, Phoenixville, Pa.; James Brown, Coatesville, Pa.; Z. D. Blackstone, Washington, D. C.

We wish to call the attention of our readers to the importance of using only our latest issue in making up their orders for Dreer from the advertisements appearing in Horticulture. In this issue the following varieties have been omitted, as surplus is exhausted for the present:

May Kenyon Slaney, Konigin Carolla, Harry Kirk, Mrs. Foley Hobbs, American Beauty, Chlo. Duke of Edinburgh, Hugh Dickson, Magna Charta, Austrian Yellow, Harrison Yellow and White Microphylla.

Cypripedium luteum is in bloom now at the Arnold Arboretum for the first time in this country. It is a native of China and was collected there by E. H. Wilson.

BERMUDA AND THE LILIES.

A paper read before the New York Florists' Club by A. T. Boddington.

Bermuda has been described as Heaven, but it is necessary to go through Hades to get there. This is on account of the rather rough sea trip, especially in the winter time. The Gulf Stream which is about a hundred miles wide is crossed diagonally, and while the current runs only at the rate of about a mile an hour, if the wind is opposing the direction of the current this frequently kicks up a nasty sea. The steamships that run down there, while they are good boats and are operated under most careful management, are only about half the size of the average European steamer; consequently the motion is felt severely by passengers with delicate stomachs. However, the trip is not always rough, frequently it is very smooth and pleasant, especially in the month of May, which is one of the most interesting months in the year from the point of view of the florist.

I left New York on April 5th arriving there on Friday morning, April 7th. The lilies were just coming into bloom, hardly any being expanded but the buds were white. The growers have been very busy in the onion and potato business this year and they were a little behind with the disbudding of the lilies. A great deal of care is necessary to produce good bulbs. No weeds can be allowed to grow up more than an inch or two high. If the weeds are allowed to get large, when they are pulled out they disturb the surface roots of the lily, which will always result in serious injury and failure when the bulb is grown next year. It is a practice among the Bermuda growers to disbud the lilies just as the buds are whitening. This is done that the plants may be strengthened and that all the nutriment may go to form as large a bulb as possible. Fortunately for me the weather which had been rather cool became suddenly warm and by Sunday, the 9th of April (Palm Sunday) the fields were a sight to behold. On the next Monday the photographs which I have here tonight were taken. These were some of the best fields at Columbia Farm, Longbird, Smith's Island and at Westmeath. The lilies shown in these photographs were growing strongly and for the most part showed perfect health. When examining them closely, however, there seemed to be about 10 per cent of stunted and deformed plants, all of which are being dug out by the more careful growers. Upon my pointing these plants out to Mr. R. H. James, he told me they were not removed before, for the reason that in digging out these rogues an equal number of good plants would be destroyed and that the plants that were deformed and stunted were really not diseased plants but bulbs which had been injured in digging the previous year or in the process of planting. Mr. James informed me that they handled lily bulbs as if they were eggs and that rough handling in digging, or by the seedsmen, or by the florists when the bulbs are being potted is one of the most frequent causes of the stunted and deformed plants. To convince me that his theory was correct, Mr. James had a

ROSE MRS. AARON WARD.

Most of our readers are now familiar with this sweet little forcing rose which got its first American introduction in Boston. Its rich pale and deep Indian yellow tinted petals form a beautiful bud or fully opened flower and it is an excellent keeper. The

color pales with age but not in an objectionable way. Being a hybrid tea this rose makes a valuable garden variety, blooming continuously all through the summer. We are indebted to H. A. Dreer for the photograph. The variety is listed in their rose advertisement in this issue.

number of these deformed plants dug up in my presence. He demonstrated to me that the bulbs showing these deformities were smaller than when they were planted and that they could never even by accident get packed in the cases as saleable bulbs for the reason that they would not be big enough to grade as even 5-7 inch bulbs. The bulbs of these deformed plants (or as our friend, Mr. Louis Schmutz calls them "Kyoudles"), were all afflicted with a partial rotting of the root base. Mr. James, who has had thirty years' experience in growing bulbs in Bermuda, tells me that to drop a bulb out of the hand onto even the soft ground will frequently produce an injury sufficient to cause this disease of the root base. There apparently seems to be nothing contagious in this disease. Of the other disease that seems to be afflicting the lilies in Bermuda, the symptoms are as follows: The plant starts to grow healthily until it gets up a few inches high when it develops yellowish brown streaks and spots in the foliage and finally peters out to nothing or produces a deformed flower. This disease has been almost eradicated, though here and there a plant was to be seen afflicted with it. About the only remedy for this disease is to dig up the bulb and see that it is destroyed, though spraying with arsenate of lead and fungicides is a preventive measure. The percentage of this disease, however, was very small.

Lilium Jamesii were looking very fine at Mr. James' Longbird Farm. This lily is almost disease-proof. It has extra fine foliage, and flowers under Bermuda conditions one week to ten days later than *Lilium Harrisii*. The bloom is slightly shorter and not so large as *Lilium Harrisii*, but it is a robust type and well worth growing. Furthermore, this lot had been thoroughly rogued and were true to name. A point in favor of the Bermuda lilies as grown at Smith's Island, Longbird and at Westmeath, is the fact that these growers have eliminated all hybrid types. I do not think that in the pure *Harrisii* grown on these establishments there could be seen more than one hybrid in a hundred bulbs. These hybrids were plain to be seen by the fact that they were only beginning to turn down their buds whereas the true *Harrisii* were in full bloom. The method of roguing is as follows: The men go through the fields with paint brushes and daub the foliage of all plants that are to be discarded. It cannot be done in April as it would cause too much injury to the good stock. *Lilium Harrisii* is particularly sensitive to any disturbance of its surface roots. I have been doing my very best to urge the Bermuda growers to still further improve their stock and to endeavor to get *Lilium Harrisii* back to where it was twenty-five years ago. This is being done by careful and painstaking methods. There is no doubt in my

mind that the progressive florist of the United States would gladly pay 50 per cent more for *Lilium Harrisii* bulbs than the present price if the stock could be improved still further.

I think that the Bermuda methods of selling lily bulbs have been entirely wrong or perhaps I should say the methods of the American bulb dealer in buying them. Under conditions as they have been, the man that grew good lily bulbs in Bermuda and looked after them carefully got no more for his product than the grower that was careless. I often think that the selling of lily bulbs should be a good deal like the cigar business. It is pretty hard to tell what a cigar is until you smoke it and for that reason the cigar manufacturer sells his goods under a brand. He takes every care that no cigars go into a box bearing his brand unless he can be proud of them and they will uphold the reputation of the brand he spent his money to establish. This same condition should apply to lily bulbs and the man that grows the extra fine article should be suitably recompensed for the trouble and care he has gone to. There are some stocks of lily bulbs on the Island of Bermuda which are very cheap at the price they are sold for and there are other stocks which are dear at any price, but the bulbs when they come to New York next July and August will all look about the same. I have spoken only of the good fields which I saw. I saw many small patches which were looking badly, but on the whole both *Lilium Harrisii* and *Lilium Jamesii* are showing much improvement in spite of a rather cold, dry and unfavorable growing season. I think that any florist that buys Bermuda bulbs from dealers that are earnestly trying to encourage the Bermudians by paying him liberally for well-grown stock will get his money's worth this season.

As regards the shipping of lily flowers, this pernicious practice was going on to a limited extent and was being carried on mainly by people who do not grow bulbs. Quite a floral business is being done in Hamilton now in sweet peas, iris flowers, roses, etc., and, last but not least, cut lilies. The large hotels were entirely filled up most of the winter with American visitors and we cannot blame the Bermuda florist for taking advantage of the situation, so long as he does not cut flowers from bulbs which he afterwards intends to ship up to his American brother florist to grow. To me, *Lilium Harrisii* is the grandest and noblest of the Easter lilies. Furthermore, a well-grown plant of 5-7 inch *Lilium Harrisii* will produce about as many flowers as a 7-9 inch Japanese *Giganteum* and for this reason I contend that *Lilium Harrisii* are not any more expensive. I hope within the next few years to see *Lilium Harrisii* come back and take its rightful place among the commercial lilies grown by the florists of the United States. This, however, can only be accomplished by the greatest care on the part of the Bermuda growers and by the establishing of brands so that when a florist in the United States buys a case of bulbs of a brand with a high reputation he can depend on getting nine hundred good plants out of a thousand bulbs with proper care and attention on his part.

CLUBS AND SOCIETIES

NEWPORT HORTICULTURAL SOCIETY.

Quite a few members of this society faced the moist weather Tuesday evening, May 9th, to attend the regular meeting and hear the reading of a paper on "Grape Culture Under Glass," by William Mackay, who is known to be a successful grower. Among the many details given by Mr. Mackay as being necessary for best results in this work, he said that vines should be planted five feet apart and this was the principal question discussed at the close of the lecture. Some of the speakers favoring planting three to four feet apart, but Mr. Mackay, although admitting that a larger quantity may be produced from close planting, he said that when first quality is the object five feet is none too much space to allow. The paper as a whole was favorably commented on and the maximum number of points voted under the annual competition rule.

On the exhibition table was a spray of a nearly white cattelya of unknown variety on which decision of award was reserved till name is furnished. Oscar Schultz was the exhibitor. A handsome lot of mushrooms of the Pure Culture variety was also shown by William Grey, who was awarded honorable mention for same. The regular business was chiefly in connection with the September show schedule, which promises to be even more attractive than ever.

NEW YORK FLORISTS' CLUB.

The monthly meeting on Monday evening, May 8, was a very interesting and instructive one and thoroughly enjoyed by a fair-sized number of members in attendance. Among the various reports handed in that of C. H. Totty stating that \$20,000 had been granted for the erection of a range of greenhouses at the New Jersey Experiment Station at New Brunswick was particularly gratifying. The outing committee reported on price of tickets for that notable occasion—\$4.00 for gentleman, \$2.50 for lady, \$6.00 for lady and gentleman. R. M. Schultz showed some grand Richmond roses for which the awards committee recommended a cultural certificate. Then came the reading of papers—Messrs. J. McHutchison on his recent trip to South America, A. T. Boddington on Bermuda, W. B. Du Rie on School Gardening, A. Kakuda on Japan and M. C. Ebel on Insects. It was announced by the Essay Committee that Messrs. J. K. M. L. Farquhar of Boston and J. Otto Trilow of Philadelphia had been secured to present stereopticon lectures next fall.

AMERICAN GLADIOLUS SOCIETY.

The American Gladiolus Society is now preparing for a magnificent exhibit of gladiolus blooms at the S. A. F. Convention in Baltimore, August 15-18. The schedule of prizes will soon be ready, and copies can be had by applying to L. Merton Gage, Secretary, Orange, Mass.

L. MERTON GAGE,
Cor. Sec'y.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

At an Executive Meeting held in New York Friday, May 5th, President Burpee presiding, the following additional special prizes were received, also the Executive Committee appropriated \$170.00 for prizes to be known as the National Sweet Pea Society's prizes. Owing to the extremely backward season, it was considered advisable to change the date from a week to two weeks later than that previously published, that is, June 23rd and 24th, but the matter will be finally decided early in June and an exact date set at that time.

The following judges were appointed for the summer exhibition: Samuel L. Hamilton, Huntington, Pa.; William Sim, Cliftondale, Mass.; Edwin Jenkins, Lenox, Mass.; William Duckham, Madison, N. J.; Walter Angus, Chapinville, Conn.

Class 11. The Henry A. Dreer prizes for vase of Queen Alexandra Spencer Sweet Peas: 1st prize, \$5.00; second, \$3.00.

Class 12. The Henry A. Dreer prizes for vase of Ruby Spencer: 1st, \$3.00; 2nd, \$2.00.

Class 13. The Henry A. Dreer prizes for vase of Mrs. Rontzahn Spencer: 1st, \$3.00; 2nd, \$2.00.

Class 14. The Jerome B. Rice Seed Co.'s prizes for vase of White Spencer: 1st, \$5.00; 2nd, \$3.00; 3d, \$2.00.

Class 15. The Anton C. Zvolanek prize for vase of 50 Orange Spencer or Unwin: 1st, \$3.00; 2nd, \$2.00; 3rd, \$1.00.

Class 16. The Anton C. Zvolanek prize for vase of 50 Pink or Rose, Spencer or Unwin type: 1st, \$3.00; 2nd, \$2.00; 3rd, \$1.00.

Class 17. The William Sim prize for 5 vases of sweet peas, commercial varieties: 1st, \$10.00; 2nd, \$5.00; 3rd, \$3.00.

Class 18. The Philadelphia North American's prize: A Silver cup for the best vase of Sweet Peas never before exhibited.

The National Sweet Pea Society's prizes. Spencer or Unwin varieties:

Classes 19 to 29 inclusive. Vase of white, light pink, deep pink, lavender, salmon or orange, crimson or scarlet, primrose, picee edged, bicolor, striped or mottled, any other color: First, second and third prizes, \$5.00, \$3.00, \$2.00 for each class respectively.

Grandiflora varieties:

Classes 30 to 35 inclusive. Vase of white, pink, lavender or blue, scarlet or crimson, striped or bicolor, any other color: First, second and third prizes, \$5.00, \$3.00, \$2.00 for each class respectively.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS

At the meeting of the executive committee of the American Association of Park Superintendents at New York, on April 22, August 8th-10th was selected as the date for the approaching convention at Kansas City, Mo. The provisional program is as follows:

Tuesday, August 8th—10 A. M. Meet at City Hall for address of welcome and general business. 2 P. M. Meeting for reading of papers. 6 P. M. Entertained at dinner, followed by automobile trip through boulevards by gas light.

Wednesday, August 9th—9.30 A. M. Meeting for reading of papers. 2 P. M. Automobile tour of parks, ending with dinner at Swope Park. 8 P. M. Meeting for reading of papers.

Thursday, August 10th—Visits to some of the following places, selection to be made later: Play grounds and bath houses; parks of Kansas City, Kan.; or a trolley trip to Lansing, Kan., near which are the State Penitentiary, the Soldiers' Home and Fort Leavenworth, one of the most important forts maintained by the Government.

Papers on the following topics are expected: Park Statistics, by a government

NEPHROLEPIS ROOSEVELT.

third to one-half wider than Boston and beautifully undulated, giving the whole plant a decided wavy effect, which attracts the eye instantly. Nephrolepis Roosevelt will make more young plants, produce a third more fronds, has more graceful drooping habit and will finish to a larger and finer plant in small pots than any other fern on the market. Our stock is positively free from that vicious little white scale which is causing fern growers so much trouble.

Orders received to June first will be booked at the following prices. Two and one-fourth inch pots, 40 cents each; \$3.50 per dozen; \$25.00 per hundred; \$200.00 per thousand. Twenty-five plants at hundred rate; 250 plants at thousand rate.

GOOD & REESE CO.
SPRINGFIELD, OHIO

**LARGEST ROSE
GROWERS IN
THE WORLD**

The Grandest Fern of the Age Nephrolepis Roosevelt

IMPORTANT SPECIAL NOTICE — PRICE ADVANCE.

The heavy demand from those who have seen Nephrolepis Roosevelt growing on our place and scarcity of stock compels us to advance the price on all orders dated after June first to the following. Two and one-fourth inch pots, 50 cents each; \$4.50 per dozen; \$35.00 per hundred; \$300.00 per thousand.

It is our belief the price of Nephrolepis Roosevelt for 1911 will be maintained during the season of 1912.

Nephrolepis Roosevelt is a sport from Nephrolepis Bostoniensis, but a wonderful improvement over the parent variety. The fronds of Roosevelt are from a tapered from base to tip. Each pinnae is distinctly undulated, giving the whole plant a decided wavy effect, which attracts the eye instantly. Nephrolepis Roosevelt will make more young plants, produce a third more fronds, has more graceful drooping habit and will finish to a larger and finer plant in small pots than any other fern on the market. Our stock is positively free from that vicious little white scale which is causing fern growers so much trouble.

Orders received to June first will be booked at the following prices. Two and one-fourth inch pots, 40 cents each; \$3.50 per dozen; \$25.00 per hundred; \$200.00 per thousand. Twenty-five plants at hundred rate; 250 plants at thousand rate.

representative; Sociological Side of Play Grounds; Street Trees; Roads and the Newest Things in Road Maintenance and Surfacing; Architecture of Animal Buildings; Insects.

CHICAGO FLORISTS' CLUB.

The regular monthly meeting of the Chicago Florists' Club was held at the Union Restaurant, May 4th. The report of Allie Zeck regarding the picnic for July 23rd was accepted and Erhardt's Grove, Oak Park, decided upon. P. J. Foley, chairman of Transportation committee, reported that no effort had been made as yet to secure rates to Baltimore for the August convention. An invitation from the Milwaukee Florists' Club to hold a joint meeting there June 1st was read and accepted unanimously. A paper on fertilizers to be read at the next meeting was promised by Walter S. McGee.

A basket of fruit was voted to be sent to Geo. Woodward, who was reported by T. Waters as improving nicely. It was voted to send a letter of condolence to the widow of the late Wm. A. Starrett.

Mr. Cassidy of the Foley Manufacturing Co. was a club visitor and made some pleasing remarks.

Geo. Asmus gave an interesting talk on the National Flower Show of Boston as he saw it, and also spoke of the coming convention at Baltimore.

TARRYTOWN HORTICULTURAL SOCIETY.

The regular monthly meeting of this Society was held on Friday evening, April 28th. The prize offered by E. W. Neubrand for the best flowering plant was awarded to George Wittlinger for a fine plant of Medinella mag-

nifica. A cultural certificate was awarded to John Woodcock for a fine vase of antirrhinums, also for calceolarias. A certificate of merit was awarded to Abel Weeks for a variegated carnation seedling. For the May meeting W. Scott offers a prize for 12 varieties of flowering shrubs and herbaceous flowers.

G. M.

YONKERS HORTICULTURAL SOCIETY.

On Friday, the 5th inst., a social and business meeting was held, and as usual proved very successful. It was decided to hold a June show at Hollywood Inn, the date to be decided later. Schedules may be obtained from H. Nichols, Glenwood Ave, Yonkers, N. Y. An interesting exhibition is expected, as competition promises to be keen.

After business was disposed of the regular bi-monthly social was thoroughly enjoyed, refreshments, stories, and songs being heartily appreciated.

H. M. B.

CLUB AND SOCIETY NOTES.

The Dayton Florists' Club held an interesting meeting Monday night, May 1, at the J. F. Young establishment. Trade topics were discussed and there was a general exchange of ideas. H. H. Ritter, retiring president, who was presented with a cane, made acknowledgment of the neat gift.

Our attention has just been called to an error in our report on the awards at the National Flower Show in which J. T. Butterworth was recorded as the winner of first prize in the class for display and collection of cut orchids arranged for effect, where-

as the award went to W. A. Manda, South Orange, N. J.

Fifty florists of the State Association coming from Alexandria, New-castle, Marion, Richmond, Connersville, Knightstown, Muncie and Indianapolis met at Anderson, Ind., on May 2. State President George Gause of Richmond and A. F. J. Baur of Indianapolis, state secretary, were in attendance. A visit was paid to local greenhouses in the afternoon. Supper was served the visitors at Stafford's restaurant.

CARNATION JUDGING.

American and British Scale of Value Points Contrasted.

I am obliged to Mr. Brunton for the British scales, printed on page 674 of last issue. These points come remarkably near the American scale as will be seen by the following comparison:

	American	British
Color	25	20
Size	20	20
Fragrance	5	10
Substance	10	10
Calyx	5	5
Habit of plant	20	20
Form	15	15
Stem	20	20
	100	100

Could "stem" and "habit of plant" be classed as synonymous terms? Would like to hear from some carnation grower.

G. C. WATSON.

GUARANTEE FUND RETURNED.

Checks have been sent this week by E. Allan Peirce, treasurer of the National Flower Show, to all subscribers to the guarantee fund, for the full amount subscribed.

A. N. PIERSON

1012 W. Ontario St., PHILADELPHIA, PA.

CURRIE FOR MILWAUKEE PARK BOARD.

Daniel Erdmann, president of the park board, whose term expires on June 1, will be succeeded by James Currie, president of Currie Brothers, florists and superintendent of Forest Home Cemetery, according to reports in the City Hall.

Mr. Erdmann has served on the board fifteen years. He was appointed to succeed the late Louis Auer on June 1, 1896, and in 1898 he was elected president to succeed Christian Wahl and has served in that capacity since.

The board consists of five members who serve four years.—*Milwaukee, Wis., Sentinel.*

St. Louis, Mo.—The mayor of St. Louis, in making his appointments, made two good selections when he handed in the names of Julius Koenig to succeed A. Meyer, Jr., as City Forester, and Dwight Davis to succeed Phil Scanlon. Both appointments meet with the approval of the local florist trade. Mr. Davis will soon appoint the superintendent, and Mr. Koenig his assistants.

CANNAS In 30 Varieties

From 3 1/2-inch pots, strong plants, \$6.00 and \$8.00 per 100.

CHRYSANTHEMUMS

Golden Eagle, Gloria, G. W. Childs, Linwood Hall, Miss May Hankey, Miss May Seddon, Merstham Yellow, Old Gold, Oct. Frost, Patty, Virginia Poehlman, Vivland Morel.

From 2 1/2-inch pots, 60c. per dozen; \$4.00 per hundred.

GENERAL COLLECTION.

Col. D. Appleton, Golden Dome, Mrs. Clay Frick, Mille. Jeanne Rosette, Nagoya, Pacific Supreme, The Harriott, White Shaw, Yellow Eaton.

Rooted Cutting, 30c. per dozen; \$2.00 per 100. From 2 1/2-inch pots, \$3.00 per 100.

A. J. Balfour, Autumn Glory, Ada Spaulding, Cullingfordii, Early Snow, Golden Glow, Geo. Kalb, Glory Pacific, Harry May, H. W. Reiman, Ivory, Jennie Nonin, J. E. Lager, J. H. Troy, J. K. Shaw, Maud Dean, Meta, Monrovia, Moneymaker, Mrs. Jerome Jones, Miss Minnie Wanamaker, Miss Alice Byron, Mrs. Baer, Mrs. Robt. McArthur, Major Bonnaffon, Mad. Ferd Bergeman, Polly Rose, Pink Ivory, Riverside, Robt. Halliday, Soilelle D'October, Timothy Eaton, W. H. Lincoln, White Bonnaffon, William Duckham.

Rooted Cuttings, 30c. per dozen; \$2.00 per 100; \$15.00 per 1000. From 2 1/2-inch pots, 50c. per dozen; \$3.00 per 100; \$25.00 per 1000.

CHICAGO NOTES.

On Mother's Day.

All the wholesalers are expressing themselves as strongly disapproving of the exclusive white flower for Mother's Day. One firm alone received orders for fifty thousand white carnations during the week and as the orders did not specify that colors could be substituted many had to be refused. Others, more fortunate made it possible to substitute, and still other large orders stated color was desired. The florists generally are in favor of assorted colors both from their standpoint and that of the customer, as prices will be much more moderate than when white only is used, and think now is the time to make a vigorous protest. A pertinent remark was heard on the subject that mothers by no means all like to be remembered with the white flower but prefer something less associated with death and funerals. Give us the colored flowers for the living mothers at least is the sentiment here.

Trade News.

Cemetery vases of all kinds and materials are taking the lead as sellers this month at the supply houses.

A. Meyer of South Holland will continue his stand in the old Flower Growers' Market for the present as will also Jos. Brooks and Ella Breede, on the 7½ per cent basis.

F. Oechslein, who laid in a big stock of glass some time ago has now ordered material from the Foley Manufacturing Co., for a range of six houses. They will cover 125 to 130 square feet.

E. E. Pieser, visited his peony farm at Villa Ridge, Ill., last week and found the peony crop so far in excellent condition. He thinks the quantity will probably not come up to that of last year but quality so far promises to be better.

W. E. Lynch, for ten years manager of the E. H. Hunt cut flower department, is building a range of houses at 22nd street near Harlem avenue, southwest of Chicago, and will grow cut flowers. Foley Manufacturing Co. furnishes the materials.

M. S. Brake as bookkeeper and Miss S. Hansen as assistant are the latest acquisitions to the E. H. Hunt office force. Several changes have taken place in this store since May 1. Miss Frances Brundage, secretary of the firm, has moved into the private office up stairs. C. N. Dickinson, manager, takes the office on the main floor, and Chas. Erne manages the cut flower department. The E. H. Hunt Co. are the oldest supply house in Chicago and their increased business makes changes necessary to handle it.

Personal.

H. Philpott was here for the regular meeting of the Florists' Club.

T. Vogel, formerly with Wm. J. Smyth, has returned from an extended trip in the West.

Mrs. Frank Beu has received word of the death of her mother, Mrs. Margaret Beucker at Beyreuth Germany.

Nick Mueller, who was lately with the J. B. Deamud Co., will have charge of the branch house of the Kennicott Bros., in the Fairbanks building opening this week.

Mr. and Mrs. Chas. McKellar write

that they will return from Hot Springs, Ark., about the 25th, when Mr. McKellar hopes to be free from blood poison, contracted from a knife in cutting flowers.

A. F. Longren, traveling salesman for the E. H. Hunt Co., came home for his first wedding anniversary. Mr. and Mrs. Longren were made the recipients of a dozen solid silver spoons from the employees of the firm.

Visitors: J. Miekcljohn, representing H. F. Darrow, New York; C. Loveridge and wife, Peoria, Ill.; W. B. Van Eyk, representing G. W. Van Gelderen, Boskoop, Holland; R. A. Smyth and wife, Benton Harbor, Mich.; A. L. Glaser, Dubuque, Ia.

ST. LOUIS NOTES.

Andre Viand, representing Phil L. Carbone of Boston, is spending a few days here with the local retailers.

Mr. T. J. Farney of M. Rice & Co., Philadelphia, is here this week interesting the trade in florists' supplies. Mr. Farney says that trade has been most satisfactory in all lines.

Joe Witck of Ayers' and Dave Geddis of F. C. Weber's, both of St. Louis, have exchanged jobs the past week. Mr. Geddis is now head of the design department at Mrs. Ayers' and Mr. Witck has the same position at Weber's. Both are first-class workmen.

E. W. Guy, chairman of the Florist Club trustees, called a meeting on Saturday, May 6th, which was held at Smith's store, and it was decided to hold a banquet for the celebration of the club's 25th anniversary, June 28th, at one of the big local hotels. This will be for the members and all ex-presidents who are not now members of the club. Invitations will be issued June 1 by Secretary Beneke, which will require a response.

Frank Toeber is chairman of the entertainment committee of an American Nurserymen Association which meets in St. Louis, June 14, 15, 16, at the Southern Hotel. J. W. Schutte will have charge of the exhibition and all the local nurserymen have been added to the entertainment committee. The feature of the meeting will be a trip to Stark Bros.' Nursery at Louisiana, Mo., by boat, a boat trip down to Jefferson Barracks and the banquet given by the Missouri Botanical Garden, known as the Shaw banquet, at the Southern Hotel. There is also a ladies' committee to attend to the visiting ladies, of whom they say there will be many.

Cincinnati, Ohio—C. J. Jones of Walnut Hills Floral Bazaar has gone into partnership with P. J. Olinger, the wholesale florist, and has turned his retail stores over to his son, Charles, who will now conduct same.

¶ The American people are the most powerful buying public in the world. They pay well for what they want and expect to get what they ask for. You can't make them buy what you want them to take—you must sell them what they want and when they want it, and you should be glad of the opportunity. The merchant who caters to the public want makes money and is successful. The fellow who "has something just as good" is fish-hooked for the business boneyard while his clients pass by his door whistling the Missouri air. The American public want lilies all the year 'round and the modern florist shop must have them. Not just because he wants them but because his trade does and if he don't satisfy his trade the successful merchant will do it for him. Cold storage lily bulbs have come to stay awhile and besides real good ones are quite profitable, so after all why shouldn't you have them at all times. Horseshoe Brand Giganteum from Cold Storage are ready for immediate or future delivery. There are none better. Order now.

Seed Trade

Pea Prospects Good.

The planting of peas for seed purposes has been nearly or quite completed, and while they have gone into the ground somewhat later than a year ago conditions generally are very favorable and everyone in any way interested including the growers, the seedsmen and the canners, are devoutly hoping for a good crop this year. There is certainly need of it, as there are no reserves carried over and the abnormally high prices of the past year or two have discouraged and irritated buyers to a great extent. Of course the growers have been the chief losers by the repeated short crops they have had, but when seedsmen and canners have had to pay double prices for seed and then found difficulty in securing it, they are naturally disposed to grumble and criticise the seed-grower, however innocent he may be.

Good Demand for Onion Seed and Seed Potatoes.

The seed trade has noted with a great deal of satisfaction that onion seed has been in good demand this season, and that what promised to be a surplus early in the winter has been greatly reduced or altogether wiped out, and as a rule the trade will carry over but very little onion seed into the coming year. This demand has largely been due to the very high prices at which onions have been selling, and in this connection it may be noted that, notwithstanding the high price of large onions, onion sets have been selling at the lowest figures in many years. In fact there really was no market price as holders appeared glad to accept any offers submitted. Seed potatoes also have been improving in value, and those who are likely to carry any surplus will no doubt be able to dispose of the same for consumption at a price that will let them out without loss. This is certainly a great improvement on the conditions of last year, when they could scarcely be given away.

Present Weather Conditions.

Weather conditions, while not altogether ideal, have been fairly good for the past week or ten days. While there were frosts two or three nights of last week little serious damage has been reported, due mainly to the backwardness of vegetation in general. In the vicinity of New York and throughout the east quite generally rain is badly needed, and while conditions are not at all desperate, moisture will be required soon or crops certainly will suffer. Conditions are largely reversed from those of a year ago when there was a superabundance of rain during most of the month of May, to be followed in mid-June by intense heat and drought. It was this condition of the weather that produced the change in the pea crop of last year, resulting in almost a failure. If we can only have a reasonable amount of moisture and not too much heat during June we shall have a fairly good crop of peas the coming season, which as already stated, everyone is hoping for.

Turnip Seed Going Up.

Turnip seed is again in very short

supply and prices on the standard varieties are likely to reach new high levels before the close of the present season. This especially applies to the purple-top strap-leaf and the purple-top globe varieties. We have recently been informed of a purchase of several thousand pounds by one of the large jobbing houses at 24 cents, and it looks now as if 30 cents will be considered a low figure for the globe variety before the next sixty days have passed. Fortunately conditions in Europe are more favorable for a crop of most biennials than a year ago, which will probably bring prices down to a more normal level in 1912. There appears to be plenty of spinach and other seasonable seeds, though there will doubtless be a shortage in certain varieties of the green pod varieties of string beans, notably the Burpee stringless.

Garden Produce Outlook.

If one may judge of the future by the quality of seed planted this spring it looks as if green peas should bring strong and exceptionally high prices the coming season, and in fact, garden sals in general should be in good demand at profitable prices.

Fate of New York Seed Bill.

There are indications that the vicious seed bill introduced in the New York State Legislature the past winter, and against which the Seed Trade Association has waged valiant battle, is likely to fail of passage at this session, even if not killed outright. However vigilance should not be relaxed until the measure is done for, as moribund bills have a disagreeable habit of often "coming back" to vex the souls of those they are aimed at.

Too Much Muchness.

Are we not in danger of being so straight sometimes in our demand for purity and germination that we may fall over backwards? Take the 98 percent purity proposition. We get a sample of seed and we clean it and clean it and clean it—put it through the mill and sieve a dozen times, each time reducing the original bulk and doubling the cost with loss of weight and cost of labor. What happens? We have seed that is so costly that nobody can afford to buy it. Not only that but some of the most valuable seeds have been blown away. It is not always the heaviest seeds that are the most valuable. We have lost much of the perennial character of ryegrass and red top just through this method. Instead of bragging about the increase in the weight per bushel on these and other seeds, we ought to consider whether we are not changing these valuable grasses from grasses into grains. Take Avena elatior for instance, would you want to make it into oat?

American Seed Trade Association.

The officers of the American Seed Trade Association have arranged for a new and important feature of their program at their next annual meeting to be held at Marblehead, Mass., on June 20-22. This will be telegraphic reports from most of the growing sections of the United States. These reports will be given when the Association is in executive session and will be strictly private and confidential to the members of the Association only.

Undoubtedly these reports will be of great interest to all the seedsmen and they will not be published.

Notes.

New Ulm, Tex.—The seed house of Kellner & Co. was burned to the ground recently. Loss about \$1,000.

Des Moines, Iowa—The Iowa Seed Co. has begun work on the erection of a large conservatory and four greenhouses. The conservatory will be 40 x 125 feet, two of the greenhouses will be 21 x 125 and two 26 x 185.

Mr. E. L. Page, President of The Page Seed Co., of Greene, N. Y., and also President of the American Seed Trade Association, left Greene on Saturday, May 6th, for a business trip through the west and to California. He is expecting to make as quick a trip as possible and probably will return about the 20th to 25th of this month.

Reports from France indicate that the crop of crimson clover seed in that country will be an average one and that prices are likely to be about the same as last year. Orders are now being booked for July-August delivery. The alfalfa crops are also in promising condition and the highly-prized Provence strain of this clover will be available, as usual, but at no reduction in price as the demand keeps increasing faster than production.

CATALOGUE RECEIVED.

Good & Reese Co., Springfield, O. - General Plant Catalogue. "The largest rose growers in the world," are not limited to roses, as this catalogue plainly shows. Foremost in this year's novelties is the grand new Nephrolepis Roosevelt, which is advertised in this issue of HORTICULTURE. It is a winner.

Dreer's Select Potted Roses

The Roses here offered are field grown plants which have been potted into 5 or 6 inch pots (according to the growth of the variety) during the winter months. They have been stored in cold houses and cold frames and are in the best possible condition to turn over to your retail customers for outdoor planting, giving an entirely different result from stock carried over winter in storage. For best results the plant should be shipped in pots; in this shape they will carry safely to reasonable distances by freight.

Detroit—B. York of Hancock, who has spent the past winter with Breitmeyer to further develop in the decorating line, has returned home.

B. Schroeter is moving into his temporary store this week.

Herman Knope is a patient at the Pennsylvania Avenue Sanitarium.

The old buildings adjoining Breitmeyer's have been leveled preparatory to the erection of Breitmeyer's new store.

Local sympathies have been greatly aroused by an auto accident which happened to Mrs. J. F. Sullivan. Their car collided with a street car and Mrs. Sullivan was thrown with such force that her right arm above the elbow and one rib were broken. She was removed to St. Mary's Hospital where she is doing quite nicely.

PERSONAL.

John T. Leavy, florist and pioneer settler of Greeley, Colo., celebrated his 80th birthday anniversary on April 28.

A. Bretschneider, for seven years superintendent for Jos. E. Hubinger, New Haven, Conn., has rented the greenhouses and nurseries of W. J. Schonman, Danielson, Conn.

George Jackson, for a long time gardener for Mr. E. S. Harkness at Goshen Point, Waterford, Conn., has been compelled by poor health to resign his position. The appreciation of his employer for his faithful services is evinced by the gift of a substantial monthly pension.

Buffalo visitors: A. Pauly, Attica, N. Y.; Max B. Eatres, of Dayton Paper Novelty Co.; H. S. Baker, Warsaw, N. Y., and A. Zirkman, representing M. Rice & Co., Philadelphia, Pa.

NEWS NOTES.

Charlotte, Mich.—J. H. Gibbons has taken over the cut flower trade of W. E. Garmon.

Holidaysburg, Pa.—Allen S. Meyers, florist, has entered suit against the Pennsylvania Railroad for \$45,000 for alleged destruction of flowers, foliage and plants by smoke and soot from the engines which stopped in front of his greenhouses.

South Bend, Ind.—The Beyer Co., florists, have filed suit against the South Bend Manufacturing Co. for \$38,000. A tract of land owned by the Beyer Co. was rendered worthless by the construction of a dam by the South Bend Manufacturing Co.

Flower Market Reports

Market conditions remain much the same as a week ago. The overstock in wholesale quarters is still very heavy and it practically includes all sorts of material. There is some hope of improvement in the near future, however, as it is evident that the heavy crop of many growers is past the high mark and a lightening up of receipts is now in sight. The only item that shows any activity is the white carnation, due to the "Mothers' Day" call, but this carries along with it, in a slight degree colored carnations and other things and the close of the present week should show a better balance sheet than either of the two previous ones.

The first half of last week's trade was only fair, plenty of everything and prices discouraging, but with favorable weather Friday, Saturday and Sunday things evened up. Good violets are about over with. Sweet peas have sold well, also lily of the valley and greens—the latter being still on the scarce side. On Monday, May 8th, the market opened more brisk, the supply equalling demand, floral work in evidence and a good portion of carried over material consumed. It is hoped that trade will continue good throughout the week after so good a beginning.

One more score is laid up either for or against the weather as the florists' interests are concerned. The wholesaler welcomed the change which a fall in temperature and dampness brought. The market has been flooded with stock of all kinds and conditions for the past two weeks and the first week in May reduced it to almost a normal condition again. The change came with a drop of from 40 to 50 degrees in portions of the west and snow, rain and cloudy weather quickly put a winter schedule into effect. The output was quickly curtailed along all lines, carnations feeling the change most. Roses are still plentiful but there is no danger of an overproduction again at present as many of the largest growers took advantage of the glut to replant. The Beauty situation is unusual this year. The plants have been so backward in blooming ever since the holidays that now growers are loth to replant while the crop is on. There are, therefore, a very large quantity of long-stemmed Beauties on the market today. Iris is shortening and selling slowly. Extra fine tulips are coming from the interior of the state. Southern ferns are beginning to come in and there are some good eastern stock still to be had. It is regarded by all as an unusual year for sweet peas. Not only has the supply been abundant throughout the season but the demand has held steady. John Kruchten, one of the many who specialize in peas still finds the Blanche Ferry very satisfactory and his crop has run steadily all the season. Glad-ioli of the best varieties are bringing good returns to the grower, some splendid Francis King selling at \$2.00 per doz.

BOXWOOD SPRAYS FOR MEMORIAL DAY

Order in good time so that stock may be reserved for you and shipped on the date you wish. Do not leave this until the last minute.

We are the introducers of this item and headquarters for it. It has become immensely popular, not only for holiday work, but all the year round. The most useful and decorative green imaginable. Artistic wreaths and designs can be made of it and find ready sale. Our stock is always clean and fresh with rich, glossy, dark green foliage. Often sold as the German Myrtle. No surplus wood. The very best quality for florists use, \$7.50 per 50 lb. crate. Special prices for large quantities.

Ivy Leaves, Leucothoe Sprays, Dagger Ferns, Galax, Magnolia, Bay, etc.—at lowest market rates. See our weekly price list.

Flower Market Reports

(Continued from page 710)

With the supply in car-
DETROIT nations and lilies some-
 what shortened and a
 demand equal to last year conditions
 in general are greatly improved. Vio-
 lets and the whole line of spring flow-
 ers are about consumed, iris, baby
 gladiolus and outdoor tulips taking
 their places. Sweet peas are coming
 in very good and are most useful for
 corsages, etc.

While the wholesale
NEW YORK markets are about
 overwhelmed with
 outdoor garden products and belated
 spring weather is making amends for
 past lapses in the exuberance of the
 crops, yet it is evident that the period
 of flood tide on standard indoor stock
 has at last been passed and more nor-
 mal conditions will soon be in order.
 The present week has, however, been
 a tough one for the wholesalers, who
 have had great difficulty in finding
 avenues of distribution for the surplus
 which has been poured in on them,
 the question of price being secondary
 to that of unloading. Now comes
 "Mothers' Day" and Memorial Day is
 not far off and many growers are al-
 ready throwing out old stock and re-
 planting. Better balance between sup-
 ply and demand is in sight.

Were you ever an
PHILADELPHIA impressionist
 painter? Probably
 not. But you know what that is:—
 The lad that starts out and says: "I
 will tell the exact bald truth, just as it
 is, in all its nakedness!" Well, out he
 goes and visits the markets and lis-
 tens to the tales of woe. Everything
 going to the demnition bow wows. No-
 body making any money. If it isn't
 a case of too much stuff—it's a case of
 not enough. By the time he gets his
 "truthful" impression from all this, he
 is an ardent pessimist—and off he goes
 to his studio and pictures it accord-
 ingly. If there were nothing but these
 impressionist correspondents around,
 wouldn't it be a melancholy world of
 dark and doleful reading—to peruse
 the trade reports of our flower mar-
 kets. But as a rule these correspon-
 dents are not impressionist painters.
 They listen to these terrible tales; put
 them through the crucible of their
 higher intelligence and by their in-
 stinctive powers of reasoning, induc-
 tive and deductive, their experience of
 present and past conditions, and their
 intimate knowledge of the natural
 proclivity to growl with or without
 reason they manage to paint a true

CARNATIONS—Continued

THE NEW HARDY EVER-BLOOMING
CARNATION "CRIMSON KING."

Everybody has asked for a Carnation that would live out in the garden during the winter. We have pleasure in offering this new plant, as it will fill the bill. It is absolutely hardy, standing even the Canadian winters in the yard. It blooms all summer long; never a day that you cannot cut blossoms. By potting up in the fall you can have flowers in the house all winter. The color is a rich crimson, the fragrance is delicious. We know of no plant that the florists can offer to their patrons that will give as much satisfaction as the Hardy Carnation Crimson King. 2½ in. pots, per dozen, \$1.25; per 100, \$8.00; per 1000, \$75.00. Twenty-five plants sold at hundred rates; 250 plants at thousand rates.

Our new trade list of everything you need now ready. Mailed on application. Write today.

During Recess

Milwaukee vs. Chicago at Chicago,
May 7, 1911.

Ideal weather and a general feeling of good fellowship made the day of the Milwaukee team's visit to Chicago a memorable one. When the train over the Northwestern pulled into the depot at 11:30, May 7th, seven autos, all belonging to florists, were in waiting and a ride through the city began immediately. Jackson, Washington, Lincoln and Garfield Parks visited and a dinner at the Hofbrau followed. The principal event of the day came next and was a decided victory for the Chicago boys. Al. Fischer again made the highest individual score, 212. After the game a supper was served and speeches were made by the presidents of the Milwaukee and Chicago Florists' Clubs and members of the teams. A number of lovers of the game who are not in the teams were present and about fifty sat down to the supper. As the train bearing the Milwaukee boys home left the depot it was unanimously decided that a successful event had taken place and that there would be others in the future.

A meeting was held Tuesday evening to organize a summer bowling league.

First Team.

CHICAGO.	MILWAUKEE.
Fischer, 147 166 212	Ruset, 115 129 157
Ayers, 170 203 136	Kellner, 144 143 149
Hu'bner, 183 167 178	Zweifel, 148 146 138
J. Zeck, 146 124 178	P.Nohos, 152 156 123
A. Zeck, 201 183 167	Holton, 159 178 180

Second Team.

CHICAGO.	MILWAUKEE.
Lorman, 136 134 131	Currie, 169 151 120
Goeris'h, 117 176 122	G. Pold, 154 198 132
Graff, 142 168 159	Cassidy, 148 163 137
Schultz, 141 158 110	Manas, 116 125 103
Farley, 210 182 209	Leidiger, 148 131 156

Third Team.

CHICAGO.	MILWAUKEE.
Fr'dm'n, 152 150 161	Hunkel, 106 128 199
Byers, 128 149 171	Leitz, 97 97 91
Krauss, 119 125 189	A. Hare, 124 111 107
Degnan, 167 118 149	Oestr'er, 100 97 129
Wolf, 155 169 154	Hummel, 179 103 137

The bowling club will now bowl each Wednesday evening at Bensing-er's to qualify for the Bowling League of the S. A. F. in August.

New York Bowlers.

The New York club commenced its contest for membership in the team to represent New York at the Baltimore convention, on Friday evening, May 5th. On Wednesday of this week the club went to Tuxedo to play the return match there, and on Saturday evening, May 20th, the Madisons will endeavor to regain their lost laurels at Thum's alleys. Scores May 5.

Al. Rick-ards..	116 144 134	W. Rick-ards..	148 144 138
Irwin ..	102 107 104	Shaw ..	155 145 167
Chad'ck 141 172 ...	125 138 125	Kakuda	188 177 168
Holt ..	146 135 129	Scott ..	125 138 125
Nugent. 88 100 109	144 172 164	Shaw, 154 125 130	

Scores Monday afternoon, May 8:

Scott, 144 172 164	Shaw, 154 125 130
Manda, 190 165 179	Schultz, 160 96 124
D'n'd's'n, 182 174 172	Miesem, 159 157 185
Kakuda, 119 128 134	Einsman, 140 154 133

A NEW IMPORTING HOUSE.

Loechner & Co. is the title of a new firm of horticultural importers and exporters with headquarters at 11 Warren street, New York city. The members of the firm are Oscar Haase and Chas Loechner. Mr. Loechner was well known for many years as the New York representative of the Yokohama Nursery Co. He has a host of friends everywhere who will join us in wishing a long and prosperous career, for his new firm. They propose to handle Japanese bulbs, German lily of the valley pips, Belgian palms, azaleas, etc.

Invitations are out for a House Warming Reception by Doubleday, Page & Co., at Country Life Press, Garden City, Long Island, N. Y., on May 23.

Flower Market Reports

(Continued from page 721)

sundry. This is as it should be and proves the value of the trade press in keeping a happy equilibrium between the contending interests—each in its turn so blinded that they cannot see the inter-relation of all and each. There is no branch of the florist trade suffering any ills worthy of mention at the present time. Compared with previous years the past week showed a good volume of business. If prices were low in some lines the clean up made amends in many ways, and the general howl is quite uncalled for. Vale.

The market last week was rather different from that reported for the previous week. Everything was scarce. Kirkwood, where most of our home-grown stock comes from, sent in very little, and of course, the outside shipments sold up clean. It is not that business was so good but the scramble for stock made it look that all were busy. Prices in the meantime went up a few cents. Carnations were up to \$4 for fancy and \$2 to \$3 for common. Roses did not go up much as they were more plentiful. Sweet peas 50 to 75 cents per 100. Other flowers such as lilies, lily of the valley and Cape jasmines remained at the old price. Peonies bring \$5 for the best. Lilac is about over but a lot of other outdoor stock is now coming and sells well.

We learn that plans are about perfected for the establishment of a wholesale flower market in Providence, R. I.

What the Users say

THE KROESCHELL A COAL SAVER—HEATS UP QUICK

"The No. 4 boiler we purchased of you in 1909 has given the very best satisfaction—would wish no better. Have taken out return tubular boiler this Fall, which used one-half more coal than your present boiler. Your boiler is so easy to regulate that in a few minutes I can run up the temperature by opening drafts. The flow and return connections with Generator all work the very best, according to your plans. We cannot give your boiler enough praise: so far as I have given it a test, my old boiler would not be in it comparing to how much more attention the old one took."

FINE FERNS

Ready for Immediate Retail Sale

We have an exceptionally fine and large stock of the following varieties—first-class plants of exceptionally good value,—plants that will please the most critical buyers, both in regard to quality and value.

NEPHROLEPIS ELEGANTISSIMA (Improved). The finest of this type, never showing a Boston frond. It has not reverted in the last four years.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$12.00 to \$18.00 per dozen; large specimens in 12-in. pans, \$3.00 to \$5.00 each.

NEPHROLEPIS ELEGANTISSIMA COMPACTA. This bears the same relation to elegantissima that Scotti does to Bostoniensis. It is a dwarf, compact plant, especially fine in the small sizes.

Fine plants, 6-in. pots, \$6.00 per dozen; 8-in., \$18.00 per dozen; extra fine specimens, 12-in. pans, \$5.00 each.

SMALL FERNS FOR FERN PANS. Best and hardiest varieties assorted,—*Pteris Mayii*, *Wimsetti*, *Adiantoides*, *Aspidium tsusimense*, *Cyrtomium falcatum*, etc.

Nice plants, 2¼-in. pots, \$3.50 per 100.

Japanese Quinces at the Arboretum

Among the manifold attractions of the Arnold Arboretum at this season of the year the Japanese quinces are by no means the least conspicuous, and visitors who are interested in the most desirable shrubs for their gardens will do well to inspect these during the next two weeks. The typical species *C. Japonica* has long been used in American gardens as a hedge plant and as such it has much to recommend it but it is undoubtedly seen to the best advantage when grown as a single specimen in the shrubbery or on a lawn where its true character can be properly developed. Under such conditions it usually makes a neat specimen from three to five feet in height with broadly spreading somewhat pendulous branches, but I know of one plant which has stood in the same position on a lawn for eighty years and is now twelve feet high and seventy feet in circumference. In the spring when the leafless branches are thickly clothed with a multitude of bright red blossoms this is a remarkable bush. Varieties are now obtainable in many shades of color and a good selection is to be found at the Arboretum on the right of the Forest Hills entrance in what is known as the shrub order.

Among many good colors opinions must, of course, differ as to which is the most desirable but I think there can be no doubt that the variety known as *C. Japonica Simonii* is unsurpassed by any. The flowers which are a rich, deep red, a color very seldom seen in flowers, are semi-double and of large size. The varieties *cardinalis*, *coccinea* and *Knap Hill scarlet* all have very bright, showy flowers, the latter being especially good. Several white varieties are also in existence the best being *nivalis* and *Mallardii*. *Moerloesii* and *Gaufordii* both have flowers composed of pink and white.

Another species of Japanese Quince which is smaller in all its parts than *C. Japonica* is *C. Maulei* which is a delightful shrub with orange-scarlet blossoms produced in great profusion. The most noteworthy variety of this is *C. Sargentii*, a very handsome form, worthy the name, with bright scarlet flowers. The varieties *alba* and *superba* are also very desirable.

For general cultivation in gardens where the best hardy shrubs are desired these beautiful Japanese subjects cannot be too highly recommended as they can be used for many purposes and never fail to give a fine display of gorgeous blossoms. As single shrubby specimens on grass or in the mixed collection or for planting amid rockwork they are extremely useful and they can also be utilized for clothing walls or pergolas. One does not usually associate them with the two latter but I have seen them largely used in these positions with the most satisfactory results.

Visitors to the Arboretum after having seen some of the beautiful flowering trees and shrubs often inquire where such and such can be obtained and it is much to be regretted that one has to reply in nine cases out of ten, "I do not think you can obtain them from any American nursery." However much one may regret this it is nevertheless true and it is very much to be hoped that some of our prominent hardy-plant nurserymen will cultivate the rarer and more beautiful shrubs so that the general garden lover may be able to enjoy them in his own garden as well as in this famous institution.

Arthur. E. Thatcher

Arnold Arboretum.

Amaryllis

The treatment of hippeastrums, commonly referred to as amaryllises has so often been reviewed in the horticultural press with skill and amplitude of detail for the benefit of those interested as well as those desirous of becoming interested, that it may seem out of place here to refer to any particular phase of their management. Nevertheless there are always belated parties, or new comers, that desire to read it all over again. This is as true of other plants as of the one in question. If it was not so, how could the writers on specific horticultural subjects go over the same ground so often with any degree of profit to others, or pleasure to themselves!

The writer thinks that the rocks that often dash the hopes of a would-be winner with these plants, lie around the period immediately after flowering. Many, if not most persons handling hippeastrums imagine that when they have flowered they can put them aside any old way as if their cycle of growth for the season had been completed. But in fact it has only begun, for it is after the flowering period that the real growth of recuperation and preparedness for another successful flowering season takes place. Hence the absolute necessity of treating them right generously after the flowering period, by copious watering at root and syringing overhead in bright and dry weather. Stimulants are in order during the growing season, once a week, and according to the vigor and amplitude of foliage shown by each individual plant. In this respect they may be classed with the so-called gross feeders. Keep this treatment up to the latter end of September when a course of a gradual drying off should be pursued to get them to the proper degree of ripeness. Afterwards they may be stored away until wanted, in a semi-warm and not over-dry place; that is, that the atmosphere surrounding them while thus at rest should not be so dry as to affect the plumpness of the bulbs.

Hippeastrums should not be forced in a too high or stuffy temperature, to obtain best and most durable quality of flowers. Fifty-five degrees at starting, with a raise to 60 degrees a little before the scapes are fully developed, reduced again 5 or more degrees when in actual flower, to impart sturdiness and stability is advisable.

H. Finlayson

Fruit and Vegetables under Glass

SPIDER ON PEACH TREES

This is not an uncommon occurrence but up to the time of the fruit ripening there is no excuse for having it there. Early forced houses where lots of fire heat is required to keep up a suitable temperature are more susceptible to a raid from this pest than later ones. Even then there should be no trace of this mite's ravages. The foliage of the peach and nectarine will stand any amount of pressure and this should be brought to play on the under sides of the leaves, starting the stroke from the center of the tree and pushing out to the extreme ends. It has to be real bad weather if trees cannot be syringed in a morning, so long as the foliage is dry by three o'clock during the winter months and at this time of year six o'clock will not be too late; the tree will be benefited by a sharp syringe. I do not mean to say it is advisable to syringe when it is raining or

LIBRARY
NEW YORK
BOTANICAL
GARDEN

snowing, but a little adverse weather should not stop the use of the hose altogether. Here is where the advantage of planting trees on trellises which run across the house shows itself superior to having them up near the glass. You can get at both sides of the tree and syringe more thoroughly. If red spider has shown its presence the only way is to take more time and give the affected parts an extra good doing on several consecutive days.

When the fruits commence to ripen and a dryer atmosphere has to be kept, we are sometimes unable to avoid a slight attack. This can soon be remedied when the fruits are cleared—resort to the water pressure twice a day and if trees are very dirty from this or other pests, it will be advisable to spray them over twice a week with some approved insecticide. Do not neglect a house as soon as the crop is off but continue to keep the trees in a healthy state by proper watering and syringing.

PACKING MELONS

This is a simple matter with suitable boxes and packing material at hand. A few specially made boxes will last for years and will always be found handy. A quantity can be packed in one large box, but it is better to use smaller boxes and have a division in them, so that each fruit can be packed by itself. A useful size is 20 x 10 x 10 having a sliding lid which saves continual nailing. These can be made strong enough to stand the strain of express work or enclosed in trunks or rough boxes. The outer parts of boxes can be lined with excelsior, using thick cotton wool near the fruit. See that the fruit is held firm in position by the packing and, like all other things, they are best on the hard side when being shipped.

KEEPING GRAPES

Keeping grapes at this time of year is often a difficult task. In the first place varieties which are ripening now will not possess any great keeping merits. The warm weather, too, is all against them. Later in the fall, bottling can be resorted to but along now it is not advisable to adopt this method. If the finest flavor is to be retained, they are best left to hang on the rods. Shade the house and keep as cool as possible; do not spray any water about and keep the border in a moderate condition. Should it be too wet, berries will be liable to crack. It will be wise to look through bunches occasionally and remove any useless berries. During wet weather or should the air become very humid, a little heat should be run in to dry up the atmosphere. Moisture condensing on the berries is very harmful. On the first signs of any shriveling they must be used at once.

MIXED ORCHARD HOUSE

The mixed orchard house will have plums, cherries, peaches, nectarines, apples, pears, etc., all swelling fast and any weak growths carrying heavy fruit should be supported. After stoning is completed zinc rims should be placed on the pots and a top dressing of half-decayed cow manure applied. As this wears out quick-acting manures can be given in the water. Syringe thoroughly until signs of ripening are visible when water must be withheld from the fruit and feeding must also cease. Continue to give plenty of water at the roots and damp the house around occasionally. Stop growths of trees grown on the spur system at four leaves and peaches and nectarines, etc., after making twelve or fourteen inches growth. When coloring commences any leaves which are covering a fruit can be tied back to allow some sun to shine on it and bring out the "rosy cheeks."

Green fly must still be looked for and periodical fumigations will be necessary to keep it down. Leave as much air as possible on at night and maintain a temperature of 60 degrees.

SCORCHING, SCALDING AND MILDEW ON GRAPES

These are all preventable evils and can generally be traced to neglect in ventilation and irregular temperatures. In each case where one has been visited by either of these unwelcome guests the damage is usually irreparable. Scorching is more prevalent when the growths are young and very tender than later on. A sudden sunny day after a cloudy spell will sometimes scorch a few young tips. On such a day ventilation must be applied most judiciously; an extreme either way will tax the tender foliage to its utmost. Not enough air will cause the house to run up and a sudden high temperature with the sun shining will cause a burn, while too much air to cause a draught simply takes all the life out of the tender foliage.

Scalding is more prevalent on delicate skinned varieties than on their coarser-skinned fellows and is usually caused by the direct rays of the sun striking the berries. It is natural for the bunches to be shaded by their foliage and if this is so scarce shade must be given them. Muscat of Alexandria and other thin-skinned varieties are better with a light shade put on the glass as soon as the berries are thinned and the sun gets strong.

Mildew is contracted very easily by irregular ventilation and night temperatures. Guard against draughts but do not "coddle." Air will strengthen the foliage and make it better able to resist an attack. If coddled up the first attack cannot be resisted and the chances are that the disease spreads. Whenever the weather permits leave a crack of air on all fruit houses every night, taking care that it is to leeward, and is changed by the night man should the wind change. If taken in time mildew can be killed by putting moist sulphur on the steam pipe or if hot water system is used the pipes must be made hot previous to putting the sulphur on. The fumes which arise from this are death to mildew spores, without injury to the vines. If allowed to get ahead on the berries it will mark them, causing the affected spot to harden, which will probably crack later on. Careful ventilation is the key to keeping these enemies away.

"Prevention is better than cure."

Mr. Penson's next notes will be on the following: Young Vines; Shade for Vines; Finished Peach Houses; Mealy Bug on Vines; Grapes Shaking.

Cattleya Mossiae

Our cover illustration shows a magnificent specimen of *Cattleya Mossiae*, well-grown and splendidly flowered in a 12-inch basket, by Anton Bauer, gardener to Mr. Henry Goldman at Deal Beach, N. J. The plant was exhibited with sixty-six open flowers at the April meeting of the Horticultural Society of New York and was there awarded a silver medal. It came in an importation by Joseph Manda two years ago.

Seasonable Notes on Culture of Florists' Stock

ANTIRRHINUMS FOR NEXT WINTER

It is time now to put in cuttings to secure nice young stock for benching in August or September to flower during early winter. Don't let them become potbound before they are planted out, but shift even into 4 or 5-inch pots. When these plants are produced by seed they should be sown any time from now up to 10th of June for winter blooming. These would begin to flower in December. Prick them out into flats when large enough and then pot off into 2½-inch. When these pots are filled with roots shift so as not to allow them to become too potbound. It is better not to pinch until the stem has reached a medium height, as you then will get better breaks. It is very important not to let green-fly get a foothold or your plants will get stunted. Fumigate moderately and often. Place them in a cold frame and grow along, giving attention to watering, etc.

CINERARIAS FOR CHRISTMAS

Seeds of *Cineraria hybrida* should be sown within the next two weeks if you want good strong flowering plants for the winter holidays. Get fresh seed of the best strains and sow in pans on a mixture of leaf mold two parts, soil one part, intermixed with enough of clean sharp sand to make the whole porous. Cover the seed thinly with finely sifted compost of the above mixture and water so as to moisten the soil. Cover with a pane of glass and lay some papers over these to keep them shaded until they germinate. A cold frame is the most suitable place for these plants. When the seedlings are up lay off the sashes, during good days, but replace them when heavy rains come, leaving on a few inches of air as they must not be coddled at any stage of their growth. When the seedlings have made their third leaf they can be pricked out into flats, and when they begin to crowd one another in these flats they should be potted up into small pots. When these pots are filled with roots they should have several shifts into larger pots either 5, 6 or 7-inch. Have sash conveniently near to protect them from heavy rains. They should have movable screens placed over them from 9 A. M. until 3 P. M. to moderate the fierce sun heat.

CALLAS

The season for callas is practically over. While a few growers may market flowers later they are really not wanted after the end of May. The foliage will by this time show signs of ripening up, but don't start to dry your plants off too suddenly for it is unwise. Place them outdoors where they will get the moisture during the night for a couple of weeks; after this they can be laid on their sides and kept there until August when they should be repotted. Where the plants have been grown in beds they should be dried out gradually and then dug up carefully placing them close together in boxes, filling in the spaces with soil. They should be kept under glass for a week and syringed over-head so as not to dry them off too suddenly for that will injure the tubers. Then place in a frame until the tops disappear, but during wet weather keep the sash on. When the tops have died down they can be put in dry sand and stored in your shed. All the small offsets can be planted out in the open ground and by fall will make fair-sized tubers.

CYCAS

Now that the dried stems of cycas are here you can

start some by putting them in as small pots as possible, using a compost of turfy soil three parts, leaf mold and sand one part, and about a fourth of well-rotted cow manure. Place in a house where there is a brisk bottom heat, even if you have to plunge them in hot manure to supply it. See that they are freely syringed two or three times daily. In the course of time they will produce a whorl of leaves, and, in their period of summer growth they should have a partial shade of some kind during the hot part of the day, but during early morning and late afternoon the sunshine will insure a more vigorous and stocky growth that will later on put them in shape to stand full sun.

MILTONIAS

When cultivated under proper condition these orchids make a beautiful show especially *Miltonia vexillaria*, which is one of the most valuable for summer flowering. As these orchids go out of flower they should be repotted. A good potting material is osmunda fern fiber and sphagnum moss. After potting water should be supplied in very careful quantities, just enough to keep the compost moist. They should be supplied with more shade for at least five weeks, after which they should have plenty of diffused sunlight through either lath or bamboo shading. They should be grown in an airy house. Do not allow a direct draught to strike them, but keep as free a circulation of pure air as possible. Keep a sharp look out for thrips and pay strict attention generally to cleanliness, for at this season thrips do increase at an alarming rate. Give a slight fumigation once a week and during their growth give them occasionally a dose of weak liquid cow manure.

ROSES

From now on the rose growers' whole time will be taken up practically in preparing for another season. See that all your compost heaps are given a good turning over as the soil will be in better condition for planting. When the old soil is removed from the benches, and any needed repairs may be done, give your houses a thorough washing down of the walls, glass, and benches as there is always an accumulation of dirt and scum from the last year. Give all wooden benches a good coating of hot lime to destroy any insects, and also as a preservative for the wood. Make your house more comfortable to work in by giving a shade of whitening and water; the first rain will remove it. When filling your benches see that the edges are well packed and the beds leveled off nicely. Set Bride and Bridesmaid about 15 to 16 inches apart and Richmond and Killarney 14 to 15 inches as these latter produce but little blind wood. American Beauty should have from 17 to 19 inches. Before planting see that balls are nice and moist for it never pays to plant a dry rose. Give the soil around the ball a good firming leaving a small depression around the plants to hold the water. After planting give a good soaking around the ball of the plant and syringe frequently during favorable weather. When the weather permits keep the ventilators open full during the day, and leave air on all night; this will make the plants sturdy. When cool enough fumigate regularly for green fly.

Flower Show in Boston which at least two of them have mildly criticised. One avers that, of course, the affair was not comparable to the Temple Shows in London and the other records his opinion that the exhibitors at the Boston show have yet much to learn in respect to staging and arrangement. We shall not attempt to refute this latter intimation for we know it to be true but would respectfully remind our British friends that there is no particular advantage in the "pot calling the kettle black" and we should like their opinion as to where this needed learning may be acquired. Having never yet had the pleasure of visiting a show across the water we do not feel justified in making any comparisons but would say that we did take opportunity to bring the matter to the attention of certain of our British-American neighbors who know all about the Temple shows and they just laughed and made some pertinent remarks about the pronounced self-conceit afflicting some of their countrymen!

Much uneasiness is felt over a large section of this country as regards the effect of the continued lack of rain. In suburban districts around Boston garden material is

stunted, lawns parched up and forlorn and many trees seem unable to develop their newly opened foliage to more than half size. Many evergreens of unquestioned hardiness are dead—winter killed, doubtless, because of insufficient moisture last fall rather than because of any unusual winter severity. We have seen the same conditions in New Jersey during a recent visit there and elsewhere. Seed of many vegetables planted in the field at usual time has either failed to germinate or has died out soon after sprouting. At the same time, hot, cloudless weather has brought vegetation forward so rapidly that the three weeks' backwardness noted at end of April has been caught up and spring flowering trees and shrubbery are blooming at normal date. The nursery trade has been placed at a great disadvantage, first by the abbreviated season, and secondly by the parched condition of the soil, which makes planting operations precarious. All are praying for rain and lots of it.

A speaker at a dinner recently given by a club of advertising agents declared that "selling is more difficult than manufacturing." This is, of course, a very

broad statement and would not be accurate in all cases, yet as a general proposition it is undoubtedly true that successful salesmanship calls for qualities in no way inferior to those that go to make for success in producing the commodity to be sold. The salesman's great study must be his fellow man. As he is proficient in mind reading, resourceful in strategy, convincing in argument, and shrewd in reasoning out probabilities, just to that extent will he make his mark. As applied to the flower trade this is a favorite topic with us, as our frequently recurring editorial notes on various phases of the subject attest. Seldom do we see a more interesting and convincing exhibition of a man "up against the real thing" than that of a grower in periods of over-production trying to negotiate a sale to the wily manipulators that congregate about the wholesale marts at such times—as much out of his element as these artful dodgers would be if given a job at growing the goods. We heard recently of one large rose grower who, visiting the wholesale district of New York, declared that this would be his last appearance in the neighborhood until the close of the season. We don't blame him.

"As others
see us"

We read with some interest the published notes on the reminiscences and impressions of our recent English visitors, particularly their estimate of the National

MENDEL'S LAW AS RELATED TO HEREDITY AND BREEDING.

By Dr. Herrmann Decker. Translated from
"Cosmos" by Gustave Thommen.

IV.

So far, we have been considering only one character at a time, in our crosses. Now we will observe two different ones at the same time. While observing the working of heredity in regard to height of plants, we will now observe how the *color* of the seed will be affected when, for instance, we cross peas again.

If the color of the seed "mendels," then it must do so in conformity to our law. And so it does, but the thing now becomes more complicated. Let us take a tall sort of peas, having green seed, and cross it with a dwarf one, having yellow seed. Our object is to get a new sort, it to be dwarf and having green seed coming true from seed. We cross-fertilize, harvest and sow the seed again. What we do get is just the opposite from what we want; these bastards of the first generation are all tall and yellow-seeded. We might think that we had failed and probably would now do the most foolish thing, by giving up further trials, so as not to waste any more valuable time. Very likely we would pull up the plants and be done with the useless "bastards." Of course, this would be wrong, for, if we consider the result thus far, we should be glad, because, according to Mendel's law, our wished for new sort **MUST** present itself already in the next generation, and, what is more, *must be pure and true to type in the seed of the following generations*. There will be no need of "breeding up the type" for a number of years, as heretofore.

The result of our cross: All tall and yellow-seeded, shows, that of the two opposing characters, tallness, has suppressed dwarfness and the yellow of the seed has suppressed the green. If we now sow these yellow seeds, (in the constitution of which the dispositions for dwarfness and for green are still present) then we will get $\frac{3}{4}$ tall and $\frac{1}{4}$ dwarf, also $\frac{3}{4}$ yellow-seeded and $\frac{1}{4}$ green-seeded. Among every sixteen of the plants there will be twelve tall and four dwarf and among the twelve tall ones, nine will be yellow-seeded and three green-seeded; among the four dwarfs we will have three with yellow and one with green seed.

This means that among each sixteen of the offspring there will appear without fail, one plant which is dwarf and has green seed—and this plant will again produce seed that comes true and so we have the sort we had been anxious to get: *Dwarf with green seed*.

While formerly, breeders, crossing at random, often had to wait years to get the expected results, it is now possible to realize a wanted object in the second generation with all the positiveness of success. One thing the breeder must always keep in mind, he must remember that the seeds which he gathers after crossing, may, and most always will look just alike, (in the above case, yellow), but internally they are not so. He must sow each of these seeds by itself.

Another example: Crossing the tomato "Fireball" red, with the yellow "Queen," gave in the first generation, fruit which resembled Fireball in color. This is easily explained by the predominancy of the red color. More aston-

POLYPODIUM GLAUCUM CRISTATUM.

This elegant new fern is well worthy of a place in every collection. It is entirely distinct and grows into a fine specimen plant, with fronds about 2 ft.

ishing is the result in the second generation. Here are two new colors, beside the red and the yellow we find crimson and orange. How comes this about? We can explain it if we take into account the fact that the red of the Fireball is a combination of yellow in the skin and the red of the meat of Fireball, while the Queen looks yellow, because its skin is without color and the yellow meat shows through it. So here is "mendeling" of two characters: First, of the *red* and of the yellow color of the meat, second, of the *yellow* and of the colorless skin. Because the first mentioned characters suppressed the others there could be, in the first generation, no other fruit than: with yellow skin and red meat, all resembling Fireball. Of *external resemblance* but *interiorly different*, because, in each fruit, two characters have been suppressed: the colorless-transparent skin and the yellow meat of the Queen. But already in the next generation the suppressed characters come again. For, when in fertilization, the different characters contained in the gametes meet each other and form all of the possible sixteen combinations, then there must be also such of those, in which the predominant characters are not present and where the suppressed characters have a chance to show themselves.

This is why in crossing the two sorts of tomatoes, two new sorts appear in the second generation—of course as pure and impure specimens. Understanding this, then it is easy to separate the pure and the impure, after having sowed the seeds separately. The above mentioned facts were not understood before Mendel's law had been discovered and breeders would waste years and years trying to get a new sort and then getting it true to

high. The fronds are glaucous metallic blue in color and as the picture shows, the edges of the pinnae are gracefully waved and crisped.

seed, while that very sort always existed already in the second generation. But not realizing that the first bastards look alike, *externally*, but are of different dispositions, *internally*, breeders would cross and recross the pure with the impure, unintentionally and unknowingly. If in the end the looked-for object did present itself, after the correct combination had been accidentally stumbled upon then the breeder would claim the credit for "having spent years in breeding up to type."

One of the most beautiful examples, where "mendeling" takes place in two pairs of characters at the same time, has been shown by Correns, with corn. This case is so much more interesting because it shows that it is not necessary to wait for the new plants at all; the proof of "mendeling" can in this instance be seen in the seed on the ear of corn.

Crossing a blue corn with a yellow gives at once an ear of all blue kernels. This is because blue predominates and at fertilization alters the substance of nutrition (the endosperm). This is *one* character. (Nawashin and Guignard have demonstrated the above fact.) But in crossing Zea Mays coeruleo dulcis, which has blue wrinkled kernels with Zea alba, which has white smooth kernels, we get in the first generation, ears with all the kernels smooth and blue. These are impure of course and, crossed among themselves, bring in the second generation ears with kernels among each sixteen of which we find $\frac{3}{4}$ blue and $\frac{1}{4}$ white—that is twelve blue and four white, but also $\frac{3}{4}$ smooth and $\frac{1}{4}$ wrinkled, a total of nine blue-smooth, three white-smooth, three blue-wrinkled and one white-wrinkled. This is a beautiful, practical demonstration of

Mendel's law, the theory of which would call for just this result.

Crossing parents which are different in three characters each, makes the thing more complicated still, as the three pairs of character dispositions form eight different sorts of germ cells and these, crossed among themselves, extend the number of possibilities to 64. Among the offsprings of any such crossings, there will naturally be many sorts which would be classed as novelties. Self-evidently they are not really *new* animals or plants; they represent only new arrangement or grouping of characters which had existed before. The breeder can not produce any animal or plant which is really new; he can only combine or rearrange certain observed and differing characteristics and qualities, so that they will reappear in the offspring in such combinations as to meet his desires and expectations. Working in accordance with Mendel's law, he can moreover establish the permanency of many sorts in the shortest time. Any seed or plant catalog will convince us that no new plants are ever produced. In all these highly praised new creations we only find a monotonous repetition of well-known characters and qualities, combined in a way not before seen.

(To be continued.)

FEDERAL NURSERY INSPECTION BILL.

Representative Jas. S. Simmons, of Niagara Falls, N. Y., has introduced in Congress a bill "to regulate the importation and interstate transportation of nursery stock, to enable the Secretary of Agriculture to establish and maintain quarantine districts for plant diseases and insect pests, to permit and regulate the movement of fruits, plants, and vegetables therefrom, and for other purposes."

This bill forbids anyone to import or offer for entry into the United States from any foreign country any nursery stock unless and until a permit shall have been issued therefor by the Secretary of Agriculture, and unless such nursery stock shall be accompanied by a certificate of inspection from the proper official of the country from which the importation is made to the effect that the stock has been inspected and found free from injurious plant diseases and insect pests.

Section 7 authorizes the Secretary of Agriculture and directs him to quarantine any state or territory of the District of Columbia, or any portion of them, when he shall determine that a dangerous plant disease or insect infestation exists there, and to give notice of such quarantine to common carriers passing through such quarantined areas, and to publish in such newspapers in the infested areas as he may select notice of the establishment of quarantine, and it is forbidden to ship or offer for shipment goods from the quarantined areas into any other states or territories except in manner prescribed by the Secretary of Agriculture.

Nursery stock is defined as including field grown florists' stock, trees, shrubs, plants, vines, cuttings, grafts, scions, buds, fruit pits, or seeds of fruit, and ornamental trees or shrubs.

THE PAEONY.

A Paper read before the Gardeners' and Florists' Club of Boston by E. J. Shaylor.

This is to be just a little talk to the gardeners of this club on growing paeonies and to the florists on some of the good varieties to grow for cutting blooms. It is to be a plain talk among ourselves on a few things I have run up against in my work. In ten years of careful labor in growing paeonies, there has been gained some interesting knowledge, and I will try to tell you about it in a plain unvarnished way.

The Paeony's Medicinal Virtues.

The paeony is a native of cold countries mostly, and is hardy. The ancients used both the roots and the seeds in a medicinal way. It is related that in the Trojan war one Paeon used the roots to heal the sick and the wounded. His name was spelled Pa-e-o-n, and from him the name was derived. It was done to perpetuate his name for his success. In my childhood about sixty years ago, I remember vaguely that some of our neighbors obtained some roots to be steeped for medicine, so its use for such purposes came nearly down to the present. The roots dried were worn also about the neck to ward off disease. The seeds were taken inwardly to shoo away the nightmare. We all know a head gardener of Wellesley who having a workman complaining of malaria took from his pocket some paeony seeds, and handing them to him in a joking way said, "Here, Tim, here are some pills; try them and maybe they will help you." Sure enough Tim took them regularly for a few days, until the head gardener thought the joke had gone far enough, and then he asked him how he was. Tim said he was better and gave the pills credit. Then the head gardener told him what they were. To the ancients it was dead earnest and no joke. They were cured no doubt by faith—a thing which in our day has been capitalized as a huge dividend-paying religion.

Planting and Soil.

The planting of paeonies should be done with care. It is not enough to simply dig a hole and put them in. Trench the ground deep and work in old manure. It does good to mix in some bone meal or wood ashes or a potato fertilizer strong in potash. The most successful field planting I ever made was done in this way. The patch was new ground which had been grubbed over in summer. In September, furrows were dug the depth of 12 or 14 inches and the loam piled along the row in a ridge. In the bottom of the trench old manure was put in and chopped into the soil with the spade. On the ridge of loam that lay along the trench we scattered some air-slacked lime and some potato fertilizer. As the roots were set this loam was filled in, and that mixed the lime and the fertilizer well with the soil. The next spring when the plants were just coming up, bone meal was scattered along one side of the row, and some of the same kind of potato fertilizer along the other side, and these were cultivated in with a wheel hand cultivator. This planting gave the best results, both

in blooms and roots that I ever grew. Never use any fresh manure. One year I made a mistake and set some rows of paeonies so that the rows ran through the place where a pile of manure had lain for six months. They were set in the fall. The next spring I noticed at once that the paeonies where the manure pile had lain were in trouble. I took them up and scrubbed them off in a tub of water. The strong soil was eating them up. They were set out in another place and I saved most of them. I have no doubt that if they had been left where they were, they would all have been lost. Be sure that your place drains good. If soil sours or becomes soggy, goodbye to your roots. I don't know why, only I know that it will either kill them outright or make them worthless. After they are set out good—don't forget that you must agitate the hoe about them quite often.

Insects.

Insects trouble them some. The cut worm likes them for breakfast, dinner and supper, and for lunch between meals. I have had letters asking "What shall I do to keep the ants off the Paeony beds?" My answer is "Nothing." The sap that is in the stalk is like a sweet syrup and it exudes at the top. The ants only drink that. I presume the stalk being sweet is why the cut worm is so partial to them. The rose bug comes about the time paeonies are ending and they eat the petals of the blooms. Generally paeonies are over before they come in numbers sufficient to do much harm.

Diseases.

Paeonies have been considered as IRON CLAD, but my experience is that they have their chills same as I do. The black rot gets in and eats away the roots. Air-slacked lime is the best remedy I have found. Dig away the loam and put some in and put back fresh loam. If you can move them to a new place, then cut the rot away and dust the roots with lime and reset. I think this is caused some by their being set in all shade, and dampness does it. If your place is shady, then set the roots four feet apart so the air can circulate freely about them. I do not recommend to set paeonies in all shade—they should have half sun any way. There is also the club foot or knotty root which affects paeony roots. I have not been able to master this. Roots have been sent to Prof. Bessee, Miami, Florida, one of the best government experts, to Amherst in our own state, and to Prof. Whitzel at Cornell, and I have not had any help from any of them. Prof. Bessee advised soaking the roots in a solution of formalin. This I did but it did not help me any. I wrote A. Dessert, and he said he had some of those affected roots from the same source which mine came from, "since ten years and they had never bloomed," and he considered them lost. I got out of patience with mine and after keeping them five years I threw most of them in the dump. I am not sure but there is a blight that hits the leaf and stem and causes the root to rot, something in the nature of the potato blight. Some few roots seem to be affected in this way. I have never been troubled

PHALAENOPSIS RIMESTADIANA.

This is one of the richest and most impressive of the Phalaenopses. It is listed by Roehrs, who grows it in quantity, as a geographical form of *P.*

amabilis, from Java, flowers pure white and much larger than amabilis. It is a spring bloomer and a house of it in flower is a sight not to be for-

gotten. In the cut flower market there is almost no limit to the uses and demand for pure white orchid blooms and this Phalaenopsis has few rivals.

with it only in a small way, and have paid no attention to it. It could no doubt be controlled by spraying with Bordeaux mixture. Where the buds blight, it is well to cut them off and burn them up. The stem wilt is a fungus blight, but it does not live over winter. Plants affected one year may be unaffected the next.

Paeonies which are called Japanese paeonies, or Imperial paeonies by the Englishmen, have their ups and downs. They seem to go all to pieces some years and do nothing at all for a year or two. They do not seem to be of good constitution. These kind of paeonies grown from seed here in America may be more vigorous. There are some other of the regular paeony roots which go to pieces also when they are divided. They are weak. Most of Richardson's seedlings do not recover after division for three or four years. I only have a few of these varieties that I can count on for sure. These are Harry Woodward or Grandiflora as I think it was originally named—*Rubra Superba*—and Milton Hill. All my English Imperial paeonies went to pieces after division, and lots of the others.

Cutting the Flowers.

There are many positions in which paeonies can be planted to be effective. Their blooms are large and their colors carry well long distances. As hedges, I would use solid colors. For borders and beds use mixed colors. Borders and beds are best used where one wants to cut flowers for the indoor rooms. The sun fades the flowers out very quickly. The most chaste and delicate colors will

change in a forenoon in the sun. To get these fresh and delicate colors for your vases indoors, I advise cutting when the buds are only half-open and putting down cellar—then when they are brought up they will quickly open retaining all their beautiful colors and fragrance.

Raising From Seed.

To grow from seed is interesting. Gather the seed as the pods open in August and September, and sow the seed at once. I sow in drills about as you would peas. Some come up the first year—some in two years and some not until three years after planting. After they have grown a year in these rows I transplant and give room to leave them in one place until they bloom so you can see which ones to try out. These are taken out and put into the trial grounds where they will not have to be moved for three or four years. No one can tell what a paeony will amount to until it has been set about three years and got established. The first blooms will be imperfect. Sometimes they will be single but show signs of coming double. The stamens will be turning to petals and next year they may become doubles. One writer says they wobble—but this is only true in that the form changes. The color is the same at the very start. Don't name them when they first bloom. Try them out three or four years first. You cannot grow paeonies from seed with any satisfactory success unless you are possessed with lots of patience.

Good Varieties for Cutting.

Now a word to the florists. There

are about a half dozen whites on which you can count for money making blooms. They will give you blooms that are choice and will always go when any paeonies go. *Festiva Maxima*, *Mme. de Verneville*, *Baroness Schroeder*, *Marie Lemoine*, *Eugenie Verdier* and *Harry Woodward*. These run early, medium, late and very late. There are lots of pinks. The first pinks for me with flowers for weddings come from *Umbelotta Rosea* or *Sarah Bernhardt* (Dessert) as it was first called; *Edithe Lyttleton* and *Polyphemus*. These were all two days ahead of *Edulis Superba*,—in fact they were the first flowers in all the grounds for sale. I could not give a list of all the pinks which would be good for florists' use. There are many and all shades. In reds or crimsons there is not much to choose from. To get best blooms, disbud. Some only set the terminal, others many buds. In cutting paeonies, it is best not to cut more than half the foliage away. I mean if a clump has twenty stalks and all the stalks have blooms, I would not cut more than ten stalks. Do not cut the stems down close. Leave at least one leaf stem on the stalk. It is really better to leave two where you can. Some have ruined their roots by cutting all the stalks and also cutting close. That is the way to kill anything by cutting it down when in full leaf. It is of more importance to keep your roots vigorous and growing than to sell everything out one year and ruining your roots. If your customers insist on long stems or nothing, then sell them the clumps, by charging what they

MEMORIAL DAY

Biggest Day in the Year for the Florist who Is Alert and Enterprising

We cater to that sort of trade and have made all preparations so that we are again ready for you as in the years past.

WHATEVER YOU WANT WE CAN SUPPLY IF YOU ORDER IN TIME

In Cut Flowers our stock will be the biggest and best in New England. In Greens, Ferns, etc., we recognize no competition as to quality and quantity. In All Supply Lines our stock is up-to-date, orders are promptly and accurately filled, and you can rely upon receiving

GOODS THAT WILL SELL
